

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

A CRITICAL

PRONOUNCING DICTIONARY

Catharine Storerell. 1796.

AND EXPOSITOR OF THE

ENGLISH LANGUAGE.

IN WHICH

Not only the Meaning of every Word is clearly explained, and the Sound of every Syllable distinctly shown, but where Words are subject to different Pronunciations, the Reasons for each are at large displayed; and the preferable Pronunciation is pointed out.

TO WHICH ARE PREFIXED,

PRINCIPLES OF ENGLISH PRONUNCIATION;

IN WHICH

The Sounds of Letters, Syllables, and Words, are critically investigated, and systematically arranged; the Rules for Pronouncing are so classed and disposed as to be easily applicable to the most difficult Words; and the Analogies of the Language are so fully shown as to lay the Foundation of a consistent and rational Pronunciation.

P R E F A C E.

FEW subjects have of late years more employed the pens of every class of critics, than the improvement of the English language. The greatest abilities in the nation have been exerted in cultivating and reforming it; nor have a thousand minor critics been wanting to add their mite of amendment to their native tongue. Johnson, whose large mind and just taste made him capable of enriching and adorning the language with original composition, has condescended to the drudgery of disentangling, explaining, and arranging it, and left a lasting monument of his ability, labour, and patience: and Dr. Lowth, the politest scholar of the age, has veiled his superiority in his short Introduction to English Grammar. The ponderous folio has gravely vindicated the rights of analogy; and the light ephemeral sheet of news has corrected errors in Grammar, as well as Politics, by slyly marking them in italics.

Nor has the improvement stopped here. While Johnson and Lowth have been insensibly operating on the orthography and construction of our language, its pronunciation has not been neglected. The importance of a consistent and regular pronunciation was too obvious to be overlooked; and the want of this consistency and regularity induced several ingenious men to endeavour at a reformation; who, by exhibiting the anomalies of pronunciation, and pointing out its analogies, have reclaimed some words that were not irrecoverably fixed in a wrong sound, and prevented others from being perverted by ignorance or caprice.

Among those writers who deserve the first praise on this subject, is Mr. Elphinstone; who, in his Principles of the English Language, has reduced the chaos to a system, and laid the foundation of a just and regular pronunciation. But this gentleman, by treating his subject with an affected obscurity, and by absurdly endeavouring to alter the whole orthography of the language, has unfortunately lost his credit with the publick for that part of his labours which entitles him to the highest applause.

After him, Dr. Kenrick contributed a portion of improvement by his Rhetorical Dictionary; in which the words are divided into syllables as they are pronounced, and figures placed over the vowels to indicate their different sounds. But though this gentleman, in his Rhetorical Grammar prefixed to his Dictionary, has given several rational strictures on language in general, and the English language in particular, he has rendered his Dictionary extremely imperfect, by entirely omitting a great number of words of doubtful and difficult pronunciation—those very words for which a Dictionary of this kind would naturally be consulted.

To him succeeded Mr. Sheridan; who not only divided the words into syllables, and placed figures over the vowels as Dr. Kenrick had done; but by spelling these syllables as they are pronounced, seemed to complete the idea of a Pronouncing Dictionary, and to leave but little expectation of future improvement. It must, indeed, be confessed, that Mr. Sheridan's Dictionary is greatly superior to every thing that preceded it; and his method of conveying the sound of words, by spelling them as they are pronounced, is highly rational and useful—But here sincerity obliges me to stop. The numerous instances I have given of impropriety, inconsistency, and want of acquaintance with the analogies of the language, sufficiently show how imperfect * I think his Dictionary is upon the whole, and what ample room was left for attempting another that might better answer the purpose of a guide to pronunciation.

* See Principles, No. 110, 124, 126, 129, 454, 462, 479, 480, 530, and the words *Assume, Celler, Covetous, Dis, Donative, Ephemera, Satiety.*

The last writer on this subject is Mr. Nares ; who, in his *Elements of Orthœpy*, has shewn a clearness of method and an extent of observation which deserve the highest encomiums. His preface alone proves him an elegant writer, as well as a philosophical observer of language ; and his alphabetical index, referring near five thousand words to the rules for pronouncing them, is a new and useful method of treating the subject ; but he seems, on many occasions, to have mistaken the best usage, and to have paid too little attention to the first principles of pronunciation.

Thus I have ventured to give my opinion of my rivals and competitors, and I hope without envy or self-conceit. Perhaps it would have been policy in me to have been silent on this head, for fear of putting the publick in mind that others have written on the subject as well as myself : but this is a narrow policy which, under the colour of tenderness to others, is calculated to raise ourselves at their expence. A writer, who is conscious he deserves the attention of the public, (and unless he is thus conscious he ought not to write) must not only wish to be compared with those who have gone before him, but will promote the comparison by informing his readers what others have done, and on what he founds his pretensions to a preference ; and if this be done with fairness and impartiality, it can be no more offensive to modesty, than it is to honesty and plain dealing.

The work I have to offer on the subject has, I hope, added something to the publick stock. It not only exhibits the principles of pronunciation, as others have done, divides the words into syllables, and marks the sounds of the vowels like Dr. Kenrick, spells the words as they are pronounced like Mr. Sheridan, and directs the inspector to the rule by the word like Mr. Nares ; but where words are subject to different pronunciations, it shows the reasons from analogy for each ; produces authorities for one side and the other, and points out the pronunciation which is preferable. In short, I have endeavoured to unite the science of Mr. Elphinstone, the method of Mr. Nares, and the general utility of Mr. Sheridan ; and to add to these advantages, have given critical observations on such words as are subject to a diversity of pronunciation. How I have succeeded must be left to the decision of the publick.

But to all works of this kind there lies a formidable objection ; which is, that the pronunciation of a language is necessarily indefinite and fugitive, and that all endeavours to delineate or settle it are in vain. Dr. Johnson, in his *Grammar* prefixed to his *Dictionary*, says : “ Most of the writers of English grammar have given long tables of words pronounced otherwise than they are written ; and seem not sufficiently to have considered, that, of English, as of all living tongues, there is a double pronunciation ; one, cursory and colloquial ; the other, regular and solemn. The cursory pronunciation is always vague and uncertain, being made different, in different mouths, by negligence, unskilfulness, or affectation. The solemn pronunciation, though by no means immutable and permanent, is yet always less remote from the orthography, and less liable to capricious innovation. They have, however, generally formed their tables according to the cursory speech of those with whom they happened to converse ; and concluding, that the whole nation combines to vitiate language in one manner, have often established the jargon of the lowest of the people as the model of speech. For pronunciation, the best general rule is, to consider those as the most elegant speakers who deviate least from the written words.”

Without any derogation from the character of Dr. Johnson, it may be asserted, that in these observations we do not perceive that justness and accuracy of thinking for which he is so remarkable. It would be doing great injustice to him to suppose, that he meant to exclude all possibility of conveying the actual pronunciation of many words that depart manifestly from their orthography, or of those that are written alike, and pronounced differently and inversely. He has marked these differences with great propriety himself in many places of his *Dictionary* ; and it is to be regretted that he did not extend these remarks farther. It is impossible, therefore, he could suppose, that, because the almost imperceptible glances of colloquial

colloquial pronunciation were not to be caught and described by the pen, that the very perceptible difference between the initial accented syllables of *money* and *monitor*, or the final unaccented syllables of *finite* and *infinite*, could not be sufficiently marked upon paper. Cannot we show that *cellar*, a vault ; and *seller*, one who sells, have exactly the same sound ; or that the monosyllable *full*, and the first syllable of *fulminate*, are sounded differently, because there are some words in which solemnity will authorize a different pronunciation from familiarity ? Besides ; that colloquial pronunciation which is perfect, is so much the language of solemn speaking, that, perhaps, there is no more difference than between the same picture painted to be viewed near and at a distance. The symmetry in both is exactly the same ; and the distinction lies only in the colouring. The English language, in this respect, seems to have a great superiority over the French ; which pronounces many letters in the poetic and solemn style that are wholly silent in the prosaic and familiar. But if a solemn and familiar pronunciation really exists in our language, is it not the business of a grammarian to mark both ? And if he cannot point out the precise sound of *unaccented* syllables, (for these only are liable to obscurity) he may, at least, give those sounds which approach the nearest ; and by this means approximate to the desired point, though he can never fully arrive at it.

The truth is, Dr. Johnson seems to have had a confused idea of the distinctness and indistinctness with which, on solemn or familiar occasions, we sometimes pronounce the *unaccented* vowels ; and with respect to these, it must be owned, that his remarks are not entirely without foundation. The English language, with respect to its pronunciation, is evidently divisible into accented and unaccented sounds. The accented syllables, by being pronounced with greater force than the unaccented, have their vowels as clearly and distinctly sounded as any given note in music ; while the unaccented vowels, for want of the stress, are apt to slide into an obscurity of sound, which, though sufficiently distinguishable to the ear, cannot be so definitely marked out to the eye by other sounds as those vowels that are under the accent. Thus some of the vowels, when neither under the accent, nor closed by a consonant, have a longer or a shorter, an opener or a closer sound, according to the solemnity or familiarity, the deliberation or rapidity of our delivery. This will be perceived in the sound of the *e* in *emotion* *, of the *o* in *obedience*, and of the *u* in *singular*. In the hasty pronunciation of common speaking, the *e* in *emotion* is often shortened, as if divided into *em-o-tion* ; the *o* in *obedience* is shortened and obscured, as if written *ub-be-di-ence* ; and the *u* in *singular*, changed into short *i*, as if written *sing-il-ar* ; while the deliberate and elegant sound of these vowels is the long open sound they have, when the accent is on them in *equal*, *over*, and *unit* ; but *a*, when unaccented, seems to have no such diversity ; it has generally a short obscure sound, whether ending a syllable, or closed by a consonant. Thus the *a* in *able* has its definite and distinct sound ; but the same letter in *tolerable* † goes into an obscure indefinite sound approaching to short *u* ; nor can any solemnity or deliberation give it the long open sound it has in the first word. Thus, by distinguishing vowels into their accented and unaccented sounds, we are enabled to see clearly what Dr. Johnson saw but obscurely ; and by this distinction entirely to obviate the objection.

Equally indefinite and uncertain is his general rule, that those are to be considered as the most elegant speakers who deviate least from the written words. It is certain, where custom is equal, this ought to take place ; and if the whole body of respectable English speakers were equally divided in their pronunciation of the word *busy*, one half pronouncing it *berw-ze* ‡, and the other half *biz-ze*, that the former ought to be accounted the most elegant speakers ; but till this is the case, the latter pronunciation, though a gross deviation from orthography, will still be esteemed the most elegant. Dr. Johnson's general rule, therefore, can only take place where custom has not plainly decided ; but unfortunately for

‡ *Principles*, No. 178,

the English language, its orthography and pronunciation are so widely different, that Dr. Watts and Dr. Jones lay it down as a maxim in their treatises on spelling, that all words, which can be sounded different ways, must be written according to that sound which is most distant from the true pronunciation; and consequently, in such a language, a Pronouncing Dictionary must be of essential use.

But still it may be objected to such an undertaking, that the fluctuation of pronunciation is so great as to render all attempts to settle it useless. What will it avail us, it may be said, to know the pronunciation of the present day, if, in a few years, it will be altered? and how are we to know even what the present pronunciation is, when the same words are often differently pronounced by different speakers, and those, perhaps, of equal numbers and reputation? To which it may be answered, that the fluctuation of our language, with respect to its pronunciation, seems to have been greatly exaggerated*. Except a very few single words, which are generally noticed in the following Dictionary, and the words where *e* comes before *r*, followed by another consonant, as *merchant*, *service*, &c. the pronunciation of the language is probably in the same state it was in a century ago; and had the same attention been then paid to it as now, it is not likely even that change would have happened. The same may be observed of those words which are differently pronounced by different speakers: if the analogies of the language were better understood, it is scarcely conceivable that so many words in polite usage would have a diversity of pronunciation, which is at once so ridiculous and embarrassing; nay, perhaps it may be with confidence asserted, that if the analogies of the language were sufficiently known, and so near at hand as to be applicable on inspection to every word, that not only many words which are wavering between contrary usages would be settled in their true sound, but that many words, which are fixed by custom to an improper pronunciation, would by degrees grow regular and analogical; and those which are so already would be secured in their purity, by a knowledge of their regularity and analogy.

* The old and new *Arctic*, with all the various dialects, must have occasioned infinite irregularity in the pronunciation of the Greek tongue; and if we may judge of the Latin pronunciation by the ancient inscriptions, it was little less various and irregular than the Greek. Aulus Gellius tells us, that Nigidius, a grammarian who lived a little more than a century before him, acuted the first syllable of *Valeri*; but says he, “ si quis nunc *Valerium* appellans in casu vocandi secundum id preceptum Nigidii acuerit “ primam, non aberit quin rideatur.”—Whoever now should place the accent on the first syllable of *Valerius*, when a vocative case, would set every body a-laughing. Even that highly-polished language the French, if we may believe a writer in the *Encyclopédie*, is little less irregular in this respect than our own.

Il est arrivé, says he, par les altérations qui se succèdent rapidement dans la manière de prononcer, & les corrections qui s'introduisent lentement dans la manière d'écrire, que la prononciation & l'écriture ne marchent point ensemble, & que quoiqu'il y ait chez les peuples les plus policés de l'Europe, des sociétés d'hommes de lettres chargés des les modérer, des les accorder, & de les rapprocher de la même ligne, elles se trouvent enfin à une distance inconcevable; enforte que de deux choses dont l'une n'a été imaginée dans son origine, que pour représenter fidèlement l'autre, celle-ci ne diffère guère moins de celle-là, que le portrait de la même personne peinte dans deux âges très éloignés. Enfin l'inconvénient s'est accru à un tel excès qu'on n'ose plus y remédier. On prononce une langue, on écrit une autre; & l'on s'accoutume tellement pendant le reste de la vie à cette bisarrerie qui a fait verser tant de larmes dans l'enfance, que si l'on renonçoit à sa mauvaise orthographe pour une plus voisine de la prononciation, on ne reconnoîtroit plus la langue parlée sous cette nouvelle combinaison de caractères. S'il y en a qui ne pourroient se succéder sans une grande fatigue pour l'organe, ou ils ne se rencontrent point, ou ils ne durent pas. Ils sont échappés de la langue par l'euphonie, cette loi puissante, qui agit continuellement & universellement sans égard pour l'étymologie & ses défenseurs, et qui tend sans intermission à amener des êtres qui ont les mêmes organes, le même idiome, les mêmes mouvements prescrits, à-peu-pres à la même prononciation. Les causes dont l'action n'est point interrompue, deviennent toujours les plus fortes avec les tems, quelque foibles qu'elles soient en elles-mêmes, & il n'y a presque pas une seule voyelle, une seule diphthongue, une seule consonne dont la valeur soit tellement constante, que l'euphonie n'en puisse disposer, soit en altérant le son, soit en le supprimant.

I shall not decide upon the justness of these complaints, but must observe, that a worse picture could scarcely be drawn of the English, or the most barbarous language of Europe. Indeed a degree of versatility seems involved in the very nature of language, and is one of those evils left by Providence for man to correct: a love of order, and the utility of regularity, will always incline him to confine this versatility within as narrow bounds as possible.

But

But the utility of a work of this kind is not confined to those parts of language where the impropriety is gross and palpable ; besides those imperfections in pronunciation, which disgust every ear not accustomed to them, there are a thousand insensible deviations, in the more minute parts of language, as the unaccented syllables may be called, which do not strike the ear so forcibly as to mark any direct impropriety in particular words, but occasion only such a general imperfection as gives a bad impression upon the whole. Speakers with these imperfections pass very well in common conversation ; but when they are required to pronounce with emphasis, and for that purpose to be more distinct and definite in their utterance, here their ear fails them ; they have been accustomed only to loose cursory speaking, and for want of a firmness of pronunciation are like those painters who draw the muscular exertions of the human body without any knowledge of anatomy. This is one reason, perhaps, why we find the elocution of so few people agreeable when they read or speak to an assembly, while so few offend us by their utterance in common conversation. A thousand faults lie concealed in a miniature, which a microscope brings to view ; and it is only by pronouncing on a larger scale, as publick speaking may be called, that we prove the propriety of our elocution. As, therefore, there are certain deviations from analogy which are not at any rate tolerable, there are others which only, as it were, tarnish the pronunciation, and make it less brilliant and agreeable. There are few who have turned their thoughts on this subject without observing, that they sometimes pronounce the same word or syllable in a different manner ; and as neither of these manners offend the ear, they are at a loss to which they shall give the preference ; but as one must necessarily be more agreeable to the analogy of the language than the other, a display of these analogies, in a Dictionary of this kind, will immediately remove this uncertainty ; and in this view of the variety we shall discover a fitness in one mode of speaking, which will give a firmness and security to our pronunciation, from a confidence that it is founded on reason, and the general tendency of the language.

But, alas ! reasoning on language, however well founded, may be all overturned by a single quotation from Horace :

ufus
Quem penes arbitrium est, & jus & norma loquendi.

This, it must be owned, is a succinct way of ending the controversy ; and by virtue of this argument we may become criticks in language without the trouble of studying it. Not that I would be thought, in the most distant manner, to deny, that Custom is the sovereign arbiter of language. Far from it. I acknowledge its authority, and know there is no appeal from it ; I wish only to dispute where this arbiter has not decided ; for if once Custom speaks out, however absurdly, I sincerely acquiesce in its sentence.

But what is this custom to which we must so implicitly submit ? Is it the usage of the greater part of speakers, whether good or bad ? This has never been asserted by the most sanguine abettors of its authority. Is it the majority of the studious in schools and colleges, with those of the learned professions, or of those who, from their elevated birth or station, give laws to the refinements and elegancies of a court ? To confine propriety to the latter, which is too often the case, seems an injury to the former ; who, from their very profession, appear to have a natural right to a share, at least, in the legislation of language, if not to an absolute sovereignty. The polished attendants on a throne are as apt to depart from simplicity in language as in dress and manners ; and novelty, instead of custom, is too often the *jus & norma loquendi* of a court.

Perhaps an attentive observation will lead us to conclude, that the usage, which ought to direct us, is neither of these we have been enumerating, taken singly, but a sort of compound ratio of all three. Neither a finical pronunciation of the court, nor a pedantic Græcism of the schools, will be denomi-

nated respectable usage, till a certain number of the general mass of speakers have acknowledged them ; nor will a multitude of common speakers authorise any pronunciation which is reprobated by the learned and polite.

As those sounds, therefore, which are the most generally received among the learned and polite, as well as the bulk of speakers, are the most legitimate, we may conclude that a majority of two of these states ought always to concur, in order to constitute what is called good usage.

But though custom, when general, is commonly well understood, there are several states and degrees of it which are exceedingly obscure and equivocal ; and the only method of knowing the extent of custom in these cases, seems to be an inspection of those Dictionaries which professedly treat of pronunciation. We have now so many works of this kind, that the general current of custom, with respect to the sound of words, may be collected from them with almost as much certainty as the general sense of words from Johnson. An exhibition of the opinions of Orthoëpists about the sound of words always appeared to me a very rational method of determining what is called custom. This method I have adopted in the following work ; and if I have sometimes dissented from the majority, it has been, either from a persuasion of being better informed of what was the actual custom of speaking, or from a partiality to the evident analogies of the language.

And here I must intreat the candid reader to make every reasonable allowance for the freedom with which I have criticised other writers on this subject, and particularly Mr. Sheridan. As a man, a gentleman, and a scholar, I knew Mr. Sheridan, and respected him ; and think every lover of elocution owes him a tribute of thanks for his unwearied addresses to the publick, to rouse them to the study of the delivery of their native tongue. But this tribute, however just, does not exempt him from examination. His credit with the world necessarily subjects him to animadversion, because the errors of such a writer are dangerous in proportion to his reputation : this has made me zealous to remark his inaccuracies, but not without giving my reasons ; nor have I ever taken advantage of such faults as may be called inadvertencies. On the same principles I have ventured to criticise Dr. Johnson*, whose friendship and advice I was honoured with, whose memory I love, and whose intellectual powers impress me with something like veneration and awe.—I do not pretend to be exempt from faults myself ; in a work like the present, it would be a miracle to escape them ; nor have I the least idea of deciding as a judge, in a case of so much delicacy and importance, as the pronunciation of a whole people ; I have only assumed the part of an advocate to plead the cause of consistency and analogy, and where custom is either silent or dubious, to tempt the lovers of their language to incline to the side of propriety ; so that my design is principally to give a kind of history of pronunciation, and a register of its present state ; and where the authorities of dictionaries or speakers are found to differ, to give such a display of the analogies of the language as may enable every inspector to decide for himself.

With respect to the explanation of words, except in very few instances, I have scrupulously followed Dr. Johnson. His Dictionary has been deemed lawful plunder by every subsequent Lexicographer ; and so servilely has it been copied, that such words as he must have omitted merely by mistake, as *Predilection*, *Respectable*, *Descriptive*, *Sulky*, *Mimetick*, *Isolated*, *Inimical*, *Decompose*, and many others, are neither in Mr. Sheridan's, Dr. Kenrick's, nor several other Dictionaries.

These and many others will, no doubt, be inserted by Mr. Croft in his future Dictionary ; which, if we may judge by the abilities and leisure of the writer, will be a most valuable present to the Republick of Letters.

* See Principles, No. 350, and the words *Skeptick*, *Schism*, *Scirrhus*, *Codde*, *Monomachy*, *Further*.

Rules to be observed by the Natives of IRELAND in order to obtain a just Pronunciation of English.

AS Mr. Sheridan was a native of Ireland, and had the best opportunities of understanding those peculiarities of pronunciation which obtain there, I shall extract his observations on that subject as the best general direction, and add a few of my own, by way of supplement, which I hope will render this article of instruction still more complete.

The reader will be pleased to take notice, that as I have made a different arrangement of the vowels, and have adopted a notation different from Mr. Sheridan, I am obliged to make use of different figures to mark the vowels, but still such as perfectly correspond to his.

" The chief mistakes made by the Irish in pronouncing English, lie for the most part in the sounds of the two first vowels, *a* and *e*; the former being generally sounded *â* by the Irish, as in the word *bâr*, in most words where it is pronounced *â*, as in *day*, by the English. Thus the Irish say, *pâtron*, *mâtron*, the vowel *â* having the same sound as in the word *fâther*; whilst the English pronounce them as if written *paytron*, *mâytron*. The following rule, strictly attended to, will rectify this mistake through the whole language.

" When the vowel *a* finishes a syllable, and has the accent on it, it is invariably pronounced *â* [day] by the English. To this rule there are but three exceptions in the whole language to be found in the words *fâther*, *papâ*, *mamâ*. The Irish may think also the word *rather* an exception, as well as *father*; and so it would appear to be in their manner of pronouncing it *râ-ther*, laying the accent on the vowel *a*; but in the English pronunciation the consonant *th* is taken into the first syllable, as thus, *rath'cr*, which makes the difference.

" Whenever a consonant follows the vowel *a* in the same syllable, and the accent is on the consonant, the vowel *a* has always its fourth sound, as *hât*, *mân*; as also the same sound lengthened when it precedes the letter *r*, as *fâr*, *bâr*, though the accent be on the vowel; as likewise when it precedes *lm*, as *bâlm*, *pâlm*. The Irish, ignorant of this latter exception, pronounce all words of that structure as if they were written *bawn*, *psawm*, *quawm*, *cawm*, &c. In the third sound of *a*, marked by different combinations of vowels, or consonants, such as *au*, in *Paul*; *aw*, in *law*; *all*, in *call*; *ald*, in *bald*; *alk*, in *talk*, &c. the Irish make no mistake, except in that of *lm*, as before mentioned.

" The second vowel, *e*, is for the most part sounded *ee* by the English, when the accent is upon it; whilst the Irish in most words give it the sound of slender *â*, as in *bate*. This sound of *é* [ee] is marked by different combinations of vowels, such as *ea*, *ei*, *e* final mute, *ee*, and *ie*. In the two last combinations of *ee* and *ie*, the Irish never mistake; such as in *meet*, *seem*, *field*, *believe*, &c.; but in all the others, they almost universally change the sound of *é* into *â*. Thus in the combination *ea*, they pronounce the words *tea*; *sea*, *please*, as if they were spelt *tay*, *say*, *plays*; instead of *tee*, *see*, *pleese*. The English constantly give this sound to *ea* whenever the accent is on the vowel *e*, except in the following words, *great*, a *pear*, a *bear*, to *bear*, to *forbear*, to *swear*, to *tear*, to *wear*. In all which the *e* has the sound of *â* in *hâte*. For want of knowing these exceptions, the gentlemen of Ireland, after some time of residence in London, are apt to fall into the general rule, and pronounce these words as if spelt *greet*, *beer*, *fwear*, &c.

" *Ei* is also sounded *ee* by the English, and as *â* by the Irish; thus the word *deceit*, *receive*, are pronounced by them as if written *desate*, *refaue*. *Ei* is always sounded *ee*, except when a *g* follows it, as in the words *reign*, *seign*, *deign*, &c. as also in the words *rein* (of a bridle), *rein-deer*, *vein*, *drein*, *veil*; *heir*, which are pronounced like *ruin*, *vain*, *drain*, *vail*, *air*.

" The final mute *e* makes the preceding *e* in the same syllable, when accented, have the sound of *ee*, as in the words *suprême*, *sincère*, *replète*. This rule is almost universally broken through by the Irish, who pronounce all such words as if written *supràme*, *sinàre*, *replâte*, &c. There are but two exceptions to this rule in the English pronunciation, which are the words *there*, *where*.

" In the way of marking this sound, by a double *e*, as thus *ee*, as the Irish never make any mistakes, the best method for all who want to acquire the right pronunciation of these several combinations is, to suppose that *ea*, *ei*, and *e* attended by a final mute *e*, are all spelt with a double *e*, or *ee*.

" *Ey* is always sounded like *â* by the English, when the accent is upon it; as in the words *prey*, *convey*, pronounced *pray*, *conway*. To this there are but two exceptions, in the words *key* and *lèy*, sounded *kee*, *lee*. The Irish, in

“ attempting to pronounce like the English, often give the same sound to *ey*, as usually belongs to *ei*; thus for *prey*, convey, they say *pres*, *convee*.

“ A strict observation of these few rules, with a due attention to the very few exceptions enumerated above, will enable the well-educated natives of Ireland to pronounce their words exactly in the same way as the more polished part of the inhabitants of England do, so far as the vowels are concerned. The diphthongs they commit no fault in, except in the sound of *i*, which has been already taken notice of in the Grammar*: where, likewise, the only difference in pronouncing any of the consonants has been pointed out; which is, the thickening the sounds of *d* and *t*, in certain situations; and an easy method proposed of correcting this habit†.

“ In order to complete the whole, I shall now give a list of such detached words, that do not come under any of the above rules, as are pronounced differently in Ireland from what they are in England.

“ These, after the closest attention, are all the words, not included in the rules before laid down, that I have been able to collect, in which the well-educated natives of Ireland differ from those of England.”

I shall make no observations on the accuracy of this list, but desire my reader to observe, that the strongest characteristics of the pronunciation of Ireland is the rough jarring pronunciation of the letter *R*, and the aspiration or rough breathing before all the accented vowels. For the true sound of *R*, see that letter in the Principles, No. 419. And for the rough breathing or aspiration of the vowels, the pupil should be told not to bring the voice suddenly from the breast, but to speak, as it were, from the mouth only.

* “ Vide p. 11, where the true manner of pronouncing the diphthong *i* is pointed out; the Irish pronouncing it much in the same manner as the French.

† “ The letter *d* has always the same sound by those who pronounce English well; but the Provincials, particularly the Irish, Scotch, and Welsh, in many words thicken the sound by a mixture of breath. Thus though they sound the *d* right in the positive *loud* and *broad*, in the comparative degree they thicken it by an aspiration, and sound it as if it were written *loudher*, *broadher*. This vicious pronunciation is produced by pushing the tongue forward so as to touch the teeth in forming that sound; and the way to cure it is easy; for as they can pronounce the *d* properly in the word *loud*, let them rest a little upon that syllable, keeping the tongue in the position of forming *d*, and then let them separate it from the upper gum without pushing it forward, and the sound *der* will be produced of course: for the organ being left in the position of sounding *d* at the end of the syllable *loud*, is necessarily in the position of forming the same *d* in uttering the last syllable, unless it makes a new movement, as in the case of protruding it so as to touch the teeth. This letter is sometimes, though not often, quiescent, as in the words *handkerchief*, *handsome*, *handfel*.

“ In pronouncing the letter *t* the Irish and other provincials thicken the sound as was before mentioned with regard to the *d*; for *better*, they say *betther*; for *utter*, *utther*, and so on in all words of that structure. This faulty manner arises from the same cause that was mentioned as affecting the sound of the *d*; I mean the protruding of the tongue so as to touch the teeth; and is curable only in the same way.”

It may be observed too, that the natives of Ireland pronounce *rm* at the end of a word so distinctly as to form two separate syllables. Thus *storm* and *farm* seem sounded by them as if written *stow-rum*, *fa-rum*; while the English found the *r* so soft and so close to the *m*, that it seems pronounced nearly as if written *stawm*, *faam*.

Nearly the same observations are applicable to *lm*. When these letters end a word they are, in Ireland, pronounced at such a distance, that *belm* and *realm* sound as if written *bel-um* and *real-um*; but in England the *l* and *m* are pronounced as close as possible, and so as to form but one syllable. To remedy this, it will be necessary for the pupil to make a collection of words terminating with these consonants, and to practise them over till a true pronunciation is acquired.

Rules to be observed by the Natives of SCOTLAND for attaining a just Pronunciation of English.

THAT pronunciation which distinguishes the inhabitants of Scotland is of a very different kind from that of Ireland, and may be divided into the quantity, quality, and accentuation, of the vowels. With respect to quantity, it may be observed, that the Scotch pronounce almost all their accented vowels long. Thus, if I am not mistaken, they would pronounce *habit*, *bay-bit*; *tepid*, *tee-pid*; *sinner*, *see-ner*; *conscious*, *cone-shus*; and *subject*, *soob-ject*: it is not pretended, however, that every accented vowel is so pronounced, but that such a pronunciation is very general, and particularly of the *i*. This vowel is short in English pronunciation where the other vowels are long; thus *evasion*, *adhesion*, *emotion*, *confusion*, have the *a*, *e*, *o*, and *u*, long; and in these instances the Scotch would pronounce them like the English; but in *vision*, *decision*, &c. where the English pronounce the *i* short, the Scotch lengthen this letter by pronouncing it like *ee*, as if the words were written *vee-sion*, *decee-sion*, &c. and this peculiarity is universal. The best way, therefore, to correct this, will be to make a collection of the most usual words which have the vowels short, and to pronounce them daily till a habit is formed.

With respect to the quality of the vowels, it may be observed, that the inhabitants of Scotland are apt to pronounce the *a* like *aw*, where the English give it the slender sound: thus *Satan* is pronounced *Sawtan*, and *fatal*, *fawtal*. It may be remarked too, that the Scotch give this sound to the *a* preceded by *w*, according to the general rule, without attending to the exceptions. Principles, No. 88; and thus, instead of making *wax*, *waft*, and *twang*, rhyme with *tax*, *spast*, and *hang*, they pronounce them so as to rhyme with *box*, *soft* and *song*. The short *e* in *bed*, *fed*, *red*, &c. borders too much upon the English sound of *a* in *bad*, *lad*, *mad*, &c. and the short *i* in *bid*, *lid*, *rid*, too much on the English sound of *e* in *bed*, *led*, *red*. To correct this error, it would be useful to collect the long and short sounds of these vowels, and to pronounce the long ones first, and to shorten them by degrees till they are perfectly short; at the same time preserving the radical sound of the vowel in both. Thus the correspondent long sounds to the *e* in *bed*, *fed*, *red*, are *bade*, *fade*, *rade*, and that of the short *i* in *bid*, *lid*, *rid*, are *bead*, *lead*, *reed*; and the former of these classes will naturally lead the ear to the true sound of the latter, the only difference lying in the quantity. The short *o* in *not*, *lodge*, *got*, &c. is apt to slide into the short *u*, as if the words were written *nut*, *ludge*, *gut*, &c. To rectify this, it should be remembered, that this *o* is the short sound of *aw*, and ought to have the radical sound of the deep *a* in *ball*. Thus the radical sound corresponding to the *o* in *not*, *cot*, *got*, is found in *naught*, *crught*, *sought*, &c. and these long sounds, like the former, should be abbreviated into the short ones. But what will tend greatly to clear the difficulty will be, to remember that only those words which are collected in the Principles, No. 165, have the *o* sounded like short *u* when the accent is upon it: and with respect to *u*, it may be observed, that the pronunciation peculiar to the English is only found in the words enumerated, Principles, No. 174.

In addition to what has been said, it may be observed, that *oo* in *food*, *mood*, *moon*, *soon*, &c. which ought always to have a long sound, is generally shortened in Scotland to that middle sound of the *u* in *bull*; and it must be remembered, that *wool*, *wood*, *good*, *hood*, *food*, *foot*, are the only words where this sound of *oo* ought to take place.

The accentuation, both in Scotland and Ireland, (if by accentuation we mean the stress, and not the kind of stress) is so much the same as that of England, that I can scarcely recollect any words in which they differ. Indeed, if it were not so, the versification of each country would be different: for as English verse is formed by accent or stress, if this accent or stress were upon different syllables in different countries, what is verse in England would not be verse in Scotland or Ireland; and this sufficiently shows how very indefinitely the word accent is generally used.

But besides the mispronunciation of single words, there is a tone of voice with which these words are accompanied, that distinguishes a native of Ireland or Scotland as much as an improper sound of the letters. This is vulgarly, and, if it does not mean stress only, but the kind of stress, I think, not improperly called the accent *. For though there is an asperity in the Irish dialect, and a drawl in the Scotch, independent of the slides or inflexions they make use of, yet it may with confidence be affirmed, that much of the peculiarity which distinguishes these dialects may be reduced to a predominant use of one of these slides. Let any one who has sufficiently studied the speaking voice to distinguish the slides, observe the pronunciation of an Irishman and a Scotchman, who have much of the dialect of their country, and he will find that the former abounds with the falling, and the latter with the rising inflexion †; and if this is the case, a teacher, if he understands these slides, ought to direct his instruction so as to remedy the imperfection. But as avoiding the wrong, and seizing the right at the same instant, is, perhaps, too great a task for human powers, I would advise a native of Ireland, who has much of the accent, to pronounce almost all his words, and end all his sentences with the rising slide; and a Scotchman in the same manner, to use the falling inflexion: this will, in some measure, counteract the natural propensity, and bids fairer for bringing the pupil to that nearly equal mixture of both slides which distinguishes the English speaker, than endeavouring at first to catch the agreeable variety. For this purpose the teacher ought to pronounce all the single words in the lesson with the falling inflexion to a Scotchman, and with the rising to an Irishman; and should frequently give the pauses in a sentence the same inflexions to each of these pupils, where he would vary them to a native of England. But while the human voice remains unstudied, there is little expectation that this distinction of the slides should be applied to these useful purposes.

Besides a peculiarity of inflexion, which I take to be a falling circumflex, directly opposite to that of the Scotch, the Welch pronounce the sharp consonants and aspirations instead of the flat. (See Principles, No. 29, 41.) Thus for *big* they say *pick*; for *blood*, *plood*; and for *good*, *coot*. Instead of *virtue* and *vice*, they say *firtue* and *fice*; instead of *zeal* and *praise*, they say *seal* and *prace*; instead of *these* and *those*, they say *thece* and *thoce*: and instead of *azure* and *offer*, they say *aysher* and *offer*; and for *jail*, *chail*. Thus there are nine distinct consonant sounds which, to the Welch, are entirely useless. To speak with propriety, therefore, the Welch ought for some time to pronounce the flat consonants and aspirations only; that is, they ought not only to pronounce them where the letters require the flat sound, but even where they require the sharp sound; this will be the best way to acquire a habit; and when this is once done, a distinction will be easily made, and a just pronunciation more readily acquired.

There is scarcely any part of England remote from the capital where a different system of pronunciation does not prevail. As in Wales they pronounce the sharp consonants for the flat, so in Somersetshire they pronounce many of the flat instead of the sharp. Thus for *Somerſetſhire*, they say *Zomerzetſhire*; for *father*, *vather*; for *think*, *think*; and for *sure*, *zhure* ‡.

There are dialects peculiar to Cornwall, Lancashire, Yorkshire, and every distant county in England; but as a consideration of these would lead to a detail too minute for the present occasion, I shall conclude these remarks with a few observations on the peculiarities of my countrymen, the Cockneys; who, as they are the models of pronunciation to the distant provinces, ought to be the more scrupulously correct.

FIRST FAULT OF THE LONDONERS.—*Pronouncing s indistinctly after ſt.*

The letter *s* after *ſt*, from the very difficulty of its pronunciation, is often sounded inarticulately. The inhabitants of London, of the lower order, cut the knot, and pronounce it in a distinct syllable, as if *e* were before it; but this is to be avoided as the greatest blemish in speaking: the three last letters in *poſts*, *fiſts*, *miſts*, &c. must all be distinctly heard in one syllable, and without permitting the letters to coalesce. For the acquiring of this sound, it will be proper to select nouns that end in *ſt* or *ſte*; to form them into plurals, and pronounce them forcibly and distinctly every day. The same may be observed of the third person of verbs ending in *ſts* or *ſtes*, as *perjiſts*, *waſtes*, *haſtes*, &c.

For this purpose, the *Rhyming Dictionary*, where all the words are arranged according to their terminations, will be found peculiarly useful.

SECOND FAULT.—*Pronouncing w for v, and inverſely.*

The pronunciation of *v* for *w*, and more frequently of *w* for *v*, among the inhabitants of London, and those not always

* See this more fully exemplified in *Elements of Elocution*, vol. II. p. 13.

† Or rather the rising circumflex. For an explanation of this inflexion, see *Melody of Speaking Delineated*, page 16.

‡ See *Change*.

of the lower order, is a blemish of the first magnitude. The difficulty of remedying this defect is the greater, as the cure of one of these mistakes has a tendency to promote the other.

Thus, if you are very careful to make a pupil pronounce *veal* and *vinegar*, not as if written *weal* and *winegar*, you will find him very apt to pronounce *wine* and *wind*, as if written *vine* and *vind*. The only method of rectifying this habit seems to be this: Let the pupil select from a dictionary, not only all the words that begin with *v*, but as many as he can of those that have this letter in any other part. Let him be told to bite his under lip while he is sounding the *v* in those words, and to practise this every day till he pronounces the *v* properly at first sight: then, and not till then, let him pursue the same method with the *w*; which he must be directed to pronounce by a pouting out of the lips without suffering them to touch the teeth. Thus, by giving all the attention to only one of these letters at a time, and fixing by habit the true sound of that, we shall at last find both of them reduced to their proper pronunciation in a shorter time than by endeavouring to rectify them both at once.

THIRD FAULT.—*Not sounding h after w.*

The aspirate *h* is often sunk, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *were*, &c. The best method to rectify this is, to collect all the words of this description from a dictionary, and write them down; and instead of the *wh* to begin them with *hoo* in a distinct syllable, and so to pronounce them. Thus let *while* be written and sounded *hoo-ile*; *whet*, *hoo-et*; *where*, *hoo-are*; *whip*, *hoo-ip*, &c. This is no more, as Dr. Lowth observes, than placing the aspirate in its true position before the *w*, as it is in the Saxon, which the words come from; where we may observe, that though we have altered the orthography of our ancestors, we have still preserved their pronunciation.

FOURTH FAULT.—*Not sounding h where it ought to be sounded, and inversely.*

A still worse habit than the last prevails, chiefly among the people of London, that of sinking the *h* at the beginning of words where it ought to be sounded, and of sounding it, either where it is not seen, or where it ought to be sunk. Thus we not unfrequently hear, especially among children, *heart* pronounced *art*, and *arm*, *harm*. This is a vice perfectly similar to that of pronouncing the *v* for the *w*, and the *w* for the *v*, and requires a similar method to correct it.

As there are so very few words in the language where the initial *h* is sunk, we may select these from the rest, and, without setting the pupil right when he mispronounces these, or when he prefixes the *h* improperly to other words, we may make him pronounce all the words where *h* is sounded, till he has almost forgot there are any words pronounced otherwise. Then he may go over those words to which he improperly prefixes the *h*, and those where the *h* is seen but not sounded, without any danger of an interchange. As these latter words are but few, I shall subjoin a catalogue of them for the use of the learner. *Heir, heiress, herb, herbage, honest, honesty, honestly, honour, honorable, honorably, hospital, hostler, hour, hourly, humble, humbly, humbles, humour, humourist, humorous, humourously, humourfome*. Where we may observe, that *humour* and its compounds not only sink the *h*, but sound the *u* like the pronoun *you*, or the noun *yew*, as if written *yewmour, yewmorous*, &c.

Thus I have endeavoured to correct some of the more glaring errors of my countrymen; who, with all their faults, are still upon the whole the best pronouncers of the English language. For though the pronunciation of London is certainly erroneous in many words, yet, upon being compared with that of any other place, it is undoubtedly the best; that is, not only the best by courtesy, and because it happens to be the pronunciation of the capital, but best by a better title; that of being more generally received: or, in other words, though the people of London are erroneous in the pronunciation of many words, the inhabitants of every other place are erroneous in many more. Nay, harsh as the sentence may seem, those at a considerable distance from the capital do not only mispronounce many words taken separately, but they scarcely pronounce with purity a single word, syllable, or letter. Thus, if the short sound of the letter *u* in *trunk, sunk*, &c. differ from the sound of that letter in the northern parts of England, where they sound it like the *u* in *bull*, and nearly as if the words were written *troonk, soonk*, &c. it necessarily follows that every word where that letter occurs must by those provincials be mispronounced.

Perhaps I cannot conclude these observations better than by quoting a passage from Dr. Campbell's *Philosophy of Rhetorick*, where what is called *national*, or general use in language, is treated with the greatest depth, clearness, and vivacity. To which I would premise, that what he observes with respect to England as distinct from the provinces, may, with very few exceptions, be applied to London—the centre of them all.

“In every province there are peculiarities of dialect, which affect not only the pronunciation and the accent, but even
“the

“ the inflection and the combination of words, whereby their idiom is distinguished from that of the nation, and from that of every other province. The narrowness of the circle to which the currency of the words and phrases of such dialects is confined, sufficiently discriminates them from that which is properly styled the language, and which commands a circulation incomparably wider. This is one reason, I imagine, why the term *use* on this subject is commonly accompanied with the epithet *general*. In the generality of provincial idioms there is, it must be acknowledged, a pretty considerable concurrence both of the middle and of the lower ranks. But still this use is bounded by the province, county, or district, which gives name to the dialect, and beyond which its peculiarities are sometimes unintelligible, and always ridiculous. But the language properly so called is found current, especially in the upper and middle ranks, over the whole British empire. Thus, though in every province they ridicule the idiom of every other province, they all vail to the English idiom, and scruple not to acknowledge its superiority over their own.

“ For example ; in some parts of Wales (if we may credit Shakspeare in his character of Fluellin in Henry V.) the common people say *goot* for *good* ; in the South of Scotland they say *gude* ; and in the North, *gued*. Wherever one of these pronunciations prevails, you will never hear from a native either of the two ; but the word *good* is to be heard every where from natives, as well as strangers ; nor do the people ever dream that there is any thing laughable in it, however much they are disposed to laugh at the country accents and idioms which they discern in one another. Nay more ; though the people of distant provinces do not understand one another, they mostly all understand one who speaks properly. It is a just and curious observation of Dr. Kenrick, in his Rhetorical Grammar, that the case of language, or rather speech, being quite contrary to that of science ; in the former, the ignorant understand the learned, better than the learned do the ignorant ; in the latter it is otherwise.”

But though the inhabitants of London have this manifest advantage over all the other inhabitants of the island, they have the disadvantage of being more disgraced by their peculiarities than any other people. The grand difference between the metropolis and the provinces is, that people of education in London are free from all the vices of the vulgar ; but the best educated people in the provinces, if constantly resident there, are sure to be strongly tinged with the dialect of the country in which they live. Hence it is, that the vulgar pronunciation of London, though not half so erroneous as that of Scotland, Ireland, or any of the provinces, is, to a person of correct taste, a thousand times more offensive and disgusting.

DIRECTIONS to FOREIGNERS,

In order to attain a Knowledge of the Marks in this Dictionary, and to acquire a right Pronunciation of every Word in the English Language.

AS the sounds of the vowels are different in different languages, it would be endless to bring parallel sounds from the various languages of Europe ; but as the French is so generally understood upon the continent, if we can reduce the sounds of the English letters to those of the French, we shall render the pronunciation of our language very generally attainable : and this, it is presumed, will pretty be accurately accomplished by observing the following directions :

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
<i>ei</i>	<i>bi</i>	<i>ci</i>	<i>di</i>	<i>i</i>	<i>ef</i>	<i>dgi</i>	<i>etch</i>	<i>ai</i>	<i>dje</i>	<i>quē</i>	<i>ell</i>	<i>em</i>	<i>en</i>	<i>o</i>	<i>pi</i>	<i>kiou</i>	<i>arr</i>	<i>efs</i>	<i>ti</i>	<i>iou</i>	<i>vi</i>	<i>doblou</i>	<i>ex</i>	<i>ouai</i>	<i>zedd</i>

The French have all our vowel sounds, and will therefore find the pronunciation of them very easy. The only difficulty they will meet with seems to be *i*, which, though demonstrably composed of two successive sounds, has passed for a simple vowel with a very competent judge of English pronunciation *. The reason is, these two sounds are pronounced so closely together as to require some attention to discover their component parts : this attention Mr. Sheridan † never gave, or he would not have told us that this diphthong is a compound of our fullest and slenderest sounds *ā* and *ē* ; the first made by the largest, and the last by the smallest aperture of the mouth. Now nothing is more certain than the inaccuracy of this definition. The third sound of *a*, which is perfectly equivalent to the third sound of *o*,

* Elements of Orthœpy, page 2.

† See Section III. of his Prefodial Grammar prefixed to his Dictionary.

when combined with the first sound of *e*, must inevitably form the diphthong in *boy*, *joy*, &c. and not the diphthongal sound of the vowel *i* in *idle*, and the personal pronoun *I*; this double sound will, upon a close examination, be found to be composed of the Italian *a* in the last syllable of *papa*, and the first sound of *e*, pronounced as closely together as possible *; and for the exactness of this definition, I appeal to every just English ear in the kingdom.

The other diphthongal vowel *u* is composed of the French *i*, pronounced as closely as possible to their diphthong *ou*, or the English *êê* and *ô*, perfectly equivalent to the sound the French would give to the letters *you*, and which is exactly the sound the English give to the plural of the second personal pronoun.

The diphthong *oi* or *oy* is composed of the French *â* and *i*; thus *toy* and *boy* would be exactly expressed to a Frenchman by writing them *tâi* and *bâi*.

The diphthongs *ou* and *ow*, when sounded like *ou*, are composed of the French *â* and the diphthong *ou*; and the English sounds of *thou* and *now* may be expressed to a Frenchman by spelling them *thâou* and *nâou*.

W is no more than the French diphthong *ou*. Thus *West* is equivalent to *Ouest*, and *will* to *ouâll*.

Y is perfectly equivalent to the French letter of that name, and may be supplied by *i*. Thus *yoke*, *you*, &c. is expressed by *ioke*, *iou*, &c.

J, or *I* consonant, must be pronounced by prefixing *d* to the French *j*. Thus *jay*, *joy*, &c. sound to a Frenchman as if spelled *djê*, *djâi*, &c. If any difficulty be found in forming this combination of sounds, it will be removed by pronouncing the *d*, *ed*, and spelling these words *edjê*, *edjâi*, &c.

Ch, in English words not derived from the Greek, Latin, or French, is pronounced as if *t* were prefixed. Thus the sound of *chair*, *cheese*, *chain*, &c. would be understood by a Frenchman if the words were written *tchêre*, *tchize*, *tchêne*.

Sh in English is expressed by *ch* in French. Thus *shame*, *share*, &c. would be spelled by a Frenchman *chême*, *chêre*, &c.

The ringing sound *ng* in *long*, *song*, &c. may be perfectly conceived by a pupil who can pronounce the French word *Encore*, as the first syllable of this word is exactly correspondent to the sound in those English words; and for the formation of it, see Principles, No. 57; also the word *Encore*.

But the greatest difficulty every foreigner finds in pronouncing English, is the lisping consonant *th*. This, it may be observed, has, like the other consonants, a sharp and a flat sound: sharp as in *thin*, *bath*; flat as in *that*, *with*. To acquire a true pronunciation of this difficult combination, it may be proper to begin with those words where it is initial: and first, let the pupil protrude his tongue a little way beyond the teeth, and press it between them as if going to bite the tip of it; while this is doing, if he wishes to pronounce *thin*, let him hiss as if to sound the letter *s*; and after the hiss, let him draw back his tongue within his teeth, and pronounce the preposition *in*, and thus will the word *thin* be perfectly pronounced. If he would pronounce *that*, let him place the tongue between the teeth as before; and while he is hissing as to sound the letter *z*, let him withdraw his tongue into his mouth, and immediately pronounce the preposition *at*. To pronounce this combination when final in *bath*, let him pronounce *ba*, and protrude the tongue beyond the teeth, pressing the tongue with them, and hissing as if to sound *s*; if he would pronounce *with*, let him first form *wi*, put the tongue in the same position as before, and hiss as if to sound *z*. It will be proper to make the pupil dwell some time with the tongue beyond the teeth in order to form a habit, and to pronounce daily some words out of a dictionary beginning and ending with these letters.

These directions, it is presumed, if properly attended to, will be sufficient to give such Foreigners as understand French, and have not access to a master, a competent knowledge of English pronunciation; but to render the sounds of the vowels marked by figures in this Dictionary still more easily to be comprehended—with those English words which exemplify the sounds of the vowels, I have associated such French words as have vowels exactly corresponding to them, and which immediately convey the true English pronunciation. These should be committed to memory, or written down and held in his hand while the pupil is inspecting the Dictionary.

* Holder, the most philosophical and accurate investigator of the formation and powers of the letters, says: Our vulgar *i*, as in *file*, seems to be such a diphthong (or rather syllable, or part of a syllable) composed of *a*, *i*, or *e*, *i*, and not a simple original vowel.—Elements of Speech, pag. 95.

Dr. Wallis, speaking of the long English *i*, says it is sounded—eodem ferè modo quo Gallorum *ai* in vocibus *main*, *manus*; *pain*, *penis*, &c. Nempe sonum habet compositum ex Gallorum *è* foeminino & *i* vel *y*.—Grammatica Linguae Anglicanae, pag. 48.

None but those who have been engaged in printing, and who consider the peculiar difficulty of a work of this kind, will conceive, that after the most unwearied drudgery on my part, and the constant attention of a very careful and intelligent corrector of the prefs, so many faults, and, I fear, many others not noticed, could have escaped observation; For these I throw myself on the merey of the candid critick; and I am persuaded that every allowance will be made for the faults of a work, if, upon the whole, it be, what it ought to be, the best production in its kind.

Though I need not be ashamed to confess that, in the course of so long and intricate a work as the present, I might, in some cases, have seen occasion to alter my opinion, yet, as far as I recollect, there is but one class of words I could have wished had been differently marked, and that is, some of those ending in *wards*, with the accent on a preceding syllable. When the accent is on this termination, as in *rewards*, the *a* has the broad sound; but when the accent precedes, this letter goes into its obscure sound, and *wards* has exactly the sound of *words*. The inspector will therefore be pleased to take notice, that this termination in *backwards*, *forwards*, *inwards*, *outwards*, &c. ought rather to have been spelt *bäck'wârdz*, *fôr'wârdz*, &c. than *bäck'wârdz*, *fôr'wârdz*, &c.

PRINCIPLES

OF

ENGLISH PRONUNCIATION.

1. **T**HE first principles or elements of pronunciation are letters:

The letters of the English language are:

Roman.	Italick.	Name.
A a	A a	a
B b	B b	bee
C c	C c	see
D d	D d	dee
E e	E e	e
F f	F f	eff
G g	G g	jee
H h	H h	aitch
I i	I i	i or eye
J j	J j	j consonant, or jay
K k	K k	kay
L l	L l	el
M m	M m	em
N n	N n	en
O o	O o	o
P p	P p	pee
Q q	Q q	cue
R r	R r	ar
S s	S s	ess
T t	T t	tee
U u	U u	u or you
V v	V v	v consonant, or vee
W w	W w	double u
X x	X x	eks
Y y	Y y	wy
Z z	Z z	zed, or izzard. (483).

2. To these may be added certain combinations of letters universally used in printing; as *ct*, *ft*, *ff*, *fl*, *fb*, *fk*, *ff*, *fi*, *ffi*, *fi*, *ffi*, and *&c*, or *and per se and*, or rather *et per se and*. *ct*, *ft*, *ff*, *fl*, *fb*, *fk*, *ff*, *fi*, *ffi*, *fi*, *ffi*, *fi*, *ffi*, *&c*.

3. Our letters, says Dr. Johnson, are commonly reckoned twenty four, because anciently *i* and *j*, as well as *u* and *v*, were expressed by the same character; but as these letters, which had always different powers, have now different forms, our alphabet may be properly said to consist of twenty-six letters.

4. In considering the sounds of these first principles of language, we find that some are so simple and unmixed, that there is nothing required but the opening of the mouth to make them understood, and to form different sounds. Whence they have the names of *vowels*, or *voices* or *vocal sounds*. On the contrary, we find that there are others, whose pronunciation depends on the particular application and use of every part of the mouth, as the teeth, the lips, the tongue, the palate, &c. which yet cannot make any one perfect sound but by their union with those vocal sounds; and these are called *consonants*, or letters sounding with other letters.

Definition of Vowels and Consonants.

5. Vowels are generally reckoned to be five in number; namely: *a*, *e*, *i*, *o*, *u*; *y* and *w* are called vowels when they end a syllable or word, and consonants when they begin one.

6. The definition of a vowel, as little liable to exception as any, seems to be the following: A vowel is a simple sound formed by a continued effusion of the breath, and a certain conformation of the mouth, without any alteration in the position, or any motion of the organs of speech, from the moment the vocal sound commences till its ends.

7. A consonant may be defined to be, an interruption of the effusion of vocal sound, arising from the application of the organs of speech to each other.

8. Agreeably to this definition, vowels may be divided into two kinds, the simple and compound. The simple *a*, *e*, *o*, are those which are formed by one conformation of the organs only; that is, the organs remain exactly in the same position at the end as at the beginning of the letter; whereas in the compound vowels *i* and *u*, the organs alter their position before the letter is completely sounded. Nay, these letters, when commencing a syllable, do not only require a different position of the organs in order to form them perfectly, but demand such an application of the tongue to the roof of the mouth, as is inconsistent with the nature of a pure vowel; for the first of these letters, *i*, when sounded alone, or ending a syllable with the accent upon it, is a real diphthong, composed of the sound of *a* in *father*, and of *e* in *the*, exactly correspondent to the sound of the noun *eye*; but when this letter commences a syllable, as in *min-ion*, *pin-ion*, &c. the sound of *e* with which it terminates is squeezed into a consonant sound, like the double *e* heard in *queen*, different from the simple sound of that letter in *queen*, and this squeezed sound in the commencing *i* makes it exactly similar to *y* in the same situation; which, by all grammarians, is acknowledged to be a consonant*. The latter of these compound vowels, *u*, when initial, and not shortened by a consonant, commences with this squeezed sound of *e* equivalent to the

* How so accurate a grammarian as Dr. Lowth could pronounce so definitively on the nature of *y*, and insist on its being always a vowel, can only be accounted for by considering the small attention which is generally paid to this part of grammar. His words are these:

“ The same sound which we express by the initial *y* our Saxon ancestors in many instances expressed by the vowel *e*; as *cowen*, *your*; and by the vowel *i*; as *iow*, *yew*; *iong*, *young*. In the word *yew* the initial *y* has precisely the same sound with *i* in the words *view*, *lieu*, *adieu*; the *i* is acknowledged to be a vowel in these latter, how then can the *y*, which has the very same sound, possibly be a consonant in the former? Its initial sound is generally like that of *i* in *shire*, or *ee* nearly: it is formed by the

the *y*, and ends with a sound given to *oo* in *woo* and *coo*, which makes its name in the alphabet exactly similar to the pronoun *you* *. If, therefore, the common definition of a vowel be just, these two letters are so far from being simple vowels, that they may more properly be called semi-consonants.

9. That *y* and *w* are consonants when they begin a word, and vowels when they end one, is generally acknowledged by the best grammarians; and yet Dr. Lowth has told us, that *w* is equivalent to *oo*; but if this were the case, it would always admit of the particle *an* before it: for though we have no word in the language which commences with these letters, we plainly perceive, that if we had such a word, it would readily admit of *an* before it, and consequently that these letters are not equivalent to *w*. Thus we find, that the common opinion, with respect to the double capacity of these letters, is perfectly just.

10. Besides the vowels already mentioned, there is another simple vowel sound found under the *oo* in the words *woo* and *coo*; these letters have, in these two words, every property of a pure vowel, but when found in *food*, *mood*, &c. and in the word *too*, pronounced like the adjective *two*: here the *oo* has a squeezed sound, occasioned by contracting the mouth, so as to make the lips nearly touch each other; and this makes it, like the *i* and *u*, not so much a double vowel as a sound between a vowel and a consonant.

Classification of Vowels and Consonants.

11. Vowels and consonants being thus defined, it will be necessary in the next place to arrange them into such classes, as their similitudes and specific differences seem to require.

12. Letters, therefore, are naturally divisible into vowels and consonants.

13. The vowels are *a*, *e*, *i*, *o*, *u*; and *y* and *w* when ending a syllable.

14. The consonants are *b*, *c*, *d*, *f*, *g*, *h*, *j*, *k*, *l*, *m*, *n*, *p*, *q*, *r*, *s*, *t*, *v*, *x*, *z*, and *y* and *w* when beginning a syllable.

15. The vowels may be subdivided into such as are simple and pure, and into such as are compound and impure. The simple or pure vowels are such as require only one conformation of the organs to form them, and no motion in the organs while forming.

16. The compound or impure vowels are such as require more than one conformation of the organs to form them, and a motion in the organs while forming. These observations premised, we may call the following scheme

the opening of the mouth without any motion or contact of the parts: in a word, it has every property of a vowel and not one of a consonant." *Introd. to Eng. Gram. p. 3.*

Thus far the learned bishop; who has too fixed a fame to suffer any diminution by a mistake in so trifling a part of literature as this: but it may be asked if *y* has every property of a vowel and not one of a consonant, why, when it begins a word, does it not admit of the euphonic article *an* before it?

* An ignorance of the real composition of *u*, and a want of knowing that it partook of the nature of a consonant, has occasioned a great diversity and uncertainty in prefixing the indefinite article *an* before it. Our ancestors judging of its nature from its name, never suspected that it was not a pure vowel, and constantly prefixed the article *an* before nouns beginning with this letter; as *an union*, *an useful book*. They were confirmed in this opinion by finding the *an* always adapted to the short *u*, as *an umpire*, *an umbrella*, without ever dreaming that the short *u* is a pure vowel, and essentially different from the long one. But the moderns, not relying on the name of a letter, and consulting their ears rather than their eyes, have frequently placed the *a* instead of *an* before the long *u*, and we have seen *a union*, *a university*, *a useful book*, from some of the most respectable pens of the present age. Nor can we doubt a moment of the propriety of this orthography, when we reflect that these words actually begin to the ear with *y*, and might be spelled *younion*, *youniversity*, *youseful*, and can therefore no more admit of *an* before them than *year* and *youth*.

<i>oo</i>		coo		
<i>i</i>	}	ti-tle	}	compound or impure vowels
<i>y</i>		cy-der		
<i>u</i>		lu-cid		
<i>w</i>		pow-er		

17. Two vowels forming but one syllable are generally called a diphthong, and three, a triphthong. These are the following :

<i>ae</i> Cæsar	<i>eo</i> people	<i>oe</i> oeconomy	<i>aye</i> (for ever)
<i>ai</i> aim	<i>eu</i> feud	<i>oi</i> voice	<i>eau</i> beauty
<i>ao</i> gaol	<i>ew</i> jewel	<i>oo</i> moon	<i>cou</i> plenteous

<i>ea</i> clean	<i>ie</i> friend	<i>oy</i> boy	
<i>ee</i> reed	<i>io</i> passion	<i>ue</i> mansuetude	
<i>ei</i> ceiling	<i>oa</i> coat	<i>ui</i> languid	<i>oeu</i> manoeuvre

18. The consonants are divisible into mutes, semi-vowels, and liquids.

19. The mutes are such as emit no sound without a vowel, as *b*, *p*, *t*, *d*, *k*, and *c* and *g* hard.

20. The semi-vowels are such as emit a sound without the concurrence of a vowel, as *f*, *v*, *s*, *z*, *x*, *g* soft or *j*.

21. The liquids are such as flow into, or unite easily with the mutes, as *l*, *m*, *n*, *r*.

22. But, besides these, there is another classification of the consonants, of great importance to a just idea of the nature of the letters, and that is, into such as are sharp or flat, and simple or aspirated.

23. The sharp consonants are, *p*, *f*, *t*, *s*, *k*, *c* hard.

24. The flat consonants are, *b*, *v*, *d*, *z*, *g* hard.

25. The simple consonants are those which have always the sound of one letter unmixed with others, as *b*, *p*, *f*, *v*, *k*, *g* hard, and *g* soft, or *j*.

26. The mixed or aspirated consonants are those which have sometimes a hiss or aspiration joined with them, which mingles with the letter, and alter its sound, as *t* in *motion*, *d* in *soldier*, *s* in *mission*, and *z* in *azure*.

27. There is another distinction of consonants arising either from the seat of their formation, or from those organs which are chiefly employed in forming them. The best distinction of this kind seems to be that which divides them into labials, dentals, gutturals, and nasals.

28. The labials are, *b*, *p*, *f*, *v*. The dentals are, *t*, *d*, *s*, *z*, and soft *g* or *j*. The gutturals are, *k*, *g*, *q*, *c* hard, and *g* hard. The nasals are, *m*, *n*, and *ng*.

29. These several properties of the consonants may be exhibited at one view in the following table, which may be called

30. Vowels and consonants being thus defined and arranged, we are the better enabled to enter upon an enquiry into their different powers, as they are differently combined with each other. But previous to this, it may not be improper to show the organic formation of each letter, that nothing may be wanting to form a just idea of the first principles of pronunciation.

Organic Formation of the Letters.

31. Though I think every mechanical account of the organic formation of the letters rather curious than useful, yet, that nothing which can be presented to the eye, may be wanting to inform the ear, I shall in this follow those who have been at the pains to trace every letter to its seat, and make us, as it were, touch the sounds we articulate.

32. It will be necessary to observe, that there are three long sounds of the letter *a*, which are formed by a greater or less expansion of the internal parts of the mouth.

33. The German *a*, heard in *ball*, *wall*, &c. is formed by a strong and grave expression of the breath through the mouth, which is open nearly in a circular form, while the tongue, contracting itself to the root, as to make way for the sound, almost rests upon the under jaw.

34. The Italian *a*, heard in *father*, closes the mouth a little more than the German *a*; and by raising the lower jaw, widening the tongue, and advancing it a little nearer to the lips, renders its sound less hollow and deep.

35. The slender *a*, or that heard in *lane*, is formed in the mouth still higher than the last; and in pronouncing it, the lips, as if to give it a slender sound, dilate their aperture horizontally; while the tongue, to assist this narrow emission of breath, widens itself to the cheeks, raises itself nearer the palate, and by this means, a less hollow sound than either of the former is produced.

36. The *e* in *e-equal*, is formed by dilating the tongue a little more, and advancing it nearer to the palate and the lips, which produces the slenderest vowel in the language: for the tongue is, in the formation of this letter, as close to the palate as possible, without touching it; as the moment the tongue touches the palate, the squeezed sound of *ee* in *thee* and *meet* is formed, which, by its description, must partake of the sound of the consonant *y*.

37. The *i* in *i-dol*, is formed by uniting the sound of the Italian *a* in *father* and the *e* in *e-equal*, and pronouncing them as closely together as possible.

38. The

38. The *o* in *o-pen*, is formed by nearly the same position of the organs as the *a* in *wa-ter*; but the tongue is advanced a little more into the middle of the mouth, the lips are protruded, and form a round aperture like the form of the letter, and the voice is not so deep in the mouth as when *a* is formed, but advances to the middle or hollow of the mouth.

39. The *u* in *u-nit*, is formed by uniting the squeezed sound *ee* to a simple vowel sound, heard in *woo* and *coo*; the *oo* in these words is formed by protruding the lips a little more than in *o*, forming a smaller aperture with them, and instead of swelling the voice in the middle of the mouth, bringing it as forward as possible to the lips.

40. *Y* final in *try*, is formed like *i*: and *w* final in *now*, like the *oo*, which has just been described.

41. The best method of shewing the organic formation of the consonants will be to class them into such pairs as they naturally fall into, and then by describing one, we shall nearly describe its fellow; by which means the labour will be lessened, and the nature of the consonants better perceived. The consonants that fall into pairs are the following:

<i>p</i>	<i>f</i>	<i>t</i>	<i>s</i>	<i>ph</i>	<i>th</i>	<i>k</i>	<i>ch</i>	<i>chair</i>
<i>b</i>	<i>v</i>	<i>d</i>	<i>z</i>	<i>zh</i>	<i>dh</i>	<i>g</i>	<i>j</i>	<i>jail</i>

42. Holder, who wrote the most elaborately and philosophically upon this subject, tells us, in his *Elements of Speech*, that when we only whisper we cannot distinguish the first rank of these letters from the second. It is certain the difference between them is very nice; the upper letters seeming to have only a smarter, brisker appulse of the organs than the latter; which may not improperly be distinguished by sharp and flat. The most marking distinction between them will be found to be a sort of guttural murmur, which precedes the latter letters when we wish to pronounce them forcibly, but not the former. Thus if we close the lips, and put the fingers on them to keep them shut, and strive to pronounce the *p*, no sound at all will be heard; but in striving to pronounce the *b* we shall find a murmuring sound from the throat, which seems the commencement of the letter; and if we do but stop the breath by the appulse of the organs, in order to pronounce with greater force, the same may be observed of the rest of the letters.

43. This difference in the formation of these consonants may be more distinctly perceived in the *s* and *z* than in any other of the letters; the former is founded by the simple issue of the breath between the teeth, without any vibration of it in the throat, and may be called a hissing sound; while the latter cannot be formed without generating a sound in the throat, which may be called a vocal sound. The upper rank of letters, therefore, may be called breathing consonants; and the lower, vocal ones.

44. These observations premised, we may proceed to describe the organic formation of each letter.

45. *P* and *B* are formed by closing the lips till the breath is collected, and then letting it issue by forming the vowel *e*.

46. *F* and *V* are formed by pressing the upper teeth upon the under lip, and sounding the vowel *e* before the former and after the latter of these letters.

47. *T* and *D* are formed for pressing the tip of the tongue to the gums of the upper teeth, and then separating them, by pronouncing the vowel *e*.

48. *S* and *Z* are formed by placing the tongue in the same position as in *T* and *D*, but not so close to the gums as to stop the breath: a space is left between the tongue and the palate for the breath to issue, which forms the hissing and buzzing sound of these letters.

49. *SH* heard in *mission*, and *zh* in *evafion*, are formed in the same seat of sound as *s* and *z*; but in the former, the tongue is drawn a little inwards, and at a somewhat greater distance from the palate, which occasions a fuller effusion of breath from the hollow of the mouth, than in the latter; which are formed nearer to the teeth.

50. *TH* in *think*, and the same letters in *that*, are formed by protruding the tongue between the fore teeth, pressing it against the upper teeth, and at the same time endeavouring to sound the *s* or *z*; the former letter to sound *th* in *think*, and the latter to sound *th* in *that*.

51. *K* and *G* hard are formed by pressing the middle of the tongue to the roof of the mouth near the throat, and separating them a little smartly to form the first, and more gently to form the last of these letters.

52. *CH* in *chair*, and *j*, in *jail*, are formed by pressing *t* to *sh*, and *d* to *zh*.

53. *M* is formed by closing the lips, as in *P* and *B*, and letting the voice issue by the nose.

54. *N* is formed by resting the tongue in the same position as in *T* or *D*, and breathing through the nose, with the mouth open.

55. *L* is formed by nearly the same position of the organs as *t* and *d*, but more with the tip of the tongue, which is brought a little forwarder to the teeth, while the breath issues from the mouth.

56. *R* is formed by placing the tongue nearly in the position of *t*, but at such a distance from the palate as suffers it to jarr against it, when the breath is propelled from the throat to the mouth.

57. *NG* in *ring*, *sing*, &c. is formed in the same seat of sound as hard *g*; but while the middle of the tongue presses the roof of the mouth, as in *G*, the voice passes principally through the nose, as in *N*.

58. *Y* consonant is formed by placing the organs in the position of *e*, and squeezing the tongue against the roof of the mouth, which produces *ee*, which is equivalent to initial *y*.

59. *W* consonant is formed by placing the organs in the position of *oo*, described under *u*, and closing the lips a little more, in order to propel the breath upon the succeeding vowel which it articulates.

60. In this sketch of the formation and distribution of the consonants, it is curious to observe on how few radical principles the almost infinite variety of combination in language depends. It is with some degree of wonder we perceive that the slightest aspiration, the almost insensible inflection of nearly similar sounds, often generate the most different and opposite meanings. In this view of nature, as in every other, we find uniformity and variety very conspicuous. The single *fiat*, at first impressed on the chaos, seems to operate on languages; which, from the simplicity and paucity of their principles, and the extent and power of their combinations, prove the goodness, wisdom, and omnipotence, of their origin.

61. This analogical association of sounds is not only curious, but useful: it gives us a comprehensive view of the powers of the letters; and from the small number that are radically different, makes us able to see the rules on which their varieties depend. It discovers to us the genius and propensities of several languages and dialects, and, when authority is silent, enables us to decide agreeably to analogy.

62. The nature of the letters thus delineated and explained, we are the better prepared to enter upon an enquiry into their different powers, as they are differently combined with each other. But first it will be necessary to obviate a difficulty which frequently arises about the sound of the first letter taken singly, or as it is heard in the alphabet.

An Enquiry into the alphabetical Pronunciation of the Letter A.

63. So many profound and ingenious observations have been made upon this first step to literature, that volumes might be filled with the erudition that has been lavished on this letter alone. The priority of place it claims, in all alphabets, has made it so much the object of attention, that philologists suppose the foundation of learning but weakly laid till the natural and civil history of the first letter be fully settled.

64. But however deep have been their researches into the origin of this letter, we find no author in our language has hitherto attempted to settle the disputes that have arisen between the natives of England,

England, Ireland, and Scotland, about the true sound of it, when called by its name. Instead, therefore, of tracing this character through the circles of Gomer, the Egyptian Hieroglyphics, the mysterious Abraxas, or the Irish Ogum, I shall endeavour to obviate a difficulty that frequently arises when it is pronounced in the Hornbook : or, in other words ; to enquire what is the true name of the first letter of the English Alphabet. Whether we are to say *Aye*, *B*, *C* ; *Ab*, *B*, *C* ; or *Aw*, *B*, *C*.

65. And first, it will be necessary to consider the nature of a vowel ; which grammarians are generally agreed in defining to be “ a simple articulate sound, formed by the impulse of the voice by the “ opening only of the mouth in a particular manner.” Now as every vowel by itself is sounded long, as nothing but its junction with a consonant can make it otherwise, it is natural, when pronouncing this vowel alone, to give it the long open sound, but as this long open sound is threefold, as heard in *face*, *father*, and *water*,—a question arises which of these long sounds shall we adopt as a common name to the whole species of this letter ? The English make choice of the *a* in *face*, the Irish of that in *father*, and the Scotch of that in *water*. Each party produces words where the letter *a* is sounded in the manner they contend for ; but when we demand why one should have the preference, the controversy is commonly at an end ; any farther reasons are either too remote or too insignificant to be produced : And indeed, if a diversity of names to vowels did not confound us in our spelling, or declaring to each other the component letters of a word, it would be entirely needless to enter into so trifling a question as the mere name of a letter ; but when we find ourselves unable to convey signs to each other on account of this diversity of names, and that words themselves are endangered by an improper utterance of their component parts, it seems highly incumbent on us to attempt an uniformity in this point ; which, insignificant as it may seem, is undoubtedly the foundation of a just and regular pronunciation.

66. The first rule for naming a letter, when pronounced alone, seems to be this : Whatever sound we give to a letter, when terminating a syllable, the same sound ought to be given to it when pronounced alone, because, in both cases, they have their primary, simple sound, uninfluenced by a succeeding vowel or consonant ; and therefore, when we pronounce a letter alone, it ought to have such a sound as does not suppose the existence of any other letter. But wherever *a* terminates a syllable with the accent upon it, (the only state in which it can be said to be pure) it has always the English sound of that letter. The only exceptions to this rule are, the words *fa-ther*, *ma-ster*, and *wa-ter* ; and that these are merely exceptions, appears from the uniformity with which the *a* is pronounced otherwise in *parent*, *papal*, *taper*, *fatal*, &c. The other vowels have their names exactly similar to the sound they have in a similar situation, as the *e* like that in *me-grim*, the *i* like the *i* in *ti-tle*, the *o* as the *o* in *noble*, and the *u* like the *u* in *tu-tor*. Thus, as it appears from the general analogy of pronunciation, that the sound of the *a*, which the English adopt, is the only one that does not necessarily suppose the existence of any other sound ; it inevitably follows that theirs only is the proper appellation of that letter.

67. But there is another analogy by which we may determine the true sound of the vowels when pronounced singly, and that is, the sound they have when preserved long and open by the final *e*. Thus we call the letter *e* by the sound it has in *theme*, the letter *i* as it sounds in *time*, the letter *o* as heard in *tone*, and the *u* as in *tune* ; and why the letter *a* should not be pronounced as heard in *face* cannot be conceived, as each of the other vowels has, like *a*, a variety of other sounds, as they are united with letters which, in some measure, alter their quality.

68. In consequence of entertaining a different idea of the *a*, when pronounced in the alphabet, we see the natives of Ireland very prone to a different pronunciation of the words where this letter occurs ; and, indeed, it is quite consistent with their doctrine of the sound of *a*, that the words *parent*, *papal*, *taper*, and *fatal*, should be pronounced *pab-rent*, *pab-pal*, *tab-per*, and *fab-tal*. We find the Scotch, likewise, inclinable to the same pronunciation of *a*, when in words, as when alone. Thus we hear *Saw-*

tan for *Satan*, *favcred* for *facred*, and *lav-ity* for *laity*: and this is perfectly consistent with the manner in which they pronounce the letter *a*, when alone: there is no medium: if this be not the true pronunciation of these words, the *a* is certainly to be sounded as the English do: for, whenever the English give the Italian sound, as it may be called, to the *a*, except in the words *father* and *master*, it is always in consequence of its junction with some consonant, which determines it to that sound; as in monosyllables terminating in *r*; as *bar*, *car*, *far*: but where it is not affected by a succeeding consonant, as in the words *parent*, *papal*, *natal*, *fatal*, we then hear it pronounced as the slender English *a*, both in and out of composition.

69. It will, perhaps, be objected, that the most frequent short sound of *a*, as heard in *cat*, *rat*, *mat*, *carry*, *marry*, *parry*, is the short sound of the Italian *a* in *father*, *car*, *mar*, *par*, and not the short sound of the *a* in *care*, *mare*, and *pare*; but it may be answered, that this want of correspondence between the name of the letter, and the most frequent short sound, is common to the rest of the vowels: for the *o*, as heard in *cot*, *not*, *rot*, is not the short sound of the *o* in *coat*, *note*, *wrote*, but of the *a* in *water*; or of the diphthongs in *caught*, *naught*, and *wrought*; and if we ought to call the *a*, *ah*, because its short sound corresponds to *ah*, for the very same reason we ought to call the *o*, *au*; and a similar alteration must take place with the rest of the vowels. As therefore, from the variety of sounds the vowels have, it is impossible to avoid the inconvenience of sometimes sounding the letter one way in a syllable, and another way in a word, we must either adopt the simple long sound when we would pronounce the letter alone, or invent new names for every different sound in a different word, in order to obviate the difficulty.

70. It must not be dissembled, however, that the sound of *a*, when terminating a syllable not under the accent, seems more inclined to the Irish than the English *a*, and that the ear is less disgusted with the sound of *Ab-mer-i-cab* than of *A-mer-i-cay*: but to this it may be answered, that letters not under the accent, in a thousand instances, deviate from their true sound; that the vowel *a*, like several other vowels in a final syllable not accented, has an obscure sound, bordering on *u*; but if the *a*, in this situation, were pronounced ever so distinctly, and that this pronunciation were clearly the *a* in *father*, it would be nothing to the purpose: when the *a* is pronounced alone, it may be said, not only to be a letter, but a distinct character, and a noun substantive; and as such, has the same force as the letters in an accented syllable. The letter *a*, therefore, as the first character in the alphabet, may always be said to have the accent, and ought to have the same long, open sound, as is given to that letter when accented in a syllable, and not influenced in its sound by any preceding or succeeding consonant.

We may therefore conclude, that if all vowels, when pronounced alone, are accented and long, if spelling be the pronunciation of letters alone, (as it would be absurd to suppose ourselves acquainted with the different consonants that determine the sound of the vowels before they are pronounced) it follows, that in spelling, or repeating the component parts of a word, we ought to give those parts their simple and uncombined sound: but there is no uncombined sound of the vowel *a*, except the slender sound contended for, unless in the words *father* and *master*; and therefore, when we repeat letters singly, in order to declare the sound of a word, we must undoubtedly give the first letter of the alphabet the sound we ever give it in the first syllable of the numerous class *la-dy*, *pa-gan*, *ma-son*, *ba-fin*, &c.

71. Thus, after placing every objection in its strongest light, and deducing our arguments from the simplest and clearest principles, this important question seems at last decided in favour of the English; who, independent of the arguments in their favour, may be presumed to have a natural right to determine the name of the letter in question, though it has been so often litigated by their formidable and learned, though junior, relations. For though, in some cases, the natives of Ireland and Scotland

adhere rather more closely to analogy than the English themselves, yet in this we find the English pronounce perfectly agreeable to rule ; and, that the slender pronunciation of the letter *a*, as they pronounce it in the alphabet, is no more than giving it that simple sound, it ever has, when unconnected with vowels or consonants that alter its power.

A.

72. *A* has three long sounds and two short ones.

73. The first sound of the first letter in our alphabet is that which among the English is its name. This is what is called by most grammarians its slender sound (35) ; we find it in the words *lade*, *spade*, *trade*, &c. the final *e*, though silent, almost always lengthening the vowel that precedes it. In the diphthong *ai*, we have exactly the same sound of this letter, as in *pain*, *gain*, *stain*, &c. and sometimes in the diphthong *ea*, as *bear*, *swear*, *pear*, &c. nay, twice we find it, contrary to every rule of pronunciation, in the words *where* and *there*, and once in the anomalous diphthong *ao* in *gaol*. It exactly corresponds to the sound of the French *e* in the beginning of the words *être* and *tête*.

74. The long slender *a* is generally produced by a silent *e* at the end of the syllable ; which *e* not only keeps one single intervening consonant from shortening the preceding vowel, but sometimes two : thus we find the mute *e* makes of *rag*, *rage*, and keeps the *a* open even in *range*, *change*, &c. *bat*, with the mute *e* becomes *bate*, and the *a* continues open, and, perhaps, somewhat longer in *haste*, *waste*, *paste*, &c. though it must be confessed this seems the privilege only of *a* ; for the other vowels contract before the same assemblage of consonants in *revenge*, *cringe*, *plunge* ; and the *ste* in our language is preceded by no other vowel but this. Every consonant but *n* shortens every vowel but *a*, when *g* and *e* silent succeed ; as *bilge*, *badge*, *binge*, *spunge*, &c.

75. The *a* has this long slender sound likewise when it ends a syllable with the accent upon it. Hence we may establish this general rule : *A* has the long open slender sound, when followed by a single consonant, and *e* mute, as *lade*, *made*, *fade*, &c. The only exceptions seem to be, *have*, *are*, *gape*, and *bade*, the past time to *bid*.

76. *A* has the same sound, when ending an accented syllable, as *pa-per*, *ta-per*, *spec-ta-tor*. The only exceptions are, *fa-ther*, *ma-ster*, *wa-ter*.

77. As the short sound of the long slender *a* is not found under the same character, but in the short *e* (as may be perceived by comparing *mate* and *met*) we proceed to delineate the second sound of this vowel, which is that heard in *father*, and is called by some the open sound (34) ; but this can never distinguish it from the deeper sound of the *a* in *all*, *ball*, &c. which is still more open : by some it is styled the middle sound of *a*, as between the *a* in *pale*, and that in *wall*. It answers nearly to the Italian *a* in *Toscano*, *Romana*, &c. or to the final *a* in the naturalized Greek words, *papa* and *mama*. We seldom find the long sound of this letter in our language, except in monosyllables ending with *r*, as *far*, *tar*, *mar*, &c. and in the word *father*.

78. The long sound of the middle or Italian *a* is always found before *r* in monosyllables, as *car*, *far*, *mar*, &c. before the liquids *lm* ; whether the latter only be pronounced as in *psalm*, or both, as in *psalmist* ; sometimes before *lf*, and *lve*, as *calf*, *half*, *calve*, *halve*, *salve*, &c. and lastly before the sharp aspirated dental *th* in *batb*, *path*, *lath*, &c. and in the word *father* : this sound of the *a* was formerly more than at present found before the nasal liquid *n*, especially when succeeded by *t* or *c*, as *grant*, *dance*, *glance*, *lance*, *France*, *chance*, *prance*, &c.

79. The hissing consonant *s* was likewise a sign of this sound of the *a*, whether doubled, as in *glass*, *grafs*, &c. or accompanied by *t*, as in *last*, *fast*, &c. but this pronunciation of *a* seems to have been for some years advancing to the short sound of this letter, as heard in *band*, *land*, *grand*, &c. and pronouncing

nouncing the *a* in *after*, *answer*, *basket*, *plant*, *maſt*, &c. as long as in *half*, *calf*, &c. borders very cloſely on vulgarity : it muſt be obſerved, however, that the *a* before *n* in monosyllables, and at the end of words, was anciently written with *u* after it, and ſo probably pronounced as broad as the German *a*. For Dr. Johnſon obſerves, “ many words pronounced with *a* broad, were anciently written with *au*, as *fault*, “ *mault* ; and we ſtill write *fault*, *vault*. This was probably the Saxon ſound, for it is yet retained in “ the northern dialects, and in the ruſtic pronunciation, as *maun* for *man*, *haund* for *hand*.” But ſince the *u* has vaniſhed, the *a* has been gradually pronounced ſlenderer and ſhorter, till now almoſt every veſtige of the ancient orthography ſeems loſt ; though the termination *mand* in *command*, *demand*, &c. formerly written *commaund*, *demaund*, ſtill retains the long ſound inviolably.

80. As the mute *l* in *calm*, *pfalm*, *calf*, *half*, &c. ſeems to lengthen the ſound of this letter, ſo the abbreviation of ſome words by apoſtrophe ſeems to have the ſame effect. Thus when, by impatience, that grand corrupter of manners, as well as language, the *no* is cut out of the word *cannot*, and the two ſyllables reduced to one, we find the *a* lengthened to the Italian or middle *a*, as *cannot*, *can't* ; *have not*, *han't* ; *ſhall not*, *ſha'n't*, &c. This is no more than what the Latin language is ſubject to ; it being a known rule in that tongue, that when, by compoſition or otherwiſe, two ſhort ſyllables become one, that ſyllable is almoſt always long, as *alius* has the penultimate long becauſe it comes from *alius*, and the two vowels in the laſt of *Orpheus* make one long ſyllable, as formed of *Orpheus*, where they make two ſhort ones.

81. The ſhort ſound of this middle or Italian *a*, which is generally confounded with the ſhort ſound of the ſlender *a*, is the ſound of this vowel in *man*, *pan*, *tan*, *mat*, *bat*, &c. we generally find this ſound before any two ſucceſſive conſonants but thoſe excepted in the foregoing remarks, even when it comes before an *r* ; for if this conſonant be doubled, in order to produce another ſyllable, the long ſound becomes ſhort, as *mar*, *marry* ; *tar*, *tarry* ; *car*, *carry*, &c. where we find the monosyllable has the long, and the diſſyllable the ſhort ſound.

82. The only exception to this rule is, in adjectives derived from ſubſtantives ending in *r* : for in this caſe the *a* continues long, as in the primitive. Thus the *a* in *ſtarry*, or full of ſtars, is as long as in *ſtar* ; and the *a* in the adjective *tarry*, or beſmeared with tar ; is as long as in the ſubſtantive *tar*, though ſhort in the word *tarry*, to ſtay.

83. The third long ſound of *a* is that which we more immediately derive from our maternal language the Saxon, but which at preſent we uſe leſs than any other : this is the *a* in *fall*, *ball*, *gall* (33) : we find a correſpondent ſound to this *a* in the diphthongs *au* and *aw* ; as *laud*, *law*, *ſaw*, &c. though it muſt here be noted, that we have improved upon our German parent, by giving a broader ſound to this letter in theſe words than the Germans themſelves would do, were they to pronounce them.

84. The long ſound of the deep broad German *a* is produced by *ll* after it, as in *all*, *wall*, *call* ; or indeed by one *l*, and any other conſonant beſides the mute labials *p*, *b*, *f*, and *v*, and the ſharp and flat gutturals *c* and *g* ; as *ſilt*, *bald*, *faſe*, &c. Our modern orthography, which has done its utmoſt to perplex pronunciation, has made it neceſſary to obſerve, that every word compounded of a monosyllable with *ll*, as *alſo*, *almoſt*, *dowſal*, &c. muſt be pronounced as if the two were ſtill remaining, notwithſtanding our word-menders have wiſely taken one away, to the deſtruction both of ſound and etymology ; for, as Mr. Elphington ſhrewdly obſerves, “ Every reader, young and old, muſt now be ſo ſagacious an analyſt as to diſcern at once not only what are compounds and what their ſimples, but that “ *al* in compoſition is equal to *all* but of it ; or in other words, that it is both what it is, and what it is “ not.” Prin. Eng. Lang. vol. I. page 60. See No. 404.

85. The *w* has a peculiar quality of broadening this letter, even when prepoſitive : this is always the effect, except when the vowel is cloſed by the ſharp or flat guttural *k* or *g*, or the ſharp labial *f* ; thus

we pronounce the *a* broad, though short, in *wad*, *wan*, *want*, *was*, *what*, &c. and though other letters suffer the *a* to alter its sound before *ll*, when one of these letters goes to the formation of the latter syllable, as *tall*, *tal-low*; *hall*, *hal-low*; *call*, *cal-low*, &c. yet we see *w* preserve the sound of this vowel before a single consonant, as *wal-low*, *fwal-low*, &c.

86. The *q* including the sound of the *w*, and being no more than this letter preceded by *k*, ought, according to analogy, to broaden every *a* it goes before like the *w*; thus *quantity* ought to be pronounced as if written *kwontity*, and *quality* should rhyme with *jollity*; instead of which we frequently hear the *w* robbed of its rights in its proxy; and *quality* so pronounced as to rhyme with *legality*: while to rhyme quantity, according to this affected mode of pronouncing it, we must coin such words as *plantity* and *consonantity*. The *a* in *Equator* is an exception to this rule, from the preponderancy of another which requires *a*, ending a syllable under the accent, to have the slender sound of that letter; to which rule, *father*, *master*, and *water*, are the only exceptions.

87. The short sound of this broad *a* is heard when it is preceded by *w*, and succeeded by a single consonant in the same syllable, as *wal-low*, *fwal-low*, &c. or by two consonants in the same syllable, as *want*, *waft*, *wasp*, &c., but when *l* or *r* is one of the consonants, the *a* becomes long, as *walk*, *swarm*, &c.

Irregular and unaccented Sounds.

88. But besides the long and short sounds common to all the vowels, there is a certain transient indistinct pronunciation of some of them, when they are not accented, that cannot so properly be called obscure, as imperfect: for it seems to have no more of the sound of the vowel to which it corresponds than what is common to the rest; that is, a simple guttural tone, entirely unmodified by the organs which distinguish the sound of one vowel from another, and is really no more than a commencement of the vowel intended to be pronounced. When the accent is not upon it, no vowel is more apt to run into this imperfect sound than the *a*; thus the particle *a* before participles, in the phrases *a-going*, *a-walking*, *a-shooting*, &c. seems, says Dr. Lowth, to be the true and genuine preposition *on*, a little disguised by familiar use and quick pronunciation: the same indistinctness, from rapidity and coincidence of sound, has confounded the pronunciation of this mutilated preposition to the ear, in the different questions *what's o'clock*, when we would know the hour, and *what's a clock*, when we would have the description of that horary machine; and if the accent be kept strongly on the first syllable of the word *tolerable*, as it always ought to be, we find scarcely any distinguishable difference to the ear, if we substitute *u* or *o* instead of *a* in the penultimate syllable. Thus *tolerable*, *tolerable*, and *tolerable*, are exactly the same word to the ear, if pronounced without premeditation or transposing the accent, for the real purpose of distinction.

89. There is a corrupt, but a received, pronunciation of this letter in the words *any*, *many*, *catch*, *Thames*, where the *a* sounds like short *e*, as if written *enny*, *menny*, *ketch*, *Tems*.

90. The *a* goes into a sound approaching to short *i*, in the numerous termination in *age*, when the accent is not on it, as *cabbage*, *village*, *courage*, &c. are pronounced nearly as if written *cabbige*, *villige*, *courige*, &c.

91. The *a* in the numerous termination *ate*, when the accent is not on it, is pronounced somewhat differently in different words. If the word be a substantive, or an adjective, the *a* seems to be shorter than when it is a verb: thus a good ear will discover a difference in the quantity of this letter, in *delicate* and *dedicate*, in *climate*, *primate*, and *ultimate*; and *calculate*, *regulate*, and *speculate*, where we find the nouns and adjectives have the *a* considerably shorter than the verbs. *Innate*, however, preserves the *a* as long as if the accent were on it. But the unaccented terminations in *ace*, whether

nouns

nouns or verbs, have the *a* so short and obscure as to be nearly similar to the *u* in *us*; thus *palace*, *solace*, *menace*, *pinnacle*, *populace*, might, without any great departure from their common sound, be written *pallus*, *sollus*, &c. while *furnace* almost changes the *a* into *i*, and might be written *furnifs*.

92. When the *a* is preceded by the gutturals, hard *g* or *c*, it is, in polite pronunciation, softened by the intervention of a sound like *e*, so that *card*, *cart*, *guard*, *regard*, are pronounced like *ke-ard*, *ke-art*, *ghe-ard*, *re-ghe-ard*. This sound of the *a* is taken notice of in Steele's Grammar, page 49, which proves it is not the offspring of the present day (160).

E.

93. The first sound of *e* is that which it has when lengthened by the mute *e* final, as in *glebe*, *theme*, &c. or ending a syllable, as *se-cre-tion*, *ad-be-sion*, &c. (3^d).

94. The exceptions to this rule are, the words *where* and *there*: in which the first *e* is pronounced like *a*, as if written *whare*, *thare*, and the auxiliary verb *were*: where the *e* has its short sound, as if written *werr*, rhyming with the last syllable of *pre-fer*. *Ere* (before) sounds like *air*.

95. The short sound of *e* is that heard in *bed*, *fed*, *red*, *wed*, &c.

Irregular and unaccented Sounds.

96. The *e* at the end of the monosyllables *be*, *he*, *me*, *we*, is pronounced like *ee*; as if written *bee*, *hee*, &c.

97. The first *e* in the poetic contractions, *e'er* and *ne'er*, is pronounced like *a*; as if written *air* and *nair*.

98. The *e* in *ber* is pronounced nearly like short *u*; and as we hear it in the unaccented terminations of *writer*, *reader*, &c. where we may observe that the *r* being only a jar, and not a definite and distinct articulation like the other consonants, instead of stopping the vocal efflux of voice, lets it imperfectly pass, and so corrupts and alters the true sound of the vowel.

99. This vowel, like the rest, when it is not supported by accentual force, is apt to slide into irregularity: thus *faces*, *ranges*, *praises*, are pronounced as if written *fuciz*, *rangiz*, *praiziz*. Where we may observe, that though the *e* goes into the short sound of *i*, it is exactly that sound which corresponds to the long sound of *e*; for the *e* in *them* is not the true short sound of the first *e* in *theme*, but of the *i* in *bim*: for if a long sound were produced to correspond with the *e* in *them*, it would certainly be found in the *a* in *Thame*. By which we may perceive, that neither the slender *a*, nor the long *e*, has a short sound in its own family which corresponds to the long ones.

100. There is a remarkable exception to the common sound of this letter in the words *clerk*, *serjeant*, and a few others, where we find the *e* pronounced like the *a* in *dark* and *margin*. But this exception, I imagine, was, till within these few years, the general rule of sounding this letter before *r*, followed by another consonant. Thirty years ago every one pronounced the first syllable of *merchant* like the monosyllable *march*, and as it was anciently written *marchant*. *Service* and *servant* are still heard among the lower order of speakers, as if written *service* and *servant*: and even among the better sort, we sometimes hear, *Sir*, *your servant*; though this pronunciation of the word singly would be looked upon as a mark of the lowest vulgarity. The proper names, *Derby* and *Berkeley*, still retain the old sound, as if written *Darby* and *Barkeley*: but even these, in polite usage, are getting into the common sound, nearly as if written *Durby* and *Burkeley*. As this modern pronunciation of the *e* has a tendency to simplify the language by lessening the number of exceptions, it ought certainly to be indulged.

101. This letter falls into an irregular sound, but still a sound which is its nearest relation in the words,

words, *England*, *yes*, and *pretty*, where the *e* is heard like short *i*. Vulgar speakers are guilty of the same irregularity in *engine*, as if written *ingine*; but this cannot be too carefully avoided.

102. The vowel *e* before *l* and *n* in a final unaccented syllable, by its being sometimes suppressed and sometimes not, forms one of the most puzzling difficulties in pronunciation. When any of the liquids precede these letters, the *e* is heard distinctly, as *woollen*, *flannel*, *women*, *fyren*; but when any of the other consonants come before these letters, the *e* is sometimes heard, as in *novel*, *sudden*; and sometimes not, as in *swivel*, *raven*, &c. As no other rule can be given for this variety of pronunciation, perhaps the best way will be to draw the line between those words where *e* is pronounced, and those where it is not; and this, by the help of the Rhyming Dictionary, I am luckily enabled to do. In the first place, then, it may be observed, the *e* before *l*, in a final unaccented syllable, must always be pronounced distinctly, except in the following words: *shekel*, *weasel*, *ousel*, *nousel*, (better written *nuzzel*) *navel*, *ravel*, *snivel*, *rivel*, *drivel*, *shrivel*, *shovel*, *grovel*, *bazel*, *drazel*, *nozel*. These words are pronounced as if that *e* were omitted by an apostrophe, as *shek'l*, *weas'l*, *ous'l*, &c. or rather as if written, *sheckle*, *weazle*, *ouzele*, &c. but as these are the only words of this termination that are so pronounced, great care must be taken that we do not pronounce *travel*, *gravel*, *rebel*, (the substantive) *parcel*, *chapel*, and *vessel*, in the same manner; a fault to which many are very liable.

103. *E* before *n* in a final unaccented syllable, and not preceded by a liquid, must always be suppressed, except in the following words: *sudden*, *mynchen*, *kitchen*, *hyphen*, *chicken*, *ticken*, (better written *ticking*), *jerken*, *aspen*, *platen*, *paten*, *marten*, *latten*, *patten*, *leaven* or *leven*, *sloven*. In these words the *e* is heard distinctly, contrary to the general rule which suppresses the *e* in these syllables, when preceded by a mute, as *harden*, *beaten*, *heaven*, as if written *hard'n*, *beath'n*, *heav'n*, &c. nay, even when preceded by a liquid in the words *fallen* and *stolen*, where the *e* is suppressed, as if they were written *fall'n* and *stol'n*: *garden* and *burden*, therefore, are very analogically pronounced *gard'n* and *burd'n*; and this pronunciation ought the rather to be indulged, as we always hear the *e* suppressed in *gardener* and *burdensome*, as if written *gard'ner* and *burd'nsome*.

104. This diversity in the pronunciation of these terminations ought the more carefully to be attended to, as nothing is so vulgar and childish as to hear *swivel* and *heaven* pronounced with the *e* distinctly, or *novel* and *chicken* with the *e* suppressed. To these observations we may add, that though *evil* and *devil* suppress the *e*, as if written *ev'l* and *dev'l*, yet that *cavil* and *pencil* preserve the sound of *e* distinctly; and that *Latin* ought never to be pronounced, as it is generally at schools, as if written *Lai'n*.

I.

105. This letter is a perfect diphthong, composed of the sound of *a* in *father*, and *e* in *be*, pronounced as closely together as possible. When these sounds are openly pronounced, they produce the familiar assent *ay*; which, by the old English dramatic writers, was often expressed by *I*. This sound is heard when the letter is lengthened by final *e*, as *time*, *thine*, or ending a syllable with the accent upon it, as *ti-tle*, *di-al*, and sometimes when the accent is not upon it, as *I-dolatory*, *I-dea*, &c.

106. There is one instance where this letter, though succeeded by final *e*, does not go into the broad English sound like the noun *eye*, but into the slender foreign sound like *e*. This is in the word *shire*, pronounced as if written *sbeer*, both when single, as *a knight of the shire*; or in composition, as in *Nottinghamshire*, *Leicestershire*, &c. This is the sound Dr. Lowth gives it in his Grammar, page 4: and it is highly probable that the simple *shire* acquired this slender sound from its tendency to become slender in the compounds, where it is at a distance from the accent, and where all the vowels have a natural tendency to become short and obscure.

107. The short sound of this letter is heard in *him*, *thin*, &c. and when ending an unaccented syllable,

as *van-i-ty*, *qual-i-ty*, &c. where, though it cannot be properly said to be short, as it is not closed by a consonant, yet it has but half its diphthongal sound. This sound is the sound of *e*, the last letter of the diphthong that forms the long *I*; and it is not a little surprising that Dr. Johnson should say that the short *i* was a sound wholly different from the long one.

108. When this letter is succeeded by *r*, and another consonant not in a final syllable, it has exactly the sound of *e* in *vermin*, *vernal*, &c. as *virtue*, *virgin*, &c. which approaches to the sound of short *u*; but when it comes before *r*, followed by another consonant in a final syllable, it acquires the sound of *u* exactly; as *bird*, *dirt*, *shirt*, *squirt*, &c. *Mirth*, *birth*, and *firm*, are the only exceptions to this rule; where *i* is pronounced like *e*, and as if the words were written, *merth*, *berth*, and *ferm*.

109. The letter *r*, in this case, seems to have the same influence on this vowel, as it evidently has on *a* and *o*. When these vowels come before double *r*, or single *r*, followed by a vowel, as in *arable*, *carry*, *marry*, *orator*, *horrid*, *forage*, &c. they are considerably shorter than when the *r* is the final letter of the word, or when it is succeeded by another consonant, as in *arbour*, *car*, *mar*, *or*, *nor*, *for*. In the same manner, the *i*, coming before either double *r*, or single *r*, followed by a vowel, preserves its pure, short sound, as in *irritate*, *conspiracy*, &c. but when *r* is followed by another consonant, or is a final letter of a word with the accent upon it, the *i* goes into a deeper and broader sound, equivalent to short *e*, as heard in *virgin*, *virtue*, &c. So *fir*, a tree, is perfectly similar to the first syllable of *ferment*, though often corruptly pronounced like *fur*, a skin. *Sir* and *stir* are exactly pronounced as if written *sur* and *stur*.

110. The sound of *i*, in this situation, ought to be the more carefully attended to, as letting it fall into the sound of *u*, where it should have the sound of *e*, has a grossness in it approaching to vulgarity. A want of attention to the different sound of this letter, when followed by *r*, succeeded by a vowel, and when followed by the same letter, succeeded by a consonant, has betrayed Mr. Sheridan into the inaccuracy of pronouncing the *i* in the word *virulent*, and its compounds, like the same letter in *virgin* and *virtue*: a fault which the dullest ear may detect.

111. There is an irregular pronunciation of this letter, which has greatly multiplied within these few years, and that is, the slender sound heard in *ee*. This sound is chiefly found in words derived from the French and Italian languages; and we think we show our breeding by a knowledge of those tongues, and an ignorance of our own *. When Lord Chesterfield wrote his letters to his son, the word *oblige* was, by many polite speakers, pronounced as if written *obleege*, to give a hint of their knowledge of the French language; nay, Pope had rhymed it to this sound:

Dreading ev'n fools, by flatterers besieg'd,
And so obliging, that he ne'er oblig'd.

But it was so far from having generally obtained, that Lord Chesterfield strictly enjoins his son to avoid this pronunciation as affected. In a few years, however, it became so general, that none but the lowest vulgar ever pronounced it in the English manner; but upon the publication of this nobleman's letters, which was about twenty years after he wrote them, his authority has had so much influence with the polite world as to bid fair for restoring the *i*, in this word, to its original rights; and we not unfrequently hear it now pronounced with the broad English *i*, in those circles where, a few years ago, it would have been an infallible mark of vulgarity.

* Report of fashions in proud Italy,
Whose manners still our tardy apish nation
Limps after, in base awkward imitation.

SHAKESPEARE, RICHARD II.

112. The words that have preserved the foreign sound of *i*, like *ee*, are the following: *Ambergris*, *verdegris*, *antique*, *beeafico*, *bombafin*, *brafil*, *capiivi*, *capuchin*, *colbertine*, *chioppine*, *caprice*, *chagrin*, *chevaux de frise*, *critique* (for criticism), *festucine*, *gabardine*, *haberdine*, *fordine*, *rugine*, *trepbine*, *quarantine*, *routine*, *fascine*, *fatigue*, *intrigue*, *glacis*, *invalid*, *machine*, *magazine*, *marine*, *palanquin*, *pique*, *police*, *profile*, *recitative*, *serpigo*, *vertigo*, *tabourine*, *tambourine*, *terrene*, *tontine*, *utramarine*. In all these words, if for the last *i* we substitute *ee*, we shall have the true pronunciation. In *signior* the first *i* is thus pronounced. Mr. Sheridan pronounces *vertigo* and *serpigo*, with the accent on the second syllable, and the *i* long, as in *tie* and *pie*. Dr. Kenrick gives these words the same accent, but sounds the *i*, as *e* in *tea* and *pea*. The latter is, in my opinion, by far the preferable pronunciation. But if the English ear were unbiassed by the long *i* in Latin, which fixes the accent on the second syllable, and could free itself from the slavish imitation of the French and Italians, there is little doubt but these words would have the accent on the first syllable, and the *i* pronounced regularly like the short *e*, as in *Indigo* and *Portico*.

113. There is a remarkable alteration in the sound of this vowel, in certain situations, where it changes to a sound equivalent to initial *y*. The situation that occasions this change is, when the *i* precedes another vowel in an unaccented syllable, and is not preceded by any of the dentals: thus we hear *iary* in *mil-iary*, *bil-iafy*, &c. pronounced as if written *mil-yary*, *bil-yary*, &c. *Min-ion* and *pin-ion*, as if written *min-yon* and *pin-yon*. In these words the *i* is so totally altered to *y*, that pronouncing the *ia* and *io* in separate syllables would be an error the most palpable; but where the other liquids or mutes precede the *i* in this situation, the coalition is not so necessary: for though the two latter syllables of *convivial*, *participial*, &c. are extremely prone to unite into one, they may, however, be separated, provided the separation be not too distant.

114. But the sound of the *i*, the most difficult to reduce to rule, is, when it ends a syllable, immediately before the accent. When either the primary or secondary accent is on this letter, it is invariably pronounced either as the long *i* in *title*, the short *i* in *tittle*, or the French *i* in *magazine*; and when it ends a syllable after the accent, it is always sounded like *e*, as *sen-fi-ble*, *ra-ti-fy*, &c. But when it ends a syllable, immediately before the accent, it is sometimes pronounced long, as in *vi-ta-li-ty*, where the first syllable is exactly like the first of *vi-al*; and sometimes short, as in *di-gest*, where the *i* is pronounced as if the word were written *de-gest*.

The sound of the *i*, in this situation, is so little reducible to rule, that none of our writers on the subject have attempted it; and the only method to give some idea of it, seems to be the very laborious one of classing such words together as have the *i* pronounced in the same manner, and observing the different combinations of other letters that may possibly be the cause of the different sounds of this.

115. In the first place, where the *i* is the only letter in the first syllable, and the accent is on the second, the vowel has its long diphthongal sound, as in *idea*, *identity*, *idolatry*, *idoneous*, *irascible*, *ironical*, *isoseles*, *itinerant*, *itinerary*, *iota*. *Imagine* and its compounds seem the only exceptions.

116. When *i* ends the first syllable, and the accent is on the second, commencing with a vowel, it generally preserves its diphthongal sounds. Thus in *di-ameter*, *di-urnal*, &c. the first syllable is equivalent to the verb to *die*. A corrupt, foreign manner of pronouncing these words may sometimes mince the *i* into *e*, as if the words were written *de-ameter*, *de-urnal*, &c.; but this is disgusting to every just English ear, and contrary to the whole current of analogy. Besides, the vowel that ends, and the vowel that begins a syllable, are, by pronouncing the *i* long, kept more distinct, and not suffered to coalesce, as they are apt to do if *i* has its slender sound. This proneness of the *e*, which is exactly the slender sound of *i* to coalesce with the succeeding vowel, has produced such monsters in pronunciation as *jog-graphy* and *jommetry* for *geography* and *geometry*; and *jorgics* for *georgics*. The latter of these words is fixed in this absurd pronunciation without remedy; but the two former seem recovering their right to

four syllables; though Mr. Sheridan has endeavoured to deprive them of it, by spelling them with three. Hence we may observe, that those who wish to pronounce correctly, and according to analogy, ought to pronounce the first syllable of *bi-ography*, as the verb to *buy*, and not as if written *be-ography*.

117. When *i* ends an initial syllable without the accent, and the succeeding syllable begins with a consonant, the *i* is generally slender, as if written *e*. But the exceptions to this rule are so numerous, that nothing but a catalogue will give a tolerable idea of the state of pronunciation in this point.

118. When the prepositive *bi*, derived from *bis*, twice, ends a syllable immediately before the accent, the *i* is long, in order to convey more precisely the specific meaning of the syllable. Thus *bi-capsular*, *bi-cipital*, *bi-cipitous*, *bi-cornous*, *bi-corporal*, *bi-dental*, *bi-farious*, *bi-furcated*, *bi-linguous*, *bi-nocular*, *bi-pennated*, *bi-petalous*, *bi-quadrate*, have the *i* long.

119. The same may be observed of words beginning with *tri*, having the accent on the second syllable. Thus *tri-bunal*, *tri-corporal*, *tri-chotomy*, *tri-gintals*, have the *i* ending the first syllable long, as in *tri-al*. To this class ought to be added, *di-petalous*, and *di-lemma*, though the *i* in the first syllable of the last word is almost always pronounced like *e*, and as if written *de-lemma*. And hence we may conclude, that the verb to *bi-sect*, and the noun *bi-section*, ought to have the *i* at the end of the first syllable, pronounced like *buy*, though otherwise marked by Mr. Sheridan.

120. When the first syllable is *chi*, with the accent on the second, the *i* is generally long, as *chi-rurgical*, *chi-rurgic*, *chi-rurgeon*, *chi-rographist*, *chi-rographer*, *chi-rography*. *Chi-mera* and *chi-merical* have the *i* most frequently short; though otherwise marked by Sheridan and Kenrick; and, indeed, the short sound seems now established. *Chicane* and *chicanery*, from the French, have the *i* always short; or more properly slender.

121. *Ci* before the accent has the *i* generally short, as *ci-vilian*, *ci-vility*, and, I think, *ci-licious* and *ci-nerulent*, though otherwise marked by Mr. Sheridan. *Ci-barious* and *ci-tation* have the *i* long.

122. *Cli* before the accent has the *i* long, as *cli-macter*.

123. *Cri* before the accent has the *i* generally long, as *cri-nigerous*, *cri-terion*; though we sometimes hear the latter as if written *cre-terion*, but I think improperly.

124. *Di* before the accented syllable, beginning with a consonant, has the *i* almost always short; as *digest*, *digestion*, *digress*, *digression*, *dilute*, *dilution*, *diluvian*, *dimension*, *dimensive*, *dimidiation*, *diminish*, *diminutive*, *diploma*, *direct*, *direction*, *diversify*, *diversification*, *diversion*, *diversity*, *divert*, *divertisement*, *divertive*, *divest*, *divestiture*, *divide*, *dividable*, *dividant*, *divine*, *divinity*, *divisible*, *divisibility*, *divorce*, *divulge*. To these, I think, may be added, *dicacity*, *didactic*, *dilacerate*, *dilaceration*, *dilaniate*, *dilapidation*, *dilate*, *dilatable*, *dilatability*, *dilection*, *dilucid*, *dilucidate*, *dilucidation*, *dinetical*, *dinumeration*, *diverge*, *divergent*, *divan*; though Mr. Sheridan has marked the first *i* in all these words long; some of them may undoubtedly be pronounced either way; but why he should make the *i* in *diploma* long is unaccountable. *Diarexis* and *dioptrics* have the *i* long, according to the general rule (116), though the last is absurdly made short by Dr. Kenrick, and the diphthong is made long in the first by Mr. Sheridan, contrary to one of the most prevailing idioms in pronunciation; which is, the shortening power of the antepenultimate accent. Let it not be said that the diphthong must be always long, since *Cæsarea* has the *e* always short.

125. The long *i*, in words of this form, seems confined to the following: *Digladation*, *dijudication*, *dinumeration*, *divaricate*, *direption*, *diruption*. Both Johnson and Sheridan, in my opinion, place the accent of the word *didascalie* improperly upon the second syllable; it should seem more agreeable to analogy to class it with the numerous terminations in *ic*, and place the accent on the penultimate syllable; and, in this case, the *i* in the first will be shortened by the secondary accent, and the syllable pronounced like *did*. The first *i* in *dimissory*, marked long by Mr. Sheridan, and with the accent on

the second syllable, contrary to Dr. Johnson, are equally erroneous. The accent ought to be on the first syllable, and the *i* short, as in the adjective *dim*.

126. *Fi* before the accent ought always to be short : this is the sound we generally give to the *i* in the first syllable of *fi-delity* ; and why we should give the long sound to the *i* in *fiducial* and *fiduciary*, as marked by Mr. Sheridan, I know not : he is certainly erroneous, in marking the first *i* in *frigidity* long, and equally so in placing the accent upon the last syllable of *finite*. *Finance* has the *i* short universally.

127. *Gigantic* has the *i* in the first syllable always long.

128. *Li* has the *i* generally long, as *li-bation*, *li-brarian*, *li-bration*, *li-centious*, *li-pothymy*, *li-quescent*, *li-thography*, *li-thotomy*. *Litigious* has the *i* in the first syllable always short. The same may be observed of *libidinous*, though otherwise marked by Mr. Sheridan.

129. *Mi* has the *i* generally short, as in *militia*, *mimographer*, *minacious*, *minacity*, *miraculous* ; though the four last are marked with the long *i* by Mr. Sheridan ; and what is still more strange, he marks the *i* which has the accent on it long in *minatory* ; though the same word, in the compound *comminatory*, where the *i* is always short, might have shewn him his error. The word *mimetic*, which, though in very good use, is neither in Johnson nor Sheridan, ought to be pronounced with the first *i* short, as if written *mi-metic*. The *i* is generally long in *micrometer*, *micrography*, and *migration*.

130. *Ni* has the *i* long in *nigrescent*. The first in *nigrification*, though marked long by Mr. Sheridan, is shortened by the secondary accent, and ought to be pronounced as if divided into *nig-ri-fi-cation*.

131. *Phi* has the *i* generally short, as in *philanthrophy*, *philippic*, *philosopher*, *philosophy*, *philosophize* ; to which we may certainly add, *philologer*, *philologist*, *philology*, *philological*, notwithstanding Mr. Sheridan has marked the *i* in these words long.

132. *Pi* has the *i* generally short, as *pilafter*, *pituitous*. *Piafter* and *piazza*, being Italian words, have the *i* short before the vowel, contrary to the analogy of words of this form (116), where the *i* is long, as in *pi-acular*, *pri-ority*, &c. *Piratical* has the *i* marked long by Mr. Sheridan, and short by Dr. Kenrick. The former is, in my opinion, more agreeable both to custom and analogy, as the sound of the *i* before the accent is often determined by the sound of that letter in the primitive word.

133. *Pri* has the *i* generally long, as in *primeval*, *primevous*, *primitial*, *primero*, *primogeneal*, *primogeniture*, *primordial*, *privado*, *privation* ; but *privative*, and its derivatives, with the accent on the *i*, seem very properly marked with the *i* short by Mr. Sheridan, as these words have the antepenultimate and preantepenultimate accent, which has generally a shortening power, as in *privilege*, *primitive*, *prevalency*, &c.

134. *Ri* has the *i* short, as in *ridiculous*. *Rigidity* is marked with the *i* long by Mr. Sheridan, and short by Dr. Kenrick : the latter is undoubtedly right. *Rivality* has the *i* long in the first syllable, in compliment to *rival*, as *piratical* has the *i* long, because derived from *pirate*.

135. *Si* has the *i* generally short, as *similitude*, *siestas*, and ought certainly to be short in *flicious*, (better written *cilicious*,) though marked long by Mr. Sheridan. *Simultaneous* having the secondary accent on the first syllable, does not come under this head, but retains the *i* long, notwithstanding the shortening power of the accent it is under.

136. *Ti* has the *i* short, as in *timidity*.

137. *Tri* has the *i* long, for the same reason as *bi*, which see.

138. *Vi* has the *i* so unsettled as to puzzle the correctest speakers. The *i* is generally long in *vicarious*, notwithstanding the short *i* in *vicar*. It is long in *vibration*, from its relation to *vibrate*. *Vitality* has the *i* long, like *vital*. In *vivificate* and *viviparous*, the first *i* is long, to avoid a too great sameness with the second. *Vivaceous* and *vivacity* have the first *i* almost as often long as short ; but
the

the short sound seems less formal and most agreeable to polite usage. *Vicinity, vicinal, vicissitude, vituperate, vimineous, and virago*, seem to prefer the short *i*, though Mr. Sheridan has marked the three last words with the first vowel long.

139. The same diversity and uncertainty in the sound of this letter seem to reign in those final unaccented syllables which are terminated with the mute *e*. Perhaps the best way to give some tolerable idea of the analogy of the language in this point, will be, to show the general rule, and mark the exceptions; though these are sometimes so numerous as to make us doubt of the rule itself; in which case, the best way will be to give a catalogue of both.

140. There is, however, one rule of very great extent, in words of this termination, which have the accent on the penultimate syllable, and that is, that the *i* in the final syllable of these words is short. Thus *servile, hostile, respite, deposit, &c.* are pronounced as if written *servil, hostil, respit, deposit, &c.* The only exceptions in this numerous class of words seem to be the following: *Exile, edile, empire, umpire, feline, archives*; the nouns, *confiner* and *supine*: *saline* and *contrite* have sometimes the accent on the first, and sometimes on the last syllable; but in either case the *i* is long. *Quagmire* and *pismire* have the *i* long also; *likewise*, has the *i* long, but *otherwise*, has it more frequently short. *Myrrhine, vulpine, and gentile*, though marked with the *i* long by Mr. Sheridan, ought, in my opinion, to conform to the general rule, and be pronounced with the *i* short: for the quantity of this vowel seems, in a great measure, to be determined by the quantity of that which precedes it: if the preceding vowel is long, this is generally long likewise, and inversely.

141. But when the accent is on the last syllable but two in words of this termination, the length of the vowel is not so easily ascertained.

142. Those ending in *ice* have the *i* short, except *sacrifice* and *rockatrice*.

143. Those ending in *ide* have the *i* long, notwithstanding we sometimes hear *suicide* absurdly pronounced, as if written *suicid*.

144. Those ending in *ife* have the *i* long, except *housewife*, pronounced *buzzwiff*, according to the general rule, notwithstanding the *i* in *wife* is always long. *Midwife* is sometimes shortened in the same manner by the vulgar; and *se'nnight*, for *sevensnight*, is gone irrecoverably into the same analogy; though *fortnight*, for *fourteennight*, is more frequently pronounced with the *i* long than short.

145. Those ending in *ile* have the *i* short, except *reconcile, chamomile, estipile*. *Juvenile, mercantile, and puerile*, have the *i* long in Sheridan's Dictionary, and short in Kenrick's. In my opinion the latter is the much more prevalent and polite pronunciation; but *infantile*, though pronounceable both ways, seem inclinable to lengthen the *i* in the last syllable.

146. In the termination *ime*, *pantomime* has the *i* long, rhyming with *time*; and *maritime* has the *i* short, as if written *maritim*.

147. Words in *ine*, that have the accent higher than the second syllable, have the quantity of *i* so uncertain, that the only method to give an idea of it will be to exhibit a catalogue of words where it is pronounced differently.

148. But first it may not be improper to see the different sounds given to this letter in the same words by different writers on this subject:

	Sheridan		Kenrick		Sheridan		Kenrick
Long	{ <i>Columbine</i> <i>Saccharine</i> <i>Saturnine</i>	Short	{ <i>Columbine</i> <i>Saccharine</i> <i>Saturnine</i>	Short	{ <i>Metalline</i> <i>Cryſtalline</i> <i>Uterine</i>	Long	{ <i>Metalline</i> <i>Chryſtalline</i> <i>Uterine</i>

149. In these words, I do not hesitate to pronounce Mr. Sheridan the best guide, except in the word *metalline*. The general rule inclines evidently to the long *i*, which, in doubtful cases, ought always to be followed; and for which reason I shall enumerate those words first where I judge the *i* ought to be pronounced long. *Canabine, carabine, columbine, Jacobine, concubine, muscadine, incarnadine, telandine, almandine, secundine, amygdaline, crystalline, vituline, calamine, afinine, saturnine, saccharine, adulterine, viperine, uterine, lamentine, armentine, serpentine, turpentine, vespertine, belluine, porcupine, countermine, leonine, sapphirine*, and, I think, *metalline*.

150. The words of this termination, where the *i* is short, are the following: *Medicine, discipline, masculine, jessamine, feminine, heroine, nectarine, libertine, genuine, hyaline*. To these, I think, ought to be added, *alkaline, aquiline, coralline, brigantine, eglantine*: and to this pronunciation of the *i*, the proper names, *Valentine* and *Constantine*, seem strongly to incline.

151. The only words ending in *ire*, with the accent on the antepenultimate syllable, is *acrospire*: and in this the *i* is long; the last syllable sounding like the *spire* of a church.

152. Words ending in *ise* have the *i* short, when the accent is on the last syllable but one, except the compounds ending in *wife*, as *likewise, lengthwise, &c.* but even among these words we sometimes hear *otherwise* pronounced *otherwiz*, as marked by Mr. Sheridan, but, I think, improperly.

153. When the accent is on the last syllable but two in these words, they are invariably pronounced with the *i* long, as *criticise, equalise*.

154. In the termination *ite*, when the accent is on it, the *i* is always long, as *requite*. When the accent is on the last syllable but one, it is always short, as *respite*; pronounced as if written *respit*, except *contrite*; but when the accent is on the last syllable but two, the *i* is generally long: the exceptions, however, are so many, that a catalogue of both will be the best rule.

155. The *i* is long in *expedite, recondite, incondite, hermaphrodite, carmelite, theodolite, cos-mopolite, chrysolite, bedlamite, eremite, aconite, margarite, marcasite, parasite, appetite, bipartite, tripartite, convertite, anchorite, pituite, satellite*. As the word stands in Kenrick's Dictionary *sa-tell-it*, having the *i* short, and the accent on the second syllable, it is doubly wrong.

156. The *i* is short in *definite, indefinite, infinite, hypocrite, favourite, requisite, pre-requisite, perquisite, exquisite, apposite, and opposite*. *Heteroclit* has the *i* long in Sheridan, but short in Kenrick. The latter is, in my opinion, the best pronunciation; but *ite*, in what may be called a Gentile termination, has the *i* always long, as in *Hivite, Samnite, cosmopolite, &c.*

157. The termination *ive*, when the accent is on it, is always long, as in *bive*, except in the two verbs, *give, live*, and their compounds, *giving, living, &c.*; for the adjective *live*, as a *live animal*, has the *i* long, and rhymes with *strive*: so has the adjective and adverb, *lively* and *livelily*: the noun *live-lihood* follows the same analogy; but the adjective *live-long*, as the *live-long day*, has the *i* short, as in the verb.

158. All the other adjectives and substantives of this termination, when the accent is not on it, have the *i* invariably short, as *offensive, defensive, &c.* The *i* in *salique* is short, as if written *sallick*, but long in *oblique*, rhyming with *pike, strike, &c.*; while the *i* in *antique* has the *i* long and slender, and rhymes with *speak*. Dr. Kenrick has *obleek* for *oblique*, and Mr. Sheridan *oblake*. The latter is, in my opinion, right.

159. All the terminations in *ize* have the *i* long, except to *endenize* and to *enfranchise*; which, having the accent on the second syllable, follow the general rule, and have the *i* short, pronounced as in the verb *is* (140.)

Thus we see how little regularity there is in the sound of this letter, when it is not under the accent, and, when custom will permit, how careful we ought to be to preserve the least trace of analogy,
that,

that, “confusion may not be worse confounded.” The sketch that has been just given may, perhaps, afford something like a clew to direct us in this labyrinth, and it is hoped it will enable the judicious speaker to pronounce with more certainty and decision.

160. It was remarked under the vowel *A*, that when a hard *g* or *e* preceded that vowel, a sound like *e* interposed, the better to unite the letters, and soften the sound of the consonant. The same may be observed of the letter *I*. When this vowel is preceded by hard *g* or *k*, which is but another form for hard *c*, it is pronounced as if an *e* were inserted between the consonant and the vowel. Thus *sky*, *kind*, *guide*, *guise*, *disguise*, *guile*, *beguile*, *mankind*, are pronounced as if written *ske-y*, *ke-ind*, *gue-ise*, *disgue-ise*, *gue-ile*, *begue-ile*, *manke-ind*. At first sight we are surprised that two such different letters as *a* and *i* should be affected in the same manner by the hard gutturals, *g*, *c*, and *k*; but when we reflect that *i* is really composed of *a* and *e*, our surprise ceases; and we are pleased to find the ear perfectly uniform in its procedure; and entirely unbiassed by the eye. From this view of the analogy we may form a judgement of the observation of a late writer on this subject, that “*ky-ind* for *kind* is a monster of pronunciation, heard only on our stage.”—Nare’s Orth. p. 28.—See No. 92.

O.

161. Grammarians have generally allowed this letter but three sounds. Mr. Sheridan instances them in *not*, *note*, *prove*. For a fourth, I have added the *o* in *love*, *dove*, &c. for a fifth, that in *or*, *nor*, *for*; and a sixth, that in *woman*, *wolf*, &c.

162. The first, and only peculiar sound of this letter, is, that by which it is named in the alphabet. It requires the mouth to be formed, in some degree, like the letter, in order to pronounce it. This may be called its long open sound, as the *o* in *prove* may be called its long slender sound. This sound we find in words ending with silent *e*, as *tone*, *bone*, *alone*; or when ending a syllable with the accent upon it, as *mo-tion*, *po-tent*, &c. likewise in the monosyllables, *go*, *fo*, *no*. This sound is found under several combinations of other vowels with this letter, as in *moan*, *groan*, *bow* (to shoot with,) *low* (not high.)

163. The second sound of this letter is called its short sound, and is found in *not*, *got*, *lot*, &c. though this, as in the other short vowels, is by no means the short sound of the former long one, but corresponds exactly to that of *a* in *what*, with which the words *not*, *got*, *lot*, are perfect rhymes. The long sound, to which the *o* in *not* and *fo* are short ones, is found under the diphthong *au* in *naught*, and the *ou* in *fought*; corresponding exactly to the *a* in *ball*, *ball*, &c.

164. The third sound of this letter, as was remarked in the first observation, may be called its long slender sound, corresponding to the double *o*. The words where this sound of *o* occurs are so few, that it will be easy to give a catalogue of them. *Prove*, *move*, *behave*, and their compounds, *lose*, *do*, *ado*, *Rome*, *poltron*, *ponton*, *sponton*, *who*, *whom*, *womb*, *tomb*. *Sponton* is not in Johnson; and this and the two preceding words ought rather to be written with *oo* in the last syllable. *Gold* is pronounced like *goold* in familiar conversation; but in verse and solemn language, especially that of the Scripture, ought always to rhyme with *old*, *fold*, &c.

165. The fourth sound of this vowel is that which is found in *love*, *dove*, &c. and the long sound, which seems the nearest relation to it, is the first sound of *o* in *note*, *tone*, *rove*, &c. This sound of *o* is generally heard when it is shortened by the succeeding liquids *n*, *m*, *r*, and the semi-vowels *v*, *z*, *th*: and as an ingenious writer has given a catalogue of these words, I shall avail myself of his labour. *Above*, *affront*, *among*, *amongst*, *attorney*, *bomb*, *bombard* (the noun,) *borage*, *borough*, *brother*, *colour*, *come*, *comely*,

comely, comfit, comfort, company, compass, comrade, combat, conduit, coney, conjure, constable, covenant, cover, covert, covet, covey, cozen, discomfit, done, doth, doft, dove, dozen, dromedary, front, glove, govern, honey, love, Monday, money, mongrel, monk, monkey, month, mother, none, nothing, one, onion, other, even, plover, pomegranate, pommel, polter, romage, shove, shovel, sloven, smother, some, Somerset, son, sovereign, sponge, stomach, thorough, ton, tongue, word, wonder, world, worry, worse, worship, wort, worth; to which we may add, *ease* and *comfrey*.

166. In these words the accent is on the *o* in every word, except *pomegranate*: but the *o* has the same sound, in the unaccented terminations, *-om, -on, -or,* and *-some*, as *kingdom, dominion, supervisor, troublesome*. The *o* in the adjunct *monger*, as *cheesemonger*, has likewise this sound.

167. The fifth sound of *o* is the long sound produced by *r* final, or followed by another consonant, as *for, former*. This sound is perfectly equivalent to the diphthong *au*; and *for* and *former* might, on account of sound only, be written *faur* and *faurmer*.

168. *O*, like *A*, is lengthened before *r*, when terminating a monosyllable, or followed by another consonant, and, like *a* too, is shortened by a duplication of the liquid; as we may hear by comparing the conjunction *or* with the same letters in *torrid, florid, &c.* for though the *r* is not doubled to the eye in *florid*, yet as the accent is on it, it is as effectually doubled to the ear, as if written *florrid*: so if a consonant of another kind succeed the *r* in this situation, we find the *o* as long as in a monosyllable. Thus the *o* in *orchard* is as long as in the conjunction *or*, and that in *formal* as in the word *for*: but the *o* in *orifice* and *forage*, where the *r* is followed by a vowel, the *o* is as short as if the *r* were double, and the words written *orrifice* and *forrage*.

169. There is a sixth sound of *o* exactly corresponding to the *u* in *bull, full, pull, &c.* which, from its existing only in the following words, may be called its irregular sound. These words are, *woman, bosom, worsted, wolf*, and the proper names, *Wolfey, Worcester, and Wolverhampton*.

170. What was observed of the *a*, when followed by a liquid and a mute, may be observed of the *o* with equal justness. This letter, like *a*, has a tendency to lengthen, when followed by a liquid and another consonant, or by *s, fs,* or *s* and a mute. But this length of *o*, in this situation, seems every day growing more and more vulgar: and, as it would be gross to a degree to sound the *a* in *castle, mask, and plant*, like the *a* in *palm, psalm, &c.* so it would be equally exceptionable to pronounce the *o* in *moses, dross, and frost*, as if written *mauwse, drawse, and frawst*. The *o* in the compounds of *solve*, as *dissolve, absolve, resolve*, seem the only words where a somewhat longer sound of the *o* is agreeable to polite pronunciation.

U.

171. The first sound of *u*, heard in *tube*, or ending an unaccented syllable, as in *cubic*, is a diphthongal sound, as if *e* were prefixed, and these words were spelt *teube* and *kewbic*.

172. The second sound of *u* is the short sound, which tallies exactly with the *o* in *done, son, &c.* which every ear perceives might, as well for the sound's sake, be spelt *dun, fun, &c.*

173. The third sound of this letter, and that in which the English more particularly depart from analogy, is the *u* in *bull, full, pull, &c.* The first, or diphthongal *u* in *tube*, seems almost as peculiar to the English as the long sound of the *i* in *thine, mine, &c.*: but here, as if they chose to imitate the Latin, Italian, and French *u*, they leave out the *e* before the *u*, which is heard in *tube, mule, &c.* and do not pronounce the latter part of *u* quite so long as the *oo* in *pool*, nor so short as the *u* in *dull*, but with a middle sound between both, which is the true short sound of the *oo* in *coo* and *woo*, as may be heard by comparing *woo* and *wool*; the latter of which is a perfect rhyme to *bull*.

174. This middle sound of *u*, so unlike the general sound of that letter, exists only in the following words:

words : *bull*, *full*, *pull* ; words compounded of *full*, as *wonderful*, *dreadful*, &c. *bullock*, *bully*, *bullet*, *bulwark*, *fuller*, *fulling-mill*, *pulley*, *pullet*, *push*, *busb*, *busbel*, *pulpit*, *pufs*, *bullion*, *butcher*, *cushion*, *cuckoo*, *pudding*, *sugar*, *buffar*, *buzza*, and *put* when a verb ; but few as they are, except *full*, which is a very copious termination, they are sufficient to puzzle Englishmen who reside at any distance from the capital, and to make the inhabitants of Scotland and Ireland, (who, it is highly probable, received a much more regular pronunciation from our ancestors) not unfrequently the jest of fools.

175. But vague and desultory as this sound of the *u* may at first seem, on a closer view we find it chiefly confined to words which begin with the mute labials, *b*, *p*, *f*, and end with the liquid labial *l*, or the dentals *s*, *t*, and *d*, as in *bull*, *full*, *pull*, *busb*, *push*, *pudding*, *pufs*, *put*, &c. Whatever, therefore, was the cause of this whimsical deviation, we see its primitives are confined to a very narrow compass : *put* has this sound only when it is a verb ; for *putty*, a paste for glass, has the common sound of *u*, and rhymes exactly with *nutty*, (having the qualities of a nut) ; so *put*, the game at cards, and the vulgar appellation of *country put*, follow the same analogy. All *Bull*'s compounds regularly follow their primitive. But though *fuller*, a whitener of cloth, and *Fulham*, a proper name, are not compounded of *full*, they are sounded as if they were ; while *Putney* follows the general rule, and has its first syllable pronounced like the noun *put*. *Pulpit* and *pullet* comply with the peculiarity on account of their resemblance to *pull*, though nothing related to it ; and *butcher* and *pufs* adopt this sound of *u* for no reason but the nearness of their form to the other words : and when to these we have added *cushion*, *sugar*, *cuckoo*, *buffar*, and the interjection *buzza*, we have every word in the whole language where the *u* is thus pronounced.

176. Some speakers, indeed, have attempted to give *bulk*, and *punish* this obtuse sound of *u*, but luckily have not been followed. The words which have already adopted it are sufficiently numerous ; and we cannot be too careful to check the growth of so unmeaning an irregularity.

177. It must be remarked, that this sound of *u* never extends to words from the learned languages ; for *fulminant*, *fulmination*, *ebullition*, &c. sound the *u*, as in *dull*, *gull*, &c. and the *u* in *pus* and *puftule* is exactly like the same letter in *thus*. So the pure English words, *busb*, *bulge*, *bustle*, *bustard*, *buzzard*, preserve the *u* in its second sound, as in *us*, *bull*, and *custard*.

178. But the strangest deviation of this letter from its regular sound is in the words *busy*, *business*, and *bury*. We laugh at the Scotch for pronouncing these words, as if written *bewsy*, *bewsfiness*, and *bewry* ; but we ought rather to blush for ourselves in departing so wantonly from the general rule as to pronounce them *bizzy*, *bizness*, and *berry*.

179. There is an incorrect pronunciation of this letter when it ends a syllable, not under the accent which prevails, not only among the vulgar, but is sometimes found in better company ; and that is giving the *u* an obscure sound, which confounds it with vowels of a very different kind. Thus we not unfrequently hear *singular*, *regular*, and *particular*, pronounced as if written *sing-e-lar*, *reg-e-lar*, and *par-tick-e-lar* ; but nothing tends more to tarnish and vulgarize the pronunciation than this short and obscure sound of the unaccented *u*. It may, indeed, be observed, that there is scarcely any thing more distinguishes a person of mean and good education than the pronunciation of the unaccented vowels. When vowels are under the accent, the prince and the lowest of the people, with very few exceptions, pronounce them in the same manner ; but the unaccented vowels in the mouth of the former have a distinct, open, and specific sound, while the latter often totally sink them, or change them, into some other sound. Those, therefore, who wish to pronounce elegantly must be particularly attentive to the unaccented vowels ; as a neat pronunciation of these, forms one of the greatest beauties of speaking.

Y final.

180. *Y* final, either in a word or syllable, is a pure vowel, and has exactly the same sound as *i* would have in the same situation. For this reason printers, who have been the great correctors of our orthography, have substituted the *i* in its stead, on account of the too great frequency of this letter in the English language. That *y* final is a vowel, is universally acknowledged; nor need we any other proof of it than its long sound, when followed by *e* mute, as in *rhyme*, *rhyme*, &c. or ending a syllable with the accent upon it, as *buy*, *cyder*, &c. this may be called its first vowel sound.

181. The second sound of the vowel *y* is its short sound, heard in *system*, *syntax*, &c.

182. The unaccented sound of this letter at the end of a syllable, like that of *i* in the same situation, is always like the first sound of *e*. Thus *vanity*, *pleurisy*, &c. if sound alone were consulted, might be written *vanitee*, *pleurisee*, &c.

183. The exception to this rule is, when *f* precedes the *y* in a final syllable; the *y* is then pronounced as long and open as if the accent were on it. Thus *justify*, *qualify*, &c. have the last syllable sounded like that in *defy*. This long sound continues when the *y* is changed into *i*, in *justifiable*, *qualifiable*, &c. The same may be observed of *multiply* and *multipliable*, &c.

184. There is an irregular sound of this letter when the accent is on it in *panegyric*, when it is frequently pronounced like the second sound of *e*; but would, perhaps, be more correct if its true sound were preserved, and it were to rhyme with *Pyrrhic*.

185. But the most uncertain sound of this letter is, when it ends a syllable immediately preceding the accent. In this case it is subject to the same variety as the letter *i* in the same situation, and nothing but a catalogue will give us any idea of the analogy of the language in this point.

186. The *y* is long in *chylaceous*, but shortened by the secondary accent in *chylification* and *chylifactive*; though, without the least reason from analogy, Mr. Sheridan has marked one *y* long, and the other short.

187. Words composed of *hydro*, from the Greek ὕδωρ, *water*, have the *y* generally long, as *hydrography*, *hydrographer*, *hydrometry*, *hydropic*. The same sound of *y* prevails in *hydraulics* and *hydatides*. *Hygrometer* and *hygrometry* seem to follow the same analogy, as well as *hyperbola* and *hyperbole*; which are generally heard with the *y* long; though Kenrick has marked the latter short. *Hypostasis* and *hypotenuse* ought to have the *y* long likewise. In *hypothesis* the *y* is more frequently short than long; and in *hypothetical* it is more frequently long than short; but *hypocrisy* has the first *y* always short. *Myrabolan* and *myropolist* may have the *y* either long or short. *Mythology* has the first *y* generally short, and *mythological* almost always. *Phytivorous*, *phytography*, *phytology*, have the first *y* always long. In *phylactery* the first *y* is generally short, and in *physician* always. *Pylorus* has the *y* long in Mr. Sheridan, but, I think, improperly. In *pyramidal* he marks the *y* long, though, in my opinion, it is generally heard short, as in *pyramid*. In *pyrites*, with the accent on the second syllable, he marks the *y* short, much more correctly than Kenrick, who places the accent on the first syllable, and marks the *y* long. *Synodic*, *synodical*, *synonima*, and *synopsis*, have the *y* always short: *synechdoche* ought likewise to have the same letter short, as we find it in Kenrick's Dictionary; though in Sheridan's we find it marked long. *Typography* and *typographer* ought to have the first *y* long, though frequently heard short; and though *tyrannical* has the *y* frequently short likewise, it ought rather to incline to the long sound.

188. From the view that has been taken of the sound of the *i* and *y* immediately before the accent, it may justly be called the most uncertain part of pronunciation. Scarcely any reason can be given why custom prefers one sound to the other in some words; and why, in others, we may use either one or the other indiscriminately. It is strongly to be presumed that the *i* and *y*, in this situation, particularly the last,

last, was generally pronounced long by our ancestors, but that custom has gradually inclined to the shorter sound as more readily pronounced, and as more like the sound of these letters when they end a syllable after the accent; and, perhaps, we should contribute to the regularity of the language, if, when we are in doubt, we should rather incline to the short than the long sound of these letters.

W final.

189. That *w* final is a vowel, is not disputed (9); when it is in this situation, it is equivalent to *oo*; as may be perceived in the sound of *vow*, *row-el*, &c. where it forms a real diphthong, composed of the *a* in *wa-ter*, and the *oo* in *woo* and *coo*.

It is often joined to *o* at the end of a syllable, without affecting the sound of that vowel; and in this situation it may be called servile, as in *bow*, to shoot with; *crow*, *low* (not high), &c.

DIPHTHONGS.

190. A diphthong is a double vowel, or the union or mixture of two vowels pronounced together, so as only to make one syllable: as the Latin *ae* or *e*, *oe* or *æ*, the Greek *eu*, the English *ai*, *au*, &c.

191. This is the general definition of a diphthong; but if we examine it closely, we shall find in it a want of precision and accuracy*. If a diphthong be two vowel sounds in succession, they must necessarily form two syllables, and therefore, by its very definition, cannot be a diphthong; if it be such a mixture of two vowels as to form but one simple sound, it is very improperly called a diphthong, nor can any such simple mixture exist.

192. The only way to reconcile this seeming contradiction, is to suppose that two vocal sounds in succession were sometimes pronounced so closely together as to form only the time of one syllable in Greek and Latin verse. Some of these diphthongal dissyllables we have in our own language, which only pass for monosyllables in poetry. Thus *hire* (wages) is no more than one syllable in verse, though perfectly equivalent to *higher* (more high) which generally passes for a dissyllable: the same may be observed of *dire* or *dyer*, *hour* and *power*, &c. This is not uniting two vocal sounds into one simple sound, which is impossible, but pronouncing two vocal sounds in succession so closely as to go for only one syllable in poetry.

193. It would be rather curious than useful to enquire whether all diphthongs had not originally a double vocal sound; but it is certain that, in the ancient languages, several of them dropped the sound of one of the vowels, and were diphthongs only to the eye. That several of the Greek diphthongs were merely ocular, is proved by Mr. Primatt in his Treatise on the Greek Accents, where he observes that the verse pronounced by the Oracle, having the word *λοιμός* in it, mentioned by Thucydides, was not known to signify pestilence rather than *λιμός* famine, till the plague at Athens was thought to decide it in favour of the former: which is certainly a convincing proof, that had there not been a similarity of sound in the two words, *λοιμός* and *λιμός*, which occasioned an ambiguity in their meaning, there could have been no foundation for the remark of the historian; which was, that the event only cleared up the difficulty. Many other instances from antiquity are produced by Mr. Primat, in his Treatise on Greek Accents; which makes it more than probable, that some of the Greek diphthongs, at least, were originally emitted with the sound of one letter only.

194. But this opinion of the ancient Greek diphthongs, whether true or false, is not intended to prove any thing with respect to our own tongue. Whatever may have been the original sound of the diph-

* We see how many disputes the simple and ambiguous nature of vowels created among grammarians, and how it has begot the mistake concerning diphthongs: all that are properly so are syllables, and not diphthongs, as intended to be signified by that word. *Holder.*

thongs in that language, in our own, we find, that most of those vocal assemblages that go under the name of diphthongs emit but a simple sound, and that not compounded of the two vowels, (which is impossible) but one of them only, sounded long: thus *pain* and *pane*, *pail* and *pale*, *bear* and *bere*, are perfectly the same sounds.

195. These observations naturally lead us to a distinction of diphthongs into proper and improper. The proper are such as have two distinct vocal sounds, and the improper such as have but one.

196. The proper diphthongs are,

<i>eu</i> feud	<i>io</i> passion	<i>ow</i> now	<i>ue</i> manfuetude
<i>ew</i> jewel	<i>oi</i> voice	<i>oy</i> boy	<i>ui</i> languid
<i>ia</i> poniard	<i>ou</i> pound	<i>ua</i> affuage	

197. The improper diphthongs are,

<i>ea</i> Cæsar	<i>aw</i> law	<i>eo</i> people	<i>oe</i> oeconomy
<i>ai</i> aim	<i>ea</i> clean	<i>ey</i> they	<i>oo</i> moon
<i>ao</i> goal	<i>ee</i> reed	<i>ie</i> friend	<i>ow</i> crow.
<i>au</i> taught	<i>ei</i> ceiling	<i>oa</i> coat	

198. The triphthongs having but two sounds are merely ocular, and must therefore be classed with the proper diphthongs:

<i>aye</i> (for ever)	<i>eon</i> plenteous	<i>iew</i> view
<i>eau</i> beauty	<i>ieu</i> adieu	<i>oenu</i> manoeuvre.

Of all these combinations of vowels we shall treat in their alphabetical order.

Æ.

199. *Æ* or *æ*, a diphthong, says Dr. Johnson, of very frequent use in the Latin language, which seems not properly to have any place in the English; since the *æ* of the Saxons has been long out of use, being changed to *e* simple; to which, in words frequently occurring, the *æ* of the Romans is, in the same manner, altered, as in *equator*, *equinoctial*, and even in *Eneas*.

200. But though the diphthong *æ* is perfectly useless in our language, and the substitution of *e* in its stead, in *Cæsar* and *Eneas*, is recommended by Dr. Johnson, we do not find his authority has totally annihilated it; especially in proper names and technical terms, derived from the learned languages. *Cæsar*, *Eneas*, *Æsop*, *pæan*, *æther*, *æthiops* mineral, *amphibæna*, *anacephalæosis*, *aphæresis*, *ægilops*, *oxæna*, &c. seem to preserve the diphthong as well as certain words which are either plurals or genitives, in Latin words not naturalised, as *cornucopiæ*, *exuviæ*, *aqua vitæ*, *minutiæ*, *stria*.

201. This diphthong, when not under the accent, in *Michaelmas*, and when accented in *dedal*, is pronounced like short *e*. It is, like *e*, subject to the short sound when under the secondary accent, as in *Ænobarbus*, where *æn*, in the first syllable, is pronounced exactly like the letter *n*.

AI.

202. The sound of this diphthong is exactly like the long slender sound of *a*; thus *pail*, a vessel, and *pale*, a colour, are perfectly the same sound. The exceptions are but few.

203. When *said* is the third person preterimperfect tense of the verb to *say*, *ai* has the sound of short *e*, and *said* rhymes with *bed*: but when this word is an adjective, as the *said* man, it is regular, and rhymes with *trade*.

204. *Plaid*, a striped garment, rhymes with *mad*.

205. *Raillery* is a perfect rhyme to *salary*; and *raisin*, a fruit, is pronounced exactly like *reason*, the distinctive faculty of man.

206. *Again* and *against* sound as if written *agen* and *agenst*.

207. The *aisle* of a church is pronounced exactly like *isle*, an island ; and is sometimes written *ile*.

208. When this diphthong is in a final unaccented syllable the *a* is sunk, and the *i* pronounced short. Thus *mountain*, *fountain*, *captain*, *curtain*, *villain*, are all pronounced as if written *mountin*, *fountin*, *captin*, *curtin*, *villin* ; but when the last word takes an addition syllable, the *i* is dropped, and the *a* has its short sound ; as *villanous*, *villany*.

209. The *ai* in *Britain* has the short sound approaching to *u*, so common with all the vowels in final unaccented syllables, and is pronounced exactly like *Briton*.

210. *Plait*, a fold of cloth, is regular, and ought to be pronounced like *plate*, a dish ; pronouncing it so as to rhyme with *meat* is a vulgarism, and ought to be avoided.

211. *Plaster* belongs no longer to this class of words, being now more properly written *plaster*, rhyming with *caster*.

AO.

212. This combination of vowels in a diphthong is only to be met with in the word *gaol*, now more properly written, as it is pronounced, *jail*.

AU.

213. The general sound of this diphthong is that of the noun *awe* ; as *taught*, *caught*, &c. or of the *a* in *ball*, *ball*, &c.

214. When these letters are followed by *n* and another consonant, they change to the second sound of *a*, heard in *far*, *father*, &c. Thus *aunt*, *baunt* ; *daunt*, *askaunce*, *askaunt*, *flaunt*, *baunt*, *gauntlet*, *jaunt*, *baunch*, *launch*, *craunch*, *jaundice*, *laundry*, have the Italian sound of the *a* in the last syllable of *papa* and *mamma*. To these I think ought to be added, *daunt*, *paunch*, *gaunt*, and *saunter*, as Dr. Kenrick has marked them with the Italian *a*, and not as if written *dawnt*, *paunch*, &c. as Mr. Sheridan sounds them. *Maund*, a basket, is always pronounced with the Italian *a*, and nearly as if written *marnd* ; for which reason *Maundy* Thursday, which is derived from it, ought, with Mr. Nares, to be pronounced in the same manner, though generally heard with the sound of *aw*. To *maunder*, to grumble, is neither in Sheridan nor Kenrick ; and though generally heard as if written *maunder*, ought certainly to be pronounced as Mr. Nares has classed it, with the Italian *a*. The same may be observed of *taunt*, which ought to rhyme with *aunt*, though sounded *tawnt* by Mr. Sheridan ; and being left out of the above list, supposed to be so pronounced by Mr. Nares.

215. *Laugh* and *draught*, which are very properly classed by Mr. Nares among these words, which have the long Italian *a* in *father*, are marked by Mr. Sheridan with his first sound of *a* in *bat*, lengthened into the sound of *a* in *father*, by placing the accent on it. *Staunch* is spelled without the *u* by Johnson, and therefore improperly classed by Mr. Nares in the above list.

216. *Vaunt* and *avaunt* seem to be the only real exceptions to this sound of *a* in the whole list ; and as these words are chiefly confined to tragedy, they may be allowed to “ fret and strut their hour upon the stage” in the old traditionary sound of *awe*.

217. This diphthong is pronounced like long *o* in *hautboy*, as if written *ho-boy* ; and like *o* short in *cowslower*, *laurel*, and *laudanum* ; as if written *colliflower*, *lorrel*, and *loddanum*. In *gauge*, *au* has the sound of slender *a*, and rhymes with *page*.

218. There is a corrupt pronunciation of this diphthong among the vulgar, which is, giving the *au* in *daughter*, *sauce*, *saucer*, and *saucy*, the sound of the Italian *a*, and nearly as if written *darter*, *farce*, *farcèr*, and *farcy* ; but this pronunciation cannot be too carefully avoided. *Au* in *sausage* also, is sounded

by the vulgar with short *a*, as if written *saſſage*; but in this, as in the other words, ~~as~~ ought to found *awe*.

AW.

219. Has the long broad ſound of *a* in *ball*, with which word *bawl* is perfectly identical. It is always regular.

AY.

220. This diphthong, like its near relation *ai*, has the ſound of ſlender *a* in *pay*, *day*, &c. and is pronounced like long *e* in the word *quay*, which is now ſometimes ſeen written *key*; for if we cannot bring the pronunciation to the ſpelling, it is looked upon as ſome improvement to bring the ſpelling to the pronunciation; a moſt pernicious practice in language.

221. To *ſlay*, to ſtrip off the ſkin, alſo, is corruptly pronounced *ſlea*; but the diphthong in this word ſeems to be recovering its rights.

222. There is a wanton departure from analogy in orthography, by changing the *y* in this diphthong to *i*, in the words *paid*, *ſaid*, *laid*, for *payed*, *ſayed*, and *layed*. Why theſe words ſhould be written with *i*, and thus contracted, and *played*, *prayed*, and *delayed*, remain at large, let our wiſe correctors of orthography determine. *Stayed* alſo, a participial adjective, ſignifying *ſteady*, is always written *ſſaid*.

223. When *ay* comes immediately after the accent in a final ſyllable, like *ai*, it drops the former vowel, in the colloquial pronunciation of the days of the week. Thus as we pronounce *captain*, *curtain*, &c. as if written *captin*, *curtin*, &c. ſo we hear *Sunday*, *Monday*, &c. as if written *Sundy*, *Mondy*, &c. A more diſtinct pronunciation of *day*, in theſe words, is a mark of the northern dialect.

224. The familiar aſſent *ay* for *yes*, is a combination of the long Italian *a* in the laſt ſyllable of *papa*, and the firſt ſound of *e*. If we give the *a* the ſound of that letter in *ball*, the word degenerates into a coarſe, ruſtic pronunciation. Though in the Houſe of Commons, where this word is made a noun, we frequently, but not correctly, hear it ſo pronounced, in the phraſe, *the ayes have it*.

AYE.

225. This triphthong is a combination of the ſlender ſound of *a*, heard in *pa-per*, and the *e* in *me-tre*. The word which it compoſes, ſignifying *ever*, is almoſt obſolete.

E A.

226. The regular ſound of this diphthong, is that of the firſt ſound of *e* in *here*; but its irregular ſound of ſhort *e* is ſo frequent, as to make a catalogue of both neceſſary; eſpecially for thoſe who are unſettled in the pronunciation of the capital, and wiſh to practice in order to form a habit.

227. The firſt ſound of *ea* is like open *e*, and is heard in the following words:—*Aſſeard*, *anneal*, *appeal*, *appear*, *appeaſe*, *aread*, *arrear*, *beacon*, *beadle*, *beadroll*, *beads*, *beadſman*, *beagle*, *beak*, *beaker*, *beam*, *bean*, *beard*, *bearded*, *beaſt*, *beat*, *beaten*, *beaver*, *beleaguer*, *beneath*, *bequoath*, *bereave*, *beſmear*, *beſpeak*, *bleach*, *bleak*, *blear*, *bleat*, *bobea*, *breach*, *bream*, to *breath*, *ceaſe*, *cheap*, *cheat*, *clean*, *cleanly* (adverb) *clear*, *clearance*, *cleave*, *cochineal*, *colleague*, *conceal*, *congeal*, *cream*, *creak*, *creaſe*, *creature*, *deacon*, *deal*, *dean*, *deanery*, *dear*, *deceaſe*, *deceaſance*, *deſeaſible*, *deſeat*, *demean*, *demeanor*, *deceaſe*, *dream*, *drear*, *dreary*, *each*, *eager*, *eagle*, *egre*, *ear*, *eaſt*, *eaſter*, *eaſy*, to *eat*, *eaten*, *caves*, *entreat*, *endear*, *eſcheat*, *fear*, *fearful*, *feaſible*, *feaſibility*, *feaſt*, *feat*, *feature*, *ſea*, *ſteam*, *freak*, *gear*, *gleam*, *glean*, to *greafe*, *greafe*, *greaves*, *beal*, *heap*, *bear*, *béat*, *beath*, *beathen*, *beave*, *impeach*, *increase*, *inſeam*, *interleave*, *knead*, to *lead*,
leaf,

leaf, league, leak, lean, lease, leach, leasing, least, leave, leaves, mead, meagre, meal, mean, meat, measles, meatb, neat, neap, near, neat, pea, peace, peak, peal, pease, peat, plea, plead, please, reach, to read, ream, reap, rear, rearward, reason, recheat, redstreak, release, repeal, repeat, retreat, reveal, squeak, scream, seal, sea, seam, seamy, scan, fear, fearcloth, season, seat, shear, shears, sheath, sheathe, sheaf, sleazy, sneak, sneaker, sneakup, speak, spear, steal, steam, streak, stream, streamer, streamy, surcease, tea, teach, tead, teague, teal, team, tear, tease, teat, treacle, treason, treat, treatise, treatment, treaty, tweag, tweak, tweague, weal, underneath, uneasy, unreave, uprear, weak, weaken, weal, weald, wean, weanling, weariness, wearisome, weary, weasand, weasel, weave, wheal, wheat, wheaten, wreak, wreath, wreathe, wreathy, yea, year, yeanning, yearling, yearly, yest, zeal.

228. In this catalogue we find *beard* and *bearded* sometimes pronounced as if written *berd* and *berded*: but this corruption of the diphthong, which Mr. Sheridan has adopted, seems confined to the Stage.

229. The preterimperfect tense of *eat* is sometimes written *ate*, particularly by Lord Bolingbroke, and frequently, and, perhaps, more correctly, pronounced *et*, especially in Ireland; but *eaten* always preserves the *ea* long.

230. *Ea* in *fearful* is long when it signifies *timorous*, and short when it signifies *terrible*, as if written *ferful*.

231. To *read* is long in the present tense, and short in the past, and participle; which are sometimes written *red*.

232. *Teat*, a dug, is marked by Dr. Kenrick with short *e* like *tit*, but more properly by Mr. Sheridan with the long *e*, rhyming with *meat*.

233 *Beat*, the preterimperfect tense, and participle of *to beat*, is frequently pronounced in Ireland like *bet* (a wager): and if utility were the only object of language, this would certainly be the preferable pronunciation, as nothing tends more to obscurity than verbs which have no different form for their present and past times; but fashion in this, as in many other cases, triumphs over use and propriety, and *bet*, for the past time and participle of *beat*, must be religiously avoided.

234. *Ea* is pronounced like the short *e* in the following words: *abreast, ahead, already, bedstead, behead, bespread, bestead, bread, breadth, breakfast, breast, breath, cleanse, cleanly* (adjective) *cleanlily, dead, deadly, deaf, deafen, dearth, death, earl, earldom, early, earn, earnest, earth, earthen, earthy, endeavour, feather, bead, beady, health, beard, bearse, heaven, heavy, jealous, impearl, instead, lead, leaden, leant*, (the past time and participle of *to lean*) *learn, learning, leather, leaven, meadow, meant, measure, pearl, peasant, pheasant, pleasant, pleasantry, pleasure, read* (past time and participle) *readily, readiness, ready, realm, rehearsal, rehearse, research, seamstresses, scarce, search, spread, stead, steadfast, steady, stealth, stealthy, sweat, sweaty, thread, threaten, threat, threaten, treachery, tread, treadle, treasure, uncleanly, wealth, wealthy, weapon, weather, yearn, zealot, zealous, zealously.*

235. I have given the last three words, compounded of *zeal*, as instances of the short sound of the diphthong, because it is certainly the more usual sound; but some attempts have lately been made in the House of Commons to pronounce them long, as in the noun. It is a commendable zeal to endeavour to reform the language as well as the constitution; but whether, if these words were altered, it would be a real reformation, may admit of some dispute.—See Enclitical Termination.

236. *Heard*, the past time and participle of *bear*, is sometimes corruptly pronounced with the diphthong long, so as to rhyme with *rear'd*; but this is supposing the verb to be regular; which, from the spelling, is evidently not the case.

237. It is, perhaps, worth observation, that when this diphthong comes before *r*, it is apt to slide into the short *u*, which is undoubtedly very near the true sound, but not exactly. Thus pronouncing *earl, earth, dearth*, as if written *url, urth, durt*, is a slight deviation from the true sound, which is exactly

exactly that of *i* before *r*, followed by another consonant, in *virtue*, *virgin*; and that is the true sound of short *e* in *vermin*, *vernal*, &c.

238. *Leant*, the past time and participle of to *lean*, is grown vulgar: the regular form *leaned* is preferable.

239. The past time and participle of the verb to *leap* seems to prefer the irregular form; therefore, though we almost always hear to *leap* rhyming with *reap*, we generally hear *leaped*, written and pronounced *leapt*, rhyming with *wept*.

240. *Ea* is pronounced like long slender *a* in *bare*, in the following words: *bear*, *bearer*, *break*, *forbear*, *forswear*, *great*, *pear*, *steak*, *swear*, to *tear*, *wear*.

241. The word *great* is sometimes pronounced as if written *greet*, generally by people of education, and almost universally in Ireland; but this is contrary to the fixed and settled practice in England. That this is an affected pronunciation, will be perceived in a moment by pronouncing this word in the phrase, *Alexander the great*; for those who pronounce the word *greet*, in other cases will generally in this rhyme it with *fate*. It is true the *ee* is the regular sound of this diphthong; but this slender sound of *e* has, in all probability, given way to that of *a* as deeper and more expressive of the epithet *great*.

242. The same observations are applicable to the word *break*; which is much more expressive of the action when pronounced *brake* than *breek*, as it is sometimes affectedly pronounced.

243. *Ea* is pronounced like the long Italian *a* in *father*, in the following words: *heart*, *bearty*, *bearten*, *bearth*, *bearken*.

244. *Ea*, unaccented, has an obscure sound, approaching to short *u* in *vengeance*, *serjeant*, *pageant*, and *pageantry*.

EAU.

245. This is a French, rather than an English, triphthong, being found only in words derived from that language. Its sound is that of long open *o*, as *beau*, *bureau*, *flambeau*, *portmanteau*. In *beauty* and its compounds it has the first sound of *u*, as if written *bewty*.

EE.

246. This diphthong, in all words, except those that end in *r*, has a squeezed sound of long open *e* formed by a closer application of the tongue to the roof of the mouth, than in that vowel singly, which is distinguishable to a nice ear, in the different sounds of the verbs to *flee* and to *meet*, and the nouns *flea* and *meat*. This has always been my opinion; but upon consulting some good speakers on the occasion, and in particular Mr. Garrick, who could find no difference in the sound of these words, I am less confident in giving it to the public. At any rate the difference is but very trifling, and I shall, therefore, consider it as equivalent to the long open *e*.

247. This diphthong is irregular only in the word *breeches*, pronounced as if written *britches*. *Cbeefecake*, sometimes pronounced *chizcake*, and *breech*, *britch*, I look upon as vulgarisms. *Beelzebub*, indeed, in prose, has generally the short sound of *e*, as in *bell*: and when these two letters form but one syllable, in the poetical contraction of *e'er* and *ne'er*, for *ever* and *never*, they are pronounced as if written *air* and *nair*.

EI.

248. The general sound of this diphthong seems to be the same as *ey*, when under the accent; which is like long slender *a*; but the other sounds are so numerous as to require a catalogue of them all.

249. *Ei* has the sound of long slender *a* in *deign*, *vein*, *rein*, *reign*, *feign*, *feint*, *veil*, *beinous*, *beir*,
beirefs,

beirefs, inveigh, weigh, neigh, skein, reins, their, theirs, eight, freight, weight, neighbour, and their compounds.

250. *Ei* has the found of long open *e* in *here*, in the following words and their compounds: to *ceil*, *ceiling*, *conceit*, *deceit*, *receipt*, *conceive*, *perceive*, *deceive*, *receive*, *inveigle*, *seize*, *seisin*, *seignior*, *seignory*, *seine*, *plebeian*, *obeisance*.

251. *Leisure* is sometimes pronounced as rhyming with *pleasure*; but, in my opinion, very improperly; for if it be allowed that custom is equally divided, we ought, in this case, to pronounce the diphthong long, as more expreffive of the idea annexed to it (241).

252. *Either* and *neither* are fo often pronounced *eye-ther* and *nigh-ther*, that it is hard to fay to which class they belong. Analogy, however, without hesitation, gives the diphthong the found of long open *e*, and rhymes them with *breather*, one who breathes. This is the pronunciation Mr. Garrick always gave to these words, and which is undoubtedly the true one. We sometimes, indeed, hear the diphthongs in these words sounded like slender *a*, as if written *ay-ther* and *nay-ther*; but this pronunciation must be carefully avoided.

253. *Ei* has the found of long open *i* in *height* and *flight*, rhyming with *white* and *right*. *Height*, indeed, often heard rhyming with *eight* and *weight*, and that among very respectable speakers; but custom seems to decide in favour of the other pronunciation, that it may better tally with the adjective *high*, of which it is the abstract.

254. *Ei* has the found of short *e* in the two words *heifer* and *nonpareil*, pronounced *beffer* and *nonparell*.

255. This diphthong, when unaccented like *ai* (208), drops the former vowel, and is pronounced like short *i* in *foreign*, *foreigner*, *forfeit*, *forfeiture*, *kerchief*, *handkerchief*, *sovereign*, *sovereignty*, *surfeit*, *counterfeit*.

EO.

256. This diphthong is pronounced like *e* long in *people* and *enfeoff*, as if written *peeple* and *enseef*; and like *e* short in *leopard* and *jeopardy*, as if written *leppard* and *jeppardy*; and in the law terms *feoffee*, *feoffer*, and *feoffment*, as if written *feffee*, *feffer*, and *feffment*.

257. We frequently hear these vowels contracted into short *o* in *geography* and *geometry*, as if written *joggraphy* and *jometry*; but this gross pronunciation seems daily wearing away, and giving place to that which separates the vowels into two distinct syllables, as it is always heard in *geographical*, *geometer*, *geometrical*, and *geometrician*. *Georgic* is always heard as if written *jorgic*, and must be given up as incorrigible (116).

258. *Eo* is heard like long *u* in *feud*, *feodal*, *feodatory*, which are sometimes written as they are pronounced, *feud*, *feudal*, *feudatory*.

259. *Eo*, when unaccented, has the found of *u* short in *surgeon*, *surgeon*, *dudgeon*, *gudgeon*, *bludgeon*, *curmudgeon*, *dungeon*, *luncheon*, *puncheon*, *truncheon*, *burgeon*, *habergeon*; but in *scutcheon*, *escutcheon*, *pigeon*, and *widgeon*, the *eo* sounds like short *i*.

260. *Eo* sounds like long *o* in *yeoman* and *yeomanry*; the first syllable of which words rhyme with *go*, *no*, *so*.

261. *Eo* in *galleon*, a Spanish ship, sounds as if written *galloon*, rhyming with *moon*.

EOU.

262. This triphthong is often contracted into one syllable in prose, and poets never make it go for two. In *cutaneous* and *vitreous* two syllables are palpable; but in *gorgeous* and *outrageous* the soft *g* coalescing with *e* seems to drop a syllable.

263. This triphthong is never found but in an unaccented syllable, and generally a final one; and when it is immediately preceded by the dentals *d* or *t*, it melts them into the sounds of *j* and *sch*. Thus *hideous* and *piteous* are pronounced as if written *hijeous* and *pitcheous*. The same may be observed of *righteous*, *plenteous*, *bounteous*, *courteous*, *beauteous*, and *duteous*.

EU.

264. This diphthong is always sounded like long *u* or *ew*; and is never irregular. Thus *fewd*, *deuce*, &c. are pronounced as if written *fewd*, *deuce*, &c.

EW.

265. This diphthong is pronounced like long *u*, and is almost always regular. There is a corrupt pronunciation of it like *oo* chiefly in London, where we sometimes hear *dew* and *new* pronounced as if written *doo* and *noo*.

266. *Shew* and *strew* have almost left this class, and by Johnson's recommendation are become *show* and *srow*, as they are pronounced. The proper name *Sbrewsbury*, however, still retains the *e*, though always pronounced *Shrowsbury*. *Sew*, with a needle, always rhymes with *no*; and *sewer*, signifying a drain, is always pronounced *shore*; but *sewer*, an officer, rhymes with *fewer*.

267. *Ew* is sometimes pronounced like *aw* in the verb to *chew*, but this is gross and vulgar. To *chew* ought always to rhyme with *new*, *view*, &c.

EWE.

268. This triphthong exists only in the word *ewe*, a female sheep; which is pronounced exactly like *yew*, a tree. There is a vulgar pronunciation of this word as if written *yoe*, rhyming with *doe*, which must be carefully avoided.

EY.

269. When the accent is on this diphthong it is always pronounced like *ay*, or like its kindred diphthong *ei*, in *vein*, *reign*, &c. Thus *bey*, *dey*, *grey*, *prey*, *they*, *trey*, *whay*, *obey*, *convey*, *purvey*, *survey*, *bey*, *eyre*, and *eyrey*, are always heard as if written *hay day*, &c. *Key* is the only exception, which always rhymes with *sea* (220).

270. *Ey*, when unaccented, is pronounced like *ee*; thus, *galley*, *valley*, *alley*, *barley*, &c. are pronounced as if written *gallee*, *vallee*, &c.

EYE.

271. This triphthong is only found in the word *eye*, which is always pronounced like the letter *I*.

IA.

272. This diphthong, in the terminations *ian*, *ial*, *iard*, and *iate*, forms but one syllable, though the *i* in this situation having the squeezed sound of *ee* perfectly similar to *y* gives the syllable a double sound, very distinguishable in its nature from a syllable formed without the *i*. Thus *Christian*, *filial*, *poniard*, *conciliate*, sound as if written *Christ-yan*, *fil-yal*, *pon-yard*, *concil-yate*, and have in the last syllable an evident duplicity of sound.

273. In *diamond*, these vowels are properly no diphthong; and in prose, the word ought to have three distinct syllables; but we frequently hear it so pronounced as to drop the *a* entirely, and as if written *dimond*. This, however, is a corruption that ought to be avoided by all elegant speakers.

274. In *carriage*, *marriage*, *parliament*, and *miniature*, the *a* is dropped, and the *i* has its short sound as if written *carridge*, *marridge*, *parlement*, *minature*.

IE.

275. The regular sound of this diphthong is that of *ee*, as in *grieve*, *thieve*, *auctionier*, *grenadier*, &c. as if written, *greeve*, *theeve*, &c.

276. It has the sound of long *i* in *die*, *hie*, *lie*, *pie*, *tie*, *vie*, as if written *dy*, *hy*, &c.

277. The short sound of *i* is heard in *fiend* and *mischievous*, as if written *fiu*, *mischiuous*.

278. In *variegate* the best pronunciation is to pronounce both vowels distinctly like *e*, as if written, *vary-e-gate*.

279. In the numeral terminations in *ieth*, as *twentieth*, *thirtieth*, &c. the vowels ought also to be kept distinct; the first like open *e*, as heard in the *y* in *twenty*, *thirty*, &c. and the second like short *e*, heard in *breath*, *death*, &c.

280. In *fiery* too, the vowels are heard distinctly.

281. In *orient* and *spaniel*, where these letters come after a liquid, they are pronounced distinctly; and great care should be taken not to let the last word degenerate into *spannel*.

282. When these letters meet, in consequence of forming the plurals of nouns, they retain either the long or short sound they had in the singular, without increasing the number of syllables. Thus a *fly* makes *flies*, a *lie* makes *lies*, *company* makes *companies*, and *dignity*, *dignities*. The same may be observed of the third persons of verbs, as *I fly*, *he flies*. *I deny*, *he denies*.

283. When *ie* is in a termination without the accent, it is pronounced like *e*, only in the same situation. Thus *braiser*, *graiser*, and *glasier*, have the last syllable sounded, as if written *brazhur*, *grazhur*, and *glazbur*.

IEU.

284. These vowels occur in *adieu*, *lien*, *purlieu*, where they have the sound of long *u*, as if written *adeu*, *lew*, *purlen*.

285. In one word, *lieutenant*, these letters are pronounced like short *e*, as if written *lev-tendant*.

IEW.

286. These letters occur only in the word *view*, where they sound like *ee*, rhyming with *few*, *new*.

IO.

287. When the accent is upon the first of these vowels they form two distinct syllables, as *priory*, *violent*, *violet*; the last of which is sometimes corruptly pronounced *vi-let*.

288. In *marchioness* the *i* is entirely sunk, and the unaccented *o* pronounced, as it usually is in this situation, like short *u*, as if written *marshuness*.

289. In *cushion* the *o* is sunk, and the word pronounced *cushin*.

290. In the very numerous termination *ion*, these vowels are pronounced in one syllable like short *u*; but when they are preceded by a liquid, as in *million*, *minion*, *clation*, &c. the two vowels are heard distinctly: the same may be observed when they are preceded by any of the other consonants, except *s* and *t*; as *champion*, *scorpion*, &c. where the vowels are heard separately: but the terminations, *tion* and *fon*, are pronounced in one syllable, and exactly like the verb *shun*.

291. The only exception to this rule is, when the *t* is preceded by *s*: in this case the *t* goes into *ich*, and the *i* is in a small degree audible like short *e*. This may be heard in *question*, *mixtion*, *digestion*, *combustion*, and what is an instance of the same kind in *Christian*, as if written *quest-yun*, *mixt-yun*, &c.

IOU.

292. This triphthong, when preceded by a liquid, or any mute but a dental, is heard distinctly in two syllables, as in *bilious*, *various*, *glorious*, *abstemious*, *ingenious*, *copious*; but when preceded by the dentals *t*, soft *c* and *s*, these vowels coalesce into one syllable, pronounced exactly like *shus*: thus *precious*, *fastidious*, *noxious*, *anxious*, are pronounced as if written *pressh-us*, *fac-shus*, *nock-shus*, *ang-shus*.

293. The same tendency of these vowels to coalesce after a dental, and draw it to aspiration, makes us hear *tedious*, *odious*, and *insidious*, pronounced as if written *te-je-us*, *o-jee-us*, and *in-sij-e-us*: for as *d* is but flat *t*, it is no wonder it should be subject to the same aspiration, when the same vowels follow. Nay, it may be affirmed, that so agreeable is this sound of the *d* to the analogy of English pronunciation, that, unless we are upon our guard, the organs naturally slide into it. It is not, however, pretended that this is the politest pronunciation; for the sake of analogy it were to be wished it were: but an ignorance of the real powers of the letters, joined with a laudable desire of keeping as near as possible to the orthography, is apt to prevent the *d* from going into *j*, and to make us hear *o-de-ous*, *te-de-ous*, &c. On the other hand, the vulgar, who in this case are right by instinct, not only indulge the aspiration of the *d*, which the language is so prone to, but are apt to contract the succeeding syllable too closely, and instead of *o-je-ous* and *te-je-ous*, say *o-jus* and *te-jus*.

294. It is with some satisfaction I see Mr. Sheridan adopt this pronunciation of these terminations, though his manner of spelling them is too apt to incline us to a too close contraction of them. Nor can I conceive why he should spell *melodious*, *me-lo-dzhus*, and *commodious*, *com-mo-dyus*, as there can be no possible difference in the sound of the terminations. If the *y* is distinctly pronounced, it sufficiently expresses the aspiration of the *d*, and is, in my opinion, the preferable mode of delineating the sound, as it keeps the two last syllables from uniting too closely. Where analogy, therefore, is so clear, and custom so dubious, we ought not to hesitate a moment at pronouncing *odious*, *tedious*, *perfidious*, *fastidious*, *invidious*, *insidious*, *compendious*, *melodious*, *commodious*, *preludious*, and *studious*, as if written *o-je-ous*, *te-je-ous*, &c. or rather *o-dyus*, *te-dyus*, &c. nor should we forget that *Indian* comes under the same analogy, and ought, though contrary to respectable usage, to be pronounced as if written *Indyan*, and nearly as *In-je-an*.

OA.

295. This diphthong is regularly pronounced as the long open sound of *o*, as in *boat*, *coat*, *oat*, *coal*, *loaf*, &c. The only exceptions are, *broad*, *abroad*, *groat*, which sound as if written *bræwd*, *abræwd*, *græwt*. *Oatmeal* is sometimes pronounced *ot-meal*, but seems to be recovering the long sound of *o*, as in *oat*.

OE.

296. Whether it be proper to retain the *o* in this diphthong, or to banish it from our orthography, as Dr. Johnson advises, certain it is, that it is always pronounced like single *e*, and comes entirely under the same laws as that vowel. Thus, when it ends a syllable, with the accent upon it, it is long, as in *An-toe-ci*, *Peri-oe-ci*. When under the secondary accent, in *oec-umenical*, *oec-onomics*, it is like *e* short. It is long *e* in *foe-tus*, and short *e* in *foet-id* and *assafoet-ida*. In *doe*, *foe*, *floe*, *toe*, *throe*, *hoe* (to dig,) and *bilboes*, it is sounded exactly like long open-*o*. In *canoe* and *shoe*, like *oo*, as if written *canoo* and *shoo*; and in the verb *does*, like short *u*, as if written *duz*.

OEI.

297. There is but one word where this triphthong occurs, and that is in Shakespeare's *King Lear*, in the word *oeiliads* (glances). If it were necessary to pronounce it, in my opinion, it ought to be sounded as if written *eye-liads*.

OEU.

298. This diphthong is from the French, in the word *manoeuvre*; a word, within these few years, of very general use in our language. It is not in Johnson, and the *oeu* is generally pronounced by those who can pronounce French, in the French manner; but this is such a sound of the *u* as does not exist in English, and therefore it cannot be described. The nearest sound is *oo*; with which, if this word is pronounced by an English speaker, as if written *manoeuvre*, it may, except with very nice French ears, escape criticism.

OI.

299. The general, and almost universal sound of this diphthong, is that of *a* in *water*, and the first *e* in *me-tre*. This double sound is very distinguishable in *boil*, *toil*, *spoil*, *joint*, *point*, *anoint*, &c. which sound ought to be carefully preserved, as there is a very prevalent practice among the vulgar of dropping the *o*, and pronouncing these words as if written *bile*, *tile*, *spile*, &c.

300. The only instance which admits of a doubt in the sound of this diphthong, when under the accent, is, in the word *choir*; but this word is now so much more frequently written *quire*, that uniformity strongly inclines us to pronounce the *oi* in *choir* like long *i*, and which, by the common orthography, seems fixed beyond recovery. I remember, very early in life, to have heard *coin* pronounced as if written *quine* by some respectable speakers; but this is now justly banished as the grossest vulgarism.

301. When this diphthong is not under the accent, it is variously pronounced. Dr. Kenrick places the accent on the first syllable of *turcois*, and, for I know not what reason, pronounces it as if written *turkiz*; and *turcois* with the *oi* broad, as in *boys*. Mr. Sheridan places the accent on the second syllable, and gives the diphthong the French sound, as if the word was written *turkaze*. In my opinion the best orthography is *turquoise*, and the best pronunciation with the accent on the last syllable, and the *oi* sounded like long *e*, as if written *turkeze*; as we pronounce *tortoise*, with the accent on the first syllable, and the *oi* like short *i*, as if written *tortiz*.

302. In *avoirduois*, the first diphthong is pronounced like short *e*, as if written *averduoise*.

303. In *connoisseur* the same sound of *e* is substituted, as if written *connesseur*.

304. In *shamois*, or *chamois*, a species of leather, the *oi* is pronounced like long *e*, as if written *shammee*.

305. *Adroit* and *devoir*, two scarcely naturalized French words, have the *oi* regular.

OO.

306. The sound of this diphthong is regular, except in a few words. It is pronounced long in *moon*, *soon*, *fool*, *rood*, *food*, *mood*, &c. This is its regular sound.

307. It has a shorter sound corresponding to the *u* in *bull*, in the words *wool*, *wood*, *good*, *hood*, *foot*, *flood*, *understood*: and these are the only words where this diphthong has this middle sound.

308. It has the sound of short *u* in the two words *blood* and *flood*, rhyming with *mud*.

309. *Soot* is vulgarly pronounced so as to rhyme with *but*, *hut*, &c. but ought to have its long, regular sound, rhyming with *boot*; as we always hear it in the compound *sooty*.

310. *Door* and *floor* are universally pronounced by the English as if written *dore* and *flore*; but in Ireland they preserve the regular sound of *oo*.

311. *Moor*, a black man, is regular in polite pronunciation, and like *more* in vulgar. *Moor*, a marsh, is sometimes heard rhyming with *store*; but more correct speakers pronounce it regularly, rhyming with *poor*.

OU.

312. This diphthong is the most irregular assemblage of words in our language. Its most common sound is that heard in *bound*, *found*, *ground*, &c. and this may be called its proper sound; but its deviations are so many and so various, that the best idea of it will be conveyed by giving the simples of all its different sounds.

313. The first or proper sound of this diphthong is composed of the *a* in *ball*, and the *oo* in *woo*, or rather the *u* in *bull*, and is equivalent to the *ow* in *down*, *frown*, &c. This sound is heard in *abound*, *about*, *account*, *acoustics*, *aground*, *aloud*, *amount*, *around*, *arouse*, *astound*, *avouch*, *bough*, *bounce*, *bound*, *bounty*, *bounteous*, *bout*, *carouse*, *chouse*, *cloud*, *clough*, *clout*, *clouterly*, *compound*, *couch*, *cochant*, *crouch*, *deflour*, *devour*, *devout*, *doubt*, *doubtful*, *drought*, *doughty*, *douse*, *encounter*, *espouse*, *expound*, *flout*, *fowl*, *flounder*, *found*, *foundling*, *fountain*, *frousy*, *glout*, *gout* (a disease) *ground*, *grout*, *bound*, *hour*, *house*, *impound*, *loud*, *lounge*, *louse*, *lout*, *mound*, *mountain*, *mountebank*, *mouse*, *mouth*, *noun*, *ounce*, *our*, *oust*, *out*, *outer*, *outermost*, *paramount*, *plough*, *pouch*, *pounce*, *pound*, *pout*, *profound*, *pronounce*, *propound*, *proud*, *rebound*, *recount*, *redoubt*, *redoubted*, *redound*, *rencounter*, *round*, *roundelay*, *rouse*, *roust*, *scoundrel*, *scour*, *scout*, *shout*, *shroud*, *slouch*, *spouse*, *spout*, *sprout*, *stout*, *surround*, *south*, *thou*, *thousand*, *touse*, *trounce*, *trousers*, *trout*, *wound* (did wind) *slough* (a miry place) *vouch*, *vouchsafe*, *without*, and in *proneun* and *scaramouch*; though, in these words, the accent is not on the diphthong.

314. The second sound is that of short *u* in *bud*, and is heard in the following words and their compounds: *adjourn*, *journey*, *journal*, *bourgeon*, *country*, *cousin*, *couple*, *double*, *trouble*, *courteous*, *courtesy*, *courage*, *encourage*, *joust*, *gourmet*, *housewife*, *flourish*, *mounce*, *nourish*, *enough*, *chough*, *rough*, *tough*, *slough* (a cast skin) *scourge*, *southerly*, *southern*, *southernwood*, *southward*, *touch*, *touchy*, *young*, *younger*, and *youngster*, but *southern*, *southerly*, and *southward*, are sometimes pronounced regularly like *south*; this, however, is far from the prevailing pronunciation. This is the sound this diphthong always has when the accent is not on it, unless in very few instances, where the compound retains the sound of the simple, as in *pronoun*; but in *sojourn* and *sojourner*, with the accent on the first syllable, and in every unaccented termination, in *our* and *ous*, this diphthong has exactly the sound of short *u*. Thus *favour*, *honour*, and *famous*, are pronounced as if written *favur*, *honur*, and *famus*.

315. The third sound given to these vowels is that of *oo* in *coo* and *woo* (39); and is found in the following words: *Bouge*, *croup*, *group*, *aggroup*, *amour*, *paramour*, *bouse*, *boufy*, *boutefeu*, *capouch*, *cartouch*, *fourbe*, *gourd*, *gout* (taste) and *ragout* (pronounced *goo* and *ragoo*) *rendezvous*, *rouge*, *soup*, *sous* (pronounced *foo*) *surtout*, *through*, *thoroughly*, *toupee*, or *toupet*, *you*, *your*, *youth*, *tour*, *contour*, *tourney*, *tourney*, *tournament*, *pour*, and *route*, (a road) *accoutre*, *billet doux*, *agouti*, *uncouth*, *wound* (a hurt) and *routine* (a beaten road) though the diphthong on the latter has not the accent.

316. The verb to *pour* is sometimes pronounced to *pore*, and sometimes to *pouer*; in each case it interferes with a word of a different signification, and the best pronunciation, which is that similar to *poor*, is as little liable to that exception as either of the others.

317. To *wound* is sometimes pronounced so as to rhyme with *found*; but this is directly contrary to the best usage; but *route* (a road, as to take a different *route*) is often pronounced so as to rhyme with *doubt* by respectable speakers.

318. The fourth sound of this diphthong is that of long open *o*, and is heard in the following words: *though*, *although*, *coulter*, *court*, *courtier*, *course*, *discourse*, *source*, *recourse*, *resource*, *bourne*, *dough*, *doughy*, *four*, *mould*, *mouldy*, *moult*, *mourn*, *shoulder*, *smoulder*, *soul*, *poultice*, *poult*, *poulterer*, *poultry*, *troul* (to troll smoothly, marked by Mr. Sheridan as rhyming with *doll*, but more properly by Dr. Kenrick with *roll*) and *borough*, *thorough*, *furlough*, *fourteen*, *concourse*, and *intercourse*, preserve the diphthong in the sound of long *o*, though not under the accent.

321. The seventh sound is that of short *o*, and heard only in the words *cough*, and *trough*, rhyming exactly with *off* and *scoff*: and in *lough* and *skough*, pronounced *lock* and *shock*.

OW.

328. This diphthong, in the word *knowledge*, has of late years undergone a considerable revolution. Some speakers, who had the regularity of their language at heart, were grieved to see the compound depart

depart so far from the sound of the simple, and with heroic fortitude have opposed the multitude by pronouncing the first syllable of this word as it is heard in the verb to *know*. The pulpit and the bar have for some years given a sanction to this pronunciation; but the senate and the stage hold out inflexibly against it: and the nation at large seem insensible of the improvement. They still continue to pronounce, as in the old ludicrous rhymes——

“ Among the mighty men of knowledge,
“ That are professors at Gresham College.”

But if ever this word should have the good fortune to be restored to its rights, it would be but charity to endeavour the restoration of a great number of words in a similar situation, such as *breakfast*, *vineyard*, *bewilder*, *meadow*, *hearken*, *pleasure*, *whistler*, *shepherd*, *windward*, and a long catalogue of fellow sufferers. But before we endeavour this restoration we should consider, that contracting the sound of the simple, when it acquires an additional syllable, is an idiom of pronunciation to which our language is extremely prone; nor is it certain that crossing this tendency would produce any real advantage; at least, not sufficient to counterbalance the diversity of pronunciation which must for a long time prevail, and which must necessarily call off our attention from things to words.—See Enclitical Termination.

OI.

329. This diphthong is but another form for *oi*, and is pronounced exactly like it. When *alloy* is written with this diphthong, it ought never to be pronounced *allay*. Custom seems to have appropriated the former word to the noun, and the latter to the verb; for the sake of consistency, it were to be wished it were always written *allay*; but it is not to be expected that poets will give up so good a rhyme to *joy*, *cloy*, and *destroy*.

330. The only word in which this diphthong is not under the accent, is the proper name *Savoy*: for *favoy*, a plant, has the accent on the second syllable; but the diphthong in both is pronounced in the same manner.

UA.

331. When the *a* in this diphthong is pronounced, the *u* has the power of *w*, which unites both into one syllable; thus *antiquate*, *antiquary*, *assuage*, *persuade*, *equal*, *language*, &c. are pronounced *antikwate*, *antikwary*, *asswage*, *perswade*, *ekwal*, *langwage*, &c.

332. The *u* in this diphthong is silent, in *guard*, *guardian*, *guarantee*, and *piquant*; pronounced *gard*, *gardian*, *garantee*, and *pickant*.

333. In *Mantua*, the town of Italy, both vowels are heard distinctly. The same may be observed of the habit so called; but in *mantuamaker* vulgarity has sunk the *a*, and made it *mantumaker*. The same vulgarity at first, but now sanctioned by universal custom, has sunk both letters in *viċtuals*, and its compounds *viċtualling* and *viċtualler*, pronounced *vittles*, *vittling*, and *vittler*.

UE.

334. This diphthong, like *ua*; when it forms only one syllable, and both letters are pronounced, has the *u* sounded like *w*; as *consuetude*, *dessuetude*, and *mansuetude*, which are pronounced *consŵetude*, *dessŵetude*, and *mansŵetude*. Thus *conquest* is pronounced according to the general rule, as if written *conkwest*; but the verb to *conquer* has unaccountably deviated into *conker*, particularly upon the stage. This error, however, seems not to be so rooted in the general ear as to be above correction; and analogy undoubtedly demands *conkwer*.

335. This diphthong, when in a final syllable, sinks the *e*, as *clue*, *cue*, *due*, *blue*, *glue*, *huc*, *fue*, *rue*, *sue*,

sue, *true*, *mue*, *accrue*, *ensue*, *endue*, *argue*, *imbue*, *imbrue*, *pursue*, *subdue*, *perdue*, *residue*, *avenue*, *revenue*, *continue*, *retinue*, *construe*, *statue*, *tissue*, *issue*, *virtue*, *value*, *ague*, pronounced *clew*, *kew*, *dew*, &c.

336. In some words the *u* is silent, and the *e* pronounced short, as in *guesfs*, *guest*, *guerkin*, *guerdon*, where the *u* acts as a servile to preserve the *g* hard.

337. In some words both the vowels are sunk, as in *antique*, *oblique*, *league*, *feague*, *teague*, *colleague*, *plague*, *vague*, *intrigue*, *fatigue*, *harangue*, *tongue*, *disembogue*, *collogue*, *rogue*, *prorogue*, *brogue*, *fugue*; in all which the *ue* is silent, and the *g* pronounced hard. The *q* in *antique* and *oblique* is pronounced like *k*, as if the words were written *anteek* and *oblike*.

338. The terminations in *ogue*, from the Greek, are pronounced in the same manner. Thus *pedagogue*, *demagogue*, *ptysmagogue*, *menagogue*, *emmenagogue*, *synagogue*, *mystagogue*, *decalogue*, *dialogue*, *tri-ologue*, *catalogue*, *theologue*, *eclogue*, *monologue*, *prologue*, and *epilogue*, are all pronounced as if written *pedagog*, *demagog*, &c.

339. This diphthong after *r* becomes *oa*. Thus *true* is pronounced *troo*.

UI.

340. The *u* in this diphthong; as in the two last, when both vowels are pronounced without forming two syllables, is pronounced like *w*; thus *languid*, *anguish*, *languish*, *extinguish*, *distinguish*, *relinquish*, *vanquish*, *linguist*, *penguin*, *pursuivant*, *guaiacum*, are pronounced as if written *langwid*, *angwish*, &c. and *cuis* and *cuisse*, as if written *kwish* and *kwisses*, and *cuirafs*, *kwirafs*.

341. The *u* is silent, and the *i* pronounced long, in *guide*, *disguise*, *guile*, and *beguile*; but the *u* is silent, and the *i* short, in *guild*, *build*, *guilt*, *guinea*, *guitar*. *Guild*, in *Guildhall*, is, by the lower people of London, pronounced so as to rhyme with *child*; but this is directly opposite to the best usage. In *circuit* and *biscuit* the *u* is merely servile; in both, the *c* is hard, and the *i* short, as if written *furkit* and *bisket*. *Conduit* is pronounced *condit*.

342. In *juice*, *suice*, *suit*, and *pursuit*, the *i* is silent, and the *u* has its diphthongal sound, as if preceded by *e*, and the words were written *sleuce*, *jewce*, *sewt*, *pursewt*.

343. When this diphthong is preceded by *r*, it is pronounced like *oo*; thus *bruise*, *cruise*, *fruit*, *bruit*, *recruit*, are pronounced as if written *broose*, *crooze*, *broot*, *froot*, *recroot* (339).

UO.

344. The *u* in this diphthong, as in the three last, is pronounced like *w* in *quote*, *quota*, *quotation*, *quotient*, *quotidian*, *quorum*, *quondam*, *filiquose*, *quoth*, as if written *kwote*, *kwota*, *kwotation*, &c. *Coif* and *coit*, improperly pronounced *kwcoif* and *kwcoit*, do not come under this class.

UY.

345. This diphthong, with the accent on it, sinks the *u*, and pronounces the *y* like long *i*; thus *buy*, the only word where *uy* has the accent, rhymes with *dry*, *fly*, &c. When the accent is not on this diphthong it is sounded like long *e*, as *plaguy*, *roguy*, *gluy*, pronounced *pla-guee*, *ro-guee*, *glu-ee*. The same may be observed of *obloquy*, *ambiloquy*, *pauciloquy*, *soliloquy*, *ventriloquy*, *alloquy*, *colloquy*, pronounced *oblo-quee*, *ambilo-quee*, &c.

UOY.

346. This triphthong is found only in the word *buoy*, pronounced as if written *bwoy*, but too often exactly like *boy*. This, however, is an impropriety which ought to be avoided by correct speakers.

OF THE CONSONANTS.

B.

347. **W**HEN *b* follows *m* in the same syllable it is generally silent, as in *lamb*, *kemb*, *limb*, *comb*, *dumb*, &c. It is silent also before *t* in the same syllable, as in *debt*, *doubt*, *redoubt*, *redoubted*, and their compounds. It is silent before *t*, when not in the same syllable, in the word *subtle* (cunning), often inaccurately used for *subtile* (fine), where the *b* is always pronounced. In the mathematical term *rhomb* the *b* is always heard, and the word pronounced as if written *rhumb*. *Amb's-ace* is pronounced *Aims-ace*.

C.

348. *C* is always heard like *k* before *a*, *o*, and *u*, as *card*, *cord*, *curd*; and soft, like *s* before *e*, *i*, and *y*, as *cement*, *city*, *cynic*.

349. When *c* ends a word, or syllable, it is always hard, as in *music*, *flaccid*, *sic-city*, pronounced *musick*, *flack-sid*, *sick-sity*.

350. In the word *sceptic*, where the first *c*, according to analogy, ought to be pronounced like *s*, Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *skeptick*. It may be observed, perhaps, in this, as on other occasions, of that truly great man, that he is but seldom wrong; but when he is so, that he is generally wrong to absurdity. What a monster does this word *skeptick* appear to an eye the least classical or correct! and if this alteration be right, why should we hesitate to write and pronounce *scene*, *scepter*, and *Lacedæmon*, *skene*, *skepter*, and *Lakedæmon*, as there is the same reason for *k* in all? It is not, however, my intention to cross the general current of polite and classical pronunciation, which I know is that of sounding the *c* as *k*; my objection is only to writing it with the *k*; and in this, I think I am supported by the best authority since the publication of Johnson's Dictionary.

351. *G* is mute in *Gzar*, *Gzarina*, *virtuals*, and *indict*, and sounds like *tch* in *vermicelli*, *violincello*; and like *z* in *suffice*, *sacrifice*, and *discern*.

352. This letter, when connected with *h*, has two sounds; the one like *tch*, in *child*, *chair*, *rich*, *which*, &c. pronounced as if written *tchild*, *tchair*, *ritch*, *whitch*, &c. the other like *sh*, as in *belch*, *bench*, *fish*, &c. pronounced *besh*, *bensh*, *fish*, &c. This latter sound is generally given to words from the French, as *chaise*, *chagrin*, *chamade*, *champagne*, *champignon*, *chandelier*, *chaperon*, *charlatan*, *chevalier*, *cheveron*, *chicane*, *capuchin*, *cartouch*, *machine*, *machinist*, *chancre*.

353. *Ch*, in words from the learned languages, are generally pronounced like *k*, as *chalcography*, *chalybeate*, *chameleon*, *chamomile*, *chaos*, *character*, *cart*, *chasm*, *chemist* (if derived from the Arabic, and *chymist* if from the Greek) *cher'sonese*, *chimera*, *chirography*, *chiromancy*, *chlorosts*, *choler*, *choras*, *chord*, *chorography*, *chyle*, and its compounds; *anchor*, *anchoret*, *cachexy*, *catechism*, *catechise*, *catechetical*, *catechumen*, *echo*, *echinus*, *epoch*, *epocha*, *ichor*, *machination*, *machinal*, *mechanic*, *mechanical*, *orchestra*, *orchestre*, *technical*, *anarch*, *anarchy*, *conch*, *distich*, *hemistich*, *monostich*, *eunach*, *monarch*, *monarchical*, *bierarch*, *heresiarch*, *pentateuch*, *stomach*, *stomachic*, *scheme*, *school*, *scholar*, *scheffs*, *mastich*, and in all words where it is followed by *r*, as *Christ*, *Christian*, *chronology*, *chronicle*, &c. To these may be added the Celtic word *loch* (a lake). The exceptions to these are *charity*, *charge*, *archer*, and *archery*.

354. When *arch*, signifying chief, begins a word from the Greek language, and is followed by a vowel, it is always pronounced *ark*, as *archangel*, *archipelago*, *architect*, *archives*, *archetype*, *archaism*, *archiepiscopal*, *archidiaconal*, *architrave*, *archaiology*. But when we prefix *arch* to a word of our own, and

and this word begins with a consonant, we pronounce it so as to rhyme with *march*, as *archduke*, *archdeacon*, *archbishop*; and sometimes, when the following word begins with a vowel, if it is a composition of our own, and the word does not come to us compounded from the Greek or Latin, as *arch-enemy*.

355. The word *ache*, (a pain), pronounced *ake*, comes from the Greek, and was by Shakespear extended to two syllables, *aches* with *ch*, as in *watches*; but this is obsolete. It is now almost universally written *ake* and *akes*, except where it is compounded with another word, as *head-ach*, *heart-ach*, &c. and by thus absurdly retaining the *ch* in the compound, we are puzzled how to form the plural, without pronouncing *aches* in two syllables: but if this remnant of Greek must be retained, the best way would be to spell the compound *head-ache*, as the simple *ache*, with a final *e*.

356. In *choir* and *chorister* the *ch* is almost universally pronounced like *qu* (300): in *ostrich*, like *dge*, as spelled *ostridge*. It is silent in *schedule*, *schism*, and *yacht*; pronounced *seddule*, *fizm*, and *yot*. It is sunk in *drachm*, but heard in *drachma*; pronounced *dram* and *drackma*.

357. When *c* comes after the accent, and is followed by *ea*, *ia*, *ie*, *io*, or *eous*, it takes the sound of *sh*; thus *ocean*, *social*, *Phocion*, *saponaceous*, are pronounced as if written *oshean*, *soheal*, *Phoshean*, *saponasheous*.

D.

358. In order to have a just idea of the alterations of sound this letter undergoes, it will be necessary to consider its near relation to *T* (41). These consonants, like *p* and *b*, *f* and *v*, *k* and hard *g*, and *s* and *z*, are letters of the same organ; they differ by the nicest shades of sound, and are easily convertible into each other; *t*, *p*, *f*, *k*, and *s*, may, for the sake of distinction, be called sharp, and *d*, *b*, *v*, *g*, and *z*, may be called flat. For this reason, when a singular ends in a sharp consonant, the *s*, which forms the plural, preserves its sharp sound, as in *cuffs*, *packs*, *lips*, *bats*, *deaths*; and when the singular ends with a flat consonant, the plural *s* has the sound of *z*, as *drabs*, *bags*, *beads*, *lives*.

359. In the same manner, when a verb ends with a sharp consonant, the *d*, in the termination *ed*, assumed by the preterit and participle, becomes sharp, and is sounded like *t*; thus *stuffed*, *tripped*, *cracked*, *passed*, (where the *e* is suppressed, as it always ought to be, except when we are pronouncing the language of Scripture) change the *d* into *t*, as if written *stust*, *tript*, *crackt*, *past*. So, when the verb ends in a flat consonant, the *d* in *ed* preserves its true flat sound, as *drubbed*, *pegged*, *lived*, *buzzed*. It may be observed too, that when the verb ends in a liquid, or a liquid and mute *e*, the participial *d* always preserves its pure sound; as *blamed*, *joined*, *filled*, *barred*. This contraction of the participial *ed*, and the verbal *en* (103), is so fixed an idiom of our pronunciation, that to alter it, would be to alter the sound of the whole language. It must, however, be regretted, that it subjects our tongue to some of the most hissing, snapping, clashing, grinding, sounds that ever grated the ears of a Vandal. Thus *rasped*, *scratched*, *wrenched*, *bridled*, *fangled*, *birchen*, *hardened*, *strengthened*, *quicken*, &c. almost frighten us when written as they are actually pronounced, as *raspt*, *scratcht*, *wrencht*, *bridl'd*, *fangl'd*, *birch'n*, *strengtb'n'd*, *quick'n'd*, &c. but to compensate for these Gothick sounds, which, however, are not without their use, our language is full of the smoothest and most sonorous terminations of the Greeks and Romans.

360. By the foregoing rule of contraction, arising from the very nature of the letters, we see the absurdity of substituting the *t* for *ed*, when the verb ends in a sharp consonant; for, when the pronunciation cannot be mistaken, it is folly to alter the orthography. Thus the *Distressed Mother*, the title of a tragedy, needs not be written *Distress Mother*, as we generally find it, because, though we write it the former manner, it must necessarily be pronounced in the latter.

361. By this rule, too, we may see the impropriety of writing *blest* for *blessed*, when a participle.

“Blest in thy genius, in thy love too blest.”

POPE.

But when the word *blessed* is an adjective, it ought always to be pronounced, even in the most familiar conversation, in two syllables, as this is a *blessed* day, the *blessed* thistle, &c.

362. This word, with *learned*, *curfed*, and *winged*, are the only participial adjectives which are constantly pronounced in two syllables, where the participles are pronounced in one: thus a *learned* man, a *curfed* thing, a *winged* horse, preserve the *ed* in a distinct syllable; while the same words, when verbs, as *he learned to write*, *he curfed the day*, *they winged their flight*, are heard in one syllable, as if written *learnd*, *curst*, and *wingd*; the *d* in *curfed* changing to *t*, from its following the sharp consonant *s*. (358).

363. Poetry, however, (which has been one great cause of improper orthography) assumes the privilege of using these words, when adjectives, either as monosyllables or dissyllables; but correct prose rigidly exacts the pronunciation of *ed* in these words, when adjectives, as a distinct syllable. The *ed* in *aged* always makes a distinct syllable, as *an aged* man; but when this word is compounded with another, the *ed* does not form a syllable, as *a full-ag'd* horse.

364. It is, perhaps, worthy of notice, that when adjectives are changed into adverbs by the addition of the termination *ly*, we often find the participial termination *ed* preserved long and distinct, even in those very words where it was contracted when used adjectively. Thus, though we always hear *confess'd*, *profess'd*, *design'd*, &c. we as constantly hear *con-fess-ed-ly*, *pro-fess-ed-ly*, *de-sign-ed-ly*, &c. The same may be observed of the following list of words, which, by the assistance of the Rhyming Dictionary, I am enabled to give as the only words in the language, in which the *ed* is pronounced as a distinct syllable in the adverb, where it is contracted in the participial adjective: *forcedly*, *enforcedly*, *unveiledly*, *deformedly*, *feignedly*, *unfeignedly*, *discernedly*, *resignedly*, *refinedly*, *restrainedly*, *concernedly*, *unconcernedly*, *discernedly*, *undiscernedly*, *preparedly*, *assuredly*, *advisedly*, *dispersedly*, *diffusedly*, *confusedly*, *unperceivedly*, *resolvedly*, *deservedly*, *undeservedly*, *reservedly*, *unreservedly*, *avowedly*, *perplexedly*, *fixedly*, *amazedly*.

365. To this catalogue may be added several abstract substantives formed from participles in *ed*; which *ed* makes a distinct syllable in the former, though not in the latter. Thus *preparedness*, *assuredness*, *diseasedness*, *advisedness*, *reposedness*, *composedness*, *diffusedness*, *confusedness*, *distressedness*, *resolvedness*, *reservedness*, *perplexedness*, *fixedness*, *amazedness*, have *ed* pronounced distinctly.

366. The adjectives *naked*, *wicked*, *picked* (pointed), *hooked*, *crooked*, *forked*, *tusked*, and *wretched*, are not derived from verbs, and are therefore pronounced in two syllables. The same may be observed of *scabbed*, *crabbed*, *chubbed*, *stubbled*, *shagged*, *snagged*, *ragged*, *crabbed*, *dogged*, *rugged*, *scragged*, *jagged*; and these, when formed into nouns by the addition of *ness*, preserve the *ed* in a distinct syllable, as *wickedness*, *scabbedness*, *raggedness*, &c.

367. *Passed*, in the sense of beyond, becomes a preposition, and may allowably be written *past*, as *past twelve o'clock*; but when an adjective, though it is pronounced in one syllable, it ought to be written with two, as *passed pleasures are present pain*: this I know is contrary to usage; but usage is, in this case, contrary to good sense, and the settled analogy of the language.

368. It needs scarcely be observed, that when the verb ends in *t* or *d*, the *ed* in the past time and participle has the *d* pronounced with its own sound, and always forms an additional syllable, as *landed*, *matted*, &c. otherwise the final *d* could not be pronounced at all.

369. And here, perhaps, it may not be useless to take notice of the very imperfect and confused idea that is given in our best grammars, of what are called contracted verbs, such as *snatcht*, *checkt*, *snapt*, *mixt*, *dwelt*, and *past*, for *snatched*, *checked*, *snapped*, *mixed*, *dwelled*, and *passed*. To these are added those that end in *l*, *m*, and *n*, or *p*, after a diphthong; which either shorten the diphthong, or change it into a single vowel; and instead of *ed*, take *t* only for the preterit, as *dealt*, *dreamt*, *meant*, *felt*, *slept*, *crept*; and these are said to be considered not as irregular, but contracted only. Now nothing can be clearer than that verbs of a very different kind are here huddled together as of the same. *Snatched*, *checked*, *snapped*, *mixed*, and *passed*, are not irregular at all; if they are ever written *snatcht*, *checkt*, *snapt*,
mixt,

mist, and *past*, it is from pure ignorance of analogy, and not considering that if they were written with *ed*, unless we were to pronounce it as a distinct syllable, contrary to the most settled usage of the language, the pronunciation, from the very nature of the letters, must be the same. It is very different with *dwell*; here, as a liquid, and not a sharp mute, ends the verb, *d* might be pronounced without going into *t* just as well as in *fell'd*, the participle of to *fell* (to cut down trees). Here then, we find custom has determined an irregularity, which cannot be altered, without violence to the language; *dwell* may be truly called an irregular verb, and *dwelt* the preterit and participle.

370. The same may be observed of *deal*, *dream*, *mean*, *feel*, *weep*, *sleep*, and *creep*. It is certain we can pronounce *d* after the four first of these words, as well as in *sealed*, *screamed*, *cleaned*, and *reeled*; but custom has not only annexed *t* to the preterit of these verbs, but has changed the long diphthongal sound into a short one; they are therefore doubly irregular. *Weep*, *sleep*, and *creep*, would not have required *t* to form their preterits any more than *peeped*, and *sleeped*; but custom, which has shortened the diphthong in the former words, very naturally annexed *t* as the simplest method of conveying the sound.

371. The only two words which occasion some doubt about classing them are, to *learn* and to *spell*. The vulgar (who are no contemptible guides on this occasion) pronounce them in the preterit *learnt* and *spelt*; but as *n* and *l* will readily admit of *d* after them, it seems more correct to favour a tendency to regularity, both in writing and speaking, which the literary world has given into, by spelling them *learned* and *spelled*, and pronouncing them *learn'd* and *spell'd*. Thus *earned*, the preterit of to *earn*, has been recovered from the vulgar *earnt*, and made a perfect rhyme to *discerned*.

372. To these observations may be added, that, in such irregular verbs as have the present, the preterit and participle the same, as *cast*, *cast*, *cut*, &c. the second person singular of the preterit of these verbs take *ed* before the *st*, as *I cast*, or *did cast*. *Thou castedst*, or *didst cast*, &c. for if this were not the case, the second person of the preterit might be mistaken for the second person of the present tense, which in these words would render "confusion worse confounded."

373. I have been led insensibly to these observation by their connexion with pronunciation; and if the reader should think them too remote from the subject, I must beg his pardon, and resume my remarks on the sound of the letter *d*.

374. The vulgar drop this letter in *ordinary* and *extraordinary*, and make them *or'nary* and *extr'or'nary*; but this is a gross abbreviation; the best pronunciation is sufficiently short, which is *ord'nary* and *extrord'nary*; the first in three, and the last in four syllables.

375. Our ancestors, feeling the necessity of showing the quantity of a vowel followed by *ge* when it was to be short, inserted *d*, as *wedge*, *ridge*, *badge*, &c. The same reason induced them to write *colledge* and *alledge*, with the *d*; but modern reformers, to the great injury of the language, have expelled the *d*, and left the vowel to shift for itself; because there is no *d* in the Latin words from which these are derived.

376. *D* like *t*, to which it is so nearly related, when it comes after the accent, and is followed by the diphthongs *ie*, *io*, *ia* or *ou*, slides into *gz*, or the consonant *j*; thus *soldier* is universally and justly pronounced as if written *sol-jer*; *grandeur*, *gran-jeur*; and *verdure* (where it must be remembered that *u* is a diphthong) *ver-jure*; and, for the same reason, *education* is elegantly pronounced *ed-jucation*. But *Date* and *reduce*, pronounced *jake* and *re-juc*, where the accent is after the *d*, cannot be too much reprobated.

F.

377. *F* has its pure sound in *often*, *off*, &c. but, in the preposition *of*, slides into its near relation *v*, as

if written *ov*. But, when this preposition is in composition at the end of a word, the *f* becomes pure; thus, though we sound *of* singly *ov*, we pronounce it as if the *f* were double in *whereof*.

378. There is a strong tendency to change the *f* into *v* in some words, which confounds the plural number and the genitive case. Thus we often hear of a *wives jointure*, a *calves head*, and *houze rent*, for a *wife's jointure*, a *calf's head*, and *house rent*.

G.

379. G, lik C, has two sounds, a hard and a soft one. It is hard before *a, o, u, l*, and *r*, as *game*, *gone*, *gull*, *glory*, *grandeur*. *Gaol* is the only exception; now more commonly written *jail* (212).

380. G before *e* and *i* is sometimes hard and sometimes soft. It is generally soft before words of Greek, Latin, or French original, and hard before words from the Saxon. These latter, forming by far the smaller number, may be considered as exceptions.

381. G is hard before *e*, in *gear*, *Greek*, *geese*, *geld*, *gelt*, *gelding*, *get*, *gew-gaw*, *shagged*, *snagged*, *ragged*, *cragged*, *scragged*, *dogged*, *rugged*, *toged* (dressed in a toga) *dagger*, *swagger*, *stagger*, *trigger*, *dogger*, *pettyfogger*, *tiger*, *auger*, *eager*, *meager*, *anger*, *finger*, *linger*, *conger*, *longer*, *stronger*, *younger*, *longest*, *strongest*, *youngest*. The last of these words are generally pronounced in Ireland, so as to let the *g* remain in its nasal sound, without articulating the succeeding vowel; thus *longer* (more long) is so pronounced as to sound exactly like the noun a *longer* (one who longs or wishes for a thing) the same may be observed of the rest. Resting the *g* in the nasal sound, without articulating the succeeding vowel, is very proper in verbal nouns, derived from verbs ending in *ing*, as *finger*, *bringer*, *flinger*, &c. but is highly improper in the words above mentioned; for *younger* ought to rhyme exactly with the termination *monger*, which has always the *g* hard, and articulating the vowel. *Forget*, *target*, and *together*, fall into this class.

382. G is hard before *i*, in *gibbe*, *gibcat*, *gibber*, *gibberish*, *gibbous*, *giddy*, *gift*, *gig*, *giggle*, *giglet* (properly *gigglet*) *gild*, *gill* (of a fish) *gimlet*, *gimp*, *gird*, *girdle*, *girl*, *girth*, *gizzard*, *begin*, *give*, *forgive*, *biggin*, *piggin*, *noggin*: also derivatives from nouns or verbs ending in hard *g*, as *waggish*, *riggish*, *hoggish*, *doggish*, *sluggish*, *rigging*, *digging*, &c.

283. G before *y* is generally soft, as in *elegy*, *apology*, &c. and almost in all words from the learned languages; but hard in words from the Saxon, which are formed from nouns or verbs ending in *g* hard, as *shaggy*, *jaggy*, *knaggy*, *snaggy*, *craggy*, *scraggy*, *guaggy*, *swagger*, *draggy*, *springy*, *twiggy*, *boggy*, *foggy*, *cloggy*, *buggy*, *muggy*. *Gyve* naturally preserves the *g* hard from its Celtic original.

GN in the same syllable at the beginning of a word.

384. The *g* in this situation is always silent, as *gnaw*, *gnash*, *gnat*, *gnarl*, *gnomon*, *gnomonics*; pronounced *naw*, *nash*, *nat*, *narl*, *nomon*, *nomonics*.

GN in the same syllable at the end of a word.

385. No combination of letters has more puzzled the critics than this. Two actresses of distinguished merit in *Portia*, in the *Merchant of Venice*, pronounced the word *impugn* differently, and each found her advocate in the newspapers. One critic affirmed, that Miss Young, by preserving the sound of *g*, pronounced the word properly; and the other contended, that Mrs. Yates was more judicious in leaving it out. The former was charged with harshness; the latter, with mutilating the word, and weakening its sound: but if analogy may decide, it is clearly in favour of the latter; for there is no axiom in our pronunciation more indisputable than that, which makes *g* silent before *n* in the same syllable. This is constantly the case in *sign* and all its compounds, as *resign*, *design*, *consign*, *assign*; and in *indign*, *condign*, *malign*, *benign*; all pronounced as if written *fine*, *refine*, &c. In which words we find the vowel *i* long and

and open, to compensate, as it were, for the suppression of *n*; as every other word ending in *gn*, when the accent is on the syllable, has a diphthong pronounced like a long open vowel, as *arraign*, *campaign*, *feign*, *reign*, *deign*, and consequently, unless the vowel *u* can produce some special privilege which the other vowels have not, we must, if we pronounce according to analogy, make the *u* in this situation long, and sound *impugn* as if written *impune*.

386. The same analogy will oblige us to pronounce *impregn*, *oppugn*, *expugn*, *propugn*, as if written *imprene*, *oppune*, *expune*, *propune*, not only when these verbs are in the infinitive mood, but in the preterits, participles, and verbal nouns, formed from them; as *impugned*, *impugning*, and *impugner*, must be pronounced *impuned*, *impuning*, and *impuner*. The same may be observed of the rest.

387. But in every other compound where these letters occur, the *n* articulates the latter syllable, and *g* is heard distinctly in the former; as *fig-nify*, *malig-nity*, *affig-nation*, &c. Some affected speakers, either ignorant of the rules for pronouncing English, or over-complaisant to the French, pronounce *physiognomy*, *cognizance*, and *recognizance*, without the *n*; but this is a gross violation of the first principles of spelling. The only words to keep these speakers in countenance are, *poignant* and *champion*, not long ago imported from France, and pronounced *poiniant*, *champion*. The first of these words will be probably hereafter written without the *g*; while the latter, confined to the kitchen, may be looked upon as technical, and allowed an exclusive privilege.

388. *Bagnio*, *signior*, *seraglio*, *intaglio*, and *oglio*, pronounced *ban-yo*, *seen-yor*, *seral-yo*, *intal-yo*, and *ole-yo*, may be considered as foreign coxcombs, and treated with civility, by omitting the *g*, while they do not pervert the pronunciation of our native English words.

GM in the same syllable.

389. What has been said of *gn* is applicable to *gm*. We have but one word in the language where these letters end a word with the accent on it, and that is *phlegm*; in this the *g* is always mute, and the *e*, according to analogy, ought to be pronounced long, as if the word were written *fleme*; but a short pronunciation of the *e* has generally obtained, and we commonly hear it *flem*. It is highly probable Pope pronounced it properly, where he says

“ Our critics take a contrary extreme ;

“ They judge with fury, but they write with *phlegm*,”

ESSAY ON CRIT.

Perhaps it would not be difficult to reduce this word to analogy, as some speakers still pronounce the *e* long: but in the compounds of this word, as in those where *gn* occur, the vowel is shortened, and the *g* pronounced; as in *phleg-mon*, *phleg-monous*, *phleg-matic*, and *phleg-magogues*; though Mr. Sheridan, for no reason I can conceive, sinks the *g* in the last word. When these letters end a syllable, not under the accent, the *g* is silent, but the preceding vowel is shortened. Thus *paradigm*, *parapegm* *diaphragm*, *apophlegm*, are pronounced *paradim*, *parapem*, *diaphram*, *apothem*.

GH.

390. This combination, at the beginning of a word, drops the *h*, as in *ghost*, *ghastly*, *agbaff*, *gherkin*; pronounced *goff*, rhyming with *most*; *gastly*, *agast*, *guerken*. But when these letters come at the end of a word they form some of the greatest anomalies in our language; *gh*, at the end of words, is generally silent, and consequently the preceding vowel or diphthong is long, as *high*, *nigh*, *thigh*, *neigh*, *weigh*, *inveigh*, *eugh* (the obsolete way of spelling *yew*; a tree) *bough*, *dough*, *though*, *although*, *clough* (a cliff) *plough*, *furlough*, *slough* (a miry place) *through*, *throughout*, *thorough*, *borough*, *usquebaugh*, *pugh*!

391. *Gh* is frequently pronounced like *f*, as *laugh*, *laughtier*, *cough*, *chough*, *clough* (an allowance in weight) *slough* (the cast skin of a snake or sore) *enough*, *rough*, *tough*, *trough*.

392. *Gh* is sometimes changed into *ck*, as *bough*, *sough*, *lough*; sometimes we hear only the *g* sounded, as in *burgh*, *burgher*, and *burghership*.

GHT.

393. *Gh* in this termination is always silent, as *fight*, *night*, *bought*, *faught*, &c. The only exception is *draught*; which, in poetry, is most frequently rhymed with *caught*, *taught*, &c. but, in prose, is so universally pronounced as if written *draft*, that the poetical sound of it grows uncooth, and is becoming obsolete. *Draughts*, the game, is also pronounced *drafts*. *Drought* (dryness) is vulgarly pronounced *drowth*: it is even written so by Milton; but in this he is not to be imitated, having mistaken the analogy of this word, as well as that of *height*, which he spells *beighth*, and which is frequently so pronounced by the vulgar.

H.

394. This letter is no more than breathing forcibly before the succeeding vowel is pronounced. At the beginning of words, it is always sounded, except in *heir*, *heirefs*, *honest*, *honesty*, *honour*, *honourable*, *herb*, *herbage*, *hospital*, *hostler*, *hour*, *humble*, *humour*, *humourous*, *humourfome*.

395. *H* is always silent after *r*, as *rhetoric*, *rhapsody*, *rheum*, *rheumatism*, *rhinoceros*, *rhomb*, *rhubarb*, *specacuanha*, *myrrh*, *catarrh*, and their compounds.

396. *H* final, preceded by a vowel, is always silent, as *ah!* *bab!* *oh!* *foh!* *firrah*, *hallelujah*, *Messiah*.

397. This letter is often sunk after *w*, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *wear*. Trifling as this difference may appear at first sight, it tends greatly to weaken and impoverish the pronunciation, as well as sometimes to confound words of a very different meaning. The Saxons, as Dr. Lowth observes, placed the *h* before the *w*, as *hwat*; and this is certainly its true place; for in the pronunciation of all words, beginning with *wh*, we ought to breathe forcibly before we pronounce the *w*, as if the words were written *hoo-at*, *hoo-ile*, &c. and then we shall avoid that feeble, cockney pronunciation, which is so disagreeable to a correct ear.

J.

398. *J* is pronounced exactly like soft *g*, and is perfectly uniform in its sound, except in the word *hallelujah*, where it is pronounced like *y*.

K.

399. *K* has exactly the sound of hard *c*. It is always silent before *n* in the same syllable, as *knee*, *kneel*, *knack*, *knight*, *know*, *knuckle*, *knab*, *knag*, *knap*, *knare*, *knave*, *knit*, *knock*, *knot*, *knoll*.

400. It has been a custom within these twenty years to omit the *k* at the end of words, when preceded by *c*. This has introduced a novelty into the language, which is that of ending a word with an unusual letter, and is not only a blemish in the face of it, but may possibly produce some irregularity in future formatives; for *mimicking* must be written with the *k*, though to *mimic* is without it. If we use *colic* as a verb, which is not uncommon, we must write *colicking* and *coliked*; and though *physicking* and *physicked* are not the most elegant words, they are not quite out of the line of formation. This omission of *k* is, however, too general to be counteracted, even by the authority of Johnson; but it is to be hoped it will be confined to words from the learned languages: and indeed, as there is not the same vanity of appearing learned in the Saxon as in the Latin and Greek, there is no great fear that *thick* and *stuck* will lose their *k*, though they never had it in the original.

L.

401. *L* is mute in *almond, calf, half, calve, halve, chaldron, falcon, folk, yolk* (better written *yelk* with the *l* sounded) *fufil, balser, malmsey, salmon, salve, talbot* (a species of dog.)

402. *L* is mute also between *l* and *k* in the same syllable, as *balk, chalk, talk, stalk, walk*.

403. *L* is silent likewise between *a* and *m* in the same syllable, as *alms, balm, calm, palm, psalm, qualm, shalm*; but when the *m* is detached from the *l* by commencing another syllable, the *l* becomes audible. Thus, though the *l* is mute in *balm, palm, and psalm*, it is always heard in *bal-my, pal-my, psal-mist, psal-mody, and pal-mistry*. *Calmer* and *calmest* ought to have the *l* mute, as they are only degrees of comparison; and *palmer* and *palmerworm* (except in the language of Scripture, where the *l* in *palmerworm* ought to be heard) are only a sort of verbal nouns, which never alter the sound of the original word, and therefore ought to have the *l* mute. But though *l* is mute in the noun *salve*, it is heard in the verb to *salve*, and in *salver* (a kind of plate.)

404. *L* ought always to be suppressed in the auxiliary verbs *would, could, should*: it is sometimes suppressed in *fault*; but this suppression is become vulgar. In *soldier*, likewise, the *l* is sometimes suppressed, and the word pronounced *so-ger*; but this is far from being the most correct pronunciation: *l* ought always to be heard in this word, and its compounds, *soldierly, soldiership, &c.*

405. *L*, preceded by a mute, and followed by *e* in a final syllable, has an imperfect sound, which does not do much honour to our language. The *l*, in this situation, is neither sounded like *el* nor *le*, but the *e* final is suppressed, and the preceding mute articulates the *l*, without either a preceding or a succeeding vowel: so that this sound may be called a monster in Grammar—a syllable without a vowel. This will easily be perceived in the words *able, table, circle, &c.* which are pronounced as if written *abl; tabl, circl, &c.* and in those still more Gothick and uncouth abbreviated participial terminations, *peopled, bridled, saddled, &c.* pronounced *pee-pl'd, bri-dl'd, sad-dl'd, &c.* (359).

406. This letter has not only, like *f* and *s*, the privilege of doubling itself at the end of a word, but it has an exclusive privilege of being double where they remain single; though by what right cannot well be conceived. Thus, according to the general rule, when a verb ends in a single consonant, preceded by a single vowel, and the accent is on the last syllable, the consonant is doubled when a participial termination is added, as *abet, abetting, begging, beginning, &c.* but when the accent is not on the last syllable of the verb, the consonant remains single, as *suffered, suffering, benefiting, &c.* but the *l* is doubled, whether the accent be on the last syllable or not, as *duelling, levelling, victualling, travelling, traveller, &c.* This gross irregularity, however, would not have been taken notice of in this place, if it had not suggested an absurdity in pronunciation, occasioned by the omission of *l*. Though the double is useless in *traveller, victualler, &c.* it is not so in *controller*: for as *ll* is a mark of the deep broad sound of *a* in *ball, tall, all, &c.* so the same letters are the sign of the long open sound of *o* in *boll* (a round stalk of a plant) to *joll, noll* (the head), *knoll* (a little hill), *poll, clodpoll, roll, scroll, droll, troll, stroll, toll*; for which reason, leaving out one *l* in *bethral, catcal, miscal, overfal, reinstal, downfal, withal, control*, and *unrol*, as we find them in Johnson's Dictionary, is an omission of the utmost importance to the sound of the words; for as the pronunciation sometimes alters the spelling, so the spelling sometimes alters the pronunciation. Accordingly we find some speakers, chiefly the natives of Ireland, inclined to give the *a* its middle sound, to words commencing with *al*, followed by another consonant, because they do not see the *ll* in the *all* with which these words are compounded. Thus we sometimes hear *Almighty, albeit*, so pronounced as to make their first syllable rhyme with the first of *al-ley, val-ly*; and *extol* is pronounced by the Scotch so as to rhyme with *coal*; and with just as much reason as we pronounce *control* in the same manner. For though compounds may, in some cases, be allowed to drop such letters of their simples, as either are not necessary to the sound, as in *Christmas*; or might possibly lead

lead to a wrong one, as in *Reconcilable* (which see); yet where, by omitting a letter, the sound may be altered, the omission is pernicious and absurd. (84). The same observations might be extended to the numerous termination *full*, where, in compounds, one *l* is omitted, though nothing can be more certain, than that *ful*, with a single *l*, has not the same sound as when this letter is doubled: but this abbreviation is too inveterate and extensive to afford any hope, that the great arbiters of orthography, the printers, will ever submit to the additional trouble of putting another *l*.

M.

407. *M* preserves its sound in every word, except *comptroller*: *compt* and *account* are now universally written as they are pronounced *count* and *account*; and though *m* and *p* are preserved to the eye in the officer called a *comptroller*, the word is pronounced exactly like the noun *controller*, one who controls.

N.

408. *N* has two sounds; the one simple and pure, as in *man*, *net*, &c.; the other compounded and mixed, as in *hang*, *thank*, &c. The latter sound is heard when it is followed by the sharp or flat guttural mutes, *g* hard, or *k*; or its representatives, *c* hard, *qu* or *x*: but it may be observed, that so prone is our language to the flat mutes, that when *n* is followed by *k*, or its representatives—the flat mute *g* seems interposed between them. Thus *thank*, *banquet*, *anxious*, are pronounced as if written, not *than-k*, *ban-quet*, *an-xious*, but *thankg*, *bangquet*, *angksbus*. But this coalition of the sound of *n* and *g*, or hard *c*, is only when the accent is on them; for when the *g* or hard *c* articulates the accented syllable, the *n* becomes pure. Thus, though *congress* and *congregate* are pronounced as if written *cong-gress* and *cong-gregate*, yet the first syllable of *congratulate* and *congressive* ought to be pronounced without the ringing sound of *n*, and exactly like the same syllable in *contrary*. The same difference may be observed in the words *concourse* and *concur*; the first word, which has the accent on the first syllable, is pronounced as if written *cong-course*; and the last, which has the accent on the second syllable, with *n* pure.

409. It may, perhaps, be worthy of notice, that when *n* is followed by *k*, the *k* has a finished or complete sound, as in *link*, *think*, &c. but when *n* is followed by hard *g*, the *g* has an unfinished or imperfect sound, as in *hang*, *bang*, &c. where we may observe the tongue to rest upon the palate in the sound of *g*; but when this letter is carried off to articulate another syllable, its sound is completed, as in *anger* and *Bangor* (the name of a town) where the sound of *g* may be perceived to be very different from the noun *hanger* (a sword) and *banger* (one who beats or bangs.) This perfect sound of *g* is heard in all simples, as *anger*, *angle*, *finger*, *linger*, *conger*, *anguish*, *languish*, *distinguish*, *extinguish*, *unguent*: but in words derived from verbs or adjectives, ending in *ng*, the *g* continues imperfect, as it was in the theme. Thus a *finger* (one who sings) does not finish the *g* like *finger*, but is merely *er* added to *sing*: the same may be observed of *sing-ing*, *bring-ing*, and *hang-ing*. So adjectives formed by the addition of *y* have the imperfect sound of *g*, as in the original word. Thus *springy*, *stringy*, and *wingy*, are only the sound of *e* added to *spring*, *string*, and *wing*; but the comparative and superlative adjectives, *longer*, *stronger*, and *younger*; *longest*, *strongest*, and *youngest*; have the *g* hard and perfectly sounded, as if written *long-ger*, *strong-ger*, *young-ger*, &c. where the *g* is heard, as in *finger*, *linger*, &c. In these words, therefore, the Irish pronounce more agreeably to analogy than the English; for, if I mistake not, they do not articulate the *g* (381).

410. Hitherto we have considered these letters as they are heard under the accent; but when they are unaccented in the participial termination *ing*, they are frequently a cause of embarrassment to speakers who desire to pronounce correctly. We are told, even by teachers of English, that *ing*, in the word *singing*, *bringing*, and *swinging*, must be pronounced with the ringing sound, which is heard when the
accent

accent is on these letters, in *king*, *sing*, and *wing*, and not as if written without the *g*, as *singin*, *bringin*, *swingin*. No one can be a greater advocate than I am for the strictest adherence to orthography, as long as the public pronunciation pays the least attention to it; but when I find letters given up by the public, with respect to sound, I then consider them as cyphers; and, if my observation does not greatly fail me, I can assert, that our best speakers do not invariably pronounce the participial *ing*, so as to rhyme with *sing*, *king*, and *ring*. Indeed, a very obvious exception seems to offer itself in those verbs that end in these letters, as a repetition of the ringing sound in successive syllables would have a very bad effect on the ear; and therefore, instead of *singing*, *bringing*, and *flinging*, our best speakers are heard to pronounce *sing-in*, *bring-in*, and *fling-in*; and for the very same reason that we exclude the ringing sound in these words, we ought to admit it when the verb ends with *in*; for if, instead of *sinning*, *pinning*, and *beginning*, we should pronounce *sin-nin*, *pin-nin*, and *begin-nin*, we should fall into the same disgusting repetition as in the former case. The participial *ing*, therefore, ought always to have its ringing sound, except in those words formed from verbs in this termination; for *writing*, *reading*, and *speaking*, are certainly preferable to *writin*, *readin*, and *speakin*, wherever the pronunciation has the least degree of precision or solemnity.

411. *N* is mute when it ends a syllable, and is preceded by *m*, as *hymn*, *limn*, *solemn*, *column*, *autumn*, *condemn*, *contemn*. In *hym-ning* and *lim-ning* the *n* is generally pronounced, and sometimes, in very solemn speaking, in *condem-ning* and *contem-ning*; but, in both cases, contrary to analogy, which forbids any sound in the participle that was not in the verb.

P.

412. This letter is mute before *s* and *t* at the beginning of words, as *psalm*, *psalmist*, *psalmody*, *psalmography*, *psalter*, *psalttery*; the prefix *pseudo*, signifying false, as *pseudography*, *pseudology*, and the interjection *psaw*! To these we may add *ptisan*, *ptyalism*, *ptysmagogue*. It is mute in the middle of words between *m* and *t*, in *empty*, *sempstress*, *peremptory*, *sumptuous*, *presumptuous*, *redemption*, *exemption*, and *raspberry*. In *cupboard* it coalesces with, and falls into its flat sound *b*, as if written *cubboard*. It is mute in a final syllable between the same letters, as *tempt*, *attempt*, *contempt*, *exempt*, *prompt*, *accompt*. In *receipt* it is mute between *i* and *t*, and in the military *corps* (a body of troops) both *p* and *s* are mute, as custom has acquiesced in the French pronunciation of all military terms.

PH.

413. *Ph* is generally pronounced like *f*, as in *philosophy*, *phantom*, &c. In *nephew* and *Stephen* it has the sound of *v*. In *diphthong* the sound of *p* only is heard; in *apophthegm* both letters are entirely dropped. The same may be observed of *phthisis*, *phthisic*, and *phthisical*. In *sapphire* the first *p* slides into *ph*, by an accentual coalition of similar letters, very agreeable to analogy.

Q.

414. *Q* has always the sound of *k*: it is constantly followed by *u*, pronounced like *w*; and its general sound is heard in *quack*, *quilt*, *queen*, &c. pronounced *kwack*, *kwill*, *kween*, &c.

415. As a great number of words, derived from the French, have these letters in them, according to our usual complaisance for that language, we adopt the French pronunciation: thus in *coquet*, *oblique*, *antique*, *opaque*, *pique*, *piquant*, *piquet*, *burlesque*, *grotesque*, *casque*, *mosque*, *quadrille*, *quater-cousin*, the *qu* is pronounced like *k*. *Quoif* and *quoit* ought to be written and pronounced *coif*, *coit*. *Paquet*, *laquey*, *chequer*, and *risque*, have been very properly spelled by Johnson as they are pronounced *packet*, *lackey*, *checker*, and *risk*. *Quoth* ought to be pronounced with the *u*, as if written *kwoth*, and therefore is not

irregular. *Liquor* and *harlequin* always lose the *u*; and *conquer*, *conquerable*, and *conqueror*, sometimes, particularly on the stage. This deviation, however, seems not to have gone beyond recovery; and *conquest* is still regularly pronounced *conkwest*. *Quote* and *quotation* are perfectly regular, and ought never to be pronounced as some do, *cote* and *cotation*. *Cirque*, contracted from *circus*, and *cinque*, *cinque-foil*, *cinque-ports*, *cinque-spotted*, are pronounced *sirk* and *sink*; and *critique*, when we mean a criticism, to distinguish it from *critick*, is pronounced *criteek*, rhyming with *speak*.

R.

416. This letter is never silent, but its sound is sometimes transposed. In a final unaccented syllable, terminating with *re*, the *r* is pronounced after the *e*, as *acre*, *lucre*, *fabre*, *fibre*, *ocbre*, *eagre*, *maugre*, *sepulchre*, *theatre*, *speître*, *metre*, *petre*, *mitre*, *nitre*, *antre*, *lustre*, *accoutre*, *massacre*; to which we may add, *centre* and *sceptre*; sometimes written *center* and *scepter*; but, in my opinion, very improperly, as this peculiarity is fixed, and easily understood; while reducing *meagre* to *meager* disturbs the rule, and adds another anomaly to our pronunciation, by making the *g* hard before *e*.

417. The same transposition of *r* is perceived in the pronunciation of *apron*, *iron*, *citron*, *saffron*, as if written *apurn*, *irun*, *citurn*, *saffurn*: nor do I think they can be pronounced otherwise without a disagreeable stiffness. *Children* and *hundred* have slid into this analogy, when used colloquially, but preserve the *r* before the *e* in solemn speaking.

418. As this letter is but a jar of the tongue, sometimes against the roof of the mouth, and sometimes at the orifice of the throat, it is the most imperfect of all the consonants; and, as its formation is so indefinite, no wonder, when it is not under the accent, that the vowels which precede it should be so indefinite in their sounds; as we may perceive in the words *friar*, *liar*, *mayor*, *martyr*, which, with respect to sound, might be written *friur*, *liur*, *mayur*, *martur* (98).

419. There is a distinction in the sound of this letter, never noticed by any of our writers on the subject, which is, in my opinion, of no small importance; and that is, the rough and smooth *r*. The rough *r* is formed by jarring the tip of the tongue against the roof of the mouth near the fore teeth: the smooth *r* is a vibration of the lower part of the tongue, near the root, against the inward region of the palate, near the entrance of the throat. This latter *r* is that which marks the pronunciation of England, and the former that of Ireland. In England, and particularly in London, the *r* in *lard*, *bard*, *card*, *regard*, &c. is pronounced so much in the throat as to be little more than the middle or Italian *a*, lengthened into *baa*, *baad*, *caad*, *regaad*; while in Ireland the *r*, in these words, is pronounced with so strong a jar of the tongue against the forepart of the palate, and accompanied with such an aspiration or strong breathing at the beginning of the letter, as to produce that harshness we call the Irish accent. But if this letter is too forcibly pronounced in Ireland, it is often too feebly sounded in England, and particularly in London, where it is sometimes entirely sunk; and it may, perhaps, be worthy observation, that, provided we avoid a too forcible pronunciation of the *r*, when it ends a word, or is followed by a consonant in the same syllable, we may give as much force as we please to this letter at the beginning of a word, without producing any harshness to the ear. Thus *Rome*, *river*, *rage*, may have the *r* as forcible as in Ireland; but *bar*, *bard*, *card*, *bard*, &c. must have it nearly as soft as in London.

S.

420. As the former letter was a jar, this is a hiss; but a hiss, which forms a much more definite and compleat consonant than the other. This consonant, like the other mutes, has a sharp and a flat sound; the sharp sound is heard in the name of the letter, and in the words *same*, *sin*, *this*; the flat sound is that
of

of, *z* heard in *is*, *bis*, *was* : and these two sounds, accompanied by the aspirate, or *h*, form all the varieties found under this letter (41).

421. *S* has always its sharp hissing sound at the beginning of words, as *soon*, *fin*, &c. and when it immediately follows any of the sharp mutes, *f*, *k*, *p*, *t*, as *scoffs*, *blocks*, *bips*, *pits*, or when it is added to the mute *e* after any of these letters, as *strifes*, *flakes*, *pipes*, *mites*.

422. *S* is sharp and hissing at the end of the monosyllables *yes*, *this*, *us*, *thus*, *gas* : and at the end of words of two or more syllables, if it be preceded by any of the vowels but *e*, and forms a distinct syllable. Thus *es* in *pipes* and *mites* do not form a distinct syllable ; and as they are preceded by a sharp mute, the *s* is sharp likewise ; but in *prices* these letters form a syllable, and the *s* is pronounced like *z*, according to the general rule.

423. The only exception to this rule is, the words *as*, *whereas*, *bas*, *bis*, *was* ; for *bias*, *dowlas*, *Atlas*, *metropolis*, *basis*, *chaos*, *tripos*, *pus*, *chorus*, *cyprus*, &c. have the final *s* pronounced sharp and hissing.

424. Agreeably to this rule, the numerous terminations in *ous*, as *pious*, *superfluous*, &c. have the *s* sharp, and are pronounced exactly like the pronoun *us* ; and every double *s* in the language is pronounced in the same manner, except in the words *dissolve*, *possess*, and their compounds ; *scissors*, *buffy*, *buffar*.

425. *S* in the inseparable preposition *dis*, when either the primary or secondary accent is on it, is always pronounced sharp and hissing. The word *dismal*, which seems to be an exception, is not so in reality ; for, in this word, *dis* is not a preposition : thus *dissolute*, *dissonant*, &c. with the primary accent on *dis* ; and *disability*, *disagree*, &c. with the secondary accent on the same letters, have the *s* sharp and hissing ; but when the accent is on the second syllable, the *s* is either sharp or flat, as it is followed either by a vowel, or a sharp or flat consonant : thus *disable*, *disaster*, *disease*, *disinterested*, *dishonest*, *disorder*, *disuse*, have all of them the *s* in *dis* flat like *z*, because the accent is not on it, and a vowel begins the next syllable ; but *discredit*, *disfavour*, *diskindness*, *dispense*, *distaſte*, have the *s* sharp and hissing, because a sharp consonant begins the succeeding accented syllable ; and *disband*, *disdain*, *disgrace*, *disjoin*, *disvalue*, have the *s* flat like *z*, because they are succeeded by a flat consonant in the same situation.

426. *S* in the inseparable preposition *mis* is always sharp and hissing, whether the accent be on it or not ; or whether it be followed either by a vowel, or a sharp or flat consonant, as *miscreant*, *misaim*, *misapply*, *misorder*, *misuse*, *misbegot*, *misdeem*, *misgovern*, &c.

427. *S*, followed by *e* in the final syllable of adjectives, is always sharp and hissing, as *base*, *obese*, *precise*, *concise*, *globose*, *verbose*, *morbose*, *pulcose*, *tenebriose*, *cortiose*, *jocose*, *oleose*, *rugose*, *desidiose*, *close*, *filiculose*, *calculose*, *tumulose*, *animose*, *venenose*, *arenose*, *filiginose*, *crinose*, *loose*, *operose*, *morose*, *edematose*, *comatose*, *acetose*, *aquose*, *filiquose*, *actuose*, *diffuse*, *profuse*, *occluse*, *recluse*, *abstruse*, *obtuse*, except *wise* and *ahberguise*.

428. *S*, in the adjective termination *sive*, is always sharp and hissing, as *suasive*, *persuasive*, *assuasive*, *dissuasive*, *adhesive*, *cohesive*, *decisive*, *precisive*, *incisive*, *derisive*, *cicatrifive*, *visive*, *plausive*, *abusive*, *diffusive*, *infusive*, *inclusive*, *conclusive*, *exclusive*, *elusive*, *delusive*, *prelusive*, *allusive*, *illusivive*, *collusive*, *amusive*, *obtrusive*, &c.

429. *S*, in the adjectives ending in *sory*, is always sharp and hissing, as *suasory*, *persuasory*, *decisory*, *derisory*, *delusory*, &c.

430. The same may be observed of *s* in the adjectives ending in *some*, as *troublesome*, &c. and substantives in *osity*, as *generosity*, &c.

431. *Se*, preceded by the liquids *l*, *n*, or *r*, has the *s* sharp and hissing, as *pulse*, *appulse*, *dense*, *tense*, *intense*, *sense*, *verse*, *adverse*, &c. except *cleanse*.

S pronounced like z.

432. S has always its flat buzzing sound, as it may be called, when it immediately follows any of the flat mutes *b, d, g* hard, or *v*, as *ribs, heads, rags, sieves*.

433. S is pronounced like *z*, when it forms an additional syllable with *e* before it, in the plurals of nouns, and the third person singular of verbs; even though the singulars and first persons end in sharp hissing sounds, as *asses, riches, cages, boxes, &c.* Thus *prices* and *prizes* have both the final *s* flat, though the preceding mute in the first word is sharp (422).

434. As *s* is hissing, when preceded by a liquid, and followed by *e* mute, as *transe, tense, &c.* so when it follows any of the liquids without the *e*, it is pronounced like *z*, as *morals, means, seems, hers*. In the same analogy, when *s* comes before any of the liquids, it has the sound of *z*, as *Cosmo, cosmetic, dismal, pismire, chasm, prism, theism, schism*, and all polysyllables ending in *asm, ism, osm, or ysm*, as *enthusiasm, judaism, microcosm, paroxysm, &c.*

435. S, in the preposition *dis*, is either sharp or flat, as it is accented or unaccented, as explained above; but it ought always to be pronounced like *z*, when it is not under the accent, and is followed by a flat mute, a liquid, or a vowel, as *disable, disease, disorder, diffuse, disband, disdain, disgrace, disvalue, disjoin, dislike, dislodge, dismay, dismember, dismount, dismiss, disnatured, disfrank, disrelish, disrobe* (425).

436. S is pronounced like *z*, in the monosyllables *is, his, was, these, those*, and in all plurals whose singulars end in a vowel, followed by *e* mute, as *commas, operas, shoes, aloes, dues*, and consequently when it follows the *w* or *y*, in the plurals of nouns, or the third person singular of verbs, as *ways, betrays, news, views, &c.*

437. Some verbs ending in *se* have the *s* like *z*, to distinguish them from nouns or adjectives of the same form. Examples:

Nouns.	Verbs.	Nouns.	Verbs.
<i>grease</i>	to <i>grease</i>	<i>excuse</i>	to <i>excuse</i>
<i>close</i>	to <i>close</i>	<i>refuse</i>	to <i>refuse</i>
<i>house</i>	to <i>house</i>	<i>diffuse</i>	to <i>diffuse</i>
<i>mouse</i>	to <i>mouse</i>	<i>use</i>	to <i>use</i>
<i>louse</i>	to <i>louse</i>	<i>rise</i>	to <i>rise</i>
<i>abuse</i>	to <i>abuse</i>	<i>premise</i>	to <i>premise</i>

438. *Sy* and *sey*, at the end of words, have the *s* pronounced like *z*, if it has a vowel before it, with the accent on it, as *easy, greasy, queasy, cheasy, daisy, misy, rosy, causey*; but if the accent is on the antepenultimate syllable, the *s* is sharp, as *heresy, poesy, &c.* if a sharp mute precede, the *s* is sharp, as *tricksy, tipsy*; if a liquid precede, and the accent is on the penultimate syllable, the *s* is flat, as *palsy, stimsy, slumsy, pansy, tansy, phrensy, quinsy, tolsy, whimsy, malmsey, jersey, kersey*. *Pursey* has the *s* sharp and hissing from its relation to *purse*, and *minstrelsey* and *controversy* have the antepenultimate and preantepenultimate accent. Thus we see why *busy, bousy, lousy, and drowsy*, have the *s* like *z*, and *jealousy* the sharp hissing *s*.

439. S in the termination *sible*, when preceded by a vowel, is pronounced like *z*, as *persuasive, risible, visible, divisible, infusible, conclusible*; but if a liquid consonant precede the *s*, the *s* then becomes sharp and hissing, as *sensible, responsible, tensible, reversible, &c.*

440. S, in the terminations *fary* and *fory*, is sharp and hissing, as *dispensary, adversary, suafory, persuafory, decisory, incisory, derisory, depulsory, compulsory, incensory, compensory, suspensory, sensory, responsory, cursory, discursory, lufory, elufory, delufory, illusory, collufory*. *Rosary* and *misery*, which have the *s* like *z*, are the only exceptions.

441. *S*, in the termination *ise*, is pronounced like *z*, except in the adjectives before mentioned, and a few substantives, such as *paradise*, *anise*, *rise*, *grise*, *verdigrise*, *mortise*, *travise*.

442. *S*, in the terminations *sal* and *sel*, when preceded by a vowel, is pronounced like *z*, as *nasal*, *oussel*, *boussel*, *noussel*, *reprisal*, *proposal*, *refusal*, and sharp and hissing when preceded by a consonant, as *mensal*, *universal*, &c.

443. *S*, in the terminations *son*, *sen*, and *fin*, is pronounced like *z*, as *reason*, *season*, *treason*, *cargason*, *disposon*, *oraison*, *benison*, *venison*, *denison*, *unison*, *foison*, *poison*, *prison*, *damson*, *crimson*, *chosen*, *resin*, *rosin*, *raisin*, *confin*. But the *s* in *mason*, *bason*, *garrison*, *caparison*, *comparison*, *parson*, and *person*, is sharp and hissing.

444. *S*, after the inseparable prepositions *pre* and *pro*, is sharp, as in *presage*, *preside*, *presidial*, *preseance*, *presension*, *prosecute*, *prosecution*, *prosody*, *protopopeia*, but flat like *z* in *presence*, *presidency*, *presume*, *presumptive*, *presumption*; but where the *pre* is prefixed to a word, which is significant when alone, the *s* is always sharp, as *presuppose*, *presurmise*, &c.

445. *S*, after the inseparable preposition *re*, is almost always pronounced like *z*, as *resemble*, *resent*, *resentment*, *reserve*, *reservation*, *reservoir*, *residue*, *resident*, *residential*, *reside*, *resign*, *resignment*, *resignation*, *resilience*, *resiliency*, *resilition*, *resin*, *resist*, *resistance*, *resolve*, *resolution*, *resolute*, *result*, *resume*, *resumption*, *refurrection*.

446. *S* is sharp after *re* in *resuscitation*, *resupination*, &c. and when the word added to it is significant by itself, as *research*, *resiege*, *reseat*, *resurvey*. Thus to *resign*, with the *s* like *z*, signifies to yield up; but to *resign*, to sign again, has the *s* sharp, as in *sign*: so to *resound*, to reverberate, has the *s* like *z*; but to *resound*, to sound again, has the *s* sharp and hissing.

447. Thus we see, after pursuing this letter through all its combinations, how difficult it often is to decide by analogy, when we are to pronounce it sharp and hissing, and when flat like *z*. In many cases it is of no great importance; in others, it is the distinctive mark of a vulgar or a polite pronunciation. Thus *deign* is never heard with the *s* like *z* but among the lowest order of the people; and yet there is not the least reason from analogy why we should not pronounce it in this manner, as well as in *resign*: the same may be observed of *preside* and *desist*, which have the *s* sharp and hissing; and *reside* and *resist*, where the same letter is pronounced like *z*. It may, however, be remarked, that *re* has the *s* like *z* after it more regularly than any other of the prefixes.

448. It may, perhaps, be worthy of observation, that though *s* becomes sharp or flat, as it is followed by a sharp or flat consonant, or a liquid, as *cosmetic*, *dismal*, *disband*, *disturb*, &c. yet if it follows a liquid or a flat consonant, except in the same syllable, it is generally sharp. Thus the *s* in *tubs*, *juds*, &c. is like *z*; but in *subserve*, *subside*, *subsist*, it is sharp and hissing; and though it is flat in *absolve*, it is sharp in *absolute* and *absolution*; but if a sharp consonant precede, the *s* is always sharp and hissing, as *tipsy*, *trickisy*. Thus, in the pronunciation of the word *Glasgow*, as the *s* is always sharp and hissing, we find the *g* invariably slide into its sharp sound *k*; and this word is always heard as if written *Glastow*. We see, therefore, that a preceding sharp consonant makes the succeeding *s* sharp, but not inversely.

449. *S* is always sharp and hissing when followed by *c*, except in the word *discern*.

S aspirated, or sounding like *sh*, or *zh*.

450. *S*, like its fellow dental *t*, becomes aspirated, and goes into the sharp sound *sh*, or the flat sound *zh*, when the accent is on the preceding vowel, and it is followed by a diphthong, as *nauseate*, or a diphthongal vowel, as *pleasure*, pronounced *naushbeate* and *plezbure*.

451. *S*, in the termination *son*, preceded by a vowel, goes into the flat aspiration *zh*, as *evasion*, *cobeson*, *mission*.

sion, decision, confusion, pronounced *evazhion*, &c. but when it is preceded by a liquid, or another *s*, it has the sharp aspiration *sh*, as *expulsion, dimension, reversion*, pronounced *expulshion*, &c.

452. The same may be observed of *s* before *u*; when a vowel precedes the *s*, with the accent on it, the *s* goes into the flat aspiration, as *plasure, measure, treasure*, pronounced *plezhure*, &c. but when preceded by a liquid, or another *s*, it is sounded *sh*, as *censure, tonsure, pressure*, pronounced *censhure*, &c.

453. From the clearness of this analogy, we may perceive the impropriety of pronouncing *Asia* with the sharp aspiration, as if written *Ashia*; when, by the foregoing rule, it ought undoubtedly to be pronounced *Azhia*, rhyming with *Arpasia, euthanasia*, &c. with the flat aspiration of *z*. This is the Scotch pronunciation of this word, and unquestionably the true one: but if I mistake not, *Persia* is pronounced in Scotland with the same aspiration of *s*, and as if written *Perzhia*; which is as contrary to analogy as the other is agreeable to it.

454. The tendency of the *s* to aspiration before a diphthongal sound has produced several anomalies in the language, which can only be detected by recurring to first principles: for which purpose it may be necessary to observe, that the accent or stress naturally preserves the letters in their true sound; and as feebleness naturally succeeds force, so the letters, immediately after the stress, have a tendency to slide into different sounds, which require less exertion of the organs. Hence the omission of one of the vowels in the pronunciation of the last syllable of *fountain, mountain, captain*, &c. (208); hence the short sound of *i* in *respite, servile*, &c. hence the *s* pronounced like *z* in *disable*, where the accent is on the second syllable; and like *s* sharp and hissing in *disability*, where there is a secondary stress on the first syllable; and hence the difference between the *x* in *exercise*, and that in *exert*; the former having the accent on it, being pronounced *eks*, as if the word were written *ecksercise*; and the latter without the accent, pronounced *gz*, as if the word were written *egzert*. This analogy leads us immediately to discover the irregularity of *sure, sugar*, and their compounds, which are pronounced *shure* and *shugar*, though the accent is on the first syllable, and ought to preserve the *s* without aspiration; and a want of attending to this analogy has betrayed Mr. Sheridan into a series of mistakes in the sound of *s* in the words *suicide, presume, resume*, &c. as if written *shoo-icide, pre-zhoom, re-zhoom*, &c. but if this is the true pronunciation of these words, it may be asked why is not *suit, suitable, pursue*, &c. to be pronounced *shoot, shootable, pur-shoo*, &c. If it be answered custom, I own this decides the question at once. Let us only be assured, that the best speakers pronounce *a* like *o*, and that is the true pronunciation; but those who see analogy so openly violated, will be assured of the certainty of the custom before they break through all the laws of language to conform to it.

455. We have seen, in a great variety of instances, the versatility of *s*, how frequently it slides into the sound of *z*; but my observation greatly fails me if it ever takes the aspiration, unless it immediately follows the accent, except in the words *sure, sugar*, and their compounds; and these irregularities are sufficient without adding to the numerous catalogue we have already seen under this letter.

456. The analogy we have just been observing directs us in the pronunciation of *usury, usurer*, and *usurious*. The two first have the accent on the first syllable, which permits the *s* to go into aspiration, as if the words were written *uzbury* and *uzburer*; but the accent being on the second *u* in the last word, the *s* is prevented from going into aspiration, and is pronounced *uzurious*.

457. Though the *ss* in *passion, mission*, &c. belong to separate syllables, as if spelt *pas-sion, mis-sion*, &c. yet the accent presses the first into the same aspiration as the last, and they are both pronounced with the sharp aspirated *hiss*, as if there were but one *s*.

458. *S* is silent in *isle, island, aisle, demesne, puisne, viscount*, and at the end of some words from the French, as *glacis, pas, sous, vis-à-vis*; and in *corps* the two last letters are silent, and the word pronounced *core* (412).

T.

459. *T* is the sharp sound of *D* (41); but though the latter is often changed into the former, the former never goes into the latter. The sound to which this letter is prone is that of *s*. This sound the *t* was anciently accused of usurping in the Greek language, and this usurpation has been continued through most modern tongues. That *p* and *b*, *t* and *d*, *k* and *g* hard, *s* and *z*, should slide into each other, is not surprising, as they are distinguished only by a nice shade of sound; but that *t* should alter to *s* seems a most violent transition, till we consider the organic formation of these letters, and of those vowels which always occasion it. If we attend to the formation of *t*, we shall find that it is a stoppage of the breath by the application of the upper part of the tongue near the end, to the correspondent part of the palate; and that if we just detach the tongue from the palate, sufficiently to let the breath pass, a hiss is produced which forms the letter *s*. Now the vowel that occasions this transition of *t* to *s* is the squeezed sound of *e*, as heard in *y* consonant: which squeezed sound is a species of hiss; and this hiss, from the absence of accent, easily slides into the *s*, and *s* as easily into *sh*. Thus mechanically is generated that hissing termination *tion*, which forms but one syllable, as-if written *shun*.

460. But it must be carefully remarked, that this hissing sound, contracted by the *t* before certain diphthongs, is never heard but immediately after the accent: when the accent falls on the vowel immediately after the *t*, this letter, like *s* or *c* in the same situation, preserves its simple sound. Thus the *c* in *social* goes into *sh*, because the accent is on the preceding vowel; but it preserves the simple sound of *s* in *society*, because the accent is on the succeeding vowel. The same analogy is obvious in *satiate* and *satiety*; and is perfectly agreeable to that difference made by accent in the sound of other letters.

461. As the diphthongs *ia*, *ie*, *io*, or *iu*, when coming after the accent, have the power of drawing the *t* into *sh*, so the diphthongal vowel *u*, in the same situation, has a similar power. If we analyse the *u*, we shall find it commence with the squeezed sound of *e*, equivalent to the consonant *y*. This letter produces the small hiss before taken notice of, and which may be observed in the pronunciation of *nature*, and borders so closely on *natshur*, that it is no wonder Mr. Sheridan adopted this latter mode of spelling the word to express its sound. The only fault Mr. Sheridan seems guilty of in depicting the sound of this word is, in making the *u* short, as in *bur*, *cur*, &c. as every correct ear must perceive an elegance in lengthening the sound of the *u*, and a vulgarity in shortening it. The true pronunciation seems to lie between both.

462. But Mr. Sheridan's greatest fault seems to lie in not attending to the nature and influence of the accent; and because *nature*, *creature*, *feature*, *fortune*, *misfortune*, &c. have the *t* pronounced like *ch*, or *tsh*, as if written *creat-chure*, *fea-tshure*, &c. he has extended this change of *t* into *tch*, or *tsh*, to the word *tune*, and its compounds, *tutor*, *tutorefs*, *tutorage*, *tutelage*, *tutelar*, *tutelary*, &c. *tumult*, *tumour*, &c. which he spells *tshoon*, *tshoon-eble*, &c. *tshoo-tur*, *tshoo-trifs*, *tshoo-tur-idzh*, *tshoo-tel-idzh*, *tshoo-tel-er*, *tshoo-tel-er-y*, &c. *tshoo-mult*, *tshoo-mur*, &c. Though it is evident, from the foregoing observations, that as the *u* is under the accent, the preceding *t* is preserved pure, and that the words ought to be pronounced as if written *tewtor*, *tewmult*, *tewmour*, &c. and *neither*, *tshootur*, *tshoomult*, *tshoomour*, as Mr. Sheridan writes them, nor *tootor*, *toomult*, *toomour*, as they are often pronounced by vulgar speakers.

463. Here, then, the line is drawn by analogy. Whenever *t* comes before these vowels, and the accent immediately follows it, the *t* preserves its simple sound, as in *Miltiades*, *elephantiasis*, *satiety*, &c. but when the accent precedes the *t*, it then goes into *tch*, or *tsh*, as *na-tshure*, *na-tshion*, *vir-tshue*, &c. or *natchure*, *natchion*, *virtchue*, &c.

464. This pronunciation of *t* extends to every word where the diphthong or diphthongal sound commences

mences with *i* or *e*. Thus *bestial*, *beauteous*, *righteous*, *frontie*, &c. are pronounced as if written *best-cheal*, *beaut-cheous*, *right-cheous*, *front-chier*, &c. except in the terminations of verbs and adjectives, which preserve the simple in the argument, without suffering the *t* to go into the hissing sound, as *I pity*, *thou pitiest*, *he pities*, or *pitied*, *mightier*, *worthier*, *twentieth*, *thirtieth*, &c. This is agreeable to the general rule, which forbids the adjectives or verbal terminations to alter the sound of the primitive verb or noun.

TH.

465. This hissing sound, as it may be called, is almost peculiar to the English. The Greek Θ was certainly not the sound we give it: like its principal letter, it has a sharp and a flat sound; but these are so little subject to rule, that a catalogue will, perhaps, be the best guide.

466. *Th*, at the beginning of words, is sharp, as in *thank*, *think*, &c. except in the following words: *that*, *than*, *thé*, *thee*, *their*, *them*, *then*, *thence*, *there*, *these*, *they*, *thine*, *this*, *thither*, *those*, *thou*, *though*, *thus*, *thy*, and their compounds.

467. *Th*, at the end of words, is sharp, as *death*, *breath*, &c. except in *beneath*, *booth*, *with*; and the verbs to *wreath*, to *loat*, to *uncloath*, to *seeth*, to *smooth*, to *sooth*, to *mouth*: all which ought to be written with the *e* final; not only to distinguish them from the nouns, but to show that *th* is soft. There is as obvious an analogy for this sound of the *th* in these verbs, as for the *z* sound of *s* in verbs ending in *se* (437), and why we should write some verbs with *e*, and others without it, is inconceivable. The best way to show the absurdity of our orthography in this particular, will be to draw out the nouns and verbs as they stand in Johnson's Dictionary.

Adjectives and Nouns.	Verbs.	Adjectives and Nouns.	Verbs.
<i>breath</i> ,	to <i>breathe</i> .	<i>mouth</i> ,	to <i>mouth</i> .
<i>wreath</i> ,	to <i>wreath</i> , to <i>iwreath</i> .	<i>swath</i> ,	to <i>swathe</i> .
<i>loat</i> ,	to <i>loathe</i> .	<i>sheath</i> ,	{ to <i>sheath</i> .
<i>cloth</i> ,	to <i>cloathe</i> , to <i>uncloath</i> .		{ to <i>sheathe</i> .
<i>bat</i> ,	to <i>bathe</i> .	<i>sooth</i> ,	to <i>sooth</i> .
<i>smooth</i> ,	to <i>smooth</i> .		

Surely nothing can be more evident than the analogy of the language in this case. Is it not absurd to hesitate a moment at writing all the verbs with the *e* final? This is a departure from our great Lexicographer, which he himself would approve, as nothing but inadvertency could have led him into this unmeaning irregularity.

468. *Th* is hard in the middle of words, either when it precedes, or follows a consonant, as *panther*, *nepenthe*, *orthodox*, *orthography*, *orthoëpy*, *thwart*, *atwart*, *ethnic*, *misanthrope*, *philanthropy*, &c. except *brethren*, *farthing*, *farther*, *northern*, *worthy*, *burthen*, *murder*, where the *th* is flat; but the two last words are better written *burden* and *murder*.

469. *Th* between two vowels is generally soft in words purely English, as *father*, *feather*, *beaten*, *hither*, *thither*, *whither*, *whether*, *either*, *neither*, *weather*, *wether*, *with*, *gather*, *together*, *poth*, *mother*.

470. *Th* between two vowels, in words from the learned languages, is generally hard, as *apathy*, *sympathy*, *antipathy*, *Athens*, *atheist*, *authentic*, *author*, *authority*, *athirst*, *cathartic*, *cathedral*, *catholic*, *catheter*, *ether*, *ethics*, *lethargy*, *Lethe*, *leviathan*, *litharge*, *lithotomy*, *Lutheran*, *matheis*, *mathematics*, *method*, *pathetic*, *plethora*, *polymathy*, *prothonotary*, *anathema*, *amethyst*, *theatre*, *amphitheatre*, *apothecary*, *apothecis*.

471. *Tb* is sometimes pronounced like simple *t*, as *Thomas, thyme, Thames, asthma, phthisis, phthisic, phthisical*.

T silent.

472. *T* is silent when preceded by *s*, and followed by the abbreviated terminations *en* and *le*, as *hasten, chasten, fasten, listen, glisten, christen, moisten*, which are pronounced as if written *hace'n, chace'n, &c.* in *bursten* the *t* is heard: so *castle, nestle, trestle, wrestle, thistle, whistle, epistle, bristle, gristle, jostle, apostle, throstle, bustle, jussle, rustle*, are pronounced as if written *castle, nestle, &c.* in *pestle* the *t* is pronounced; in *often* and *soften* the *t* is silent, and at the end of several words from the French, as *trait, gout* (*taste*) *eslat*. In the first of these words the *t* begins to be pronounced; in the last, it has been sometimes heard; but in the second, never. *Toupet* is more frequently written *toupee*, and is therefore not irregular. In *billet-doux* the *t* is silent, as well as in *hautboy*. The same silence of *t* may be observed in the English words, *Christmas, chestnut, mortgage, ostler*, and in the second syllable of *mistletoe*. In *currant* and *currants* the *t* is always mute.

V.

473. *V* is flat *f*, and bears the same relation to it as *b* does to *p*, *d* to *t*; hard *g* to *k*, and *z* to *s* (41). It is never irregular; and if ever silent, it is in the word *twelvemonth*, where both that letter and the *e* are, in colloquial pronunciation, generally dropped, as if written *twel'month*.

W initial.

474. That *w* at the beginning of a word is a consonant, has been proved already (9) (59). It is always silent before *r*, as in *wrack, wrangle, wrap, wrath, wreak, wreath, wreck, wren, wrenck, wrest, wrestle, wretch, wriggle, wright, wring, wrinkle, wrist, write, writhe, wrong, wrought, wry, awry, bewray*.

475. *W* before *h* is pronounced as if it were after the *h*, as *hoo-y, why, hoo-en, when, &c.* but in *whole, whoop, &c.* the single and double *o* coalescing with the same sound in *w*, this last letter is scarcely perceptible. In *fwoon*, however, this letter is always heard; and pronouncing it *foon*, is vulgar. In *sword* and *answer*, it is always silent. In *two* it mingles with its kindred sound, and the number *two* is pronounced like the adverb *too*. The same may be observed of *toward* and *towards*, where the *w* is dropped, as if written *toard* and *toards*, rhyming with *board* and *boards*, but in the adjectives and adverbs *toward* and *towardly, froward* and *frowardly*, the *w* is heard distinctly. It is sometimes dropped in the last syllable of *awkward*, as if written *awkard*; but this pronunciation is vulgar.

X.

476. *X* is a letter composed of those which have been already considered, and therefore will need but little discussion. It is flat or sharp like its component letters, and is subject to the same laws.

477. *X* has a sharp sound like *ks*, when it ends a syllable with the accent upon it, as *exercise, excellence, &c.* or when the accent is on the next syllable, if it begin with a consonant, as *excuse, expence, &c.*

478. *X* has its flat sound like *gz*, when the accent is not on it, and the following syllable begins with a vowel, as *exert, example, exist, &c.* pronounced *egzert, egzample, egzist, &c.* The same sound may be observed if *h* follow, as in *exhibit, exhale, &c.* pronounced *egzhibit, egzhale*; but if the secondary accent be on the *x* in the polysyllables *exhibition, exhalation, &c.* this letter is then sharp, as in *exercise*.

479. *X*, like *s*, is aspirated only when the accent is before it: hence the difference between *luxury* and *luxurious, anxious* and *anxiety*: in the true pronunciation of which words, nothing will direct us but

recurring to first principles. It was observed that *s* is never aspirated, or pronounced like *ʃ*; but when the accent is on the preceding syllable (450); and that when the accent is on the succeeding vowel, though the *s* frequently is pronounced like *z*, it is never sounded *zb*; from which premises we may conclude, that *luxury* and *luxurious* ought to be pronounced *lucksbury* and *lugzurious*, and not *lug-zho-ryus*, as Mr. Sheridan spells it. The same error runs through his pronunciation of all the compounds, *luxuriance*, *luxuriant*, *luxuriate*, &c. which unquestionably ought to be pronounced *lug-zu-ri-ance*, *lug-zu-ri-ant*, *lug-zu-ri-ate*, &c. in four syllables, and not in three only, as they are divided in his Dictionary.

480. The same principle will lead us to decide in the words *anxious* and *anxiety*: as the accent is before the *x* in the first word, it is naturally divisible into *ank-sious*, and as naturally pronounced *ank-sus*; but as the accent is after the *x* in the second word, and the hissing sound cannot be aspirated (456), it must necessarily be pronounced *angziety*. But Mr. Sheridan, without any regard to the component letters of these words, or the different position of the accent, has not only spelled them without aspiration, but without letting the *s*, in the composition of the last word, go into *z*; for thus they stand in his Dictionary: *ank-syus*, *ank-si-e-ty*.

481. The *s* in *x*, at the beginning of words, goes into *z*, as *Xerxes*, *Xenophon*, &c. pronounced *Zerkjes*, *Zenophon*, &c. it is silent at the end of the French word *billet-doux*, and pronounced like *s* in *beaux*; often and better written *beaus*.

Y initial.

482. *Y*, as a consonant, has always the same sound; and this has been sufficiently described in ascertaining its real character (8) (58).

Z.

483. *Z* is the flat *s*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *v* to *f*. Its common name is *izzard*, which Dr. Johnson explains into *s* hard; if, however, this be the meaning, it is a gross misnomer; for the *z* is not the hard, but the soft *s*: but as it has a less sharp, and therefore not so audible a sound, it is not impossible but it may mean *s* *furd*. *Zed*, borrowed from the French, is the more fashionable name of this letter; but, in my opinion, not to be admitted, because the names of the letters ought to have no diversity.

484. *Z*, like *s*, goes into aspiration before a diphthong, or a diphthongal vowel after the accent, as is heard in *vizier*, *glazier*, *grazier*, &c. pronounced *vizb-i-er*, *glazb-i-er*, *grazb-i-er*, &c. The same may be observed of *azure*, *razure*, &c.

485. *Z* is silent in the French word *rendezvous*, and is pronounced in the Italian manner, as if *t* were before it in *mezzotinto*, as if written *metzotinto*.

Thus have we endeavoured to exhibit a just idea of the principles of pronunciation, both with respect to single letters, and their various combinations into syllables and words. The attentive reader must have observed how much the sounds of the letters vary, as they are differently associated, and how much the pronunciation of these associations depends upon the position of the accent. This is a point of the utmost importance, and a want of attending to it has betrayed several ingenious men into the grossest absurdities. This will more fully appear in the observations on accent; which is the next point to be considered.

OF THE NATURE OF ACCENT.

486. **T**HE accent of the ancients is the opprobrium of modern criticism. Nothing can show more evidently the fallibility of the human faculties than the total ignorance we are in at present of the nature of the Latin and Greek accent. This would be still more surprising if a phenomenon of a similar kind did not daily present itself to our view. The accent of the English language, which is constantly sounding in our ears, and every moment open to investigation, seems as much a mystery as that accent which is removed almost two thousand years from our view. Obscurity, perplexity, and confusion, run through every writer on the subject, and nothing could be so hopeless as an attempt to explain it, did not a circumstance present itself, which at once accounts for the confusion, and affords a clew to lead us out of it.

487. Not one writer on accent has given us such a definition of the voice, as acquaints us with its essential properties. They speak of high and low, loud and soft, quick and slow; but they never once mention that striking property which distinguishes singing from speaking sounds, and which, from its sliding from high to low, and from low to high, may not improperly be called the inflection of the voice. No wonder, when writers left this out of the account, that they should blunder about the nature of accent; it was impossible they should do otherwise, so partial an idea of the speaking voice must necessarily lead them into inextricable difficulties. But let us once divide the voice into its rising and falling inflection, the obscurity vanishes; and accent becomes as intelligible as any other part of language.

488. Keeping this distinction in view, let us compare the accented syllable with others, and we shall find this general conclusion may be drawn: "The accented syllable is always louder than the rest; but "when it has the rising inflexion, is higher than the preceding, and lower than the succeeding syllable; "and when it has the falling inflexion, it is pronounced higher than the other syllables, either preceding "or succeeding." The only exception to this rule is, "when the accent is on the last syllable of a word "which has no emphasis, and which is the concluding word of a discourse." Those who wish to see this clearly demonstrated must consult *Elements of Elocution*, vol. 2, page 5. On the present occasion it will be sufficient to observe, that the stress we call accent is as well understood as is necessary for the pronunciation of single words, which is the object of this treatise; and therefore, without disturbing the common opinion concerning accent, we shall proceed to make some remarks on its proper position in a word, and endeavour to detect some errors in the use and application of it.

The different position of the English Accent.

489. Accent, in its very nature, implies a comparison with other syllables less forcible; hence we may conclude, that monosyllables, properly speaking, have no accent: when they are combined with other monosyllables and form a phrase, the stress which is laid upon one, in preference to others, is called emphasis. As emphasis evidently points out the most significant word in a sentence, so, where other reasons do not forbid, the accent always dwells with greatest force on that part of the word which, from its importance, the hearer has always the greatest occasion to observe; and this is necessarily the root, or body of the word. But as harmony of termination frequently attracts the accent from the root to the branches of words, so the first and most natural law of accentuation seems to operate less in fixing the stress than any of the other. Our own Saxon terminations, indeed, with perfect uniformity, leave the principal part of the word in quiet possession of what seems its lawful property; but Latin and Greek

terminations, of which our language is full, assume a right of preserving their original accent, and subject almost every word they bestow upon us, to their own classical laws.

490. Accent, therefore, seems to be regulated, in a great measure, by etymology. In words from the Saxon, the accent is generally on the root; in words from the learned languages, it is generally on the termination; and if to these we add the different accent we lay on some words, to distinguish them from others, we seem to have the three great principles of accentuation; namely, the radical, the terminational, and the distinctive.

Accent on Dissyllables.

491. Every word of two syllables has necessarily one of them accented, and but one. It is true, for the sake of emphasis, we sometimes lay an equal stress upon two successive syllables, as *di-rect*, *sometimes*; but when these words are pronounced alone, they have never more than one accent. For want of attending to this distinction, some writers have roundly asserted, that many dissyllables have two accents, such as *convoy*, *concourse*, *discord*, *shipwreck*: in which, and similar instances, they confound the distinctness, with which the latter syllables are necessarily pronounced, with accentual force; though nothing can be more different. Let us pronounce the last syllable of the noun *torment* as distinctly as we please, it will still be very different from the same syllable in the verb *to torment*, where the accent is on it; and if we do but carefully watch our pronunciation, the same difference will appear in every word of two syllables throughout the language. The word *Amén* is the only word which is pronounced with two accents when alone.

492. There is a peculiarity of accentuation in certain words of two syllables, which are both nouns and verbs, that is not unworthy of notice; the former having the accent on the first syllable, and the latter on the last. This seems an instinctive effort in the language (if the expression will be allowed me) to compensate in some measure for the want of different terminations for these different parts of speech. The words which admit of this diversity of accent are the following:

493. To this analogy, some speakers are endeavouring to reduce the word *contents*; which, when it signifies the matter contained in a book, is often heard with the accent on the first syllable; nor, in my opinion, should this pronunciation be discouraged, as it serves, in some measure, to distinguish words which are widely different in signification, and to give a difference of form to the noun and verb, in which our language is remarkably deficient.

494. Sometimes words have a different accent, as they are adjectives or substantives.

Substantives.	Adjectives.	Substantives.	Adjectives.
<i>August</i> , the month	<i>august</i> , noble	<i>instinct</i>	<i>instinct</i>
<i>compact</i>	<i>compact</i>	<i>invalid</i>	<i>invalid</i>
<i>context</i>	<i>context</i>	<i>Levant</i> , a place	<i>levant</i> , eastern

<i>exile</i> , banishment	<i>exile</i> , small	<i>supine</i> , in grammar	<i>supine</i> , indolent.
<i>gallant</i> , a lover	<i>gallant</i> , bold		

495. Sometimes the same parts of speech have the accent on different syllables, to mark a difference of signification.

to <i>conjure</i> , to practise magic	to <i>conjure</i> , to summon in a sacred name
<i>désert</i> , a wilderness	<i>désert</i> , merit
<i>buffet</i> , a blow	<i>buffet</i> , a cupboard
<i>sinister</i> , insidious	<i>sinister</i> , the left side.

496. In this analogy some speakers pronounce the word *Concordance* with the accent on the first syllable, when it signifies a dictionary of the Bible; and with the accent on the second, when it signifies agreement: but besides that, there is not the same reason for distinguishing nouns from each other, as there is nouns from verbs; the accent on the first syllable of the word *Concordance* gives a harshness and poverty to its sound, which ought to be avoided.

497. But though the different accentuation of nouns and verbs of the same form does not extend so far as might be wished, it is certain, that in words of two syllables, where the noun and verb are of different forms, there is an evident tendency in the language to place the accent upon the first syllable of the noun, and on the last of the verb. Hence the nouns *outrage*, *upstart*, and *uproar*, have the accent on the first syllable; and the verbs to *uplift*, to *uphold*, and to *outstrip*, on the last.

498. This analogy will appear still more evident if we attend to the accent of those nouns and verbs which are compounded of two words. Every dissyllable compounded of words which, taken separately, have a meaning may be deemed a qualified substantive; and that word, which qualifies or describes the other, is that which most distinguishes it, and consequently is that which ought to have the accent. Accordingly we find that *inkhorn*, *outrage*, *chairman*, *freehold*, *sand-box*, *book-case*, *pen-knife*, have the accent on the first syllable, which is the specifying part of the word; while *gainsay*, *foresee*, *overlook*, *underfell*, have the accent on the last syllable, which is the least distinguishing part of the word. This rule, however, is either by the caprice of custom, or the love of harmony, frequently violated, but is sufficiently extensive to mark the general tendency of the language.

499. Something very analogous to this we find in the nouns we verbalize, by changing the *s* sharp of the noun into the *s* flat, or *z* of the verb (437), as a *use*, and to *use*; where we may remark, that when the word in both parts of speech is a monosyllable, and so not under the laws of accent, the verb, however, claims the privilege of lengthening the sound of the consonant when it can, as well as when it cannot prolong the accentuation. Thus we not only find *grass* altered to *graze*, *brass* to *braze*, *glass* to *glaze*, *price* to *prize*, *breath* to *breathe*, &c. but the *c* or *s* sharp altered to the *s* flat in *advice* to *advise*, *excuse* to *excuse*, *devise* to *devise*, &c. The noun adopting in sharp hissing *s*, and the accent on the first syllable, and the verb the soft buzzing *s*, with the accent on the last. The vulgar extend this analogy to the noun *practice* and the verb to *practise*, pronouncing the first with the *i* short and the *c*-like sharp *s*, as if written *practis*, and the last with the *i* long and the *s* like *z*, as if written *practize*; but correct speakers pronounce the verb like the noun; that is, as if written *practis*. The noun *prophecy* and the verb to *prophecy* follow this analogy, only by writing the noun with the *c* and the verb with the *s*, and without any difference of sound, except pronouncing the *y* in the first like *e*, and in the last like *i* long; where we may still discover a trace of the tendency to the barytone pronunciation in the noun, and the oxytone in the verb (467).

500. This seems to be the favourite tendency of English verbs; and where we find it crossed, it is generally in those formed from nouns, rather than the contrary: agreeably to this, Dr. Johnson has observed, that though nouns have often the accent on the latter, yet verbs have it seldom on the former syllable; those nouns which, in the common order of language, must have preceded the verbs, often transmit this accent to the verbs they form, and inversely. Thus the noun *water* must have preceded the verb to *water*, as the verb to *correspond* must have preceded the noun *correspondent*; and to *pursue* must claim priority to *pursuit*. So that we may conclude, wherever verbs deviate from this rule, it is seldom by chance, and generally in those words only where a superior law of accent takes place.

Accent on Trisyllables.

501. As words increase in syllables, the more easily is their accent known. Nouns, sometimes acquire a syllable by becoming plural; adjectives, increase a syllable by being compared; and verbs, by altering their tense, or becoming participles: adjectives become adverbs, by adding *ly* to them; and prepositions precede nouns or verbs without altering the accent of the word to which they are prefixed: so that when once the accent of dissyllables is known, those polysyllables, whose terminations are perfectly English, have likewise their accent invariably settled. Thus *lion* becomes *lions*; *poet*, *poets*; *polite* becomes *politer*, or *politely*, or even *politelier*; *mischievous*, *mischievous*; *happy*, *happiness*: nay, *lions* becomes *lionses*; *mischievous*, *mischievousness*; and *service*, *serviceable*, *serviceableness*, *serviceably*, and *unserviceably*, without disturbing the accent, either on account of the prepositive *un*, or the subjunctives *able*, *ably*, and *ableness*.

502. Hence we may perceive the glaring absurdity which prevails even in the first circles; that of pronouncing the plural of *princess*, and even the singular, with the accent on the second syllable, like *success* and *successes*; for we might just as well say, *dutchess* and *dutchesses*, as *princess* and *princesses*; nor would a correct ear be less hurt with the latter than with the former.

503. So few verbs of three syllables follow the analogy observable in those of two, that of protracting the accent to the last syllable, that this æconomy seems peculiar to dissyllables: many verbs, indeed, of three syllables are compounded of a preposition of two syllables: and then, according to the primary law of accentuation, and not the secondary of distinction, we may esteem them radical, and not distinctive: such are *contradict*, *intercede*, *supercede*, *contraband*, *circumscribe*, *superscribe*, &c. while the generality of words, ending in the verbal terminations *ise* and *ize*, retain the accent of the simple, as *criticise*,

tyrannize,

tyrannize, modernise, &c. and the whole tribe of trisyllable verbs in *ate* refuse the accent on the last syllable, and, except two or three, will not admit the stress on the penultimate, as to *illustrate, to decorate, to perpetrate, &c.* so that the distinctive accent has hardly any place, except in words of two syllables.

Accent on Polysyllables.

504. We have seen that the Saxon terminations, regardless of harmony, always leave the accent where they found it, let the adventitious syllables be ever so numerous. The Saxons, attentive chiefly to sense, preserved the same simplicity in the accentuation, as in the composition of their words; and, if sense were the only object of language, it must be confessed, that our ancestors were, in this respect, superior to the Greeks and Romans. What method could so rigidly preserve, and so strongly convey, the sense of words, as that which always left the accent on the root, where the principal meaning of the word undoubtedly lies. But the necessities of human nature require that our thoughts should not only be conveyed with force, but with ease; to give language its due effect, it must be agreeable as well as forceful; and the ear must be addressed while we are informing the mind. Here, then, terminational accent, the music of language, interposes; corrects the discordant, and strengthens the feeble sounds; removes the difficulty of pronunciation which arises from placing the accent on initial syllables, and brings the force gently down to the latter part of the word, where a cadence is formed, on the principles of harmony and proportion.

505. To form an idea of the influence of termination upon accent, it will be sufficient to observe, that words which have *ia, io, eou,* in their termination, always have the accent on the preceding syllable; thus *Cyclopædia, regalia, ambrosia, &c.* the numerous terminations in *ion*, as *gradation, promotion, confusion, &c.* those in *ious*, as *harmonious, abstemious, &c.* those in *eoue*, as *outrageous, advantageous, &c.*

506. The only exceptions to this rule are one word in *iac*, as *elegiac*, which has the accent on the *i*, and the following words in *iacal*, as *profodiactal, cardiacal, belliacal, genethliacal, maniacal, demoniacal, ammoniacal, theriacal, paradisiacal, aphrodisiacal, and hypochondriacal*; all which have the accent on the antepenultimate *i*, and that long and open, as in *idle, title, &c.*

507. Nothing can be more uniform than the position of the accent in words of these terminations; and, with very few exceptions, the quantity of the accented vowel is as regular as the accent; for when these terminations are preceded by a single consonant, every accented vowel is long, except *i*; which, in this situation, is as uniformly short. Thus *occasion, adhesion, erosion, and confusion*, have the *a, e, o,* and *u*, long; while *vision* and *decision* have the *i* short. The same may be observed of *probation, concretion, devotion, ablution, and exhibition*. The exceptions are *discretion* and *batalion*, which last ought to be spelt with double *l*, as in the French, from which it is derived, and then it would follow the general rule. *Gladiator, national, and rational*, form three more exceptions; and these are the only irregularities to which these numerous classes of words are subject.

508. Nearly the same uniformity, both of accent and quantity, we find in words ending in *ic*. The accent immediately precedes this termination, and every vowel under this accent but *u* is short. Thus *Satanic, pathetic, elliptic, harmonic, &c.* have the accent on the penultimate, and the vowel short; while *tunic, runic, and cubic*, have the accented vowel long.

509. The same may be observed of words ending in *ical*, as *fanatical, poetical, levitical, canonical, &c.* which have the accent on the antepenultimate syllable, and the vowels *a, e, i,* and *o*, short; but *cubical* and *musical*, with the accent on the same syllable, have the *u* long.

510. The only exceptions to this rule are, *Bucolic, arsenic, choleric, ephemeric, turmeric, empiric, rheumatic, bishopric* (better written *bishoprick*, see No. 400) *lunatic, arithmetic, splenetic, heretic, politic, and,* perhaps,

perhaps, *phlegmatic*; which, though more frequently heard with the accent on the antepenultimate syllable, ought, if possible, to be reduced to regularity.

511. In the same manner, if we take a view of the words ending in *ity*, we find the accent invariably placed on the preceding syllable, as in *diversity*, *congruity*, &c. On a closer inspection we find every vowel in this antepenultimate syllable, when no consonant intervenes, pronounced long, as *deity*, *piety*, &c. A nearer inspection shows us, that, if a consonant precede this termination, the preceding accented vowel is short, except it be *u*, as *severity*, *curiosity*, *impunity*, &c. we find too, that even *u* contracts itself before two consonants, as in *curvity*, *taciturnity*, &c. and that *scarcity* and *rarity* (signifying uncommonness; for *rarity*, thinness, has the *a* short) are the only exceptions to this rule throughout the language.

512. To these may be added the numerous class of words ending in *arous*, *erous*, and *orons*, as *barbarous*, *meteorous*, and *humorous*; all which have the accent on the antepenultimate syllable, except *canorous* and *sonorous*; which some unlucky scholar happening to pronounce with the accent on the penultimate syllable, in order to show their derivation from the Latin adjectives, *canorus* and *sonorus*, they stand like strangers amidst a crowd of similar words, and are sure to betray a mere English scholar into a wrong pronunciation.

Enclitical Accent.

513. I have ventured to give the name of *enclitical* to the accent of certain words, whose terminations are formed of such words as seem to lose their own accent, and throw it back on the last syllable of the word with which they coalesce, such as *theology*, *orthography*, &c. The readiness with which these words take the antepenultimate accent, the agreeable flow of sound to the ear, and the unity it preserves in the sense, are sufficient proofs of the propriety of placing the accent on this syllable, if custom were ambiguous. I do not remember to have heard the accent disputed in any word ending in *ology*; but *orthography* is not unfrequently pronounced with the accent on the first syllable, like *orthodoxy*. The temptation we are under to discover our knowledge of the component parts of words, is very apt to draw us into this pronunciation; but as those words which are derived from the Greek, and are compounded of *λόγος*, have universally given into this enclitical accentuation, no good reason appears for preventing a similar pronunciation in those compounded of *γραφω*, as by placing the accent on the antepenultimate syllable the word is much more fluent and agreeable to the ear. It is certain, however, that at first sight the most plausible reasoning in the world seems to lie against this accentuation. When we place the accent on the first syllable, say our opponents, we give a kind of subordinate stress to the third syllable *graph*; by which means the word is divided into its primitives *ορθός* and *γραφω*, and those distinct ideas it contains, are preserved, which must necessarily be confounded by the contrary mode; and that pronunciation of compounds, say they, must certainly be the best which best preserves the import of the simples.

514. Nothing can be more specious than this reasoning, till we look a little higher than language, and consider its object; we shall then discover, that in uniting two words under one accent, so as to form one compound term, we do but imitate the superior operations of the mind, which, in order to collect and convey knowledge, unite several simple ideas into one complex one. “The end of language,” says Mr. Locke, “is by short sounds to signify with ease and dispatch general conceptions, wherein not only abundance of particulars are contained, but also a great variety of independent ideas are collected into one complex one, and that which holds these different parts together in the unity of one complex idea, is the word we annex to it. For the connexion between the loose parts of those complex ideas being made by the mind, this union, which has no particular foundation in nature, would cease again, were there not something that did, as it were, hold it together, and keep the parts from
“scattering;

“ scattering ; though, therefore, it be the mind that makes the collection, 'tis the name which is, as it were, the knot which ties them fast together.” This reasoning, with respect to words and ideas, is so exactly applicable to accent and words, that we need but change the names to have an argument in form for that accentuation which unites the different parts of a word under one forcible pressure of the voice ; for, as Mr. Locke continues, “ Men, in framing ideas, seek more the convenience of language and quick dispatch by short and comprehensive signs, than the true and precise nature of things ; and, therefore, he who has made a complex idea of a body with life, sense, and motion, with a faculty of reason joined to it, need but use the short monosyllable, man, to express all particulars that correspond to that complex idea.” So it may be subjoined, that in framing words for the purpose of immediate communication, the end of this communication is best answered by such a pronunciation as unites simples into one compound, and at the same time renders the compound as much a simple as possible : but it is evident that this is done by no mode of accentuation, so well as that which places the accent on the antepenultimate syllable of the words *theology*, *orthography* ; and therefore that this accentuation, without insisting on its superior harmony, must best answer the great end of language (328).

515. This tendency in our language, to simplify compounds, is sufficiently evident in that numerous catalogue of words, where we find the long vowel of the simple changed into a short one in the compound, and by this means losing much of its original import to the ear ; thus *breakfast*, *shepherd*, *vineyard*, *meadow*, *shadow*, *zealous*, *hearken*, *valley*, *cleansed*, *cleanly* (neat) *forehead*, *wilderness*, *bewilder*, *kindred*, *knowledge*, *darling*, *fearful*, *pleasant*, *pleasure*, *whitster*, *whittleather*, *seamstresses*, *wealth*, *bealth*, *wisdom*, *wizard*, *parentage*, *lineage*, *children*, *pasty*, *gosling*, *collier*, *holiday*, *Christmas*, *Michaelmas*, *windlafs*, *cripple*, *hinder*, and many others entirely lose the sound of the simple in their compounds.

516. The long *i* in *white*, when a simple, is almost universally changed into a short one in proper names, as *Whitchurch*, *Whitefield*, *Whitbread*, *Whitlock*, *Whitaker*, &c. for compendiousness and dispatch being next in importance to perspicuity, when there is no danger of mistake, it is no wonder that the organs should fall into the shortest and easiest sounds.

517. It must, however, be observed, that this tendency to unite simples into a compound, by placing an accent exactly where the two words coalesce, is still subservient to the laws of harmony. The Greek word *δοκέω*, which signifies opinion, and from which the last syllables of *orthodoxy* are derived, was never a general subjunctive word like *λογος* and *γραφω* ; and even if it had been so, the assemblage of consonants in the letter *x* would have prevented the ear from admitting an accent on the syllable immediately preceding, as the *x* would, by this means, become difficult to pronounce. Placing the accent, therefore, on the first syllable of *orthodoxy*, gives the organs an opportunity of laying a secondary stress upon the third, which enables them to pronounce the whole with distinctness and fluency. Thus *Galaxy* and *Cachexy*, having the accent on the first syllable, are very difficult to pronounce ; but this difficulty is removed by placing the accent a syllable higher in the words *apoplexy*, *ataraxy*, and *anorexy*.

518. But the numerous classes of words that so readily adopt this enclitical accent sufficiently prove it to be agreeable to the genius of our pronunciation. This will more evidently appear by adducing examples. Words in the following terminations have always the accent on that syllable where the two parts unite, that is, on the antepenultimate syllable.

In *loquy*, as *obloquy*, *soliloquy*, *ventriloquy*, &c.

In *strophe*, as *catastrophe*, *apostrophe*, *anastrophe*, &c.

In *meter*, as *geometer*, *barometer*, *thermometer*, &c.

In *gonal*, as *diagonal*, *octagonal*, *polygonal*, &c.

In *vorous*, as *carnivorous*, *granivorous*, *piscivorous*, &c.

In *ferous*, as *bacciferous*, *cocciferous*, *somniferous*, &c.
 In *fluus*, as *superfluous*, *mellifluous*, *fellifluous*, &c.
 In *fluent*, as *mellifluent*, *circumfluent*, *interfluent*, &c.
 In *vomous*, as *ignivomous*, *flammivomous*, &c.
 In *parous*, as *viviparous*, *oviparous*, *deiparous*, &c.
 In *cracy*, as *theocracy*, *aristocracy*, *democracy*, &c.
 In *gony*, as *theogony*, *cosmogony*, *hexagony*, &c.
 In *phony*, as *symphony*, *cacophony*, *colophony*, &c.
 In *machy*, as *theomachy*, *logomachy*, *sciomachy*, &c.
 In *nomy*, as *oxonomy*, *astronomy*, *Deuteronomy*, &c.
 In *tomy*, as *anatomy*, *lithotomy*, *arteriotomy*, &c.
 In *scopy*, as *metoposcopy*, *deuteroscopy*, *aeroscopy*, &c.
 In *pathy*, as *apathy*, *antipathy*, *idiopathy*, &c.
 In *mathy*, as *opsmathy*, *polymathy*, &c. &c. &c.

519. Some of these Greek compounds seem to refuse the antepenultimate accent for the same reason as *orthodoxy*; such as *necromancy*, *chiromancy*, *hydromancy*; and those terminating in *archy*, as *hierarchy*, *oligarchy*, *patriarchy*: all of which have the accent on the first syllable, which gives the organs time to recover their force upon the third, and to pronounce the two consonants with much more ease, than if the accent immediately preceded them; but *periphrasis* and *antiphrasis*, besides their claim to the accent of their originals, readily admit of the accent on the second syllable, because the consonants in the two last syllables do not come together, and are therefore easily pronounced after the accent.

520. By this view of the enclitical terminations we may easily perceive how readily our language falls into the antepenultimate accent, in words of more than two syllables; and that those terminations which seem to refuse this accent, do it rather from a regard to etymology than analogy. Thus words ending in *asis*, as *periphrasis*, *apophasis*, *hypothesis*, &c. have the antepenultimate accent of their originals. The same may be observed of those ending in *esis*, as *hypotesis*, *antithesis*, *parentesis*, &c. but *exegetis*, *mathesis*, *auxesis*, *cataphesis*, *paracentesis*, *apostrophesis*, have the accent on the penultimate syllable, because the vowel in this syllable is long in Greek and Latin. But all words ending in *asis* have the accent on the penultimate, except *metamorphosis* and *apotheosis*, which desert the accent of their originals, while those in *ysis* are accented regularly on the antepenultimate in Greek, Latin, and English, as *analysis*, *paralysis*, &c. We may note too, that every *s* in all these terminations is sharp and hissing.

521. Words of three syllables ending in *ator* have the accent on the penultimate, as *spectator*, *collator*, *delator*, &c. except *orator*, *senator*, *legator*, and *barrator*. But words in this termination of more than three syllables, though they have generally the accent on the penultimate, are subject to a diversity not easily reduced to rule: thus *navigator*, *propagator*, *dedicator*, &c. are sometimes pronounced with the accent on the first syllable, and sometimes on the third: but as these words may be pronounced with an accent on both these syllables, it is of less consequence on which syllable we place the accent, when we use only one. The general rule certainly inclines to the penultimate accent; but as all these words are verbal nouns, and, though generally derived from Latin words of the same terminations, have verbs corresponding to them in our own language, it is very natural to preserve the accent of the verb in these words, as it gives an emphasis to the most significant part of them: thus *equivocator*, *prevaricator*, *dedicator*, might be regularly formed from the verbs to *equivocate*, to *prevaricate*, and to *dedicate*; and, agreeably to analogy, would have been written *equivocater*, *prevaricater*, and *dedicater*; but an affectation of preferring every analogy to our own, has given these words a Latin termination, which answers no purpose, but to involve our language in absurdities; but the ear, in this case, is not quite so servile

as the eye ; and though we are obliged to write these words with *or*, and not *er*, we generally hear them pronounced as if they were formed from our own verbs, and not from Latin nouns in *ator*. But when the word has no verb in our own language to correspond to it, the accent is then placed with great propriety upon the *a*, as in Latin : thus *violator*, *instigator*, *navigator*, &c. ought to have the accent on the first syllable ; and *emendator*, *gladiator*, *adulator*, &c. on the last but one.

SECONDARY ACCENT.

522. **H**ITHERTO we have considered that accent only, which necessarily distinguishes one syllable in a word from the rest ; and which, with very little diversity, is adopted by all who speak the English language.

523. The secondary accent is that stress we may occasionally place upon another syllable, besides that which has the principal accent, in order to pronounce every part of the word more distinctly, forcibly, and harmoniously.

524. There are few authors who have not taken notice of this secondary stress upon some of the longer polysyllables, but none have once hinted that this stress is not essential to the sound of the word : they seem to have supposed both accents equally necessary, and without any other difference, than that one was pronounced more forcibly than the other. This mistake arose from a want of studying the speaking voice. A knowledge of this would have told them, that one accent only was essential to every word of more than one syllable, and that the secondary stress might, or might not, be adopted, as distinctness, force, or harmony, should require : thus *complaisant*, *caravan*, and *violin*, have frequently an accent on the first, as well as on the last syllable, though a somewhat less forcible one. The same may be observed of *repartee*, *referee*, *privateer*, *domineer*, &c. but it must still be observed, that though an accent be allowed on the first syllable of these words, it is by no means necessary ; they may all be pronounced with one accent, and that on the last syllable, without the least deviation from propriety.

525. In order to give some idea of the nature of the secondary accent, let us suppose, that, in giving our opinion of an argument, we say——

“ It is a direct demonstration of the Copernican system.”

In this sentence, as an accent is necessarily upon the last syllable of *direct*, we seldom lay a stress on the first syllable of *demonstration*, unless we mean to be uncommonly emphatical. But in the following sentence——

“ It is a démonstration of the Copernican system.”

Here, as no accented word precedes *demonstration*, the voice finds a rest, and the ear a force, in placing an accent on the first, as well as on the third syllable of this word.

526. But though we may, or may not use, the secondary accent at pleasure, it is by no means a matter of indifference on what syllable we place it : this is fixed, with as much certainty as the place of the principal accent itself ; and a wrong position of one, would as much derange the sound of the word as a wrong position of the other.

527. It may be observed, in the first place, that the secondary accent is always two syllables, at least, distant from the principal accent : thus in *demonstration*, *lamentation*, *provocation*, &c. the secondary accent is on the first syllable, and the principal on the third ; and in *arteriotomy*, *meteorology*, and *hypochondriacal*, the secondary accent is on the first, and the principal on the fourth syllable ; and in the word *indivisibility* we may place two secondary accents, one upon the first, and the other on the third syllable.

528. In the next place it may be observed, that though the syllable on which the principal accent is placed, is fixed and certain, yet we may, and do, frequently make the secondary principal, and the principal secondary : thus *caravan*, *complaisant*, *violin*, *repartee*, *referee*, *privateer*, *domineer*, may all have the greatest stress on the first, and the least on the last syllable, without any violent offence to the ear : nay, it may be asserted, that the principal accent on the first syllable of these words, and none at all on the last, though certainly improper, has nothing in it grating or discordant ; but placing an accent on the second syllable of these words would entirely derange them, and produce an intolerable harshness and dissonance. The same observations may be applied to *demonstration*, *lamentation*, *provocation*, *navigator*, *propagator*, *alligator*, and every similar word in the language.

QUANTITY.

529. In treating this part of pronunciation, it will not be necessary to enter into the nature of that quantity which constitutes poetry ; the quantity here considered will be that which relates to words taken singly ; and this is nothing more than the length or shortness of the vowels, either as they stand alone, or as they are differently combined with vowels or consonants.

530. Quantity, in this point of view, has already been fully considered under every vowel and diphthong in the language. What remains to be said on this subject is, the quantity of vowels under the secondary accent. We have seen that vowels under the principal accent, before the terminations *ia*, *eon*, *ion*, are all long, except *i* (507). That all vowels are long before the terminations *ity* and *ety* (511) ; that if one consonant precede these terminations, every preceding accented vowel, except the *a* in *scarcity* and *rarity*, signifying uncommonness, is short but *u* ; and that the same analogy of quantity is found before the terminations *ic* and *ical*, and the numerous enclitical terminations we have just been pointing out. Here we find custom conformable to analogy ; and that the rules for the accent and quantity of these words admit of scarcely any exceptions. In other parts of the language where custom is more capricious, we can still discover general rules ; and there are but very few words in which the quantity of the vowel under the principal accent is not ascertained. Those who have but a common share of education, and are conversant with the pronunciation of the capital, are seldom at a loss for the quantity of the vowel under that accent which may be called principal ; but the secondary accent in the longer polysyllables does not seem to decide the quantity of the vowels so invariably. Mr. Sheridan divides the words *deglutition*, *depravation*, *degradation*, *dereliction*, and *democratical*, into *de-glu-ti-tion*, *de-pra-va-tion*, *de-gra-da-tion*, *de-re-lic-tion*, and *de-mo-crat-i-cal* ; while Dr. Kenrick more accurately divides them into *deg-lu-ti-tion*, *dep-ra-va-tion*, *deg-ra-da-tion*, and *dem-o-crat-i-cal*. But though Mr. Sheridan divides *retrograde* into *ret-ro-grade*, he divides *retrogradation*, *retrogression*, *retrospect*, *retrospection*, and *retrospective*, into *re-tro-gra-da-tion*, *re-tro-gres-sion*, *re-tro-spec-t*, *re-tro-spec-tion*, and *re-tro-spec-tive*. At the first sight of these words we are tempted to prefer the preposition in a distinct syllable, as supposing that mode to convey more distinctly each part of the word ; but custom at large, the best interpreter of nature, soon lets us see that these prepositions coalesce with the word they are prefixed to, for reasons greatly superior to those which present themselves at first. If we observe the tendency of pronunciation, with respect to inseparable prepositions, we shall find, that those compound words which we adopt whole from other languages we consider as simples, and pronounce them without any respect to their component parts ; but those compounds which we form ourselves retain the traces of their formation, in the distinction which is observable, between the prepositive and radical part of the word : thus *retrograde*, *retrogression*, *retrospect*, and *retrospective*, coming compounded to us from the Latin, ought, when the accent is on the preposition, to shorten the vowel, and unite it to the root, as in *ref-ur-rec-tion*, *rec-ol-lec-tion*,

lec-tion, prep-o-sit-ion, &c. while *re-commit, re-convey, &c.* being compounds of our own, must preserve it separate.

531. From what has been observed arises this general rule : where the compound retains the primary sense of the simples, and the parts of the word are the same in every respect, both in and out of composition, then the preposition is pronounced in a distinct syllable ; but when the compound departs ever so little from the literal sense of the simples, the same departure is observable in the pronunciation ; hence the different syllabication and pronunciation of *re-com-mence* and *rec-om-mend* ; the former signifies a repetition of a commencement, but the latter does not imply a repetition of a commendation : thus *re-petition* would signify to petition again ; while *rep-ition* signifies only an iteration of the same act, be it what it will.

532. That this is perfectly agreeable to the nature of the language, appears from the short pronunciation of the vowel in the first syllable of *preface, prelate, prologue, prelude, &c.* as if divided into *pre-face, prel-ate, prol-ogue, prel-ude, &c.* and that it is agreeable to the nature of things, may be collected from observing, that the utility of language does not consist in keeping the simples in a word so distinct as that each of the component parts shall remain in a state of separation, but in uniting several parts into one undistinguished compound ; which compound shall often have an idea annexed to it somewhat different from the simples that compose it (514).

533. It will be necessary, however, to observe, that in forming a judgement of the propriety of these observations, the nicest care must be taken not to confound those prepositions which are under the primary and secondary accent, with those which immediately precede the stresses ; for *preclude, pretend, &c.* are under a very different predicament from *prologue, preposition, &c.* and the very same law that obliges us to pronounce the vowel short in the first syllable of *prov-i-dence, prov-o-cation, and prof-a-nation*, obliges us to pronounce the vowel open, and with some degree of length in *pro-vide, pro-voke, and pro-fane*. The same may be observed of the *e* in *repair* and *rep-a-ration* ; *reply* and *rep-li-cation* ; *repeat* and *rep-e-tition* ; the accent making the whole difference between the quantity of the vowel in one word and the other.

534. The only exception to the shortening power of the secondary accent is, when it is succeeded by a diphthong : thus *mediator* and *mediatorial* have the *e* in the first syllable as long as in *mediate* : *deviation* has the *e* in the first syllable as long as in *deviate*, notwithstanding the secondary accent is on it, and which would infallibly have shortened it, if it had not been for the succeeding diphthong *ia* : and even this diphthong in *gladiator* has not the power of preserving the first syllable long ; though Mr Sheridan, by his marking it, seems to be of a different opinion. The first *e* in *perpetual* is shortened by the same power ; while *especial* and *discretion* have the penultimate *e* short, and are exceptions to another rule (507).

535. From what has been seen of accent and quantity, it is easy to perceive how prone our language is to an antepenultimate accent, and how naturally this accent shortens the vowel it falls upon : nay, so great a propensity have vowels to shrink under this accent, that the diphthong itself, in some words, and analogy in others, are not sufficient to prevent it. Thus, by the subjoining only of *al* to *nation*, with the *a* long, it becomes *national*, with the *a* short, though contrary to its relation with *occasion* and *congregation* ; which do not shorten the *a* upon being made *occasional* and *congregational* : in like manner the acquisition of the same termination to the word *nature*, makes it *nat-u-ral* ; which is just as opposite to the general analogy of forming these adjectives in *al*, as in the former instance ; for this termination has nothing in enclitical in it, and makes no more alteration in the accented vowel than the participial or adverbial endings in *ing, ed, and ly*.

536. The same shortening power in the antepenultimate accent may be observed in *rational* and *rationate*, where the first *a* in the first word, and the *o* in the second, are short. The first *a* in the second word is short also by the power of the secondary accent ; though Mr. Sheridan has, in my opinion,

nion, very erroneously divided this word into *ra-sho-fy-na-shun* ; that is, into a syllable less than it ought to have, and marked the *o* long instead of short.

537. The accent on the Latin antepenultimate seemed to have something of a similar tendency : for though the great difference in the nature of the Latin and English accent will not allow us to argue from one to the other, but in very few circumstances, yet we may perceive in that accent; so different from ours in general, a great coincidence in this particular ; namely, its tendency to shorten an antepenultimate syllable. Bishop Hare tells us, that “ *Quæ acuantur in tertia ab extrema, interdum acuta corripunt, si positione sola longa sunt, ut *optime, servitus, pervelim, Pampbilus*, et pauca alia, quo Cretici mutantur, in Anapestos. Idem factum est in *neutiquam*, licet incipiat diphthongo.*” De Metr. Comic, p. 62. — Those words, which have the acute accent on the antepenultimate syllable, have sometimes that syllable shortened, if it was only long by position, as *optime, servitus, pervelim, Pampbilus*, and a few others, which by this means are changed from Cretic to Anapestic feet : nay, *neutiquam* undergoes the same fate, though it begin with a diphthong.

SYLLABICATION.

538. Dividing words into syllables is a very different operation, according to the different ends proposed by it. The object of syllabication may be, either to enable children to discover the sound of words they are unacquainted with, or to show the etymology of a word, or to exhibit the exact pronunciation of it.

539. When a child has made certain advances in reading, but is ignorant of the sound of many of the longer words, it may not be improper to lay down the common general rule to him, that a consonant between two vowels must go to the latter ; and that two consonants coming together must be divided. Farther than this, it would be absurd to go with a child ; for telling him that compounds must be divided into their simples, and that such consonants as may begin a word may begin a syllable, requires a previous knowledge of words, which children cannot be supposed to have ; and which, if they have, makes the division of words into syllables unnecessary. Children, therefore, may be very usefully taught the general rule above mentioned, as, in many cases, it will lead them to the exact sound of the word, as in *pro-vi-ded* ; and in others, it will enable them to give a good guess at it, as in *de-li-cate* ; and this is all that can be expected. This procedure may be called synthetic, as it proceeds from parts to the whole ; and when we are to form an unknown compound sound, out of several known simple sounds, (which is the case with children, when we wish them to find out the sound of a word by spelling it) this, I say, is the only method that can be taken.

540. But an etymological division of words is a different operation. That syllabication, which has etymology for its object, is an analytic division ; that is, the division of a person acquainted with the whole word, and who wishes to convey, by this division, a knowledge of its constituent parts, as *orthography, theology*, &c.

541. In the same manner, a person, who is pre-acquainted with the whole compound sound of a word, and wants to convey the sound of each part to one unacquainted with it, must adopt the analytic method, by dividing it into such partial sounds as, when put together again, will exactly form the whole, as *or-thog-ra-phy, the-ol-o-gy*, &c. This is the method adopted by those who would convey the whole sound, by giving distinctly every part ; and, when this is the object of syllabication, Dr. Lowth's rule is certainly to be followed. “ The best and easiest rule,” says the learned bishop, “ for dividing the syllables in spelling, is, to divide them as they are naturally divided in a right pronunciation, without regard to the derivation of words, or the possible combination of consonants, at the beginning of a syllable.” Introduction to Eng. Gram. page 7.

542. Easy, however, as it may appear at first sight, to divide words exactly as they are pronounced; it will be found upon trial to be frequently attended with difficulty. We have seen, that without a competent knowledge of the position and power of the secondary accent, Mr. Sheridan and Dr. Kenrick have differed widely from each other, and sometimes from themselves, in the syllabication of the inseparable prepositions (530). The same diversity may be observed in some words where the diphthongs occur. Mr. Sheridan divides *diamond* and *deviate* into *di-mund* and *de-vyate*, making them but two syllables; while Dr. Kenrick, in my opinion, much more correctly, divides them into *di-a-mond* and *de-vi-ate*. The same incorrectness runs through almost every word of the same kind in Mr. Sheridan, who divides *partiality* and *satiate* into *par-shal-by-ty* and *sa-shet*, which, if my ear does not grossly mislead me, ought always to be pronounced with a syllable more than he has bestowed on them.

543. It is true, indeed, in poetry, these words would have no more syllables than he has given them; but a poetic syllable and a prosaic one are sometimes very different quantities. The *e* before *r*, in an unaccented syllable, never goes for a syllable in verse, as in the following couplet from Pope:

“ But of the two, less *dang’rous* is th’ offence

“ To tire our patience, than mislead our sense.”

And yet nothing can be more certain than that the word *dangerous* has always three syllables in prose. The same may be observed of the word *various* in the following lines from Rowe:

“ Of all the *various* wretches love has made,

“ How few we find by men of sense betray’d!”

Which word Mr. Sheridan squeezes into two syllables, by spelling it *va-ryus*.

544. By these instances we may perceive how essential to a correct pronunciation is an accurate division of words into syllables, especially when we consider that this division, in most cases, determines the quantity of the vowel; that is, when a vowel ends a syllable it is long; and when a consonant ends a syllable, the preceding vowel is short. This will not be disputed when the vowel is under the accent, as every vowel in this situation must be either long or short; but many will hesitate to call those vowels long which terminate a syllable not under the accent, because we do not always rest so long upon unaccented as upon accented vowels: but if instead of long and short we substitute the terms open and shut, we may, with very few exceptions, say, that every vowel ending a syllable is open, and every vowel succeeded by a consonant which ends a syllable is short or shut. Now the difference between a long and an open vowel is merely the greater duration of the former, while the difference between a long and a short vowel is often an essential difference of sound. Thus the *e* in *event*, and the *o* in *opaque*, though not under the accent, are essentially the same sounds as the *e* in *equal*, and the *o* in *opiate*; while the *e* in *men*, and the *o* in *don*, are short sounds essentially different from the foregoing long ones; that is, the *e* in *men*, is the short sound of *a* in *mane*; and the *o* in *don*, the short sound of the diphthong *aw* in *dawn*. In the same manner, when *i* ends a syllable, not under the accent as *qual-i-ty*, though it has not the long diphthongal sound, as in *i-dle*, yet it is not short as in *it*, but open as the *e* in *equal*: the same may be observed of *u* (179).

545. There is a remarkable exception to this rule in the letter *a*. When this vowel ends a syllable, not under the accent, we cannot give it any of its three open sounds without hurting the ear. Thus in pronouncing the word *abound*—*ay-bound*, *ah-bound*, and *aw-bound*, are all improper; but giving the *a* the second or Italian sound, as *ab-bound*, seems the least so; for which reason I have, like Mr. Sheridan, adopted the short sound of this letter to mark the unaccented *a* (70) (88).

546. *A Table of the Simple and Diphthongal Vowels, referred to by the Figures over the Letters in the Dictionary.*

A CRITICAL PRONOUNCING D I C T I O N A R Y AND EXPOSITOR OF THE ENGLISH LANGUAGE.

The figures between the parentheses refer to the numbers in the Principles of Pronunciation prefixed to this Dictionary. Thus (63) refers to the enquiry into the alphabetical pronunciation of the letter A; and so of the rest.

The figures over the letters refer to the vowels in the words at the top of the page; and the index & before these words, refers to the table of simple and diphthongal sounds, where the different sounds of the vowels are explained more at large. Thus & (546) refers to the Table in the opposite page.

ABSCISSION, áb-sîzh'ôn. f.

The act of cutting off ; the state of being cut off.

I have differed from Mr. Sheridan in marking the *s* in this word, and, I think, with the best usage on my side. Though double *s* is almost always pronounced sharp and hissing, yet when a sharp *s* precedes, it seems more agreeable to the ear to pronounce the succeeding *s* flat. Thus, though the termination *ition* is always sharp, yet because the *s* in *transition* is necessarily sharp, the *t* goes into the flat sound, as if written *transizibion*.

An assembly or society of men, uniting for the promotion of some art; the place where sciences are taught; a place of education, in contradistinction to the universities or public schools.

Dr. Johnson tells us, that this word was anciently and properly accented on the first syllable, though now frequently on the second. That it was accented on the first syllable till within these few years, is pretty generally remembered; and if Shakespeare did not, by poetical licence, violate the accentuation of his time, it was certainly pronounced so two centuries ago, as appears by Dr. Johnson's quotation of him,

"Our court shall be a little academy,

"Still and contemplative in living arts."

LOVE'S LABOUR'S LOST.

But the accentuation of this word formerly, on the first syllable, is so generally acknowledged, as not to stand in need of poetic authority. The question is, whether this accentuation, or that which places the stress on the second syllable, is the most proper. To wave, therefore, the authority of custom, which precludes all reasoning on language, and reduces the dispute to a mere matter of fact, it may be presumed, that whatever is agreeable to the most general usage of the language in similar words, is the most proper in this; and if it appears that general usage, in similar words, is in favour of the old pronunciation, it must certainly, for that reason, be allowed to be the best. And first it may be observed, that as our language is almost as averse to the accent on the last syllable, as the Latin, it is a general custom with us, when we adopt a word from the Latin, and abridge it of one or two of its syllables, to remove the accent, at least a syllable higher, than it was in the original language, that the accent, when the word is naturalised, may not rest on the last. Thus of *Hómérus*, we make *Homer*; of *Virgilius*, *Virgil*; and of *Horátius*, *Horace*. *Hyacinthus*, altered to *Hyacinth*, removes the accent two syllables higher; and *cérémonie*, become *céremony*, does the same; and no law, that I know of, forbids us to accent *academia*; or if you will *Acadèmia*, when turned into *academy*, on the first syllable, as it was constantly accented by our ancestors, who, receiving Greek through the medium of Latin, generally pronounced Greek words according to the Latin analogy, and therefore necessarily placed the accent of *academia* on the third syllable, which, when reduced to *academy*, required the accent to be removed higher.

But how, it will be said, does this account for placing the accent on the first syllable of the English word *academy*, rather than the second? To this it may be answered, that the numberless instances of preference given by the accent to the first syllable in similar words, such as *melancholy*, *parsimony*, *dilatatory*, &c. might be a sufficient authority without any other reason. But, perhaps, it will be pardoned me if I go farther, and hazard a supposition that seems to account for the very common practice of placing the accent of so many of the longer polysyllables from the Latin on the first or second syllable. Though in the Latin there never was more than one accent upon a word, yet, in our pronunciation of Latin, we commonly place an accent on alternate syllables, as in our own words; and when the Latin word, by being anglicised, becomes shorter, the alternate accent becomes the principal. Thus in pronouncing the Latin word *academia*, the English naturally place an accent on the first and third.

(546). — Fâte, fâr, fâll, fât ; — mê, mêt ; — pine, pîn ; —

third syllable, as if divided into *de-a-dé-mi-a*; so that when the word becomes Anglicised into *de-a-de-my*, the first syllable retains the accent it had when the word was Latin. On the other hand it may be conjectured with some probability, that a fondness for pronouncing like the French has been the occasion of the alteration. As the English ever suppose the French place the accent on the last syllable, in endeavouring to pronounce this word after their manner, the stresses must naturally fall on the second and last syllables, as if divided into *a-cád-a-mie*; and from an imitation of this, it is probable the present pronunciation of the word was produced. Thus we have a very probable reason why so many of our longer words from the Latin are accented so near the beginning; as, in this mode of pronouncing them, they seem to retain one of the accents of the original. Hence the long train of words, *voluntary, comparable, disputable, admirable, &c.* have the accent on the first syllable, because in pronouncing the words *voluntarius, comparabilis, disputabilis, admirabilis, &c.* we commonly lay a stress upon the first, as well as the third syllable. As to the analogy, as Mr. Sheridan pretends, of pronouncing this word with the accent on the second syllable, because words ending in *my* have the accent on the antepenultimate, nothing can be more ill founded. True it is, that words of this termination never have the accent on the penultimate; but, that for this reason, they must necessarily have the accent on the antepenultimate, I cannot well comprehend. If *polygamy, neconomy, astronomy, &c.* (513) have their accent on the antepenultimate, it arises from the nature of the terminations; which being, as it were, a species, and applicable to a thousand other words, have, like *logy* and *graphy*, the accent always on the preceding syllable; which seems best to unite the compound into one word: but *academy* being a simple, is subject to no such rule, and seems naturally to incline to a different analogy of pronunciation. Thus Dr. Johnson seems to have decided justly in laying the word *academy* ought to have the accent on the first syllable; though present usage, it must be confessed, seems to lean to the contrary pronunciation.

ACCEPTABILITY, ák-sèp-tá-bíl'lè-tè

f. The quality of being acceptable.

ACCEPTABLE, ák'sèp-tá-bl. a.

Grateful; pleasing.

Within these twenty years this word has shifted its accent from the second to the first syllable. There are now few polite speakers who do not pronounce it acceptable; and it is much to be regretted that this pronunciation is become so general; for where consonants of so different an organ as *p* and *t* are near the end of a word, the word is pronounced with much more difficulty when the accent is removed higher than when it is arrested by these letters; for in this case, the force which accompanies the accent facilitates the organs in their transition from the formation of the one letter to the other. As nature, therefore, directs us to place the accent upon these consonants in all words ending in *active, edive, isive, osive, and utive*; *atible, estible, ostible, and utible*; so we ought to listen to the same voice in pronouncing *acceptab e, susceptib le, corruptib le*, with the accent on the second syllable. — See *Commendable*.

ACCEPTABLENESS, ák'sèp-tá-bl-nèfs

f. The quality of being acceptable.

ADVERTISE- { âd-vêr'tiz-mênt. }
MENT, { âd-vêr-tize'mênt. }

f. Intelligence, information; notice of any thing published in a paper of intelligence.

As nouns ending in *ment* always follow the accentuation of the verbs from which they are formed, we frequently hear *advertisement* taxed with the grossest irregularity for having the accent on a different syllable from *advertise*. The origin of this irregularity seems to have arisen from a change which has taken place in the pronunciation of the verb since the noun has been formed: *advertise* and *chastise* were, in Shakespeare's time, both accented on the penultimate, and therefore *advertisement* and *chastisement* were formed regularly from them.

"Wherein he did the King his lord *advertise*." HAN. VIII.

"My grief cries louder than *advertisement*." MUCH ADO, &c.

"Oh, then how quickly should this arm of mine,"

"Now pris'n'er to the palsy, *chastise* thee." RICHARD II.

"And *chastisement* doth therefore hide its head." JUL. CÆSAR.

But since that time the verbs *advertise* and *chastise* have fallen into an analogy more agreeable to verbs of the same form—for the verbs to *promise*, *practise*, *franchise*, *mortise*, and *divertise*, are the only words where the termination *ise* has not the accent either primary or secondary; and if an alteration must be made to reconcile the pronunciation of the simple with that of the compound, we should find it much easier to change *advertisement* and *chastisement* into *advertisement* and *chastisement*, than *advertise* and *chastise* into *advêrtise* and *chêstise*; but the irregularity seems too inveterate to admit of any alteration.

[3] This word is sometimes pronounced as if written *awtority*. This affected pronunciation is traced to a gentleman who is one of the greatest ornaments of the law, as well as one of the politest scholars of the age, and whose authority has been sufficient to sway the bench and the bar, though *author*, *authentic*, *theatre*, *theory*, &c. and a thousand similar words where the *th* is heard, are constantly flaring them in the face.

The public ear, however, is not so far vitiated as to acknowledge this innovation; for though it may with security, and even approbation, be pronounced in Westminster Hall, it would not be quite so safe for an actor to adopt it on the stage.

I know it will be said that *authoritas* is latter Latin, that the purer Latin never had the *s*; and that our word, which is derived from it, ought, on that account, to omit it. But it may be observed, that, according to the best Latin critics, the word ought to be written *awtoritas*; and that, according to this reasoning, we ought to write and pronounce *awtority* and *awtor*; but this, I presume, is farther than these innovators would choose to go. The truth is, such singularities of pronunciation should be left to the lower order of critics; who, like coxcombs in dress, would be utterly unnoticed if they were not distinguished by petty deviations from the rest of the world.

From what oddity I know not, this word is frequently pronounced as if accented on the last syllable but one, and is generally

found written as if it ought to be so pronounced, the *t* being doubled, as is usual when a participle is formed from a verb that has its accent on the last syllable. Dr. Johnson, indeed, has very judiciously set both orthography and pronunciation to rights, and spells the word with one *t*, though he finds it with two in the quotations he gives us from Garth and Swift. That the former thought it might be pronounced with the accent on the second syllable, is highly presumable from the use he makes of it, where he says:

"Bigotted to this idol, we disclaim

"Rest, health, and ease, for nothing but a "name."

For if we do not lay the accent on the second syllable here, the verse will be unparadoxically rugged. This mistake must certainly take its rise from supposing a verb which does not exist, namely, to *bigot*; but as this word is derived from a substantive, it ought to have the same accent; thus, though the words *ballot* and *billet* are verbs as well as nouns, yet as they have the accent on the first syllable, the participial adjectives derived from them have only one *t*, and both are pronounced with the accent on the first syllable, as *balloted*, *billeted*. *Bigoted* therefore ought to have but one *t*, and to preserve the accent on the first syllable.

(259). To sprout, to shoot into branches.

BOURN, bôrne. f.

A bound, a limit; a brook, a torrent.

I have differed from Mr. Sheridan and Dr. Kenrick in the pronunciation of this word. They make it sound as if written *born*; but if my memory fail me not, it is a rhyme to *mourn* upon the stage; and Mr. Garrick so pronounced it.

"The undiscover'd country, from whose bourn

"No traveller returns."

BOW-WINDOW, bô'win-dô.

Dr. Johnson derives this word, and, perhaps, justly, from *bow-window*, or a window forming a *bay* in the internal part of the room; but present custom has universally agreed to call these windows *bow-windows*, from the curve, like a *bow*, which they form by jutting outwards. However original and just, therefore, Dr. Johnson's derivation may be, there is little hope of a conformity to it, either in writing or pronunciation, while there is apparently so good an etymology, both for sense and sound, to support the present practice.

BOWYER, bô'yêr. f.

An archer; one whose trade is to make bows.

BOX, bôks. f.

A tree; the wood of the tree.

BRACE, brâce. f.

A pair, a couple.

BRACELET, brâce'lêt. f.

An ornament for the arms.

I have, in the pronunciation of this word, made the *e* long and slender, as in *brace*, as I find it in Dr. Keurick, W. Johnson, Mr. Perry, and Mr. Scott; and not short as in *brass*, as Mr. Sheridan has marked it; and which, I believe, is the prevailing pronunciation in Ireland. For though many compounds shorten the vowel in the simple, as is shown at large in the Principles of Pronunciation (308) (515), yet I think such words are exceptions as are only diminutives, plurals and feminines.

† The general sound of this word is like the verb to buy; but we not unfrequently hear it pronounced like the verb to be. This latter sound, however, is only tolerable in colloquial pronunciation, and then only when used as a preposition; as when we say, Do you travel *by*-land or *by*-water? But in reading these lines of Pope:

"By land, by water, they renew the charge;
"They stop the chariot, and they board the
"barge."

Here we ought to give the word *by* the sound of the verb to buy.

CANT, kánt. f.

A corrupt dialect used by beggars and vagabonds; a form of speaking peculiar to some certain class or body of men; a whining pretension to goodness; barbarous jargon; auction.

It is scarcely to be credited, that the writer in the Spectator, signed T. should adopt a derivation of this word from one Andrew Cant, a Scotch Presbyterian Minister, when the Latin *cantus*, so expressive of the singing or whining tone of certain preachers is so obvious an etymology. The Cant of particular professions is an easy derivation from the same origin, as it means the set phrases, the routine of professional language, resembling the chime of a song. *Quaint*, from which some derive this word, is a much less probable etymology.

CHAMBER, thámé'búr. f.

An apartment in a house, generally used for those appropriated to lodging; any retired room; any cavity or hollow; a court of justice; the hollow part of a gun where the charge is lodged; the cavity where the powder is lodged in a mine.

I have in this word departed from Mr. Sheridan and Dr. Kenrick, because I think the best usage has entirely departed from them. About thirty years ago the first syllable of *Chamber* was unversally pronounced so as to rhyme with *Palm*, *Psalm*, &c. but since that time it has been gradually narrowing to the slender sound of *a* in *came*, *fame*, &c. and seems now to be fully established in this sound. This, however, is to be regretted, as it militates with the laws of syllabication: there are few words in the language which we cannot divide into parts as to show by this division the quantity of the vowels; this word forms an exception; for *mb*, being uncombinable consonants, we cannot end the first syllable with *a*; and if we join *m* to it, the *a* becomes short, and acquires another sound. But if two such words as *Cam* and *Bridge* could not resist the blind force of custom, which has for so many years reduced them to *Camelridge*, why should we wonder that *Chamber* and *Cambrick* should yield to the same unrelenting tyrant?

TO CHANGE, thánje. v. a.

To put something in the place of another; to resign any thing for the sake of another; to discount a larger piece of money into several smaller; to give and take reciprocally; to alter; to mend the disposition or mind.

This word, with others of the same form, such as *range*, *strange*, *mange*, &c. are, in the west of England, pronounced with the short sound of *a* in *ran*, *man*, &c. The same may be observed of the *a* in the first syllable of *angel*, *ancient*, &c. which, in that part of the kingdom, sounds like the article *a*; and this, though disagreeable to a London ear, and contrary to the best usage, which forms the only rule, is more analogical than pronouncing them as if written *chainge*, *stränge*, *ancient*, *angel*, &c. for we find every other vowel in this situation short, as *revenge*, *hinge*, *sponge*, &c.

TO CHANGE, thánje. v. n.

To undergo change, to suffer alteration.

CHAR, tsháre. f.

Work done by the day.

TO CHAR, tsháre. v. n.

To work at other's houses by the day.

In Ireland they seem to have retained the genuine pronunciation of this, as well as many other old English words; I mean that which is agreeable to the orthography, and rhyming with *ter*. In England it is generally heard like *chair* to fit on, and its compound, *char-woman*, like *chair-woman*. Skinner, I know, admits that the word may be derived from the Dutch *keeren*, to sweep; and Junius spells the word *chare*, and tells us the Saxons have the same word spelled *cýppe*, signifying business or charge; but be its derivation what it will, either the orthography, or the pronunciation, ought to be altered; for as it stands at present, it is a singular and disgraceful anomaly.

Containing flesh or carcases.

CHARNEL-HOUSE, tshár'nél-hóúse. f.

The place where the bones of the dead are deposited.

CHART, kárt or tshárt. f.

A delineation of coasts.

As this word is perfectly anglicised by cutting off the *a* in the Latin *Charta*; and as in the Greek *χαρτα*, we ought certainly to naturalize the initial letters by pronouncing them as in *charter*, *charity*, &c. but such is our fondness for Latin and Greek originals, that we catch at the shadow of a reason for pronouncing after these languages, though in direct opposition to the laws of our own. Thus we most frequently, if not universally, hear this word pronounced as *Cart*, a carriage, and perfectly like the French *Carte*.

CHARTER, tshár'túr. f.

A charter is a written evidence; any writing bestowing privileges or rights; privilege, immunity, exemption.

CHARTER-PARTY, tshár'túr-pár-té. f.

A puniſher, a correſtor.

CHASTITY, tſhâſ'té-té. f. (511).

Purity of the body; freedom from obſcenity; freedom from bad mixture of any kind.

I have in this word departed from Mr. Sheridan, and ſeveral other ſpeakers, in the ſound of the *a* in the firſt ſyllable, as no analogy can be clearer than that which prevails in words of this termination, where the antepenultimate accent always ſhortens the vowel. Thus, though the *a*, *e*, and *i*, are long in *humane*, *ſerene*, and *divine*, they are ſhort in *humanity*, *ſerenity*, and *divinity*; and unleſs cuſtom clearly forbids, which I do not believe is the caſe, *chafſtity* ought certainly to have the *a* as I have marked it.

CHASTLY, tſhâſte'lè. ad.

Without incontinence, purely, without contamination.

In theſe words Dr. Johnson has very improperly omitted the ſilent *e*; they ought to be written *chafſtely* and *chafſtenſe*.—See Introduction to Rhyming Dictionary, Orthographical Aphoriſm the VIIth.

CHASTNESS, tſhâſte'nès. f.

Chafſtity, purity.

Gladner, giver of gayety.

CHEERFUL, tſhêér'fûl, or tſhêr'fûl. a.

Gay, full of life, full of mirth; having an appearance of gayety.

This word, like *fearful*, has contracted an irregular pronunciation that ſeems more expreſſive of the turn of mind it indicates than the long open *e*, which languiſhes on the ear, and is at war with the ſmartneſs and vivacity of the idea. We regret theſe irregularities, but they are not to be entirely prevented; and as they ſometimes ariſe from an effort of the mind to expreſs the idea more forcibly, they ſhould not be too ſtudiouſly avoided; eſpecially when cuſtom has given them conſiderable currency; which I take to be the caſe with the ſhort pronunciation of the preſent word. (241) (242).

CHEERFULLY, tſhêér'fûl-lè. ad.

Without dejection, with gayety.

CHEERFULNESS, tſhêér'fûl-nès. f.

CHERUBIM, tſhêr'û-bim. f.

The Hebrew plural of Cherub.

Thoſe who underſtand no language but their own are apt to commit an unpardonable fault with critics, by miſtaking this word for a ſingular, and writing the plural *Cherubims*. Others are apt to commit a much greater fault in ſpeaking, which is that of forming an adjective from this word, as if written *Cherubimical*, or *Cherubimical*. How hard is the fate of an Engliſhman, who, to write and ſpeak his own language properly, muſt not only underſtand French, Latin, and Greek, but Hebrew alſo!

CHERUBIN, tſhêr'û-bîn. a.

Angeliſh.

CHIN, tshín. f.
The part of the face beneath the under lip.

CHINA, tshá'né. f.
China ware, porcelain, a species of vessel made in China, dimly transparent.

CH What could induce us to so irregular a pronunciation of this word is scarcely to be conceived. One would be apt to suppose that the French first imported this Porcelain, and that when we purchased it of them we called it by their pronunciation of China (*Chéén*); but being unwilling to drop the *s*, and desirous of preserving the French sound of *i*, we awkwardly transposed these sounds, and turned *China* into *Cháinee*. This absurd pronunciation seems only tolerable when we apply it to the porcelain of China, or the Oranges, which are improperly called *China Oranges*; but even in these cases it seems a pardonable pedantry to reduce the word to its true sound.

CHINA-ORANGE, tshá'né-òr'inje. f.
The sweet orange.

CHINA-ROOT, tshí'ná-ròót. f.
A medicinal root brought originally from China.

CHINCOUGH, tshín'kòf. f.

TO CHOOSE, thhôoze. v. a.
I chose, I have chosen. To take by way of preference of several things offered; to select, to pick out of a number; to elect for eternal happiness; a term of theologians.

547 This word is sometimes improperly written *choise*, which is a needless departure from its French etymology in *choisir*, as well as from our own analogy in the preterit *chose*.

TO CHOOSE, thhôoze. v. n.
To have the power of choice.

CHOOSER, thhôo'zûr. f.
He that has the power of choosing, elector.

TO CHOP, thhôp. v. a.

CHOP, thhôp. f.
A piece chopped off; a small piece of meat; a crack, or cleft.

CHOP-HOUSE, thhôp'hôfê. f.
A mean house of entertainment.

548 Dr. Johnson, in this definition, seems to have rated a chop-house too low, and to have had a *Cook's Shop* or an *Eating-house* in his mind. Since coffee-houses are become eating-houses and taverns, chop-houses are, perhaps, a little depreciated; but this was

not the case till long after Dr. Johnson's Dictionary was published; and I think they may still, without any impropriety, be called, reputable houses of ready entertainment.

CHOPIN, thhô-pêen'. f.
A French liquid measure, containing nearly a pint of Winchester; a term used in Scotland for a quart of wine measure.

CHYMIST, kîm'mist. f.
A professor of chymistry.

Scholars have lately discovered, that all the nations of Europe have, for many centuries past, been erroneous in spelling this word with a *y* instead of an *e*; that is, *Chymist* instead of *Chemist*: and if we crave their reasons, they very gravely tell us, that instead of deriving the word from *χυμος*, juice, or from *χυνω*, *χυνω*, or *χυνω*, to melt, it is more justly derived from the Arabic *kema*, black. But Dr. Johnson, who very well understood every thing that could be urged in favour of the new orthography, has very judiciously continued the old; and indeed, till we see better reasons than have yet appeared, it seems rather to favour of an affectation of Oriental learning than a liberal desire to rectify and improve our language. But let the word originate in the East or West, among the Greeks or Arabians, we certainly received it from our common *Linguists*, (if the word will be pardoned me) the Latin and French, which still retain either the *y*, or its substitute *i*.

Besides, the alteration produces a change in the pronunciation, which, from its being but slight, is the less likely to be attended to; and therefore the probability is, that let us write the word as we will, we shall still continue to pronounce it the old way: for in no English word throughout the language does the *e* sound like *y*, or *i* short, when the accent is on it.

This improvement, therefore, in our spelling, would, in all probability, add a new irregularity to our pronunciation, already encumbered with too many. Warburton, in his Edition of Pope's Works, seems to have been the first writer of note who adopted this mode of spelling from Boerhaave, and the German critics; and he seems to have been followed by all the inscriptions on the chymists shops in the kingdom. But till the voice of the people has more decidedly declared itself, it is certainly the most eligible to follow Dr. Johnson and our established writers in the old orthography. — See Mr. Nares's English Orthœpy, page 285.

If they are desired to exemplify this by actual pronunciation, we find they cannot do it, and only pay us with words. This accent, therefore, in the ancient as well as modern languages, with respect to sound, has no specific utility. The French, who make use of this Circumflex in writing, appear, in the actual pronunciation of it, to mean nothing more than long quantity.

☞ How Dr. Johnson could be guilty of so gross an oversight as to spell this word and its compounds with one *d* is inconceivable. By the general rule of English pronunciation, as the word stands here, it ought to be pronounced with the *o* long, the first syllable rhyming with *go*, *no*, and *so*. False and absurd, however, as this spelling is, the veneration I have for Dr. Johnson's authority, forbids me to alter it in this Dictionary, though I shall never follow it in practice. Perhaps the same veneration induced Mr. Sheridan to let this word stand as he found it in Johnson. Dr. Kenrick has ventured to insert another *d* in the verb; but in the substantivē, derived from the present participle *Codling*, lets it stand with one *d*. Some will be apt to think, that when *d* ends a syllable, and a consonant follows the *d*, which begins another, that the business is done, and that the quantity of the vowel is sufficiently secured; but this is a mistake. For unless we previously understand the simple, the *o* in the compound, by the general rule, must be long. Now the first principle of orthography is, that, if possible, the letters should of themselves point out the sound of the word, without the necessity of recurring to etymology to find out the sound of the letters; and that we should never have recourse to etymology, but where fixing the sound would unsettle the sense. Thus *Codding*, a kind of apple, ought to be written with double *d*, both because it determines the sound of the *o*, and shews its derivation from the verb to *Coddle*. And *Codling*, a small cod fish, ought to have but one *d*, because putting two, in order to fix the sound of *o*, would confound it with another word. To write *Saddler*, therefore, with one *d*, as we frequently see it on shops, is an error against the first principles of spelling; as, without necessity, it obliges us to understand the derivation of the word before we are sure of its sound. The words *Stalling* and *Stabler*, for stable-keeper in Scotland, with the word *Fabled* in Milton, all present their true sound to the eye without knowing their primitives; and this essential rule has generated the double consonant in the particles and verbal nouns, *beginning*, *regret*, *complotter*, &c. But this rule, rational and useful as it is, is a thousand times violated by an affectation of a knowledge of the learned languages, and an ignorant prejudice against clusters of consonants, as they are called. Thus *couple*, *trouble*, *double*, *treble*, and *triple*, have single consonants, because their originals in Latin and French have no more, though double consonants would fix the sound of the preceding vowels, and be merely double to the

It scarcely any part of the language does the influence of accent on the sound of the vowels appear more perceptibly than in the prepositional syllables, *Col*, *Com*, *Con*, and *Cor*. When the accent is on these syllables, in *College*, *Commisary*, *Conclusion*, *Corrigible*, &c. &c. the *o* has distinctly its short sound. The same may be observed of this *o*, when the principal accent is on the third syllable, as in *Colonnade*, *Commendation*, *Condescension*, *Correspondent*, &c. &c.; for in this case there is a secondary accent on the first syllable, which preserves the *o* in its true sound (522); but when the accent is on the second syllable, this vowel slides into a sound like short *u*, and the words *To Collect*, *To Commit*, *To Convince*, *To Corrupt*, &c. &c. are heard nearly as if written *Colléct*, *Commít*, *Convínce*, *Corrupt*, &c. &c. It is true, that when these words are pronounced alone with deliberation, energy, and precision, the *o* in the first syllable preserves nearly its true sound; but this seems to slide insensibly into short *u* the moment we unite these words with others, and pronounce them without premeditation. The deliberate

(546). — Fâte, fâr, fâll, fât; — mē, mēt; — pîne, pîn; —

deliberate and solemn sound is that which I have given in this Dictionary; nor have I made any difference between words where the accent is on the second syllable: and why Mr. Sheridan, and those who have followed him, should in *Commute*, *Commute*, *Complete*, &c. &c. give the sound of short *o* in *from*; and in *Command*, *Commit*, *Commence*, &c. &c. give the same letter the sound of short *u* in *drum*, I cannot conceive: they are all susceptible of this sound or none, and therefore should all be marked alike. If custom be pleaded for this distinction, it may be observed that this plea is the best in the world when it is evident, and the worst when obscure. No such custom ever fell under my observation; I have always heard the first syllables of *compare* and *compel*, of *commence* and *compose*, pronounced alike, and have therefore made no distinction between them in this Dictionary. I have given them all the sound of the *o* in *Comma*; though I am sensible that, in colloquial pronunciation, they all approach nearer to the short *u*, and are similar to the same syllables in *Comfort*, *Combat*, &c. And it may be laid down as a general rule, without an exception, "that *o*" in an initial syllable, immediately before "the accent, and succeeded by two uncombined consonants, may, in familiar conversation, be pronounced like the same letter in *come, done*," &c.

(546). — Fâte, fâr, fâll, fât; — mê, mêt; — pine, pîn; —

Laudable, worthy of praise.

☞ This word, like *Acceptable*, has, since Johnson wrote his Dictionary, shifted its accent from the second to the first syllable. The sound of the language certainly suffers by these transitions of accent. However, when custom has once decided, we may complain, but must still acquiesce. The accent on the second syllable of this word is grown vulgar, and there needs no other reason for banishing it from polite pronunciation.

COMMENDABLY, kôm'mên-dâ-blê.

TO COMMERCE, kôm'mêrse'. v. n.

To hold intercourse.

☞ Milton has, by the licence of his art, accented this verb according to the analogy of dissyllable nouns and verbs of the same form (492).

"And looks *commêrce* with the skies,

"Thy rapt soul sitting in thy eyes."

PENSEROSO.

But this verb, like *To Comment*, would, in prose, require the accent on the first syllable as in the noun. Though Akenfide has taken the same liberty with this word as Milton had done with that—

"——— the sober zeal

"Of age *commênting* on prodigious things."

PLEAS. OF IMAG.

COMMERCIAL, kôm'mêr'shâl. a.

Relating to commerce or traffick.

One who makes profession of his faith in the face of danger; he that hears confessions, and prescribes penance; he who confesses his crimes.

Dr. Kenrick says, this word is sometimes, but improperly, accented on the first syllable; but it may be observed, that this impropriety is become so universal that no one, who has the least pretension to politeness, dares to pronounce it otherwise. It is, indeed, to be regretted, that we are so fond of Latin originals as entirely to neglect our own; for this word can now have the accent on the second syllable, only when it means one who confesses his crimes; a sense in which it is scarcely ever used.

CONFEST, kôn-fêst'. a.

Open, known, not concealed.

Dr. Kenrick tells us, that this is a poetical word for *Confessed*; and, indeed, we frequently find it so written by Pope and others—

"This clue thus found unravels all the rest;

"The prospect clears, and Clodio stands confessed."

But that this is a mere compliance with the prejudices of the eye, and that there is not the least necessity for departing from the common spelling, see Principles of English Pronunciation, No. (360).

CONFESTLY, kôn-fêst'lê. ad.

Indisputably, evidently.

CONFIDANT, kôn-fê-dânt'. f.

A person trusted with private affairs.

This word, very unlike most others from the same source, has been made to alter its French orthography, in order to approach a little nearer to the English pronunciation of it. Some affected speakers on the stage pronounce the first syllable like *con*, as it is

marked in the first edition of Mr. Sheridan's Dictionary; and this is perfectly of a piece with that affectation which has altered the spelling of the last. By Dryden and South, as quoted by Dr. Johnson, we find this word spelled like the adjective *confident*; and it is more than probable that its French pronunciation is but of late date; but so universal is its use at present, that a greater mark of rusticity can not be given than to place the accent on the first syllable, and to pronounce the last *dant* instead of *dânt*.

TO CONFIDE, kôn-fide'. v. n.

To trust in.

CONFIDENCE, kôn'fê-dênse. f.

CONFINE, kôn'fîne. f. (140).

Common boundary, border, edge.

Dr. Johnson tells us, that the substantive *confine* was formerly pronounced with the accent on the last syllable. The examples, however, which he gives us from the poets, prove only that it was accented both ways. But, indeed, it is highly probable that this was the case; for instances are numerous of the propensity of latter pronunciation to place the accent higher than formerly; and when by this accentuation a noun is to be distinguished from a verb, it is not entirely without its use (492).

CONSOLATORY, kôn-sô-lâ-tôr-ê. f.

A speech or writing containing topics of comfort.

I have given the *o* in the second syllable of this word the short sound, as heard in *solid*; as it seems more agreeable to the analogy of words in this termination than the long *o* which Mr. Sheridan has given: for by inspecting the Rhyming Dictionary we shall see that every vowel, but *u* in the pre-antepenultimate syllable in these words, is short. Dr. Kenrick and W. Johnson give this *o* the same sound as I have done.

CONSOLATORY, kôn-sô-lâ-tôr-ê. a.

Tending to give comfort.

CONSTRUCTURE, kôn'strûk'tshûre. f.

(461) Pile, edifice, fabric.

To CONSTRUE, kôn'strû, or kôn'strû. v. a.

To interpret, to explain.

It is a scandal to semesters of learning that the latter pronunciation of this word should prevail there. Those who ought to be the guardians of propriety are often the perverters

—nô, mōve, nôr, nôt; —tâbe, tâb, bắl; —đil; —pồnd; —thin, THIS.

perverters of it. Hence *Accidence* for *Accidents*, *Preceptor* for *Prepositor*, and *Constur* for *Construe*; for it must be carefully noted, that this last word is under a different predicament from those which end with *r* and mute *e*: here the vowel *u* must have its long sound, as in the word *true*; this letter cannot be sunk or transposed like *e* in *Centre*, *Sceptre*, &c.

TO CONSTUPRATE, kôn'stù-pràte. v. a. To violate, to debauch, to defile.

CONSTUPRATION, kôn'stù-prà'shôn. f. Violation, defilement.

CONSULT, kôn'sól't, or kôn-sól't. f. The act of consulting; the effect of consulting, determination; a council, a number of persons assembled in deliberation.

I am much mistaken if this word does not incline to the general analogy of accent in dissyllable nouns and verbs, like *insult*. Poets have used it both ways; but the accent on the first syllable seems the most usual, as well as the most legitimate pronunciation.

CONSULTATION, kôn-sól'tà'shôn. f. The act of consulting, secret deliberation; a number of persons consulted together.

CONSULTER, kôn-sól'túr. f. One that consults or asks counsel.

CONSUMABLE, kôn-sù-má-bl. a. Susceptible of destruction.

TO CONSUME, kôn-sùme'. v. a. To waste, to spend, to destroy.

The reason why the *s* in this word is pure, and in *Consular* it takes the aspiration, is, that in one the accent is on the syllable beginning with this letter; and in the other, on the preceding syllable (450).

TO CONSUME, kôn-sùme'. v. n. To waste away, to be exhausted.

CONSUMER, kôn-sù'múr. f. One that spends, wastes, or destroys any thing.

CONTEMPERAMENT, kôn-tèm'púr-á-mènt. f. The degree of any quality.

TO CONTEMPERATE, kôn-tèm'púr-àte. v. a. To moderate, to temper.

CONTEMPERATION, kôn-tèm-púr-á'shôn. f. The act of moderating or tempering; proportionate mixture, proportion.

TO CONTEMPLATE, kôn-tèm'pláte. v. a. To study, to meditate.

There is a very prevailing propensity to pronounce this word with the accent on the first syllable; a propensity which ought to be checked by every lover of the harmony of language. That very singular analogy in our tongue of placing the accent on the last syllable of the verb, and the first of the noun, (493) seems to have taken place chiefly

for the convenience of forming participles, adverbs, and verbal nouns; which would be inharmonious and difficult to pronounce, if the verb had the accent on the first syllable. This analogy should teach us to avoid placing the accent on the first syllable of this and similar verbs, however we may pronounce nouns and adjectives.

TO CONTEMPLATE, kôn-tèm'pláte. v. n. To muse, think studiously with long attention.

CONTEMPLATION, kôn-tèm-plá'-shôn. f. Meditation, studious thought on any subject; holy meditation; study, opposed to action.

TO CONTRACT, kôn-trâkt'. v. n.
To shrink up, to grow short; to bargain, as to contract for a quantity of provisions.

CONTRACT, kôn-trâkt. f. (492).
A bargain, a compact; an act whereby a man and woman are betrothed to one another; a writing in which the terms of a bargain are included.

Mr. Nares, in his English Orthœpy, page 338, has very properly criticised Dr. Johnson's observation on this word, where he says, "Dr. Johnson has accented this word on the last syllable, and has subjoined this remark, "anciently accented on the first." It is evident that the whole article should be reversed: The word should stand with the accent on the first, and the remark should be, "anciently accented on the last."

The justice of these observations will appear from the quotations:
"This is the hand which, with a vow'd contract,
"Was fast belock'd in thine."
SHAKESPEARE.
"I did; and his contract with Lady Lucy,
"And his contract by deputy in France."
Ibid.
But that the accent should now be placed on the first syllable needs no proof but the general ear, and the general analogy of dissyllable nouns and verbs of the same form. (492).

CONTRACTEDNESS, kôn-trâkt'-têd-nês. f.
The state of being contracted.

CONTRACTIBILITY, kôn-trâkt'-tê-bîl'-ê-tê. f.

Things of opposite natures or qualities; in logic, propositions which destroy each other.

CONTRARIETY, kôn-trá-rî'ê-tê. f.

Repugnance, opposition; inconsistency, quality or position destructive of its opposite.

CONTRARILY, kôn-trá-rê-lê. ad.

In a manner contrary; different ways, in opposite directions. Little used.

§ This and the following word are by Dr. Johnson accented on the second syllable; no doubt from the harshness that must necessarily arise from placing the accent on the first, when so many unaccented syllables are to succeed. But if harmony were to take place, we should never suffer the stress on the first syllable of *Contrary*, from which these words are formed; but that once admitted, as it invariably is by the best speakers, we should cross the most uniform analogy of our language, if we accented the substantive and the adverb differently from the adjective; and therefore, however harsh they may sound, these words must necessarily have the accent on the first syllable.

CONTRARINESS, kôn-trá-rê-nês. f.

Contrariety, opposition.

CONTRARIOUS, kôn-trá-rê-ûs. a.

Opposite, repugnant.

CONTRARIOUSLY, kôn-trá-rê-ûf-lê. ad.

Conversely; on the contrary.

CONTRARY, kôn-trá-rê. a.

Opposite, contradictory; inconsistent, disagreeing; adverse, in an opposite direction.

§ The accent is invariably placed on the first syllable of this word by all correct speakers, and as constantly removed to the second by the illiterate and vulgar. When common ears refuse a sound, it is a strong presumption that sound is not agreeable to the general harmony of the language. The learned often vitiate the natural taste for their own language by an affected veneration for others; while the illiterate, by a kind of vernacular instinct, fall into the most analogous pronunciation, and such as is most suitable to the general turn of the language. Anciently this word was most commonly pronounced by the learned, as it is now by the vulgar, with the accent on the second syllable; but nothing can be now more firmly established than the accent on the first syllable, and the other pronunciation must be scrupulously avoided.—See *Contrarily*.

CONTRARY, kôn-trá-rê. f.

A thing of opposite qualities; a proposition contrary to some other; in opposition, on the other side; to a contrary purpose.

CONTRAST, kôn-trást. f.

CONTRITE, kôn-trîte. a. (140)

Bruised, much worn; worn with sorrow, harassed with the sense of guilt, penitent.

CONTRITELY, kôn-trîte-lê. adv.

Penitently.

§ As the adjective *contrite*, though contrary to analogy, seems to prefer the accent on the first syllable; *contritely* and *contriteness* must necessarily have the accent on the same syllable.—See *Contrarily*.

CONTRITENESS, kôn-trîte-nês. f.

Contrition, repentance.

CONTRITION, kôn-trîsh'ôn. f.

 To call before a judge or judicature. Not
 in uſe.
CONVENTICLE, kôn-vên-tê-kl. f.
 An aſſembly, a meeting; an aſſembly for
 worſhip; a ſecret aſſembly.
 ¶ I have followed Mr. Sheridan's accentu-
 ation of this word, as I apprehend it is the
 moſt agreeable to polite uſage, though leſs
 agreeable to the ear than the accent on the
 ſecond ſyllable; and in hopes that uſage
 will be more agreeable to harmony, I have
 preferred the accent on the ſecond ſyllable
 of *Conventicle*; though, according to ana-
 logy, it ought certainly to have the ſame ac-
 cent as *Conventicle*.
CONVENTICLER, kôn-vên'tik-lôr. f.
 One that ſupports or frequents private and
 unlawful aſſemblies.
CONVENTION, kôn-vên'thôn. f.

CONVERSANT, { kôn-vêr-sânt. } a.
{ kôn-vêr'sânt. }
 Acquainted with, familiar; having inter-
 courſe with any, acquainted; relating to,
 concerning.
 ¶ The accent on the firſt ſyllable of this
 word is not only more agreeable to polite
 uſage, but to analogy, than the accent on the
 ſecond. Thus the words *Confident, Preſi-
 dent, Provident*, &c. are not accented like
 the verbs *Conſide, Preſide*, &c. &c. but are
 conſidered as ſimples, and follow the gene-
 ral rule; which is, that all ſimples of three
 ſyllables have the accent on the firſt, and
 that the vowel in this ſyllable is ſhort.
CONVERSATION, kôn-vêr-sâ'thôn. f.
 Familiar diſcourſe, chat, eaſy talk; a parti-
 cular act of diſcourſing upon any ſubject;
 commerce, intercourſe, familiarity; beha-
 viour, manner of acting in common life.
To CONVERSE, kôn-vêrſê'. v. n.
 To cohabit with, to hold intercourſe with;

to be acquainted with; to diſcourſe fami-
 liarly upon any ſubject; to have commerce
 with a different ſex.

CONVERSE, kôn-vêrſê. f. (492).
 Manner of diſcourſing in familiar life; ac-
 quaintance, cohabitation, familiarity; with
 geometricians it means the contrary.

¶ It is highly probable that this ſubſtantive
 was anciently pronounced like the verb,
 with the accent on the ſecond ſyllable; but
 nothing is now better eſtabliſhed than the
 accent on the firſt. Even the line of Pope,
 "Generous *converſe*; a ſoul exempt from
 "pride,"

However rugged with the accent on the firſt
 ſyllable of this word, cannot with propriety
 be read otherwiſe.

CONVERSELY, kôn-vêrſê'lê. ad.

 defence; the act of attending as a defence.

CONUSANCE, kôn'û-sânſe. f.

Cognition, notice. A law term.—See *Cog-
 nizance*.

¶ Perhaps it may be pleaded by the gentle-
 men of the law, that this is the word they
 uſe inſtead of *Cognizance*, and conſequently,
 that the charge againſt them of mutilating
 that word falls to the ground. But it may
 be answered, that the ſecond ſyllable of
 theſe words are ſo different as to leave us in
 no doubt which they make uſe of; and that
 the words *Cognizable, Cognizer, and Cognize*,
 being pronounced by them without the *s*,
 are ſufficient proofs of the juſtneſs of the
 accuſation.

Some affected speakers have done all in their power to remove the accent of this word from the second to the first syllable; thanks to the difficulty of pronouncing it in this manner, they have not yet effected their purpose. Those who have the least regard for the sound of their language ought to resist this novelty with all their might; for if it once gain ground, it is sure to triumph. The difficulty of pronouncing it, and the ill sound it produces, will recommend it to the fashionable world, who are as proud to distinguish themselves by an oddity in language as in dress.

† In the pronunciation of this word and its compounds, Mr. Sheridan has adopted a vulgarism, of which one could scarcely have suspected him. But pronouncing *covetous* for *covetus* is not only a vulgarism, but contrary to analogy; all those diphthongs and diphthongal vowels which draw the preceding consonants to aspiration are such as commence with the sound of *e*; which, from its nearness to the sound of double *e*, and the nearness of this sound to the commencing sound of *y*, approaches to the hissing sound of *s*, *z*, and lost *c*, and in the absence of accent coalesces with them. *T* and *D* being formed in the same feat of sound as the *s*, *z*, and lost *c*, when the accent is before them, easily slide into the same sound before similar vowels, but never before any other. For we might with as much propriety pronounce *calamitous* and *necessitous*, *calamishus* and *necessishus*, as *covetous*, *covetshus* (459).

CUT-THROAT, kût'thrôte. f.
A Russian, a murderer, an assassin.

CUT-THROAT, kût'thrôte. a.
Cruel, inhuman, barbarous.
This adjective is frequently used very absurdly, (and not always by the lowest of the people) when it is applied to a house of entertainment that charges an exorbitant price; such a house is not uncommonly, though very improperly, called a *Cut-throat house*. This sense, I see, has been adopted by Entick; though it ought not to have a place in any Dictionary.

CUTTING, kût'tîng. f.
A piece cut off, a chop.

CUTTLE, kût'tl. f. (405).
A fish, which, when he is pursued by a fish of prey, throws out a black liquor.

CYCLOIDAL, si-klôid'âl. a.
Relating to a cycloid.

CYCLOPÆDIA, si-klô-pê'dê-â. f.
A circle of knowledge, a course of the sciences.

I have in this word differed from Mr. Sheridan and Dr. Johnson, by placing the accent on the antepenultimate syllable instead of the penultimate. I know that Greek words of this termination have the accent on the penultimate syllable; but the antepenultimate accentuation is more agreeable to the genius of our tongue, and seems to have prevailed. For though Dr. Johnson has given this word the penultimate accent, he has placed the accent on the antepenultimate syllable of *Ambrosia*, *Euthanasia*, and *Hydrophobia*, though these have all the accent on the penultimate in the Greek. The pronunciation I have adopted I see is supported by Dr. Kenrick, Entick, Scott, Perry, and Buchanan, which abundantly shows the general current of custom.

To these observations may be added, that if the *i* be accented, it must necessarily have the long open sound, as in *Elegiac*, and not the sound of *e*, as Mr. Sheridan has marked it.

CYGNET, sig'nêt. f.
A young swan.

CYLINDER, sil'in-dôr. f.
A body having two flat surfaces and one circular.

CYLINDRICAL, sê-lîn-drê-kâl. } a.

CYNICK, sin'nik. f.
A philosopher of the snarling or currish sort, a follower of Diogenes; a snarler, a misanthrope.

CYNOSURE, sin'ô-sûre, or si'nô-sûre f.
The star near the north pole, by which sailors steer.

I have, in the first syllable of this word, contrary to Mr. Sheridan, preferred the short to the long sound of *y*. My first reason is, that this letter in Greek is the same as in *Cynic* and *Cylinder*; both which have the *y* short. The next reason is, the very general rule in our language of pronouncing the vowel short in all simples which have the accent on the antepenultimate syllable. (535) (537).—See *Entick's Dictionary*.

CYPRESS-TREE, si'près-trêê. f.
A tall straight tree: its fruit is of no use, its leaves are bitter, and the very smell and shade of it are dangerous; it is the emblem of mourning.

DAMNED, dâmd, or dâm'nêd. part.

a. Hatred, detestable.

[T] This word, in familiar language, is scarcely ever used as an adjective, and pronounced in one syllable, but by the lowest vulgar and profane; in serious speaking it ought always, like *curst*, to be pronounced in two (364). Thus in Shakespeare—

"But oh what *damned* minutes tells he o'er,
"Who dotes, yet doubts—suspects, yet
"Strongly loves."

There is a very singular usage of this word, as a verb or participle, when it signifies the condemnation of a Play; but this application of it, though authorized by the politest speakers, has an unhallowed harshness in it to pious ears, and an affectation of sense to judicious ones.

DAMNIFICK, dâm-nîf'ik. a.

TO DECOMPOSE, dè-kôm-pôze'. v. a. (Decomposer. French.)
To dissolve or resolve a mixed body.

† This word is neither in Johnson's Dictionary, nor any other I have seen, but is of such frequent use as to deserve a place in all. To Decompose is frequently used in this sense, but improperly ; for that word signifies to mix compounded things together, while To Decompose means to unmix or analyze things.

DECOMPOSITE, dè-kôm-pôz'ît. a.
Compounded a second time.

An adorer.

DECOROUS, dè-kô'rûs. a.
Decent, suitable to a character.

† An uneducated English speaker is very apt to pronounce this word with the accent on the first syllable, according to the analogy of his own language ; but a learned ear would be as much shocked at such a departure from classical propriety, as in the words *sonorus* and *canorus* (512). When once the mere English scholar is set right in this word he will be sure to pronounce *Dedecorus* with

♣ (546). — Fâte, fâr, fâll, fât; — mê, mêt; — plne, pln; —

with the accent on the penultimate; and when he is told that this is wrong, because that syllable in the Latin word is short, he will not fail to pronounce *Indecorous* with the antepenultimate accent; but what will be his surprize when he is informed that this too is wrong, because the penultimate syllable in Latin is short! — See *Indecorus*.

TO DECORTICATE, dè-kôr'tè-kâte. v. a. To divest of the bark or husk.

TO DESPATCH, dè-spâtch'. v. a.

To send away hastily; to send out of the world, to put to death; to perform a business quickly; to conclude an affair with another.

♣ There is a general rule in pronunciation, viz. when a vowel ends a syllable immediately before the accent, that vowel has a tendency to lengthen, and is often, particularly in solemn speaking, pronounced as open as if the accent were on it. See *To Collect*, (544). — This general tendency inclines us to divide words in such a manner as to make the vowel end the unaccented syllable; and if the two succeeding consonants are combinable, to carry them both to that syllable which has the accent. When the *e* is thus left to finish the syllable before the accent in *de-spair*, *de-spâtch*, &c. it inclines to its open slender sound, which, being rapidly pronounced, falls into the short *i*, which is exactly its short sound (105) (107); for when the *e* is short by being closed by a consonant, like other vowels, it goes into a different sound from the long one (544). Thus the word *despatch*, till Dr. Johnson corrected it, was always written with an *i*; and now it is corrected, we do not find the least difference in the pronunciation.

An inseparable particle used in composition, implying commonly a privative or negative signification of the word to which it is joined; as to *arm*, to *disarm*; to *join*, to *disjoin*; &c.

When the accent, either primary or secondary, is on this inseparable preposition, the *s* is always sharp and hissing; but when the accent is on the second syllable, the *s* will be either hissing or buzzing, according to the nature of the consecutive letter. That is, if a sharp mute, as if *p*, *t*, &c. succeed, the preceding *s* must be pronounced sharp and hissing; but if a flat mute as *b*, *d*, &c. or a vowel or a liquid begin the next syllable, the foregoing *s* must be sounded like *z*. *Dismal*, which seems to be an objection to the first part of this rule, is in reality a confirmation of it; for the first syllable in this word is not a preposition, but a contraction

of the Latin word *dies*; and *dismal* is evidently derived from *dies malus*. For want of this clue, Mr. Sheridan has given the *s* pure, to *disgrace*, *disguise*, &c.

† I have in this word preferred Mr. Sheridan's accentuation upon the first syllable, to Dr. Johnson's on the second; not only as more agreeable to polite usage, but to analogy: words in *able*, from the Latin, have a tendency to remove the accent to the beginning of the word, on which a secondary accent was placed in the English pronunciation of the Latin word from whence they were derived. Thus *disputabilis* has an accent on the first and third syllable; and when the third loses its accent by being anglicised into *disputable*, the first syllable holds possession of its former accent.—See *Academy*.

Any thing that diverts or alleviates.

TO DIVERTISE, dê-vêr'tîz. v. n.

To sport, to amuse, to divert.

Dr. Johnson seems to have accented this word on the last syllable in compliance with the verb *advertise*, which is exactly of the same form, and therefore he thought ought to be accented in the same manner. But by making *divertise* conform in accentuation to *advertise*, we make the general rule stoop to the exception, rather than the exception to the general rule. For in all verbs of three or more syllables, where the termination *ise* is only the verbal formation, and does not belong to the root, we never find the accent on it; as *criticise*, *exercise*, *epitomise*, &c.—See *Advertisement*.

DIVERTISEMENT, dê-vêr'tîz-mênt.

f. Diversion, delight.

¶ Dr. Johnson observes, that of English, as of all living tongues, there is a double pronunciation, one cursory and colloquial, the other regular and solemn. He gives no instances of this double pronunciation ; and it is at first a little difficult to conceive what are the words in which this observation is verified. Solemn speaking seems to have no effect upon the accented vowels ; for let us pronounce them as rapidly or as solemnly as we will, we certainly do not make any change in the quantity or quality of them. The only part of the language in which Dr. Johnson's observation seems true, is some of the vowels when unaccented ; and of these the *o* seems to undergo the greatest change in consequence of solemnity or rapidity. Thus the *o* in *obey* is, in solemn speaking, pronounced as long and full as in the first syllable of *open* ; but in rapid and cursory speaking, as short as the *o* in *oven*. This latter found, however, must not be given as a model ; for let the pronunciation be ever so rapid and familiar, there is a certain elegance in giving the *o*, in this situation, its full, open sound, approaching to that which it has when under the accent ; and though nothing but a delicacy of ear will direct us to the degree of openness with which we must pronounce the unaccented *o* in *Domestic*, *Docility*, *Potential*, *Proceed*, *Monastic*, *Monotony*, &c. we may be assured that these vowels are exactly under the same predicament ; and can never be pronounced short and flat, as if written *Domestic*, *Docility*, *Potential*, &c. without hurting the ears of every good speaker, and overturning the first principles of pronunciation.

The same observations seem to hold good of the unaccented *o* in every word ending in *ory* ; as *transitory*, *dilatory*, &c. The *o* in rapid speaking certainly goes into short *u* ; but in solemn pronunciation approaches to the accented, open sound of *o* in *glory*, *flory*, &c. but as the *o* in these terminations never admits of being pronounced quite so open as when ending a syllable before the accent, I have, like Mr. Sheridan, given it the colloquial sound of short *u*.

A gift, a largess, a present ; in law, a benefice merely given and collated by the patron to a man, without institution or induction.

¶ I have differed from Mr. Sheridan in the quantity of the vowel in the first syllable of this word, not only as I think it contrary to the best usage, but as it is at variance with the analogy of words in this termination. Let not the long quantity of the Latin *o* in *Donatio* be pleaded in favour of Mr. Sheridan ; for, waving the utter uncertainty of arguing from the Latin quantity to ours, this would prove that the *a* and *e* in the first syllable of *Sanative* and *Lenitive* ought to be long likewise. — See Introduction to the Rhyming Dictionary. Article, Syllabication.

DONE, dôûn. part. pass. of the verb *Do*.

 The first mode of pronouncing this word is, that which was universally current till within these few years; but the second has insensibly stolen into use, as we may observe from the several Dictionaries which have adopted it. Mr. Sheridan, Mr. Scott, and W. Johnson, divide it in the former manner. Dr. Ash and Buchanan in the latter.
 And first it may be observed, that if any argument can be drawn from the Latin quantity to the English, it is certainly in favour of the latter pronunciation: for in a Latin word of two syllables, where a consonant comes between two vowels, the consonant always goes to the last, and the first vowel is pronounced long, without the least regard to the quantity. Thus (*crâtes*, the philosopher, and *crâtes*, a hurdle; *dêcus*, honour, and *dêdo*, to give; *ôvus*, to triumph, and *ôvum*, an egg; *Nûm*, the legislator, and *Nûmen*, the divinity, have the first vowel always sounded long by an English speaker, although in the Latin the first vowel in the first word of each of these pairs is short. From this universal manner of pronouncing Latin words, though contrary to Latin quantity, it is no wonder when we adopt words from that language without any alteration, we should pronounce

them in the same manner; and it may be fairly concluded, that this uniform pronunciation of the Latin arises from the genius of our own tongue; which always inclines us to lengthen the accented vowel before a single consonant in words of two syllables; otherwise, what reason can we assign for the rule laid down by our ancestors for doubling the consonant in verbs, verbal nouns and participles, where a single vowel was preceded by a single consonant in the theme? But an affectation of Latinity seems to have disturbed the general pronunciation of our own language, as much as our own pronunciation has disturbed the Latin quantity. For though we neglect the quantity of Latin dissyllables, when we are pronouncing that language, yet in dissyllables of our own, formed from the Latin, and anglicised, we seem to be, in some measure, guided by the Latin quantity. To what else can we attribute the short sound of the first vowel in *magic*, *placid*, *tepid*, *vigil*, *novel*, &c. and to what but the genuine force of vernacular pronunciation can we ascribe the long sound of *u* in this situation, let the quantity of the Latin original be what it will. Thus, though *epic*, *topic*, *cynic*, and *toxic*, have the first vowel short, *tunic*, *stupid*, *Cupid*, *tumid*, &c. have the *u* long, though always short in the Latin words from whence they are derived. But however this may be in words anglicised from the Latin, and ending in a consonant, perhaps, in nothing is our pronunciation more regular than in the quantity of the first vowel in a word of two syllables ending with a vowel; in this case the first vowel is invariably long, and the word in question is the only exception. We have no words originally English of this form; but those we adopt from other languages sufficiently show the analogy of pronunciation: thus *Gole*, *Coma*, *China*, *Era*, *Strata*, *Quota*, *Fixa*, *Dado*, *Sago*, *Bravo*, *Tyro*, *Hero*, *Negro*, &c. &c. have all the first syllable long; and why *Drama* should not fall into the same analogy I cannot conceive. A corroboration of this is the pronunciation of *Lama*, *Brama*, *Zama*, and *Zara*; and I think it may be with confidence asserted, that an Englishman, who had never heard the word pronounced, would naturally place the accent upon the first syllable, and pronounce the vowel in that syllable long and slender.

† Good Speakers seem divided about the quantity of the vowel in the first syllable of this word. Kenrick, Perry, and Buchanan, make it short; and Sheridan, Nares, Entick, Ash, Scott, and W. Johnson, long. This majority has induced me to make it long likewise, and not any length of the same letter in the Latin *edictum*; for though the Latin accent is frequently a rule for the placing of ours, the quantity of Latin has almost as little to do with our quantity as it has with that of the Chinese or Hebrew.—See Introduction to Rhyming Dictionary, page xix.

EDIFICATION, èd-è-sè-kâ'shûn. f.

The act of building up man in the faith, improvement in holiness; improvement, instruction.

TO EFFACE, èf-fâcè'. v. a.

To destroy any form painted or carved; to blot out; to destroy, to wear away.

† The strong tendency of the vowel to open, when it terminates a syllable, immediately before the accent, makes us frequently hear the e in these words, when the accent is on the second syllable, pronounced as open as if there were but one f. The same may be observed of the o in *occasion*, *offence*, *official*, &c. This is certainly a deviation from rule, but it is so general, and so agreeable to the ear, as to be a distinguishing mark of elegant pronunciation.

A species of rose; sweetbriar.

EGOTISM, ê-gô-tîzm. f.

Too frequent mention of a man's self.

Contrary to my own judgement I have made the *e* in the first syllable of this word long, because I see it is uniformly so marked by all the Dictionaries I have seen: but I am much mistaken if analogy does not in time recover her rights, and shorten this vowel by joining it to the *g*, as if written *eg-g-tîzm*; not because this vowel is short in the Latin *ego*, (for the English quantity has very little to do with the Latin) but because the word may be looked upon as a simple in our language, and the accent is on the antepenultimate syllable.—See Principles, No. 511, 530, 536.

EGOTIST, ê-gô-tîst. f.

One that is always talking of himself.

A legal writ by which any inhabitant of a house, or tenant of an estate, is commanded to depart.

EIGHT, âyt. a.

Twice four. A word of number.

The genuine sound of the diphthong in this word and its compounds does not seem to be that of the first sound of *a*, which Mr. Sheridan has given it under the second sound of *e*, but a combination of the first sound of *a* and *e* pronounced as closely together as possible. But as this distinction is very delicate, and may not be more easily appre-

hended than that between *meat* and *meet*, (246), I have given the diphthong the same sound as Mr. Sheridan has done.

EIGHTH, âytth. a.

Next in order to the seventh.

This word, as it is written, by no means, conveys the sound annexed to it in speaking; for the abstract termination *th* being a perfect hiss, is quite distinct from the final *t* of *eight*, and can never coalesce with it without depriving the word of one of its letters. The only sound conveyed by the letters of this word, as now spelt, is, as if written *ayth*: and if we would spell this sound as we pronounce it, and as the analogy of formation certainly requires, we must necessarily write it *eythth*. This would have an unusual appearance to the eye; and this would be a sufficient reason with the multitude for opposing it; but men of sense ought to consider, that the credit of the language is concerned in rectifying this radical fault in its orthography.

EIGHTEEN, ây'têen. a.

Twice nine.

EIGHTEENTH, ây'têenth. a.

ELECTARY, ê-lêk'tâ-rê. f.
 A form of medicine made of conserves and powders in the consistence of honey.
 † This is an alteration of the word *Electuary* which has taken place within these few, and it must be owned, is an alteration for the better; for as there is no *u* in the Latin *Electarium*, there can be no reason for inserting it in our English word, which is derived from it.
ELECTION, ê-lêk'nhôn. f.
 The act of choosing one or more from a greater number; the power of choice; voluntary preference; the determination of God by which any were selected for eternal life; the ceremony of a public choice.

 In such a manner as to please without elevation.
ELEGIACK, êl-ê-jî'âk. a.
 Used in elegies; mournful, sorrowful.
 † Our own analogy would lead us to place the accent upon the second syllable of this word; but its derivation from the Latin *elegiacus*, and the Greek *ελεγιακος*, (in both which the antepenultimate is long) obliges us, under pain of appearing grossly illiterate, to place the accent on the same letter. But it may be observed, that we have scarcely an instance in the whole language of adopting a Latin or Greek word, and curtailing it of a syllable, without removing the accent higher on the English word.—See *Academy*.
ELEGY, êl'ê-jê. f.
 A mournful song; a funeral song; a short poem, without points or turns.
ELEMENT, êl'ê-mênt. f.
 The first or constituent principle of any thing; the four elements, usually so called, are earth, air, fire, water, of which our world is composed; the proper habitation or sphere of any thing; an ingredient, a constituent part; the letters of any language; the lowest or first rudiments of literature or science.

TO EMBALM, ẽm-bãlm'. v. a. (403)

To impregnate a body with aromatics, that it may resist putrefaction.

The affinity between the long *e* and the short *i*, when immediately followed by the accent, has been observed under the word *Despatch*. But this affinity is no where more remarkable than in those words where the *e* is followed by *m* or *n*. This has induced Mr. Sheridan to spell *embrace*, *endow*, &c. *embrace*, *indow*, &c. and this spelling may, perhaps, sufficiently convey the curiosity or colloquial pronunciation; but my observation greatly fails me if correct public speaking does not preserve the *e* in its true sound, when followed by *m* or *n*. The difference is delicate, but, in my opinion, real.

EMBALMER, ẽm-bãm'ẽr. f.

One that practises the art of embalming and preserving bodies.

EMPYEMA, ém-pl-é'má. f.

A collection of purulent matter in any part whatsoever, generally used to signify that in the cavity of the breast only.

I have differed from Mr. Sheridan in the found of the *y* in the second syllable of this word, merely from the disagreeable effect it has on the ear, to pronounce two vowels of exactly the same found in immediate succession. This sameness is, in some measure, avoided by giving *y* the long diphthongal found of *i* ; and the same reason has induced me to the same notation in the word : *empyrean*. If good usage is against me, I submit.

EMPYREAL, ém-pìr-é-ál. a.

Formed of the element of fire, refined beyond aerial.

EMPYREAN, ém-pl-ré-án. f.

ENCOMIUM, én-kò'mé-òm. f.

Panegyric, praise, elogy.

Though in cursory speaking we frequently hear the *e* confounded with the short *i* in the first syllables of *encamp*, *enchaat*, &c. without any great offence to the ear, yet such an interchange in *encomium*, *encomiast*, &c. is not only a departure from propriety, but from politeness ; and it is not a little surprising that Mr. Sheridan should have adopted it. The truth is, preserving the *e* pure in all words of this form, whether in rapid or deliberate speaking, is a correctness well worthy of attention.

TO ENCOMPASS, én-kùm'pás. v. a.

To enclose, to encircle ; to go round any place.

ENCOMPASSMENT, én-kùm'pás-mènt. f.

Circumlocution, remote tendency of talk.

ENCORE, óng-kòre'. ad.

Again, once more.

This word is perfectly French, and, as usual, we have adopted it with the original pronunciation. In other words which we have received from the French, where the nasal vowel has occurred, we have substituted an awkward pronunciation in imitation of it, which has at once shown our fondness for foreign modes of speaking, and our incapacity of acquiring them : thus *Cuissón* has been turned into *Cuissón*, *Ballón* into *Ballón*, into *Shamón* ; but in the word before us, this nasal found is followed by *c* hard, which after *a* always involves hard *g* (408) ; and this is precisely an English found. An Englishman, therefore, does not find the difficulty in pronouncing the nasal found in this word, which he would in another that does not admit of the succeeding hard *c* or *g* ; as *entendement*, *attention*, &c. for if in pronouncing the *en* in these words the tongue should once touch the roof of the mouth, the French nasal found would be ruined. No wonder then that a mere English speaker should pronounce this French word so well, and the rest of the nasal vowels so ill. It does not arise from the habit they contract at Theatres,

† (546). — Fâte, fâr, fâll, fât; — mê, mêt; — pine, pîn; —

tres, (where it would be the most barbarous and ill-bred pronunciation in the world to call for the repetition of an English song in plain English.) It does not, I say, arise from custom, but from coincidence. The sound, in the word before us, is common to both nations; and though the French may give it a somewhat lighter sound than the English, they are both radically the same. Adopting this word, however, in the Theatre, does the English no manner of credit. Every language ought to be sufficient for all its purposes. A foreigner who understood our language, but who had never been present at our dramatic performances, would suppose we had no equivalents in English, should he hear us cry out *Encore, Bravo, and Bravissimo*, when we only wish to have a song repeated, or to applaud the agility of a dancer.

TO ENDITE, }

To charge any man by a written accusation before a court of justice, as he was indicted for felony; to draw up, to compose; to dilate.

† Before Johnson published his Dictionary, these words were universally spelt *indit* and *indite*. That great reformer of our language seems to have considered, that as the Latin *Indicere* came to us through the French *enditer*, we ought to adopt the French rather than the Latin preposition, especially as we have conformed to the French in the found of the latter part of the word. But notwithstanding his authority, to *indit*, signifying to charge, stands its ground, and to *indite* is used only when we mean to draw up or compose; in this sense, perhaps, it may not be improper to spell it *endite* as it may serve to distinguish it from the other word, so different in signification.

ENSIGN, ên'sîne. f. (385).

The flag or standard of a regiment; badge, or mark of distinction; the officer of foot who carries the flag.

I have given the last syllable of this word the long sound, as I am convinced it is the most correct, though I am of opinion that, in the military profession, it is oftener pronounced short, as if written *ensin*. Some reasons from analogy might be produced in favour of this latter pronunciation, (144); but they do not seem sufficient to outweigh the more general usage which declares for the former.

ENSIGNBEARER, ên'sîne-bâ-rûr. f.

He that carries the flag.

ENSIGNCY, ên'sîn-sê. f.

The office of an ensign.

I have not met with this word in any of our Dictionaries, but from its very frequent use in the polite world, am persuaded it deserves a place there, and particularly in a Pronouncing Dictionary; as it must be remarked, that though the second syllable of *Ensign* is generally and more correctly pronounced with the long, the same letter in the same syllable of *Ensigncy* is always short.

To inwrap, to cover ; to hide, to surround ; to line, to cover on the inside.

ENVELOPE, ẽn-vẽ-lũpẽ'. f.
A wrapper, an outward case.

¶ This word signifying the outward case of a letter is always pronounced in the French manner by those who can pronounce French, and by those who cannot the *e* is changed into an *o*. Sometimes a mere Englishman attempts to give the nasal vowel the French sound, and exposes himself to laughter by pronouncing *g* after it, as if written *ongve-lope*. This is as ridiculous to a polite ear as if he pronounced it, as it ought to be pronounced, like the verb to *envelop*.

TO ENVENOM, ẽn-vẽn'ũm. v. a.
To poison ; to make odious ; to enrage.

ENVIABLE, ẽn'vẽ-ã-bl. a.
Deserving envy.

The addition of a vowel or consonant in the middle of a word.

EPHEMERA, ẽ-fẽm'ẽ-rã. f.

A fever that terminates in one day ; an insect that lives only one day.

¶ I was much surpris'd when I found Mr. Sheridan had given the long open sound of *e* to the second syllable of *Ephemera*, *Ephe-meris*, &c. If it was in compliment to the Greek *eta*, the same reason should have induced him to give the sound of long *e* to the first syllable of *Hemistich*, *Demagogue*, and *Rhetorick*.

(3) This word, according to the analogy of our own language, ought certainly to have the accent on the second syllable; and this is the pronunciation which unlettered speakers constantly adopt; but the learned, ashamed of the analogies of their own tongue, always place the accent on the third syllable because *Europæus* has the penultimate long, and is therefore accented in Latin. *Epiciæan* has the accent on the same syllable by the same title; while *Herculean* and *cerulean* submit to English analogy, and have the accent on the second syllable, because their penultimate in Latin is short.

TO EXAGGERATE, ẽgz-âdje-ẽ-râte.

v. a. To heighten by representation.

𠵿 This word is sometimes heard with the double *g* hard, as in *dagger*; but every one who has a scrap of Latin knows, that *exaggerate* comes from *exaggero*, and that all words from that language have the *g* soft before *e* and *i*: the third syllable, therefore, must have the *e* soft. But it will be said, that, according to the laws of pronunciation, the first *g* ought to be hard, as the first *c* is in *flaccid*, *siccit*y, &c. To which it may be answered, that, strictly speaking, it ought to be so; but polite usage has so fixed the first, as well as the last *g* in the soft sound, that none but a confirmed pedant would have the boldness to pronounce it otherwise.

EXAGGERATION, ẽgz-âdje-ẽ-râ'shôn. f.

The act of keeping together; hyperbolical amplification.

One who exhorts.

TO EXICCARE, êk-sîk'kâte. v. a.

To dry.

¶ The first syllable of this word (strictly speaking) ought to be pronounced according to the rule laid down under the preposition *Ex*; but in this pronunciation we totally lose the sharp *s* which commences the Latin word *sicco*, to dry; of which this word is compounded, and thus the sound of the word is radically injured, and its etymology lost. But it will be said, the Latins made the same excision of the radical *s* on account of its coincidence with the *s* contained in the *x* of the preposition, and wrote the word *exiccō*. It is allowed these corruptions obtained amongst them, as amongst us; though it is doubtful whether the same inconvenience arose amongst them in this word as with us: for Vossius makes it highly probable that the Latins never gave the flat sound *ex* to the letter *x*; and the best manuscript inform us, that writing this word with an *s*, as *exsicco*, and thus preserving the composition distinct and perfect, is the most accurate orthography.

A building, an edifice; any system or compages of matter.

F The *a* in this word seems floating between long and short quantity, as it was in the Latin *Fabrica*. I have, like Mr. Sheridan, made it short for several reasons. The first is, that the termination *ick* seems to shorten the vowel in the preceding syllable, as well as in its own. The next is, that if Latin quantity has any influence on ours, it is certainly in such words of two syllables as are perfectly Latin, as well as English, and such dissyllables as are anglicised by altering the termination: now though the first syllable of *Fabrica* in Latin be either long or short, the first of *Faber* is always short; and these reasons have induced me to shorten the *a* in *Fabric*.—See *Drama*.

FACUND, fâk'ûnd. a.

Eloquent.

Dr. Johnson has placed the accent on the last syllable both of this word and *Jocund*; in which he is consistent, but contrary both to custom and to English analogy. Mr. Sheridan places the accent on the first syllable of *Jocund*, and, on the last of this word. The reasons are the same for accenting both; they both come from the Latin, *facundus* and *jocundus*; and there is scarcely a more inviolable rule in our language than that of removing the accent higher when we adopt a word from the Latin, and abridge it of its latter syllables.—See *Academy*.

† This word, by the parsimony of Printers, is often spelt without the *e*. They may allege, that spelling the word with *e* makes it liable to be pronounced in three syllables by those who do not know the composition of the word; and it may be answered, that spelling it without the *e* makes it liable to a mispronunciation, by joining the *s* and *h* together: if, therefore, the composition must be understood before the word can be pronounced with security, let it, at least, be presented to the eye, and the chance of a mistake will be less.

FAREWELL { fâre-wêl, or fâre-wêl' } { fâr-wêl, or fâr-wêl' }

The parting compliment, adieu; it is sometimes used only as an expression of separation without kindness.

— To all these different pronunciations is this word subject. The accentuation, either on the first or last syllable, depends much on the rhythm of the sentence.—See *Comedore* and *Commonwealth*.

When it is used as a substantive, without an adjective before it, the accent is generally on the first syllable, as,

"See how the morning opens her golden gates,
"And takes her *farewell* of the glonious sun."

SHAKSP.

Or if the adjective follow the substantive, as,

"If chance the radiant sun with *farewell*, sweet

"Extend his evening beam, the fields receive,

"The birds their notes renew, and bleating

"Herds

"Shew their joy, that drill and valley ring."

MILTON.

But if the adjective precede the substantive, the

accent is generally placed on the last syllable, as,

"Treading the path to nobler ends,

"A long *farewell* to love I gave."

WALLER.

"As in this grove I took my last *farewell*."

DRYDEN.

Or when it is governed by a verb, as, "I bade

"him *farewell*," or "I bade *farewell* to

"him."

When it is used as an adjective the accent is always on the first syllable, as "A *farewell*"

"Sermon."

But when it is used as an interjection (for with great deference to Dr. Johnson I cannot think it an adverb) the accent is either on the first or second syllable, as the rhythm of pronunciation seems to require.

"But *farewell*, king; hith thus thou will ap-

"pear,

"Freedom lives hence, and Banishment is

"here." SHAKSP.

—"O, queen, *farewell*; be still posselt

"Of dear remembrance, blessing skill and

"blest." POPE.

With respect to the pronunciation of *a*, in the first syllable of this word, Mr. Sheridan says, that in England the first syllable is pronounced like *far*, and in Ireland like *fare*. But if this be really the case the two nations seem to have changed dialects; for nothing can be more evident to the most superficial observer, than the tendency in Ireland to pronounce the *a* in the first manner, and in England in the latter. Not that I think the pronunciation of the first syllable of *farewell*, like *far*, either vicious or vulgar: I am convinced many good speakers so pronounce it; but the other pronunciation I think the more eligible, as well as more general.

¶ The first mode of pronouncing this word is the most general ; the second is heard chiefly on the Stage. Actors, who have such continual occasion to express the passions, feel

(546).—Fâte, fâr, fâll, fât;—mê, mêt;—pine, pin;—

feel a propriety in giving a short vowel sound to a word denoting a rapid and violent emotion; and therefore, though this pronunciation may be said to be grammatically improper, it is philosophically right.—*See Cheerful.*

FURTHER, fûr'thêr. a.

Forth, Further, Furthest. At a great distance; beyond this.

¶ Dr. Johnson has proved beyond dispute that *farth-r* and *farthêst* are not the comparative and superlative of *far*, but corruptions of the comparative and superlative of *forth*. However true this discovery may be, it does not seem a sufficient reason for altering the beaten path which custom had formed in the usage of *farther* and *farthêst*. It is probable, indeed, that *far*, *fore*, and *forth*, arise from the same original root: extending beyond some other object seems to be the leading idea in all. *Far* seems to intimate extension beyond an indefinite object; *fore* only such extension

— nỏ, mỗve, pỏr, nỏt; — tủe, tủb, bủll; — ỏil; — pỏủnd; — tủin, THIS.

extension as gives priority to the extended object; and *forth*, from its form, seems to relate to the abstract of such priority of extension, or the very act of extending or issuing out. If, therefore, *forth* and *far* have different ideas annexed to them, the same comparative and superlative cannot possibly suit with both; and as almost immemorial usage has borrowed the comparative and superlative of *forth* to form the comparative and superlative of *far*, their sense is now fixed to the latter adverb; and *forth*, inasmuch as it differs from *far*, seems entirely to have lost its comparison. Notwithstanding, therefore, that *farther* and *farthest* are very irregular branches of *far*, they are grafted on it by use, and cannot be altered without diverting the plain tendency of the language. Such, however, has been the force of Dr. Johnson's criticism, that, since his time, every writer and printer, unless by mistake, has used *further* and *furthest* for *farther* and *farthest*; by which means we have revived the comparative and superlative of an adverb which has lost its comparison, and have lost the comparative and superlative of an adverb, which has been compared for these two hundred years. But though *further* passes very well for *farther*, when *far* is out of sight, we feel the utmost repugnance at saying, "Thus *far* shalt thou go," and no *further*."

It is much to be regretted that the second sound of this word is grown much more frequent than the first. It is not easy to guess at the cause of this unmeaning deviation from the general rule, but the effect is to empowerish the sound of the language, and to add to its irregularities. It has not, however, like some other words, irrecoverably lost its true pronunciation. Rhyme still claims its right to the long open o, as in *bold*, *fold*, &c.

" Judges and Senates have been bought for
" gold ;

" Esteem and Love were never to be fold.

" Now Europe's laurels on their brows be-
" hold,

" But stained with blood, or ill exchange'd for
" gold." Pope.

And solemn speaking, particularly the language of Scripture, indispensably requires the same sound. With these established authorities in its favour, it is a disgrace to the language to suffer indolence and vulgarity to corrupt it into the second sound.—See *W'ind*.

GROSS, grôse. a.
Thick, corpulent ; shameful, unseemly ; intellectually coarse ; inelegant ; thick, not refined ; stupid, dull ; coarse, rough, opposite to delicate.

[?] This word is irregular from a vanity of imitating the French. In Scotland they pronounce this word regularly so as to rhyme with *mess*. Pope also rhymes it with this word.

" Shall only man be taken in the gross ?"
" Grant but as many sorts of mind as moss."

This, however, must be looked upon as a poetical licence ; for the sound is now irrevocably fixed as it is marked, rhyming with *justice, verbose*, &c.

ad. Athletically, fitly for strong exercise.

GYMNASTICK, jîm-nâs'tik. a.

Relating to athletick exercises.

In this word and its relatives we not unfrequently hear the *g* hard, because forsooth they are derived from the Greek. For the very same reason we ought to pronounce the *g* in *Genesis, geography, geometry*, and a thousand other words, hard, which would essentially alter the sound of our language. Mr. Sheridan has very properly given the soft *g* to these words; and Mr. Nares is of the same opinion with respect to the propriety of this pronunciation, but doubts of the usage: there can be no doubt, however, of the absurdity of this usage, and of the necessity of curbing it as much as possible.—See Principles, No. 350.

HEIGHT, hîte, or hâte. f. (253).
Elevation above the ground; degree of altitude; summit, ascent, towering eminence; elevation of rank; the utmost degree; utmost exertion; state of excellence; advance towards perfection.

¶ The first of these modes is the most general, and the last, the most agreeable to the spelling. Milton was the patron of the first, and in his zeal for analogy, as Dr. Johnson says, spelt the word *highth*. This is still the pronunciation of the vulgar, and is unquestionably most agreeable to analogy; but though the found of the adjective *high* is generally preferred in the abstract *height*, the *b* is always placed before the *t*, and is perfectly mute. Mr. Garrick's pronunciation (and which is certainly the best) was *bite*. — See *Drought*.

TO HEIGHTEN, hî't'n. v. a.
To raise higher; to improve, to meliorate; to aggravate; to improve by decorations.

HEINOUS, hâ'nûs. a. (249).
Atrocious, wicked in a high degree.

¶ Mr. Sheridan gives the long found of *e* to the first syllable of this word, contrary to every Dictionary, to analogy, and, I think, the best usage; which, if I am not mistaken, always gives the first syllable of this word the found of slender *a*.

HEINOUSLY, hâ'nûs-lê. ad.
Atrociously, wickedly.

HEINOUSNESS, hâ'nûs-nês. f.

✂ There is an affected pronunciation of this and the two preceding words, which, contrary to our own analogy, preserves the g hard. The plea is, that these words are derived from the Greek, which always preserved the gamma hard. To produce this reason, is to expose it. What would become of our language if every word from the Greek and Latin, that had g in it, were so pronounced? What is most to be regretted is, that men of learning sometimes join in these pedantic deviations, which are only worthy of the lowest order of critical coxcombs.

HICCOUGH, hîk'kûp, or hîk'kôf. f.

A convulsion of the stomach producing sob.

✂ This is one of those words which seems to have been corrupted by a laudable intention of bringing it nearer to its original. The convulsive sob was supposed to be a species of cough; but neither Junius nor Skinner mention any such derivation, and both suppose it formed from the sound it occasions. Accordingly we find, though *hiccup* is the most general orthography, *hickup* is the most usual pronunciation. Thus Butler:

"Quoth he. to bid me not to love,

"Is to forbid my pulse to move;

"My beard to grow, my ears to prick up,

"Or, when I'm in a fit, to *hickup*."

TO HICCOUGH, hîk'kûp. v. n.

To sob with convulsion of the stomach.

TO HICKUP, hîk'kûp. v. n.

HYMENEAL, hi-mé-né'ál. } a.

HYMENEAN, hi-mé-né'án. } a.

Pertaining to marriage.

♣ In these compounds of *Hymen*, Mr. Sheridan has shortened the *i* in the first syllable; but though I think this tendency of the secondary accent to shorten the vowel perfectly agreeable to analogy, yet *y* has so frequently the sound of long *i* that it seems in this case, and some others, to counteract that tendency. Dr. Kenrick, Mr. Buchanan, and Mr. Perry, by their notation, seem of the same opinion.

A plant. It hath been a great dispute, whether the hyssop commonly known is the same which is mentioned in Scripture.

♣ Mr. Sheridan, Mr. Scott, Mr. Entick, W. Johnson, and Buchanan, pronounce this word in the second manner; Dr. Kenrick, Dr. Ash, and Mr. Perry, in the first. To pronounce the *y* long before double *s* is contrary to every rule in spelling; and therefore if the mode I have adopted be not the best, the orthography ought necessarily to be changed.

HYSTERICAL, hís-tér'rè-kál. } a.

HYSTERICK, hís-tér'rik. } a.

Troubled with fits, disordered in the regions of the womb; proceeding from disorders in the womb.

JANIZARY, ján'ẻ-zẻr-ẻ. f.

One of the guards of the Turkish king.

JANTY, ján'tẻ. a.

Showy, fluttering.

It It is highly probable, that when this word was first adopted it was pronounced as close to the French *gentile* as possible; but as we have no letter in our language equivalent to the French soft *g*; and as the nasal vowel *eu* when not followed by hard *g*, *c*, or *k*, is not to be pronounced by a mere English speaker, (see *Encore*,) it is no wonder that the word was anglicised in its sound, as well as in its orthography. Mr. Sheridan has preserved the French sound of the vowel in this word and its compound *jauntiness*, as if written *jauntty* and *jaunttiness*; but Dr. Kenrick, Mr. Scott, and Mr. Perry, give the *a* the Italian sound, as heard in *aunt*, *father*, &c. and this, I imagine, it ought to have.

IMBECILE, im-bés'sil, or im-bé-séel'. a.

Weak, feeble, wanting strength of either mind or body.

Dr. Johnson, Dr. Ash, Dr. Kenrick, and Entick, accent this word on the second syllable, as in the Latin *imbécilis*; but Mr. Scott and Mr. Sheridan on the last, as in the French *imbécille*. The latter is, in my opinion, the more fashionable, but the former more analogical. We have too many of these French sounding words; and if the number cannot be diminished, they should, at least, not be suffered to increase. (112).

This word, says Dr. Johnson, is corruptly written *embezzle*. This corruption, however, is too well established to be altered; and, as it is appropriated to a particular species of deficiency, the corruption is less to be regretted.

IMPLACABLE, im-plâ'kâ-bl. a.

Not to be pacified, inexorable, malicious, conſtant in enmity.

† This word is frequently pronounced with the *a* in the ſecond ſyllable ſhort, as if divided into *implac-able*. But this pronunciation is erroneous : for though our language has a ſtrong tendency to ſhorten the antepenultimate vowel in other terminations, in this the quantity of the vowel ſeems to depend on the quantity of the ſyllable, as *divid-able*, *blam-able*, &c. and ſometimes in primitives from the Latin, on the Latin quantity, as *placabilis*, *implacabilis*, &c. This agreement with the Latin quantity does not hold where two conſonants occur ; for though the *e* is long in the Latin *peccabilis*, it is ſhort in the Engliſh *Peccable*.

IMPORTANT, im-pôr'tânt, or im-pôr'tânt. a.

Momentous, weighty, of great conſequence.

† The ſecond ſyllable of this and the foregoing word is frequently pronounced as in the verb *to import*. The beſt uſage, however, is on the ſide of the firſt pronunciation, which ſeems to ſuppoſe that it is not a

word formed from *import*, but an adoption of the French *importance*, and therefore that it ought not to be pronounced as a compound, but as a ſimple. The authorities for this pronunciation are, Mr. Sheridan, Dr. Kenrick, Dr. Aſh, W. Johnſon, Mr. Perry, and Mr. Buchanan. Mr. Scott is for either, but gives the firſt the preference.

TO IMPUGN, im-pûne'. v. a.

To attack, to assault.

Notwithstanding the clear analogy there is for pronouncing this word in the manner it is marked, there is a repugnance at leaving out the *g*, which nothing but frequent use will take away. If *sign* were in as little use as *impugn* we should feel the same repugnance at pronouncing it in the manner we do. But as language is association, no wonder association should have such power over it. For the analogies that lead us to this pronunciation, see Principles, No. 385.

Mr. Sheridan, Mr. Nares, and Mr. Scott, pronounce the word as I have marked it; that is, with the *g* silent, and the *u* long; but Dr. Kenrick, Mr. Perry, and Buchanan, though they suppress the *g*, pronounce the *u* short. That this short sound is contrary to analogy cannot be doubted, when we take a view of the words of this termination; and the only plea for it is, the short sound of the vowels before *gm* in *plegm*, *diaphragm*, *paraplegm*, *apophlegm*, and *paradigm*, (389); but as the accent is not on any of these syllables, except *plegm*, which is irregular, (389), it is no wonder the vowel should shorten, as it so frequently does in the numerous terminations in *ile*, *inc*, *ite*, &c. (147).

IMPUGNER, im-pû'nûr. f.

One that attacks or invades.

In judging of the propriety of this pronunciation we must not confound the participles *impugning*, *impugned*, and the verbal noun *impugner*, with such words as we do not form ourselves, as *repugnant*, *malignant*, &c. The former are mere branches of the verb *impugn*, and therefore make no alteration in the root; the latter we receive already formed from the Latin or the French, and pronounce the *g* as we do in *signify* and *signet*, though it is silent in *signed*, *signing*, or *signer*. For it must be carefully observed, that analogy of pronunciation admits of no alteration in the sound of the verb upon its being formed into a participle or verbal noun; nor in the sound of the adjective, upon its acquiring a comparative or superlative termination.—See Principles, No. 409.

Nothing can show more with what servi-
lity we sometimes follow the Latin accentu-
ation than pronouncing this word with the
accent on the penultimate. In the Latin
decorus the *o* is long, and therefore has the
accent; but in *deceus* the *o* is short, and
the accent is consequently removed to the
antepenultimate; this alteration of accent
obtains likewise when the word is used in
English, and this accentuation is perfectly
agreeable to our own analogy; but because
the

67 (546). — Fâte, fâr, fâll, fât; — mêt, mêt; — pîne, pîn; —

the Latin adjective *indecorus* has the penultimate long, and consequently the accent on it, we must desert our own analogy, and servilely follow the Latin accentuation, though that accentuation has no regard to analogy; for why *dedecurus* and *indecorus*, words which have a similar derivation and meaning, should have the penultimate of different quantities, can be resolved into nothing but the caprice of custom; but that to clear an analogy of our own language should be subservient to the capricious usages of the Latin, is a satire upon the good sense and taste of Englishmen. Dr. Ash is the only one who places the accent on the antepenultimate of this word; but his single authority ought to be decisive when there is so much analogy on his side. — See Principles, No. 512.

INIMICAL, in-îm'ê-kâl, or in-ê-mî'kâl. a.

Hostile, contrary, repugnant.

† This word sprung up in the House of Commons about ten years ago, and has since been so much in use as to make us wonder how we did so long without it. It had, indeed, one great recommendation, which was, that it was pronounced in direct opposition to the rules of our own language. An Englishman, who had never heard it pronounced, would, at first sight, have placed the accent on the antepenultimate, and have pronounced the penultimate *i* short ; but the vanity of showing its derivation from the Latin *inimicus*, where the penultimate *i* is long ; and the very oddity of pronouncing this *i* long in *inimical* made this pronunciation fashionable. I know it may be urged, that this word, with respect to sound, was as great an oddity in the Latin language as it is in ours ; and that the reason for making the *i* long was its derivation from *amicus*. It will be said too, that, in other words, such as *aromaticus*, *tyrannicus*, *retoricus*, &c. the *i*

was only terminational ; but in *inimicus* it was radical, and therefore intitled to the quantity of its original *amicus*. In answer to this, it may be observed, that this was no reason for placing the accent on that syllable in Latin. In that language, whenever the penultimate syllable was long, whether radical or terminational, it had always the accent on it. Thus the numerous terminations in *alis* and *ator*, by having the penultimate *a* long, had always the accent on that letter, while the *i* in the terminations *itis* and *itas* never had the accent, because that vowel was always short. But allowing for a moment that we ought servilely to follow the Latin accent and quantity in words which we derive from that language ; this rule, at least, ought to be restricted to such words as have preserved their Latin form, as *orator*, *senator*, *character*, &c. yet in these words we find the Latin penultimate accent entirely neglected, and the English antepenultimate adopted. But if this Latin accent and quantity should extend to words from the Latin that are anglicised, then we ought to pronounce *divinity*, *de-vî-ne-e-ty* ; *severity*, *se-vere-e-ty* ; and *urbanity*, *ur-bane-e-ty*. In short, the whole language would be metamorphosed, and we should neither pronounce English nor Latin, but a Babylonish dialect between both.

IRREFRAGABILITY, ir-rêf-frâ-gâ-bil'ê-tê.
 Strength of argument not to be refuted.
IRREFRAGABLE, ir-rêf-frâ-gâ-bl, or ir-rê-frâg'â-bl. a.
 Not to be confuted, superiour to argumental opposition.
 If we might judge by the uniformity we find in our Dictionaries, there would be no great difficulty in settling the accentuation of this word. Dr. Johnson, Dr. Ash, Bailey, Entick, W. Johnson, Perry, and Buchanan, place the accent on the third syllable; Mr. Scott either on the second or third, with a preference to the latter; and Mr. Sheridan alone places it exclusively on the second. But notwithstanding Mr. Sheridan's accentuation stands single, I am much mistaken if it has not only the best usage on its side, but the clearest analogy to support it. It were, indeed, to be wished, for the sake of harmony, that, like the Greeks and Romans, we had no accent higher than the antepenultimate; but language is the *populi*. Our accent, in a thousand instances, transgresses these classic bounds, and who shall confine it? In compounds of our own, with the utmost propriety, we place the accent on the fourth syllable from the last, as in *wearisomeness*, *servicableness*, &c. (601); and a probable reason is given under the word *Academy* why we accent so many words from the Latin in the same manner; but the reason

546). — Fâte, fâr, fâll, fât ; — mêt, mêt ; — pine, pin ; —

reason what it will, certain it is, that this custom has prevailed. This prevalence of custom is sufficiently exemplified in the positive of the word in question ; *Refragable* is accented by Johnson, Ash and Bailey on the first syllable, and would probably have been accented in the same manner by the rest if they had inserted the word. Buchanan, indeed, has the word, and accents it on the second ; but his authority is greatly outweighed by the three others. Convinced, therefore, that pronouncing this word with the accent on the second syllable is following that path which the best usage has pointed out, I do not hesitate to dissent from so many authorities, especially when I find the best of these authorities inconsistent ; for if we are to place the accent on the first syllable of *Refragable*, why we should remove the accent in *Irrefragable* I cannot conceive.—See *Academy* and *Disputable*.

IRREFRAGABLY, ïr-rêf'frâ-gâ-blê.

ad. With force above confutation.

IRREFUTABLE, ïr-rê-fû-tâ-bl. a.

Not to be overthrown by argument.

¶ All our Dictionaries place the accent on the third syllable of this word ; nor do I mean to affront such respectable authority, by placing it on the second, as in *irrefragable*, though there is exactly the same reason for both. Let it not be pleaded that we have the verb *refute* in favour of the first pronunciation ; this has not the least influence on the words *indisputable*, *irrevocable*, *incomparable* &c. The reason why *Corruptible* and *Refraction* ought not to have the accent on the first syllable, arises from the difficulty of pronouncing the uncombinable consonants *pt* and *ft* in syllables not under the stress.—See *Principles*, No. 517 ; also the words *Acceptable* and *Refraction*.

IRREGULAR, ïr-rêg'gû-lâr. a.

Deviating from rule, custom, or nature ; immethodical, not confined to any certain rule or order ; not being according to the laws of virtue.

IRRELATIVE, ïr-rêl'lâ-tîv. a.

Having no reference to any thing, single, unconnected.

IRRELEVANT, ïr-rêl'ê-vânt. a.

Unaffixing.

¶ This is one of the annual productions of the House of Commons, (where new words and money bills naturally originate) but it certainly deserves reception, as it conveys a new idea ; which is, that the object to which it relates is supposed to be in a fallen and abject state, and incapable of relief ; whereas *Unaffixing* may relate to an object which, indeed, wants assistance, but which is still in a militant state, and not overcome. Every new shade of thought, however nice, enriches a language, and may be considered as a real acquisition to it.

IRRELIGION, ïr-rê-lîd'jôn. f.

Contempt of religion, impiety.

IRRELIGIOUS, ïr-rê-lîd'jûs. a.

IRREVERSIBLE, ïr-rê-vêr'sê-bl. a.

Not to be recalled, not to be changed.

IRREVERSIBLY, ïr-rê-vêr'sê-blê. ad.

Without change.

IRREVOCABLE, ïr-rêv'vô-kâ-bl. a.

Not to be recalled, not to be brought back.

¶ For the reason of accenting this word on the second, and not on the third syllable, see *Academy*.

IRREVOCABLY, ïr-rêv'vô-kâ-blê. ad.

Without recall.

TO IRRIGATE, ïr-rê-gâte. v. a.

Scarcely any word has occasioned more altercation among verbal critics than this. A great appearance of propriety seems to favour the second pronunciation, till we observe a great number of similar words, where the long vowel in the simple is shortened in the compound, and then we perceive something like an idiom of pronunciation, which, to correct, would, in some measure, obstruct the current of the language. To preserve the simple without alteration in the compound, is certainly a desirable thing in language; but when the general tune of the language, as it may be called, crosses this analogy, we may depend on the rectitude of universal custom, and ought to acquiesce in it. That the secondary accent shortens the vowel, which was long in the original, appears throughout the language in *proclamation, provocation, &c.* That the primary accent does the same in *preface, prelate, prelude, &c.* is evident; and as *ledge* is no general termination of our own, which is applicable to several words, why should we not consider *knowledge* as a simple, and pronounce it independently on its original quantity? See Principles, No. 328, 515. The patrons for the first pronunciation are, Mr. Sheridan, Dr. Kenrick, Mr. Nares, and Mr. Scott; and for the second, W. Johnson and Mr. Buchanan. Mr. Perry gives both, but seems to allow the first the preference.—See Principles, No. 328, 515.

LEGEND, lê'jênd. f.

A chronicle or register of the lives of saints; any memorial or relation; an incredible unauthentic narrative; any inscription, particularly on medals or coins.

† This word is sometimes pronounced with the vowel in the first syllable short, as if written *lêd-jênd*. This has the feeble plea of the Latin word *Lego*, to produce; but with what propriety can we make this plea for a short vowel in English, when we pronounce that very vowel long in the Latin word we derive it from? The genuine and ancient analogy of our language, as Dr. Wallis observes, is when a word of two syllables has the accent on the first, and the vowel is followed by a single consonant to pronounce the vowel long. It is thus we pronounce all Latin words of this kind; and in this manner we should certainly have pronounced all our English words, if an affectation of following Latin quantity had not disturbed the natural progress of pronunciation. See *Drama*. But besides this analogy, the word in question has the authority of Mr. Sheridan, Mr. Scott, W. Johnson, Bailey, Entick, Perry, and Buchanan, on its side. Dr. Kenrick and Dr. Ash are the only abettors of the short sound.

LEGENDARY, lêd'jên-dâ-rê.

Pertaining to a legend.

† As the preceding word has, by the clearest analogy, the vowel in the first syllable long, so this word, by having the accent higher than the antepenultimate, has as clear an analogy for having the same vowel short. (530) (535). This analogy, however, is contradicted by Dr. Ash, W. Johnson, Mr. Scott, Entick, Buchanan, and Perry. As Mr. Sheridan has not got the word, his opinion cannot be produced either way.

LEGER, lêd'jûr. f.

A ledger-book, a book that lies in the computing-house.

LEGERDEMAIN, lêd-jûr-dê-mâne. f.

Slight of hand; juggle, power of deceiving the eye by nimble motion, trick.

TO LEGISLATE, lêd'jis-lâte. v. a.

To enact laws.

† This word is neither in Johnson nor Sheridan. For the pronunciation of the first syllable, see the following words.

LEGISLATION, lêd-jis-lâ'shûn. f.

The act of giving laws.

LEGISLATIVE, lêd'jis-lâ-tiv. a.

Giving laws, lawgiving.

LEGISLATOR, lêd'jis-lâ-tôr. f.

A lawgiver, one who makes laws for any community.

LEGISLATURE, lêd'jis-lâ-tôre. f.

(461). The power that makes laws.

† Some respectable speakers in the House of Commons pronounce the *e* in the first syllable of this word long, as if written *Legislature*, and think they are wonderfully correct in doing so, because the first syllable of all Latin words, compounded of *Lex*, is long. They do not know that, in pronouncing the word in this manner, they are contradicting one of the clearest analogies of the language; which is, that the antepenultimate, and secondary accent, shorten every vowel they fall upon, except *u*, unless they are followed by a diphthong. (534) (535). This analogy is evident in a numerous catalogue of words ending in *ity*, where the antepenultimate vowel is short in English, though long in the Latin words, whence they are derived, as *serenity*, *divinity*, *globosity*, &c. The same may be observed of the words *declamatory*, *deliberative*, &c. where the two second syllables are short in English, though long in the Latin *declamatorius*, *deliberativus*, &c. Even the words *liberal* and *liberty*, if pronounced with their first syllables long, as in the Latin words *liberalis* and *libertas*, ought to be founded *lib'eral* and *lib'er-ty*. If, therefore, we consider the accent on the first syllable of *legislator*, *legislature*, or *legislative*, either as primary or secondary, we find a clear analogy for shortening the vowel; nor can we have the least reason for lengthening it, which will not oblige us in the same manner to lengthen the first vowel of *lenitive*, *pedagogue*, *pacification*, and a thousand others. See Principles, No. 530, 535. Mr. Sheridan, Dr. Kenrick, Mr. Scott, and Mr. Perry, mark the *e* in the first syllable of this word and its relatives short. W. Johnson only marks them long. From Entick we can gather the quantity of this vowel in no word but *legislate*, where he makes it long; and Ash, Bailey, and Buchanan, do not mark it either way. These authorities sufficiently show us the general current of custom; and the analogies of the language sufficiently show the propriety of it.

LEGITIMACY, lê-jit'tê-mâ-sê. f.

LEPORINE, lèp'pò-rine. *a.*

Belonging to a hare, having the nature of a hare.

Mr. Sheridan has marked the *e* in the first syllable of this word long, without even the flimsy plea of Latin quantity to support it.

Mr. Perry, Entick, and Dr. Ash, are the only Orthoëpists from whom we can gather the pronunciation of this letter. The two first are for the short sound, and the last for the long one. But the short sound is so agreeable to analogy as to want no authorities to support it.—See Principles, No. 530, 535.

LEPROSY, lèp'prò-sè. *f.*

A loathsome distemper, which covers the body with a kind of white scales.

LESSOR, lès'sôr. *f.*

One who lets any thing to farm, or otherwise by lease.

LEST, lèst, or lèést. *conj.*

That not; for fear that.

Almost all our Orthoëpists pronounce this word both ways; but the former seems to be by much the most general. This word is derived from the adjective *leest*, but it is not uncommon for words to change their form when they change their class. Dr. Wallis's advice to spell the superlative of little *leest*, has not yet been followed, and probably never will; and therefore there is no necessity for Dr. Lowth's expedient to distinguish these words by spelling the conjunction with *e*. But why we should sound the *e* long, contrary to the analogy of spelling, while such a pronunciation confounds the conjunction and the adjective, cannot be conceived. The second pronunciation, therefore, ought to be exploded.

MALEADMINISTRATION, mâle-âd-min-nîs-trâ'shôn. f.

Bad management of affairs.

† I have given the first syllable of this and the succeeding words, compounded of *male*, the long sound of *a*, because I look upon *male* as a prefix, not alterable in its sound in words of our own composition any more than *arch*, *fore*, *mis*, *pre*, or *vice*: *arch* and *fore* are used separately as adjectives, which is not the case with *male*; but *mis*, *pre*, and *vice*, are never used out of composition, and are therefore exactly under the same predicament. *Dis* not being a prefix of our own which we can apply to words at pleasure, alters the sound of *s* according to the presence or absence of the accent, or the nature of the succeeding consonants, (see *Dis*); but *mis* being applicable to any words, never alters the sound of *s*, (426). *Pre*, when prefixed to words of our own, as *pre-conceived*, *pre-supposed*, &c. never shortens the vowel, (530) (531) (532); and *vice* in *vice-president*, *vice-admiral*, &c. might as well be changed into *vis-president* and *vis-admiral*, as *male-content* and *male-practice* into *malcontent* and *malpractice*. If custom has decided in favour of the short sound of *a*, the *e* ought to be omitted in writing, and then the spelling

and found would not be at variance; but my observation fails me if any such decision has passed; and, in such case, the pronunciation ought unquestionably to conform to the orthography.

MALKIN, mawk'kin. f.

A dirty wench.

MALL, mál. f.

A stroke, a blow. Obsolete. A kind of beater or hammer; a walk where they formerly played with malls and balls.

† This word is a whimsical instance of the caprice of custom. Nothing can be more uniform than the sound we give to *a* before double *l* in the same syllable; and yet this word, when it signifies a wooden hammer, has not only changed its deep sound of *a* in *all* into the *a* in *alley*, but has dwindled into the short sound of *e* in *Mall*, a walk in St. James's Park, where they formerly played with malls and balls, and from whence it had its name; and to crown the absurdity, a street parallel to this walk is spelt *Pall Mall*, and pronounced *Pellmell*, which confounds its origin with the French adverb *pôle melle*. For Bailey appears to derive the name of the street justly from *pellere malleo*, to strike with a mallet. That this word was justly pronounced formerly we can scarcely doubt from the rhymes to it:

"With mighty mall

"The monster merciless him made to fall."

SPENCER.

"And give that reverend head a mall

"Or two or three against a wall."

HUDIBRASS.

As a corroboration of this, we find a large wooden club used for killing swine, called and spelt *a mall*; and the word signifying to beat or bruise is spelt and pronounced in the same manner. The word *mallet*, where the latter *l* is separated from the former, is under a different predicament, and is pronounced regularly.

MALLARD, mál'lârd. f.

The drake of the wild duck.

MALLEABILITY, mál-lê-â-bîl'ê-tê. f.

† I have departed from Mr. Sheridan and Dr. Johnson in the accentuation of this word, and agree with Mr. Nares in placing the

— nõ, move, nõr, nõt ; — tũbe, tũb, bũll ; — ðil ; — pũnd ; — ðin, THIS.

the stress upon the first syllable of this and similar words, and as Dr. Johnson himself has done in *Axillary*, *Maxillary*, and *Capillary*. See *Academy*.

MAMMOCK, mãm'mũk. f.

MANKIND, mãn-kyĩnd'. f.

The race or species of human beings.—See *Guard*.

This word is sometimes improperly pronounced with the accent on the first syllable, and is even marked so by Dr. Ash. Milton, with his usual license, sometimes places the accent in this manner—

“ ——— where he might likeliest find

“ The only two of *mankind*, but in them

“ The whole included race his purpos'd

“ prey.”

But Pope, in this particular, is a better guide,

both in prose and verse :

“ The proper study of *mankind* is man.”

MARIGOLD, mâr'rê-gôld. f.
A yellow flower.

Mr. Sheridan and **Mr. Buchanan**, pronounced long and slender, as in the proper name *Mary*; and this is supposed to be the true sound, as it is imagined the flower was dedicated to the Blessed Virgin; but **Mr. Scott**, **Mr. Perry**, and **W. Johnson**, give the *a* the short sound, as in *marry*; and in this they appear not only more agreeable to general usage, but to that prevailing tendency of shortening the antepenultimate vowel, which runs through the language, (535). Losing the *i* in the compound can be no objection, when we reflect on the frequency of this coalition, (515). Nor is it unworthy of observation that *gold*, in this word, preserves its true sound, and is not corrupted into *gôld*.

♣ I have excluded Mr. Sheridan's pronunciation, which makes the two first syllables of this word exactly like *matron*, because the word is a primitive in our language, derived from the Latin *matronalis*, and therefore, according to English analogy, when reduced to three syllables, ought to have the accent on the antepenultimate; and this accent has, in simples, always a shortening power, (335). The second pronunciation, though not so strictly agreeable to analogy as the first, is still preferable to Mr. Sheridan's. *Matronis* and *matronly* ought to have the first vowel and the accent as in *matron*, because they are compounds of our own; but we do not subjoin *al* to words as we do *ish* and *ly*, and therefore words of that termination are under a different predicament. Something like this seems to have struck Mr. Sheridan and Dr. Johnson when they accented the word *Patronal*: for though this word is exactly of the same form, and is perfectly similar in the quantity of the Latin vowels, we find *matronal* marked with the accent upon the first syllable, and *patronal* on the second. From Dr. Johnson's accentuation, we cannot collect the quantity of the vowel; his authority therefore, in the word in question, is only for the accent on the first syllable. To him may be added, Mr. Scott, Mr. Perry, and Entick, who accent and found the *a* as Mr. Sheridan has done. Dr. Ash alone seems to favour the pronunciation I have given.

♣ Dr. Johnson tells us, that this word is now commonly pronounced *medicinal*, with the accent on the second syllable, but more properly and more agreeably to the best authorities *medicinal*. If by the best authorities Dr. Johnson means the Poets, the question is decided; but I look upon Poets to be the worst authorities in this case, as, by the very rules of their art, a license is given them to depart from the general pronunciation; and that they often avail themselves of this license, cannot be disputed. But if by more properly Dr. Johnson alludes to the long *i* in the Latin *medicinus*, or *medicinalis*, nothing can be more inconclusive. If the word be perfectly Latin, as well as English, we sometimes place the accent on the same syllable as in the original, as *acumen*, *decorum*, &c. but frequently otherwise, as *orator*, *senator*, *character*, &c. But if this Latin accentuation were to be servilely followed in Latin words anglicised, we should overturn the whole fabric of our pronunciation. Thus *doctrinal*, *pastoral*, &c. &c. must have the accent on the second syllable instead of the first, and nothing but confusion would ensue. The truth is, the strong tendency of our language is to an antepenultimate accent; and it is with reluctance we ever place it lower, except in words of our own composition, or where the latter syllables have either an assemblage of consonants or a diphthong; yet even in this case we find the antepenultimate accent sometimes prevail, as *ancestor*, *amethyst*, *magistrate*, &c. and *counterpoise*, *porcelain*, *chamberlain*, *interregn*, &c. So that by attempting to bring our pronunciation under the laws of the Latin language, we disturb and pervert it. Let Poets, therefore, who have, and, perhaps, in some cases, ought to have, a language different from prose, enjoy the privilege of their art, and while we are reading them let us conform to their rules; but let us not strive against the general current of prosaic pronunciation, which is always right, and which is equally negligent of the peculiarities of poets, and the pedantry of ancient derivation. — See *Indecorous* and *Inimical*.

 This word was universally, till of late years, pronounced with the accent on the second syllable, as Dr. Johnson, W. Johnson, Dr. Kenrick, Bailey, Buchanan, and Perry, have marked it. Some speakers have endeavoured to pronounce it with the accent on the first, as we find it marked in Dr. Ash, Scott, and Entick: but this is an innovation unsuitable to the genius of our pronunciation, which in dissyllables, having a diphthong in the last, inclines us to place the accent on that syllable.

♂ Mr. Sheridan pronounces the *e* in the first syllable of this word, like the *a* in *march*; and it is certain that, about thirty years ago, this was the general pronunciation; but since that time the sound of *a* has been gradually wearing away; and the sound of *e* is so fully established, that the former is now become gross and vulgar, and is only to be heard among the lower orders of the people. It is, indeed, highly probable, that, however coarse this sound of *e* may now seem, it was once, not only the common pronunciation, but the most agreeable to analogy. We still find, that the vowel *i* before *r*, followed by another consonant, takes the short sound of *e*, which is really the short sound of slender *a*, as *virgin*, *virtue*, &c.; and it is a similar alteration which takes place in the *e* before *r*, followed by another consonant, in *clerk*, *serjeant*, *Derby*, &c. where this vowel falls into the sound of the Italian *a*. *Sermon*, *service*, *vermin*, &c. are still pronounced by the vulgar, as if written *sermon*, *service*, *verment*, &c.; and this was probably the ancient manner of pronouncing every *e* in the same situation. This analogy is now totally exploded; and, except *clerk*, *serjeant*, and a few proper names, we have scarcely another word in the language where this *e* has not its true sound. But instead of saying with Mr. Nares, that *Merchant* has returned to the proper sound of *e*, we may with greater probability assert, that this and every other word of the same form have acquired a sound of *e*, which they never had before, and which, though a feeble and a shorter sound, conduces to the simplicity and regularity of our pronunciation.

Impregnated with metal; consisting of metal.

Mr. Sheridan, Dr. Johnson, Dr. Ash, and Bailey, place the accent on the second syllable of this word; but Dr. Kenrick, W. Johnson, Mr. Scott, Buchanan, and Entick, on the first. I do not hesitate to pronounce the latter mode the more correct; first, as it is a simple in our language, and, having three syllables, requires the accent on the antepenultimate, notwithstanding the double *l* (see *Medicinal*). In the next place, though there is no *metalũnus* in Latin, it ought to follow the analogy of words of that termination derived from Latin, as *Cryſtallinus*, *Serpentinus*, &c. which, when anglicised, lose the last syllable, and remove the accent to the first. See *Academy*. For the *i* in the last syllable, see *Principles*, No. 148, 149.

A worker of metals.

METALLURGY, mêt'tál-lũr-jẻ. f.

The art of working metals, or separating them from their ore.

This word is accented three different ways by different Orthoepists. Dr. Johnson and Mr. Perry accent it on the second syllable; Mr. Sheridan, Buchanan, and Bailey, on the third; and Dr. Ash, Mr. Scott, and Entick, on the first; and this last accentuation appears to me the most correct. Bailey derives this word from the Greek *μεταλλουργία*; and words of this form, upon dropping a syllable when anglicised, remove the accent higher, as *philosophy*, *philology*, &c. from *φιλοσοφία*, *φιλολογία*. The accent thus removed, in enclitic terminations, (513) generally falls upon the antepenultimate syllable, unless in the two succeeding syllables there are uncombinable consonants, as *chirromancy*, *oligarchy*; and in this case, for the ease of pronunciation, the accent generally rises to the next syllable, which throws a secondary or alternate accent on the penultimate, and by this means gives the organs a greater force to pronounce the uncombinable consonants than if they immediately followed the principal stress.—See *Principles*, No. 517, 519.

By metonymy, not literally.

METONYMY, mẻ-tỏn'ẻ-mẻ, or mẻt'ỏ-nẻm'ẻ. f.

A rhetorical figure, by which one word is put for another, as the matter for the matter; He died by steel, that is, by a sword.

Authorities for the two different ways of accenting this word are so nearly balanced,

that it is hard to say which preponderates. Dr. Johnson, Dr. Kenrick, Dr. Ash, Mr. Perry, Buchanan, and Bailey, are for the first; and Mr. Sheridan, Mr. Nares, W. Johnson, Mr. Scott, Entick, and Gibbons, the author of the *Rhetorick*, for the last. In this case the ear and analogy ought to decide; and both seem to favour the first pronunciation. That the ear is pleased with the antepenultimate accent cannot be doubted; and that this word has as great a right to that accent as *lipotbymy*, *homonymy*, *synonymy*, &c. is unquestionable. Besides the enclitic accent, as this may be called, is so agreeable both to the ear and analogy, that, without evident reasons to the contrary, it ought always to be preferred.—See *Principles*, No. 513, 518, 519.

This word, and the verb from which it is derived, is in Ireland pronounced with the short *i*, as Mr. Sheridan has marked it; but I am much mistaken if it is not in England pronounced with the long *i*, as more agreeable to the orthography. There is a character in the farce of the Stage Coach, written by Farquhar, called *Micher*, and this I recollect to have heard with the *i* long.

MILLEPEDES, mil-'lè-pédz, or mil-lép-'è-déz. f.

Wood-lice, so called from their numerous feet.

The former pronunciation of this word is adopted by Dr. Johnson, Dr. Kenrick, Mr. Sheridan, Mr. Scott, and Entick; and the latter by Mr. Nares, W. Johnson, Buchanan, and Perry. That the latter is the more fashionable cannot be denied; but that the former is the more correct is evident, from similar words which have been anglicised; thus *Bipeds* and *Quadrupeds* have dropped their Latin final syllable; and why the word in question should retain it cannot be conceived. Besides, though seldom used in the singular, there is no reason why it should not be so used; and then it must necessarily become a *Milliped*. *Centipede*, properly *Centiped*, is adopted; and by forming *Centipeds* in the plural, shows us how we ought to form and pronounce the word in question; and if *Antipodes* has not yet submitted to this analogy, it is because, like *Camarides*, *Caryatides*, *Manes*, &c. it is never used in the singular.

MIMER, mí-'múr. f.

A mimick, a buffoon.

MIMETIC, mé-mét-'ík. a. (129).

Apt to imitate; having a tendency to imitation.

This word is in no dictionary I have met with; but as it is regularly derived from the Greek μιμητικός, and is adopted by good speakers, there is no reason why it should not be inserted, especially as it seems to convey a different idea from similar words; for the adjective *mimick* seems to imply the act of imitating; and *imitative*, the power, capability, or habit, of imitating; while *mimetic*

signifies a proneness or tendency to imitation. Besides, *mimetic* seems to imply a ludicrous imitation of the actions and passions of living creatures; but *imitative* is applied to any objects, and generally implies serious and respectable imitation. Thus we say: "Painting is an *imitative* art, and that apes are very *mimetic*," and "it is observable, that those who are very *mimetic* are seldom *imitative* of grand and noble objects." Harris, therefore, seems to have used this word rather inaccurately, when he says, "The *mimetic* art of poetry has been hitherto considered, as fetching its imitation from mere natural resemblance. In this it has been shown much inferior to painting, and nearly equal to music."

37 I have differed from Mr. Sheridan in the sound of the first syllable of this word, as he seems to have adopted a vulgar pronunciation, which does not distinguish between the sound of *i*, succeeded by single or double *r*, not final; and the sound of *i* final, or succeeded by *r* and another consonant. In the former case the *i* is pure, and has exactly the same sound as its representative *y* *Pyramid*, *Lyric*, &c.; in the latter the *i* goes into short *e* or *u*, as in *Birth*, *Virtue*, &c. or *Sir*, *Stir*, &c.—See Principles, No. 108, 109, 110.

MIS, mîs.

An inseparable particle used in composition to mark an ill sense, or depravation of the meaning, as chance, luck, mischance, ill luck, to like, to be pleased, to dislike, to be offended. It is derived from *mes*, in Teutonic and French, used in the same sense.

37 What is remarkable in the pronunciation of this inseparable preposition is, that the *s*, whether the accent be on it or not, or whether it be followed by a sharp or flat consonant, it always retains its sharp hissing sound, and never goes into *z*, like *dis* and *ex*. The reason seems to be, that the latter come to us compounded, and have their meaning so mingled with the word as to coalesce with it, while *mis* remains a distinct prefix, and has but one uniform meaning.

Harmful, hurtful, destructive; spiteful, malicious.

37 There is an accentuation of this word upon the second syllable, chiefly confined to the vulgar, which, from its agreeableness to analogy, is well worthy of being adopted by the learned. Analogy certainly requires that the verb formed from the noun *mischief* should be *mischieve*, as from *thief*, *thieve*, *grief*, *grieve*, *believe*, &c. with the accent on the second syllable, (492); and from such a verb would naturally be formed the adjective in question. But what analogy can give suc-

MONOLOGUE, môn'nô-lôg. f. (338).

A scene in which a person of the drama speaks by himself; a soliloquy.

Why Mr. Sheridan should pronounce *Dialogue* with the last syllable like *log*, *Prologue* with the same syllable like *lug*, and *Monologue*, rhyming with *vogue*, I cannot conceive. The final syllable of all words of this termination, when unaccented, are, in my opinion, uniformly like that in *Dialogue*. Mr. Scott has marked it in the same manner as I have done.

MONOME, môn'nôme. f.

In algebra, a quantity that has but one denomination or name.

MONOMACHY, môn'nôm'â-kê.

A duel; a single combat.

Nothing can more show the uncertainty of our Orthëpists in the pronunciation of unusual words than the accentuation of this, and those of a similar form. The only words of this termination we have in Johnson's Dictionary are, *Logomachy*, *Monomachy*, *Sciomachy*, and *Theomachy*. The two first of which he accents on the first syllable, and the two last on the second. Mr. Sheridan has but two of them, *Logomachy* and *Sciomachy*; the first of which he accents on the first syllable, and the last on the second. Mr. Scott has none of them. Dr. Ash has them all, and accents *Logomachy*, *Monomachy*, and *Theomachy*, on the first syllable; and *Sciomachy* on the second. Bailey accents *Monomachy* and *Sciomachy* on the first syllable, and *Logomachy* and *Theomachy* on the third. W. Johnson has only *Logomachy*, which he accents on the second syllable. Mr. Perry has only *Theomachy*, which he accents on the second likewise. Entick has them all, and accents them all on the first; and Dr. Kenrick accents them all on the second syllable.

This confusion among our Orthëpists plainly shows the little attention which is paid to analogy; for this would have informed them, that these words are under the same predicament as those ending in *graphy*, *logy*, &c. and therefore ought all to have the penultimate accent. An obscure idea of this

induced them to accent some of these words one way, and some another; but nothing can be more evident than the necessity of accenting all of them uniformly on the same syllable.—See Principles, No. 513, 518, &c. As to Dr. Johnson's observation, which is repeated by Dr. Kenrick and Mr. Nares, that *Sciomachy* ought to be written *Shiomachy*, I have only to observe at present, that writing a instead of o is more agreeable to etymology; but changing c into s, either in writing or pronouncing, is an irregularity of the most pernicious kind, as it has a tendency to overturn the most settled rules of the language.—See Principles, No. 350.

MONOPETALOUS, môn-nô-pêt'tâl-lûs. a.

It is used for such flowers as are formed out of one leaf, howsoever they may be seemingly cut into many ones.

v. a. To have the sole power or privilege of vending any commodity.

MONOPTOTE, môn'nôp-tôte, or môn-nôp'tôte. f.

Is a noun used only in some one oblique case.

The second pronunciation, which is Dr. Johnson's, Dr. Ash's, &c. is the most usual; but the first, which is Mr. Sheridan's, is more agreeable to analogy.

MONOSTICH, môn-nôs'tik. f.

A composition of one verse.

MONOSYLLABICAL, môn-nô-sil'lâb'ê-kál. a.

Consisting of words of one syllable.

MONOSYLLABLE, môn-nô-sil'lâ-bl.

f. A word of only one syllable.

Mr. Sheridan, in making the first syllable of this word long, seems not to have attended to the shortening power of the secondary accent.—See Principles, No. 547, 530.

54 There is an incorrect pronunciation of this and similar words, chiefly among the vulgar, which is, sounding the word as if it were written *mo-sold*. This sound is often heard among incorrect speakers, where there is no diphthong, as in *cold*, *bold*, *fold*, &c. pronounced *co-sold*, *bo-sold*, *fo-sold*, &c. while the true pronunciation of these words has nothing of the *s* or *ss* in it, but is exactly like *foal'd*, *foal'd*, *cajal'd*, &c. the preterits of the verbs *foal*, *fole*, and *cajal*, &c. For there is no middle sound between *ral* and *bol* ; and the words in question must either rhyme with *bo-wô'd* or *foal'd* ; but the last is clearly the true pronunciation.

The vowel *u*, in the first syllable of this and similar words, forms a remarkable exception to the shortening power of the antepenultimate and secondary accent; any other vowel but *u*, unless followed by a diphthong, would have been short. This arises from no regard to the Latin quantity in the word *Muculentus*, for the *u* in *Culinary*, *Mucilate*, &c. is long in English, though short in

67 (546). — Fâte, fâr, fâll, fât; — mè, mêt; — plne; pln; —

in the Latin *Cassarius, Mutilo*, &c. So that the long *s* in this and similar words is an idiom of our own pronunciation, (508) (512) (530).

It is highly probable that this word is a corruption of *Murky*, which Johnson and other writers explain by dark, cloudy, &c. but Skinner tells us it is used in Lincolnshire to signify darkness, accompanied by heat; and as this temperament of the weather is commonly accompanied by moisture, the word is generally used to signify a dark, close, warm, and moist, state of the air. As this word is not very legitimately derived, it is seldom heard among the learned and polite; but as it affords us a new complex idea, and is in much use among the middle ranks of life, it seems not unworthy of being adopted.

MY, mî, or mè. pronoun possessive.

Belonging to me.

¶ There is a puzzling diversity to foreigners in the pronunciation of this word, and sometimes to natives, when they read, which ought to be explained. It is certain that the pronoun *my*, when it is contradistinguished from any other possessive pronoun, and consequently emphatical, is always pronounced with its full, open sound, rhyming with *fly*; but when there is no such emphasis, it falls exactly into the sound of *me*, the oblique case of *I*. Thus if I were to say, *My pen is as bad as my paper*, I should necessarily pronounce *my* like *me*, as in this sentence pen and paper are the emphatical words; but if I were to say, *My pen is worse than yours*, here *my* is in opposition to *yours*, and must, as it is emphatical, be pronounced so as to rhyme with *high*, *nigh*, &c.

MYOGRAPHY, mî-ôg'grâ-fê. f. (116)

(187). A description of the muscles.

MYOLOGY, mî-ôl'lo-jê. f. (116) (187)

MYOPY, mî'ô-pê. f.

Shortness of sight.

MYRIAD, mîr'rê-âd. f.

The number of ten thousand; proverbially any great number.

¶ It may not, perhaps, be unworthy of observation, that *y*, in this and the following words, is under the same predicament as *i*; if followed by *r* and a vowel, it is short *i*; if by *r* and a consonant, it becomes short *e*, which is the cause of the difference in the first syllable of *myriad* and *myrmidon*.—See Principles, No. 108, 109.

MYRMIDON, mêr'mê-dûn. f.

There is a vulgar pronunciation of this word as if written *nature*, which cannot be too carefully avoided. Some critics have contended, that it ought to be pronounced as if written *nate-yure*; but this pronunciation comes so near to that here adopted as scarcely to be distinguishable from it. *T* before *y*, which is the letter long *a* begins with, approaches so near to *sh*, as, in the absence of accent, naturally to fall into it, in the same manner as *s* becomes *zh* in *leisure*, *pleasure*, &c. The sibilant and aspiration of *t* in this and similar words, provided they are not too coarsely pronounced, are so far from being a deformity to our language, by increasing the number of hissing sounds, as some have insinuated, that they are a real beauty; and by a certain coalescence and flow of sound, contribute greatly to the smoothness and volubility of pronunciation. See Principles, No. 459, 460, 461, &c.

OB DURACY, ôb'jû-râ-sé, or ôb-dû'rá-sé. f.

Inflexible wickedness, impenitence, hardness of heart.

♫ Though we most frequently hear *obdurate* with the accent on the second syllable, yet less frequently, I imagine, is *obduracy* so pronounced. This seems to follow the example of *accuracy*, *procuracy*, &c. in throwing the

accent on the first syllable. As there are some terminations which seem to attract the accent to the latter syllables, as *ater*, *end*, &c. as *speciator*, *observator*, &c. *comprehend*, *apprehend*, &c. so there are others that seem to repel it to the beginning of the word, as *ary*, *acy*, &c. as *efficacy*, *optimacy*, *contumacy*, &c. *salutary*, *tributary*, *adversary*, &c. The word in question seems to be of the latter class, and therefore more analogically pronounced with the accent on the first than on the second syllable.—See *Obdurate*.

OB DURATE, ôb'jû-râte, or ôb-dû'rate. a. (91).

Hard of heart, inflexibly obstinate in ill, hardened; firm, stubborn; harsh, rugged.

♫ This word is pronounced with the accent on the second syllable by Dr. Johnson, Mr. Sheridan, Dr. Kenrick, Dr. Ahl, Mr. Nares, and Mr. Perry; and on the first by Bailey, Entick, and W. Johnson. Mr. Scott accents it either on the first or second, but gives the preference to the latter. The Poets are decidedly in favour of the penultimate accent; and when the usage of poetry does not contradict any plain analogy of prosaic pronunciation, it certainly has a respectable authority. The verb *to indurate* is a word of exactly the same form, and has the same derivation; and yet Dr. Johnson and Mr. Sheridan place the accent on the first syllable; and my observation fails me if there is not a strong propensity in custom to place the accent on the first syllable of the word in question. This propensity, as there is a plain analogy in favour of it, ought, in my opinion, to be indulged. *To indurate* is a verb, derived from the Latin *induro*, forming its participle in *atus*; and words of this kind are generally anglicised by the termination *ate*, and have the accent at least as high as the antepenultimate: thus from *depuo*, *propago*, *desuo*, &c. are formed to *depurate*, to *propagate*, to *desolate*, &c.; and, without recurring to the Latin *induratus*, we form the regular participle *indurated* from the verb *to indurate*. But though there is the Latin verb *obdure*, we do not form an English verb from it in *ate* as in the former case, but derive the adjective *obdurate* from the Latin participial adjective *obduratus*; and no analogy can be more uniform than that of removing the accent two syllables higher than in the original: thus *desperate*, *profigate*, and *desecate*, have the accent on the first syllable; and *desperatus*, *profigatus*, and *desecatus*, on the third. Agreeably, therefore, to every analogy of derivation, *obdurate* ought to have the accent on the first syllable; and as poets have adopted the other accentuation, we must, as in *medicinal*, and some other words, admit of a poetical and a prosaic pronunciation rather than cross so clear an analogy in favour of poetry; which is so frequently at variance with prose, and sometimes with itself.

OB DURATELY, ôb'jû-rât-lê. ad.

Stubbornly, inflexibly.

OB DURATENESS, ôb'jû-rât-nēs. f.

Stubbornness, inflexibility, impenitence.

OB DURATION, ôb-jû-râ'shûn. f.

Hardness of heart.

OB DURED, ôb-dûr'd'. a.

Hardened, inflexible.

OBEDIENCE, ô-bé'jê-ênse. f. (293)

(376). Obsequiousness, submission to authority.

♫ The *e* which forms the first syllable of this word, though not under the accent, may occasionally be pronounced as long and open as the *e* in *oval*, *over*, &c.; and though in rapid pronunciation it admits of a short obscure sound, common to some of the other vowels when unaccented, yet its radical sound, or that which it acquires on the least distinctness or solemnity, is undoubtedly the long open *e* before mentioned. Thus in that fugitive pronunciation which has no existence but in the ear, and can hardly be expressed to the eye by a correspondent sound, we perceive very little difference in the sound of the initial vowels of *absurd*, *upward*, and *obedience*; yet the moment we dwell with the least distinctness on these letters, the *a* in *absurd* verges to the *e* in *Father*; the *u* has the short sound we hear in the preposition *up*; and the *e* in *obedience* becomes open, as the first sound of that letter in the alphabet. The same may be observed of the *e* in *opaque*, *opinion*, and every initial *e* ending a syllable immediately before the accent.—See Principles, No. 544.

What was observed of the *e* in *Efface* is applicable to the *o* in the first syllable of this word. From the tendency of the vowel to open, when immediately preceding the accent, we find elegant speakers sometimes pronounce the *o* in *occasion*, *offer*, *affluence*, &c. as if written *o-casîou*, *o-fend*, *o-ficiens*, &c. This seems to be one of those "faults true" critics dare not mend." But as it is an evident deviation from the orthography, I have not dared to mark these words in this manner. See *Efface*. It must, however, be remarked, that this deviation only takes place before double *e* in the word *occasion* and its compounds.

OMNIPOTENT, ôm-nîp'pô-tênt. a.

Almighty, powerful without limit.

OMNIPRESENCE, ôm-nê-prêz'ênse.

f. Ubiquity, unbounded presence.

☞ All the Orthœpists I have consulted (as far as can be gathered from their notation and accentuation) make the penultimate e in this word short; as in the word *presence*, except Mr. Sheridan. That it is not pronounced enclitically like *omnipotence*, (513) (518), arises, perhaps, from the number of consonants in the latter syllables; and as this is the case, it seems most agreeable to the nature of our composition to pronounce *presence* in this word, in the same manner as when it is taken singly; just as we pronounce *theatre* in the word *amphitheatre*, with the accent on the antepenultimate, though the accent is on the penultimate, and the vowel long, in the Latin *amphitheatrum*.

OMNIPRESENT, ôm-nê-prêz'ênt. a.

ONOMATOPOEIA, òn-ò-mât-ò-pê'yâ f. In Grammar or Rhetorick, a figure of speech whereby names and words are formed to the resemblance of the sound made by the things signified. The word is formed from the Greek *ονομα* name, and *ποιεω*, *make*, I make or *feign*. Thus is the word *trique-track* formed from the noise made by moving the men at this game; and from the same source arises the buzzing of bees, the grunting of hogs, the cackling of hens, the snoring of people asleep, the clashing of arms, &c. The surest etymologies are those derived from the onomatopoeia.—*Chambers*.

A stone. Ophites, has a dusky greenish ground, with spots of a lighter green.

OPHTHALMICK, òp-thâl'mîk. n.

Relating to the eye.

Two aspirations in succession seem disagreeable to an English ear, and therefore one of them is generally sunk. Thus *diphthong* and *triphthong* are pronounced *diptong* and *triptong*. P is lost as well as b in *apophthegm*; and therefore it is no wonder we hear the first b dropped in *ophthalmic* and *ophthalmick*, which is the pronunciation I

have adopted as agreeable to analogy. Nay, such an aversion do we seem to have to a succession of aspirates, that the b is sunk in *Isbmus*, *Esber*, and *Demosthenes*, because the s, which is akin to the aspiration, immediately precedes.

OPHTHALMY, òp'thâl-mê. f.

A disease of the eyes.

OPIATE, ò'pê-âte. f. (91).

A medicine that causes sleep.

TO OPPUGN, ôp-pûne'. v. a. (386).

To oppose, to attack, to resist.

OPPUGNANCY, ôp-pûg'nân-sê. f.

Opposition.

OPPUGNER, ôp-pûne-ûr. f.

One who opposes or attacks.

Mr. Sheridan sounds the *g* in this word, though not in the verb from which it is formed; but that this is contrary to analogy, see Principles, No. 386.

OPTABLE, ôp'tâ-bl. a.

Desirable, to be wished.

OPTATIVE, ôp'tâ-tîv, or ôp-tâ'tîv. a.

Expressive of desire; the name of that mood of a verb which expresses desire.

Dr. Johnson, Mr. Sheridan, Dr. Ash, Mr. Scott, Entick, and Buchanan, accent this word on the first syllable; and Dr. Kenrick, Bailey, W. Johnson, and Mr. Perry, on the second. That the last is more general, particularly in Grammar schools, will be readily acknowledged, but that the first is more correct and agreeable to analogy cannot be denied; as we have not an instance in the whole language where the *a* in this termination has the accent when it is not radical.

OPTICAL, ôp'tê-kâl. f.

Relating to the science of optics.

OPTICIAN, ôp-tî'h'ûn. f.

One skilled in optics.

f. One who sells oranges.

ORATION, ô-râ'hûn. f.

A speech made according to the laws of rhetoric.

ORATOR, ôr'râ-tûr. f.

A public speaker, a man of eloquence; a petitioner. This sense is used in addresses to chancery.

ORATORIAL, ôr-râ-tô'rê-âl.

Rhetorical, florid.

I have inserted this word, though omitted by almost all our Lexicographers, because I have met with it in authors of reputation. Dr. Forster, in his *Treatise on Accent and Quantity*, says: "The connexion of this, which may be called the *oratorial* accent, with the syllable, and the subordination of them to each other, however difficult it may appear, is yet easy in practice." page 23. Other good authorities for this word might have been adduced, but the other adjective *oratorial*, though not so justly formed, seems generally to be preferred. I have sometimes made the experiment on people, whose ears were nicely set to pure English pronunciation, by proposing to them for their choice the adjectives *oratorial* or *oratorical*, and have always found them prefer the latter. This may, in some measure, arise from supposing the former might be considered as the adjective of *orator*, but seems rather to be occasioned by too great a plenitude and rotundity of sound, which is not agreeable to the genius of our language: for if we regard derivation only, the adjective ought to be *oratorial*,

as derived immediately from the Latin *oratorius*, in the same manner as from *rhetoricus*, is formed *rhetorical*.

ORATORICAL, ôr-râ-tô'rê-kâl. a.

Rhetorical, befitting an orator.

ORATORY, ôr'râ-tûr-ê. f.

Eloquence, rhetorical skill; exercise of eloquence; a private place which is deputed and allotted for prayer alone.

ORCHESTRE, ôr'kês-tûr. f. (416).

The place where the musicians are set at a publick show.

ORCHESTRA, ôr'kês'trâ.

A part of the theatre appropriated to the musicians.

Dr. Johnson has preferred the French *orchestre*, to the Latin *orchestra*, and the Greek *orchestra*; but as we find the latter spelling and pronunciation universally adopted, and as we take almost every other term of art rather from the Greek than any other language, I have ventured to insert it in that dress after Chambers, and some other very respectable authors.

TO ORDAIN, ôr-dâne'. v. a.

To appoint, to decree; to establish, to institute; to set in an office; to invest with ministerial function, or sacerdotal power.

ORDAINER, ôr-dâne-ûr. f.

ORDINARILY, òr'dè-nà-rè-lè. ad.

According to established rules, according to settled method; commonly, usually.

ORDINARY, òr'dè-nà-rè, or òrd'nà-rè

a. Established, methodical, regular; common, usual; mean, of low rank; ugly, not handsome, as she is an Ordinary woman.

Though it is allowable in colloquial pronunciation to drop the *i* in this word, and pronounce it in three syllables, in solemn speaking the *i* must be heard distinctly, and the word must have four syllables. — See Principles, No. 374.

ORDINARY, òr'dè-nà-rè. f.

Established judge of ecclesiastical causes; settled establishment; actual and constant office.

ORDINARY, òrd'nà-rè. f.

Regular price of a meal; a place of eating established at a certain price.

The *i* is never heard when the word is used in this sense.

¶ If we consult our Orthoëpists, there can scarcely be any two pronunciations more equally balanced than those that are given to this word. Mr. Sheridan, Mr. Nares, Dr. Ash, W. Johnson, Mr. Scott, and Entick, are for the first; and Dr. Johnson, Dr. Ken-

rick, Bailey, Buchanan, and Perry, for the last; but notwithstanding the last has these authorities to support it, I am much mistaken if the first has not obtained a complete victory. That there is a strong tendency in our language to the antepenultimate accent, is evident; it is as evident, likewise, that those polysyllables, which we derive from the Latin, incline to accent that syllable on which we place a secondary accent in pronouncing the original, (see *Academy* and *Disputable*); and provided there are no clusters of uncombinable consonants in the latter syllables, there is no reason why this accentuation should be checked. This is the case with the word in question; the *p* is mute, *i* is easily pronounced after *em*, and the whole termination is sufficiently smooth and voluble; but in *Perfunctory* the case is different; the uncombinable consonants *nt* are not to be pronounced without considerable difficulty, if we place the accent on the first syllable; and therefore this accentuation ought to be avoided as much as in *Corruptible*, which see.

TO PERFORM, pèr-fôr'm', or pèr-fôr'm'. v. a.

To execute, to do, to discharge, to atchieve an undertaking.

† There is a wanton deviation from rule in the pronunciation of this word, which calls aloud for reformation. Pronouncing the last syllable like *form*, a feat, is a gross departure from analogy; as will appear by comparing it with the same syllable in *re-form*, *conform*, *inform*, *deform*, *transform*, &c. This error seems chiefly confined to the stage, where it probably originated. It is not unlikely that some affected actor, to give the word a foreign air, first pronounced it in this manner; though, in justice to the stage, it ought to be observed, that it has less affectation than any theatre of elocution in the kingdom.

PERFUNCTORY, pèr-fûnk'tûr-ê. a.

Slight, careless, negligent.

† I have differed from Mr. Sheridan, who accents this word on the first syllable, but have Dr. Johnson, Bailey, Buchanan, and Entick, on my side for accenting the second; and this pronunciation, without any authority, would be more eligible than the other, from the difficulty of pronouncing the uncombinable consonants in the last syllables without the assistance of accent. — See *Peremptory*, *Irrefragable*, and *Corruptible*.

But that before the time of Milton the spelling and accentuation had been changed.

"Whence heavy persecution shall arise

"Of all who in the worship *persevere*

"Of spirit and truth."

PAR. LOST, xii. v. 532.

As this word is written at present there can be no doubt of its pronunciation; and that it is very properly written so, appears from other words of the same form. *Declare, respire, explore, procure*, &c. from *declaro, respiro, exploro, procuro*, &c. and consequently from *persevero* ought to be formed *persevere*; yet such is the force of prescription, that the old pronunciation is not entirely rooted out, though it is never heard among those who have any pretensions to correctness.

PERSEVERINGLY, pèr-sè-vère'ing-lé

ad. With perseverance.

TO PERSIST, pèr-sìst'. v. n. (447).

To persevere, to continue firm, not to give over.

Individual or particular man or woman; human being; a general loose term for a human being; one's self, not a representative; exterior appearance; man or woman represented in a fictitious dialogue; character; character of office; in grammar, the quality of the noun that modifies the verb.—See *Parson*.

PERSONABLE, pèr'sùn-à-bl. a.

Handsome, graceful, of good appearance.

As the *o* in *person* is sunk, as in *section, treason*, &c. so this word being a compound of our own, and *personage* coming to us from the French, we generally suppress the *o*; but as *personal*, *personate*, &c. come to us from the Latin, we generally preserve the *o*. This is the best reason I can give for the slight difference we find in the pronunciation of these words; and if any one is inclined to think we ought to preserve the *o* distinctly in all of them, except *person*, and even in this, on solemn occasions, I have not the least objection.

PERSONAGE, pèr'sùn-àdje. f. (90).

A considerable person, man or woman of eminence; exterior appearance; air, stature; character assumed; character represented.

PERSONAL, pèr'sùn-ál. a.

Belonging to men or women not to things, not real; affecting individuals or particular people, peculiar, proper to him or her, relating to one's private actions or character; present, not acting by representative; exterior, corporal; in law, something moveable, something appendant to the person; in grammar, a personal verb is that which has all the regular modification of the three persons, opposed to impersonal that has only the third.

PERSPECTIVE, pèr-spèk'tiv. f.

A glass through which things are viewed; the science by which things are ranged in a picture, according to their appearance in their real situation; view, vista.

This word, as may be seen in Johnson, was generally accented by the poets on the first syllable; but the harshness of this pronunciation arising from the uncombinable consonants in the latter syllables, has prevented this pronunciation from gaining any ground in prose; and it were much to be wished that the same reason had prevented the initial accentuation of similar words.—See *Irrefragable*, *Corruptible*, *Acceptable*, &c.

PERSPECTIVE, pèr-spèk'tiv. a.

The second manner of pronouncing this word is more general ; but the first is more

analogical. If, when we pronounce a Latin or Greek word of two syllables, having a single consonant between two vowels, we always make the first vowel long ; it is very natural, when such a word is transplanted whole into our own language, to pronounce it in the same manner. That the quantity of the original has nothing to do in this case may be seen under the word *Drama* ; and yet nothing but an absurd regard to this could have influenced the generality of speakers to pronounce this word with the first vowel short, contrary to the old genuine analogy of our own language, as Dr. Wallis calls it, and contrary to the manner in which we pronounce the word in the original : for though *local*, *favour*, and *labour*, have the first vowel short in the Latin *locus*, *favor*, and *labor*, we pronounce them both in Latin and English according to our own analogy, with the *o* and *a* long and open. The same may be observed of words from the Greek. In the word in question, therefore, the authority of Mr. Sheridan, Mr. Scott, and Dr. Ash, who make the first vowel long, ought to outweigh that of Dr. Kenrick, Mr. Perry, Entick, and Buchanan, who make it short.

PHLOGISTON, flog-jis'tôn, or flog-gis'tôn. f.

A chymical liquor extremely inflammable; the inflammable part of any body.

Professors of every art think they add to its dignity, not only by deriving the terms of it from the Greek, but by pronouncing these terms contrary to the analogy of our own language. For this reason our pronunciation becomes full of anomalies, and the professors of an art speak one language, and the rest of the world, another. Those, therefore, who are not chymists ought, in my opinion, to enter their protest against the irregular sound of the g in this and similar words. Pronouncing the g soft would only hurt the pride of the professor; but pronouncing it hard would hurt the genius of the language. — See *Heterogeneous*.

PHYSIOGONOMER, fizh-ê-ôg'nô-mûr, or fizh-ê-ôg'nô-mûr. } f.

PHYSIOGNOMIST, fizh-ê-ôg'nô-mîst. }

One who judges of the temper or future fortune by the features of the face.

For the propriety of pronouncing the s in these words like zh, we need only appeal to analogy. S before a diphthong beginning with i, and having the accent before it, either primary or secondary, always goes into zh, as may be seen, Principles, No. 451. The secondary accent on the first syllable of these words gives a feebleness to the second, which occasions the aspiration of s as much as in *evasion*, *adhesion*, &c. where the s is preceded by the primary accent. It must, however, be acknowledged, that this is far from being the most general pronunciation. — See *Ecclesiastick*.

PHYSIOGNOMY, fizh-ê-ôg'nô-mê. f.

The art of discovering the temper and foreknowing the fortune by the features of the face; the face, the cast of the look.

Exact, strict, nice, having strict and determinate limitations; formal, finical.

PRECISELY, prè-sîse'lè. ad.
Exactly, nicely, accurately, with superstitious formality, with too much scrupulosity.

Though we seldom hear the adjective *precise* pronounced as if written *precize*, we very frequently hear the adverb *precisely* pronounced as if written *precizely*; but it ought to be remembered as an invariable rule, that adverbs preserve exactly the same accent and sound as the adjective from which they are formed; and therefore, as the adjective is pronounced with the hissing or pure *s*, the adverb ought to have the same.

PRECISENESS, prè-sîse'nès. f.
Exactness, rigid nicety.

PRECISIAN, prè-sîzh'ân. f.
One who limits or restrains; one who is superstitiously rigorous.

PREDIGESTION, prè-dè-jès'shûn. f.
Digestion too soon performed.

PREDILECTION, prè-dè-lèk'shûn. f.
Preference, partiality, prepossession, in favour of any thing.

It is probable that this word was not in use when Dr. Johnson wrote his Dictionary, or he would have inserted it; but the readiness with which it has since been adopted by the most respectable writers, is a sufficient proof of its propriety and utility.

TO PREDISPOSE, prè-dis-pôze'. v. a.
To adapt previously to any certain purpose.

PREDISPOSITION, prè-dis-pô-zîsh'ûn. f.
Previous adaptation to any certain purpose.

PREFECTURE, prèf'fèk-tûre. f.
Command, office of government.

Though I have agreed with all our Orthoëpists in making the first syllable of *perfect* long, I cannot follow them so implicitly in the accent and quantity of this word.

All but Mr. Sheridan, W. Johnson, and Mr. Perry, place the accent on the second syllable; and the two first of these writers make the first syllable long, as in *perfect*.

Mr. Perry alone has, in my opinion, given this word its true pronunciation, by placing the accent on the first syllable, and making that syllable short. This is agreeable to that general tendency of our language to an antepenultimate accentuation, and a short quantity on every vowel but *u*. — See Principles, No. 533, 585.

PROGRESS, prỏg' grẻs. f.

Course, procession; advancement, motion forward; intellectual improvement; removal from one place to another; a journey of state, a circuit.

⚠ This word is frequently, but improperly, pronounced with the first syllable long, as if written *pro-gress*. But the analogy of pronunciation evidently tends to shorten the vowel in the inseparable preposition when the accent is upon it, and therefore the nouns *produce*, *progress*, *project*, &c. have very properly the *o* in the first syllable short.—See Principles, No. 530, 531, &c.

PROLOCUTOR, prỏ-lỏ-kủ' tủr. f.

The foreman, the speaker of a convocation.

⚠ In compliance with so many authorities I placed the accent on the antepenultimate syllable of *Interlocutor*, and nearly the same authorities oblige me to place the accent on the penultimate of this word; for so Dr. Johnson, Dr. Kenrick, Dr. Ash. W. Johnson, Mr. Perry, Buchanan, and Bailey,

accent it. But surely these two words ought not to be differently accented; and if my opinion had any weight, I would accent them both on the penultimate, as they may be considered exactly like words in *ator*, and ought to be accented in the same manner. Mr. Sheridan and Mr. Scott are very singular in placing the accent on the first syllable.

PROLOCUTORSHIP, prỏ-lỏ-kủ' tủr-shủp. f.

PRONOUNCER, prô'nôûn'sûr. f.
One who pronounces.

PRONUNCIATION, prô'nûn-shè-â'shûn. f.

The act or mode of utterance.

87 There are few words more frequently mispronounced than this. A mere English scholar, who considers the verb to pronounce as the root of it, cannot easily conceive why the *o* is thrown out of the second syllable, and therefore, to correct the mistake, founds the word as if written *Pronunciation*. Those who are sufficiently learned to escape this error, by understanding that the word comes to us either from the Latin *pronuntiatio*, or the French *pronunciation*, are very apt to fall into another, by sinking the first aspiration, and pronouncing the third syllable like the noun *sea*. But these speakers ought to take notice, that, throughout the whole language, *c*, *s*, and *t*, preceded by the accent, either primary or secondary, and followed by *ea*, *ia*, *io*, or any similar diphthong, always become aspirated, and are pronounced as if written *sh*. Thus the very same reasons that oblige us to pronounce *partiality*, *propitiation*, *essentially*, &c. as if written *parshality*, &c. oblige us

to pronounce *pronunciation* as if written *pronunshashun*. — See Principles, No. 357, 450, 461.

But though Mr. Sheridan avoids the vulgar error of sinking the aspiration, in my opinion, he falls into one still as exceptionable, which is, that of pronouncing the word in four syllables, as if written *Pro-nun-sha-shun*. I am grossly mistaken if correct speakers do not always pronounce this and similar words in the manner I have marked them: and, indeed, Mr. Sheridan himself seems dubious with respect to some of them; for though he pronounces *glaciate*, *glaciation*, *association*, &c. *glâ-shate*, *glâ-sha-shun*, *as-so-shâ-shun*, &c. yet he spells *conglaciate*, *conglaciation*, and *association*, — *con-glâ-shate*, *con-glâ-sha-shun*, and *con-shâ-sha-shun*. — See Principles, No. 542, 543.

QUADRANT, kwâ'drânt. f. (85).

The fourth part, the quarter ; the quarter of a circle ; an instrument with which latitudes are taken.

It has been observed in the Principles, No. 85, 86, &c. that *u*, by articulating the *a*, gives it the deep broad sound equivalent to the diphthong *au*, and that *u*, preceded by *q*, has exactly the same effect. (414). This is evident from the sound of *a* in this and similar words, which, till lately, was always pronounced broad. Some innovators have attempted to give the *a* in this word its slender sound ; but the publick ear seems in opposition to it, nor ought it to be admitted. The broad sound is the genuine English pronunciation, as appears in every word where it is succeeded by *r*. As this consonant, when final, or followed by ano-

ther consonant, gives every *a* that precedes it the Italian sound heard in *father* ; so when these letters are preceded by *q*, or *w*, the *a* falls into the broad sound heard in *water*. Thus as we hear *bar*, *dart*, *barrel*, with the sound of the Italian *a*, so we hear *war*, *quart*, and *quarrel*, with the German *a*. *Equator*, *quaver*, and words ending with hard *c*, *g*, and *f*, have departed from this rule ; but a sufficient number of words are left to indicate plainly what is the analogy, and to direct us where usage is doubtful.

RAILER, râle'ûr. f.
One who insults or defames by opprobrious language.

RAILLERY, râl'lêr-ê. f.
Slight satire, satirical merriment.

⚡ We must not suppose this word to be the offspring of the English word *rail*, however nearly they may be sometimes allied in practice. *Raillery* comes directly from the French word *raillerie*; and, in compliment to that language for the assistance it so often affords us, we pronounce the first syllable nearly as in the original. This, however, is not a mere compliment like the generality of those we pay the French; for were we to pronounce the first syllable like *rail*, it might obscure and pervert the meaning.

RAIMENT, râ'mênt. f. (202).
Vesture, vestment, clothes, dress, garment.

RAISER, râze'ûr. f.
He that raises.

RAISIN, rê'z'n. f.
A dried grape.

⚡ If antiquity can give a sanction to the pronunciation of a word, this may be traced as far back as the days of Queen Elizabeth. Falstaff, in the first part of Henry the Fourth, being urged by the Prince to give reasons for his conduct, tells him, that if *raisins* were as plenty as *blackberries*, he would not give him one upon compulsion. This pun evidently shews these words were pronounced exactly alike in Shakespear's time, that Mr. Sheridan's pronunciation of this word, as if written *ray-z'n*, is not only contrary to the most settled usage, but destructive of the wit of Shakespear.

RAKE, râke. f.
An instrument with teeth, by which the ground is divided; a loose, disorderly, vicious, wild, gay, thoughtless fellow.

TO RAKE, râke. v. a.

¶ The difference in the pronunciation of these words is not only necessary to convey their different signification, but to show their different etymology. The first comes to us from the French *rareté*, and the last from the Latin *raritas*; which therefore, according to the most settled analogy of our language, ought to have the antepenultimate syllable short. — See Principles, No. 511; also the word *Chastity*.

TO RASE, râse. v. a.—See Raze.
To skim, to strike on the surface; to overthrow, to destroy, to root up; to blot out by rasure, to erase.

¶ There seems to be no small difficulty in settling the orthography and pronunciation of this word. Dr. Johnson advises, when it signifies to strike slightly, to write it *rase*; and when it signifies to ruin, *raze*. Whatever may be the utility of this distinction to the eye, the ear seems to have made no such distinction in the sound of the *s*; as *graze*, which is evidently formed from this word, and seems to have been adopted for the purpose of signifying to strike slightly, has preserved the *z*; while *erase*, which means to destroy, to expunge, to take away entirely, is always pronounced with the *s* pure. But *rase*, whether signifying to strike slightly, or to overthrow, has been so generally pronounced with the *s* like *z*, that most of our writers have adopted the latter character; and this found, it may be observed, seems more agreeable to the analogy of verbs in this termination than that in *erase*, (437) (467). But as nothing can be more fixed in the language than the sharp hissing sound of *s* in *erase*, and the flat buzzing sound of that let-

ter in *rase*, it would be in vain to attempt an alteration. If analogy and usage were to compound the difference, perhaps it would be easier to bring *erase* to the sound of *eraze*, than *raze* to *raze*. It must, indeed, be owned, that pronouncing *rase* with the sound of *z* is apt to confound it with *raise*, a word a very opposite meaning; but these homonymous words are in all languages, and, by their continuance after criticism, seem to be a lesser evil than any violent alteration would be. In my opinion, therefore, however we may spell this word, we ought always to pronounce it with the sound of *z*: but to sound it with the hissing *s* when it is written *raze*, as Mr. Sheridan has done, is a solecism in pronunciation: for though *s* often goes into the sound of *z*, *z* never goes into that of *s*.

⚡ (546). — Fâte, fâr, fâll, fât; — mê, mêt; — plne, pîn; —

in preference, a bad expression; it should be, Will Rather.

⚡ Dr. Johnson tells us that this word is the comparative of *rat*, a Saxon word, signifying *soon*, and that it still retains its original signification; as we may say, "I would *sooner* do a thing," with as much propriety as "I would *rather* do it." Some very respectable speakers pronounce this word with the first syllable like that in *Râ-ven*; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other Orthoëpists, from whom we can certainly know the quantity of the vowel, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminutive. Thus in familiar conversation, when we wish to express very little, we sometimes lengthen the vowel, and pronounce the word as it written *little*. In the same manner, when *rather* signifies just preferably, we lengthen the first vowel, and pronounce it long and slender, as if written *ray-ther*; and this, perhaps, may be the reason why the long slender sound of the vowel has so much obtained, for both analogy and usage seem to be clearly on the side of the other pronunciation.

REAR, rẻẻẻ. a. (227).

Raw, half roasted, half fadden.

¶ This word is frequently, but corruptly, pronounced as if written *rear*. But though *rear*, rhyming with *rear*, is the true pronunciation, we must not suppose it to have the least affinity in signification with *rear* (behind). Junius and Skinner derive this word from the Saxon word *brere*, signifying *fluent*, or *trembling* like the white or yolk of an egg when unconcocted: hence Junius explains the phrase a *rear*-egg, a trembling egg; and Skinner imagines that this word may come from the Greek word *ρῆω*, to flow, because unconcocted eggs easily flow or move about: or he supposes that our word *rear*, and the Saxon *brere*, may possibly come from the Latin *rarus*, as opposed to *dense*, because eggs, when boiled, lose their fluidity, and grow thick. This derivation of Skinner seems a little too far fetched. Whatever may be its origin in the Saxon, it seems to have been used in that language for *crude* and *unconcocted*: from the Saxon it comes to us in that sense, and, in my opinion, ought to be written as well as pronounced *Rere*.

RECONCILEABLE, rẻk-kỏn-sẻlẻ-bl.
a. Capable of renewed kindness; consistent, possible to be made consistent.

¶ Though Dr. Johnson and Mr. Sheridan have written *Reconcilable*, *Unreconcilable*, and *Reconcilableness*, with the mute *e* in the middle of these words, they have omitted it in *Irreconcilable*, *Irreconcilably*, and *Irreconcilableness*. This has sometimes occasioned an impropriety in the pronunciation of these words, by founding the preceding *i* short, as in *silver*, and giving the words a syllable more than they ought to have, as if divided into *Re-con-sẻlẻ-a-ble*, &c.; but as the orthography is wrong, so is the pronunciation. The mute *e* ought to have no place, when followed by a vowel, in words of our own composition; and therefore, as it is *Inclinable*, *Desirable*, &c. so it ought to be *Reconcilable*, *Reconcilably*, &c.

RECONCILEABLENESS, rẻk-kỏn-sẻlẻ-lẻ-blẻnẻs. f.

Consistence, possibility to be reconciled; disposition to renew love.

TO RECONDENSE, rẻ-kỏn-dẻnse'.

v. a. To condense anew.

RECONDITE, rẻk'kỏn-dẻte. a.

Secret, profound, abstruse.

¶ Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, accent this word on the second syllable; Mr. Sheridan and Bailey on the last. Notwithstanding these authorities, I am mistaken if the best speakers do not pronounce this word with the accent on the first syllable, and if it is not agreeable to analogy to do so. A few words of three syllables from the Latin, when anglicised, without altering the number of syllables, have the accent on the same syllable as in the Latin, as *Opponent*, *Deponent*, &c.; but the general inclination of our language is to place the accent on the first syllable, as in *Manducate*, *Indagate*, &c.

TO RECONDUCT, rẻ-kỏn-dỏkt'. v. a.
To conduct again.

TO RECONJOIN, rẻ-kỏn-jỏin'. v. a.

To register any thing, so that its memory may not be lost; to celebrate, to cause to be remembered solemnly.

RECORD, rẻk'ỏrd, or rẻ-kỏrd'. f.

Register, authentick memorial.

¶ The noun *record* was anciently, as well as at present, pronounced with the accent either on the first or second syllable: till lately, however, it generally conformed to the analogy of other words of this kind; and we seldom heard the accent on the second syllable, till a great luminary of the law, as remarkable for the justness of his elocution as his legal abilities, revived the claim this word anciently had to the ultimate accent; and since his time this pronunciation, especially in our courts of justice, seems to have been the most general. We ought, however, to recollect, that this is overturning one of the most settled analogies of our language, and that it would be to the advantage of pronunciation to lean to the obvious analogy in disyllable nouns and verbs of the same form.—See Principles, No. 49a.

RECORDATION, rẻk-ỏr-dỏ' shỏn. f.

Remembrance.

RECUSANT, rêk'kù-zânt, or rê-kù'sânt. f.

One that refuses any terms of communion or society.

⚡ Though almost every Dictionary in the language is against the accentuation of this word on the first syllable, I am inclined to give it the preference, from the strong tendency of our language to an antepenultimate accentuation of simples of three syllables. For though *Proponent* and *Deponent* preserve their Latin accent, *Ignorant* and *Laborant* depart from it. The same may be observed of *Adjutant* and *Permanent*; and till a better reason can be given for placing the accent on the penultimate syllable of the word in question, than the long quantity of the Latin word from which it is derived, I shall beg leave to accent it on the antepenultimate with Mr. Sheridan, W. Johnson, and, I think, the best present usage on my side.

⚡ Almost all the Dictionaries I have consulted, except Mr. Sheridan's, place the ac-

—nô, môve, nôr, nôt; —tûbe, tâb, bâll; —ôll; —pônd; —thin, THIS.

cent on the second syllable of this word; and yet so prevalent has the latter accentuation been of late years, that Mr. Nares is reduced to hope it is not fixed beyond recovery. There is, indeed, one reason why this word ought not to have the accent on the first syllable, and that is, the two mutes in the second and third, which are not so easily pronounced when the accent is removed from them, as the mutes and liquids in *accessory, confessor, desultory*, &c. — See *Peremptory, Corruptible, Irrefragable*, &c.

Regard, attention; reverence, honour; awful kindness; goodwill; partial regard; reverend character; manner of treating others; consideration, motive; relation, regard.

RESPECTABLE, rê-spêk'tâ-bl. a.

Deserving of respect or regard.

I This word, like several others of the same form, is frequently distorted by an accent on the first syllable. When there are no uncombined consonants in the latter syllable, this accentuation is not improper, as *despicable*, *disputable*, *preferable*, &c. but when consonants of so different an organ as *t* and *p* occur in the penultimate and antepenultimate

mate syllables of words without the accent, the difficulty of pronouncing them is a sufficient reason for placing the accent on them in order to assist the pronunciation: and accordingly we find almost every word of this form has the accent upon these letters, as *deliciable*, *deffructible*, *perceptible*, *susceptible*, *discernible*, &c.; besides, as it contributes greatly to the clearness and force of the language to place the accent on the most significant part of the word, when other reasons do not forbid, this ought to determine us to lay the stress upon the second syllable of the word in question. This is the accentuation of Mr. Scott, Mr. Buchanan, W. Johnson, Bailey, and Entick; and if Dr. Johnson, Mr. Sheridan, Dr. Ash, Dr. Kenrick, and Mr. Perry, had inserted the word in their Dictionaries, they would, in all probability, have accented the word in the same manner. See *Acceptable*, *Corruptible*, and *Irrefragable*.

TO RETCH, rêth. v. n.

To force up something from the stomach.

⚡ This word is derived from the same Saxon original, as the verb to *retch*, and seems to signify the same action; the one implying the extension of the arm; and the other, of the throat or lungs. No good reason, therefore, appears either for spelling or pronouncing them differently; and though Dr. Johnson has made a distinction in the orthography, the pronunciation of both continues the same.

Having the form of a net.

RETINUE, rêt'ê-nû, or rê-tîn'û. f.

A number attending upon a principal person, a train.

⚡ This word was formerly always accented on the second syllable; but the antepenultimate accent, to which our language is so prone in simples of three syllables, has so generally obtained as to make it doubtful to which side the best usage inclines. In this case then, analogy ought to decide for placing the accent on the first syllable. See Principles, No. 535, and the word *Revenue*.

TO RETIRE, rê-tîre'. v. n.

To retreat, to withdraw, to go to a place of privacy; to retreat from danger; to go from a public station; to go off from company.

TO RETRIBUTE, rē-trib'úte. v. a.

To pay back, to make repayment of.

I have differed from Dr. Johnson, Mr. Sheridan, and almost all our Orthoëpists, in giving the accent to the second syllable of this word in preference to the first. But while the verbs *attribute*, *contribute*, and *distribute*, have the penultimate accent, it seems absurd not to give *retribute* the same.

RETRIBUTION, rē-tré-bú'shūn. f.

Repayment, return accommodated to the action.

REVENUE, rév'è-nù, or rē-vēn'ù. f.

Income, annual profits received from lands or other funds.

This word seems as nearly balanced between the accent on the first and second syl-

lable as possible; but as it is of the same form and origin as *avenue* and *retinue*, it ought to follow the same fortune. *Retinue* seems to have been long inclining to accent the first syllable, and *avenue* has decidedly done so, since Dr. Watts observed that it was sometimes accented on the second; and by this retrocession of accent, as it may be called, we may easily foresee that these three words will uniformly yield to the antepenultimate accent; the favourite accent of our language, conformably to the general rule, which accents every simple of three syllables upon the first.—See *Conversant*.

¶ This word seems to have been some years floating between the accent on the first and last syllable, but to have settled at last on the former. It may still, however, be reckoned among those words, which, if occasion require, admit of either. See Principles, No. 528. It may, perhaps, be necessary to observe, that some Lexicographers have written this word *Reverie* instead of *Revery*, and that while it is thus written we may place the accent either on the first or last syllable ; but if we place the accent on the last of *Revery*, and pronounce the *y* like *e*, there arises an irregularity which forbids it ; for *y*, with the accent on it, is never so pronounced. Dr. Johnson's orthography, therefore, with *y* in the last syllable, and Mr. Sheridan's accent on the first, seem to be the most correct mode of writing and pronouncing this word.

¶ I have adopted that sound of the vowel in this word which is given to it by Dr. Kenrick, Mr. Scott, and Mr. Perry, and therefore ought to have inserted it among those words in Principles, No. 165. This I do not only suppose to be the general pronunciation, but have sometimes found it written with *u*. But when this word is given us in its Latin form *Rhombus*, the *o* ought to have the same sound as in *comedy*.—See Principles, No. 347.

The capital city of Italy, supposed to have been founded by Romulus, and once the mistress of the world.—*Abb.*

The *o* in this word is irrevocably fixed in the English sound of that letter in *move, prove, &c.* Pope, indeed, rhymes it with *dome*, thus when we view some well-proportion'd *dome*,

The world's just wonder, and ev'n thine, *O Rome!*—

But, as Mr. Nares observes, it is most probable that he pronounced this word as if written *doom*, as he rhymes *Rome* with *doom* afterwards in the same poem.

From the same foes at last both felt their *doom*; And the same age saw learning fall and *Rome*.

SAT, sât. The preterit of Sit.

SATAN, sâ'tân. f.

The prince of hell, any wicked spirit.

¶ This word is frequently pronounced as if written *Sattân*; but making the first syllable long is so agreeable to analogy that it ought to be indulged wherever custom will permit; and particularly in proper names. *Cato, Plato*, &c. have now universally the penultimate a long and slender; and no good reason can be given why the word in question should not join this class.

SATANICAL, sâ-tân'né-kâl. } a.
SATANICK, sâ-tân'nik. }

Devilish, infernal.

SATCHELL, sâth'hîl. f.

A little bag used by schoolboys.

TO SATE, sâte. v. a.

To satiate, to glut, to pall, to feed beyond natural desires.

SATELLITE, sât'têl-lîte. f. (155).

A small planet revolving round a larger.

¶ Pope has, by the licence of his art, accented the plural of this word upon the second syllable, and, like the Latin plural, has given it four syllables.

Or *âtt* of yonder argent fields above,
Why Jove's *Satellites*, are less than Jove.

ESSAY ON MAN.

This, however, is only pardonable in poetry, and, it may be added, in good poetry.—See *Antipodes* and *Millepedes*.

SATELLITIOUS, sât-têl-lîsh'ûs. a.

Consisting of satellites.

TO SATIATE, sâ'shê-âte. v. a.

To satisfy, to fill; to glut, to pall; to gratify desire; to saturate, to impregnate with as much as can be contained or imbibed.

SATIATE, sâ'shê-âte. a. (91).

Glutted, full to satiety.

SATIETY, sâ-tî'ê-tê. f.

Fulness beyond desire or pleasure, more than enough, state of being palled.

¶ The sound of the second syllable of this word has been grossly mistaken by the generality of speakers; nor is it much to be wondered at. *Ti*, with the accent on it, succeeded by a vowel, is a very uncommon predicament for an English syllable to be under; and therefore it is not surprising that it has been almost universally confounded with an apparently similar, but really different, assemblage of accent, vowels and consonants. So accustomed is the ear to the aspirated sound of *t*, when followed by two vowels, that whenever these appear we are apt to annex the very same sound to that letter, without attending to an essential circumstance in this word, which distinguishes it from every other in the language. There is no English word of exactly the same form with *satiety*, and therefore it cannot, like most other words, be tried by its peers; but analogy, that grand resource of reason, will as clearly determine, in this case, as if the most positive evidence were produced.

In the first place then, the sound commonly given to the second syllable of this word, which is that of the first of *science*, as if written *sa-si-ty*, is never found annexed to the same letters throughout the whole language. *Ti*, when succeeded by two vowels, in every instance but the word in question, sounds exactly like *ti*; thus *sutiate*, *expatiate*, &c. are pronounced as if written *sa-she-ate*, *ex-pa-she-ate*, &c. and not *sa-se-ate*, *ex-pa-se-ate*, &c. and therefore if the *t* must be aspirated in

this word, it ought at least to assume that aspiration which is found among similar assemblages of letters, and instead of *sa-si-ty*, it ought to be founded *sa-shi-ty*: in this mode of pronunciation a greater parity might be pleaded; nor should we introduce a new aspiration to reproach our language with needless irregularity. But if we once cast an eye on those conditions, on which we give an aspirated sound to the dentals, (26), we shall find both these methods of pronouncing this word equally remote from an analogy. In almost every termination where the consonants, *t*, *d*, *c*, and *s*, precede the vowels, *ea*, *ia*, *ie*, *io*, &c. as in *martial*, *soldier*, *suspicion*, *confusion*, *anxious*, *prescience*, &c. the accent is on the syllable immediately before these consonants, and they all assume the aspiration; but in *elephantiasis*, *hendiadys*, *society*, *anxiety*, *science*, &c. the accent is immediately after these consonants, and the *t*, *d*, *c*, and *s*, are pronounced as free from aspiration as the same letters in *tiar*, *diat*, *cium*, *Ision*, &c. the position of the accent makes the whole difference. But if analogy in our own language were silent, the uniform pronunciation of words from the learned languages, where these letters occur, would be sufficient to decide the dispute. Thus in *elephantiasis*, *Miltiades*, *satietas*, &c. the antepenultimate syllable *ti* is always pronounced like the English *noun* *ti*; nor should we dream of giving *ti* the aspirated sound in these words, though there would be exactly the same reason for it as in *satietas*: for, except in very few instances, as we pronounce Latin in the analogy of our own language, no reason can be given why we should pronounce the antepenultimate syllable in *satietas* one way, and that in *satietas* another.

I should have thought my time thrown away in so minute an investigation of the pronunciation of this word if I had not found the best judges disagree about it. That Mr. Sheridan supposed it ought to be pronounced *sa-si-ty*, is evident from his giving this word an instance of the various sounds of *t*, and telling us that here it sounds *s*. Mr. Garrick, whom I consulted on this word, told me, if there were any rules for pronunciation, I was certainly right in mine; but that he and his literary acquaintance pronounced it in the other manner. Dr. Johnson likewise thought I was right, but that the greater number of speakers were against me; and Dr. Lowth told me, he was clearly of my opinion, but that he could get nobody to follow him. I was much flattered to find my sentiments confirmed by so great a judge, and much more flattered when I found my reasons were entirely new to him.

But, notwithstanding the tide of opinion was some years ago so much against me, I have since had the pleasure of finding some of the most judicious philologists on my side. Dr. Kenrick and Mr. Perry mark the word as I have done; and Mr. Nares is of opinion it ought to be so pronounced, though for a reason very different from those I have produced, namely, in order to keep it as distinct as may be from the word *society*. While Mr. Fry frankly owns, it is very difficult to determine the proper pronunciation of this word.

Thus I have ventured to decide where "Doctors disagree," and have been induced to spend so much time on the correction of this word, as the improper pronunciation of it does not, as in most other cases, proceed from an evident caprice of custom, as in *luffy* and *bury*, or from a desire of drawing nearer to the original language, but from an absolute mistake of the principles on which we pronounce our own.

SATIN, sât'tîn. f.

A soft, close, and shining, silk.

SATIRE, sâ'tîr, or sât'îr. f.

A poem in which wickedness or folly are censured.

¶ The first mode of pronouncing this word is the most general and the most agreeable to analogy. The last syllable is, by some refined speakers, pronounced *teer*; but this is contrary to the general rule of pronouncing the unaccented *i* in similar syllables. In *respice*, *servile*, &c. we find it always short, and never like the *i* in *police*, *profile*, &c. where the accent is upon it, and therefore it ought always to be short, as in *sir*, *sir*, &c. or as we hear the *y* in the last syllable of *martyr*: this sound approaches so near to the *u*, that this letter will, perhaps, be the best general mark of its sound.—See Principles, No. 418.

⚡ From the general tendency of the antepenultimate accent to shorten the vowel, and the particular propensity to contract every vowel but *u* before the termination in *ic*, we find those in *ic*, which may be looked upon as abbreviations of the other, preserve the same shortening power with respect to the vowels which precede: and though the word in question might plead the long found of the *e* in the Latin *scenicus*, yet, if this plea were admitted, we ought for the same reasons to alter the found of *e* in *scenicus*; nor should we know where to stop. As a plain analogy, therefore, is formed by *epic*, *topical*, *tropical*, *tonic*, &c. it would be absurd to break in upon it, under pretence of conforming to Latin quantity; as this would disturb our most settled usages, and quite unhinge the language.—See *Drama*.

SCHEDULE, sêd'jùle. f.

A small scroll; a little inventory.

It is but seldom that we prefer French to Latin and Greek derivation; but this word coming to us from the old law French has retained its Gallick pronunciation, regardless of its Greek and its more immediate Latin parent, in which the *ch* must be pronounced like *k*. This word, therefore, to avoid litigation, and provided it does not become a precedent in other cases, may be permitted to retain by prescription what might be justly disputed as a right.

SCHEME, skême. f.

A plan, a combination of various things into one view, design, or purpose; a project, a contrivance, a design; a representation of the aspects of the celestial bodies, any lineal or mathematical diagram.

SCHEMER, skê'mér. f.

A projector, a contriver.

SCHISM, sizm. f.

A separation or division in the church.

The common pronunciation of this word is contrary to every rule for pronouncing words from the learned languages, and ought to be altered. *Ch* in English words, coming from Greek words with *χ*, ought always to be pronounced like *k*; and I believe the word in question is almost the only exception throughout the language. However strange, therefore, *sizm* may sound, it is the only true and analogical pronunciation; and we might as well pronounce *scheme*, *seme*, as *schism*, *fixm*, there being exactly the same reason for both. But when once a false pronunciation is fixed as this is, it requires some daring spirit to begin the reformation; but when once begun, as it has, what seldom happens, truth, novelty, and the appearance of Greek erudition on its side, there is no doubt of its success. Whatever, therefore, may be the fate of its pronunciation, it ought still to retain its spelling. This must be held sacred, or the whole language will be metamorphosed: for the very same reason that induced Dr. Johnson to spell *Sceptick*, *Skeptick*, ought to have made him spell *schism*, *fixm*, and *schedule*, *sedule*.

SCIRRHUS, skír'rús. f. (109).

An indurated gland.

This word is sometimes, but improperly, written *schirrus*, with the *b* in the first syllable instead of the last; and Bailey has given us two aspirations, and spelt it *schirrus*; both of which modes of spelling the word are contrary to the general analogy of orthography; for as the word comes from the Greek *σχίρρος*, the latter *r* only can have the aspiration, as the first of these double letters has always the *spiritus lenis*:

and the *c* in the first syllable, arising from the Greek *κ*, and not the *χ*, no more reason can be given for placing the *b* after it, by spelling it *schirrus*, than there is for spelling *scene* from *σκηνη*, *scene*; or *sceptre* from *σκηπτειρ*, *scheptre*. The most correct Latin orthography confirms this opinion, by spelling the word in question *scirrhus*; and, according to the most settled analogy of our own language, and the constant method of pronouncing words from the Greek and Latin, the *c* ought to be soft before the *i* in this word, and the first syllable should be pronounced like the first of *syrringe*, *Sirius*, &c. Whatever might have been the occasion of the false orthography of this word, its false pronunciation seems fixed beyond recovery: and Dr. Johnson tells us it ought to be written *schirrus*, not merely because it comes from *σχίρρος*, but because *c* in English has before *e* the sound of *s*. Dr. Johnson is the last man I should have suspected of giving this advice. What! because a false orthography has obtained, and a false pronunciation in consequence of it, must both these errors be confirmed by a still grosser departure from analogy? A little reflection on the consequences of so pernicious a practice would, I doubt not, have made Dr. Johnson retract his advice here, as well as in *skiomachy*. While a true orthography remains, there is some hope that a false pronunciation may be reclaimed; but when once the orthography is altered, pronunciation is incorrigible, and we must bow to the tyrant, however false may be his title.—See Principles, No. 350, and the word *Skepick*.

¶ This was the ancient mode of writing and pronouncing this word. Stow, indeed, writes it *shrive*; but it is highly probable that the *i* had exactly the sound of *ie* in *grieve*, *thrive*, &c. and the common people of London to this day have preserved this old pronunciation, though it is wearing away fast among them. That this is the true etymological manner of writing and pronouncing it, we need but attend to the Saxon word from which it is derived to be convinced, *neve*, or *Recve*, signifies a steward; and *Shrieve* is but a contraction of *Shire recve*, or *Shire Steward*. But however just this orthography and pronunciation may be in other respects, it wants the true stamp of polite usage to make it current; it is now grown old and vulgar, and Pope's use of this word,

Now Mayors and *Shrieves* all hush'd and satiate lay—

must only be looked upon as assisting the humour of the scene he describes.

SHRIEVALTY, shrêe'vâl-tê.

The office of a sheriff.

¶ By a caprice, common in language, this compound is not nearly so antiquated as its simple; though it should seem, that if the old root be taken away, and another planted in its stead, the branches ought to spring from the latter, and not the former. But though we seldom hear *Shrieve* for Sheriff, except among the lower classes of people in London, we not unfrequently hear, even among the better sort, *Shrievalty* for *Sheriffalty*; and Junius, in one of his letters to the Duke of Grafton, says, "Your next appearance in office is marked with his election to the '*Shrievalty*.'" Public Advertiser, July 9, 1771. This is certainly an inaccuracy; and such an inaccuracy, in such a writer as Junius, is not a little surprising.

67 A very extraordinary pronunciation of this word prevails in London, and, what is more extraordinary, on the Stage, so different from every other word of the same form as to make it a perfect oddity in the language. This pronunciation approaches to the word *scythe*; and the only difference is, that *scythe* has the flat aspiration as in *this*; and *sigh* the sharp one, as in *this*. It is not easy to conjecture what could be the reason of this departure from analogy, unless it were to give the word a sound, which seems an echo to the sense; and if this intention had gone no farther than the lengthening or shortening of a vowel, it might have been admitted, as in *searful*, *cheerful*, *perce*, *siere*, *grash*, *leisure*, and some others; but pronouncing *gh* like *th* in this word is too palpable a contempt of orthography to pass current without the stamp of the best, the most universal, and permanent usage on its side. The Saxon combination *gh*, according to the general rule, both in the middle and at the end of the word, is silent. It had anciently a guttural pronunciation, which is still retained in great part of Scotland, and in some of the northern parts of England: but every guttural sound has been long since banished from the language; not, however, without some efforts to continue by changing these letters, sometimes into the related guttural consonant *k*, as in *lough*, *bough*, &c. and sometimes into a consonant entirely unrelated to them, as in *laugh*, *cough*, &c. These are the only transmutations of these letters; and these established irregularities are quite sufficient without admitting such as are only candidates for confusion. If it be pleased that *sigh* better expresses the emission of breath in the act of sighing, it may be answered, that nothing can be more erroneous, as the tongue and teeth have nothing to do in this action. Mr. Sheridan has, indeed, to assist this expression, spelt the word *sib*, as an aspiration must necessarily accompany the act of sighing; but (to take no notice that, in this case, the *b* ought to be before the *i*) (397) though such expression may be very proper in oratory, when accompanied by passion, it would be

—nô, mỏe, nờ, nôt; —tủ, tủ, bủ; —ôl; —pở; —tín, THIS.

be as affected to give it this aspiration in ordinary speech, as to pronounce the word *fearful* with a tremor of the voice and a faulting of the tongue; or to utter the word *laugh* with a convulsive motion of the breast and lungs. To these reasons may be added the laws of rhyme; which necessarily exclude this affected pronunciation, and oblige us to give the word its true analogical sound.

Love is a smoke, rais'd with the fume of sighs;
Being purg'd, a fire, sparkling in lovers' eyes.
SHAKESPEARE.

† This word, though uniformly accented on the second syllable by the poets quoted by Johnson, is as uniformly accented on the first by all our lexicographers, and is uniformly so pronounced by the best speakers. Mr. Nares tells us, that Dr. Johnson seems to think, that when this word is used in its literal sense, as

In his sinister hand, instead of ball,
He plac'd a mighty mug of potent ale.

DRYDEN.

It has the accent on the second syllable ; but when in the figurative sense of corrupt, insidious, &c. on the first. This distinction seems to be well founded, both with respect to utility, as well as the best usage.

One who doubts, or pretends to doubt of every thing.

It is with some reluctance I have given this word, as Dr. Johnson has written it, a place in this Dictionary; not because it is not generally pronounced in this manner, but that I think conforming our spelling to a prevailing pronunciation, when this pronunciation is contrary to analogy, is pregnant with the greatest evils that can happen to a language. While the original landmark is standing, the true proprietor may claim his rights; but when once that is effaced, there is no hope of a resumption. How Dr. Johnson could remove this landmark is astonishing. It is one of those unaccountable absurdities that sometimes enter into the characters of men, whose understandings are as much above the rest of the world in some things, as they are below them in others. The truth is, this great man troubled himself little about pronunciation; he seems to have cared as little for etymologies, and even grammatical disquisitions seem not to have been his favourite study; but when words were to be precisely defined, when the boundaries of their significations were to be fixed, and their most delicate shades of meaning to be distinguished and exemplified, this task, so difficult to the strongest mind, seemed to present him with an operation worthy of his powers: in this labour he was, indeed, a literary Hercules, and in this he has toiled with honour to himself, and to the essential improvement of the English language.

To SOLDER, sòl'dùr. v. a.

To unite or fasten with any kind of metallick cement; to mend, to unite any thing broken.

Dr. Johnson seems to favour writing this word without the *l*, as it is sometimes pronounced: but the many examples he has brought where it is spelt with *l*, show sufficiently how much this orthography is established; and I am much mistaken if the best pronunciation does not coincide with it. When other things are equal, Dr. Johnson's rule of deriving words rather from the French than more remote languages, is certainly a good one; but ought not to overturn a settled usage, which has a more original language than the French in its favour.

SOLDER, sòl'dùr. f.

Condensed or embodied smoke.

Notwithstanding I have Mr. Sheridan, Mr. Nares, Dr. Kenrick, W. Johnston, Mr. Perry, and the professors of the Black Art themselves, against me in the pronunciation of this word, I have ventured to prefer the regular pronunciation to the irregular. The adjective *sooty* has its regular found among the correctest speakers, which has induced Mr. Sheridan to mark it so; but nothing can be more absurd than to pronounce the substantive in one manner, and the adjective derived from it by adding *y*, in another. The other Orthoëpists, therefore, who pronounce both these words with the *oo* like *û*, are more consistent than Mr. Sheridan, though, upon the whole, not so right.

♣ Dr. Johnson has received this word without any remark upon the impropriety of its formation. To turn a Latin noun into an English adjective by the addition of *ish*, is false heraldry in language; especially as we have the English word *spleen*, from which it might have been formed with so much more propriety: but to pronounce the *e* long, as Mr. Sheridan has done, is adding absurdity to error.

✶ A most absurd custom has prevailed in pronouncing this adjective, as if it were formed from *springe*, a gin, rhyming with *fringe*, when nothing can be plainer than its formation from *spring*, and that the addition of *y* ought no more to alter the sound of *g* in this word than it does in *stringy*, full of strings. But the absurdity is still increased when this vicious pronunciation is given to the adjective formed from *spring*, a fountain ; this, however, is so contrary both to custom and analogy, that nothing but an oversight in Mr. Sheridan could have prevented his making the distinction. — See Principles, No. 409.

☞ This word had long been a vagabond in conversation, and was not to be found in any of our Dictionaries till it was lately admitted to a place in Entick's, and, from its very frequent use, may now be considered as a denizen of the language. Mr. Colman had, many years ago, made use of it in his Prologue to *The Wife in the Right*, where he says —

No *sulky* critick to the Playhouse drawn,
Whom modern Comedy provokes to yawn.

And this writer's authority alone is a sufficient proof of the propriety and utility of the word. It may, perhaps, be objected, that the word *fullen* is perfectly equivalent, and renders this word useless. Those, however, who consider language philosophically know that there are no words perfectly synonymous, and consequently that there are no useless words. If it be asked what is the difference between these words, I would answer, that fulleness seems to be an habitual sulkiness, and sulkiness a temporary fulleness. The former may be an innate disposition; the latter, a disposition occasioned by recent injury. The one has a malignancy in it threatening danger; the other, an obstinate averisence to pleasure. Thus we are in a fullen mood, and in a sulky fit; Men and Women are said to be fullen, and Children sulky; fulleness may be predicated of inanimate objects, sulkiness only of such as are animated.

No cheerful breeze this *fullen* region knows;
The dreadful East is all the wind that blows.

Pope.

If these distinctions are just, there is good reason for receiving the word in question, and incorporating it into the language, even though it had not been adopted by the respectable writer I have quoted.

† The quantity of *e* in the first syllable of this word, and its relatives *tenet*, *tenor*, and *tenure*, is one of the most puzzling difficulties of pronunciation. How differently this letter is pronounced by different speakers may be gathered from a view of these Orthoepists who have marked the quantity of the vowels.

Sheridan. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Kenrick. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Nares. *tēnable*, — *tēnor*, *tēnure*.

Ash. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Scott. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Entick. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Perry. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

W. Johnston. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

Bailey. *tēnable*, — *tēnor*, *tēnure*.

Buchanan. *tēnable*, — *tēnor*, *tēnure*.

Fry. *tēnable*, *tēnet*, *tēnor*, *tēnure*.

From this survey of our dictionaries we find them uniform only in the word *tenor*, and this uniformity seems founded on the best usage. They are equally divided on the word *tenet*; and if analogy were to decide, it would be clearly in favour of the short vowel, in this word, as well as in *tenor*. They are both Latin words, and both have the vowel short in the original. This, however, is no reason with those who understand the analogy of English pronunciation, (for *tremor*, *minor*, &c. have the first vowel short in Latin) but it sufficiently shows the partiality of the ear to the short vowel in words of this form, as is evident in the word *tenant*. The word *tenable* seems rather derived from the French *tenable* than the Latin *tenes*, and, being of a different form, comes under a different analogy. The termination *able*, though derived from the Latin *abilis*, is frequently annexed to mere English words, as *pleasurable*, *passurable*, &c. and therefore makes no alteration in the accent or quantity of the word to which it is subjoined, (501). But as *tenable* must be considered as a simple in our language, the shortening power of the antepenultimate accent alone seems to determine the quantity of the first syllable of this word, which, like *getable*, *probable*, &c. has the short quantity of the original Latin to plead; a plea which seems to have some weight in words of this termination, where the antepenultimate accent appears to have less influence than in any other class of words whatever. See *Implacable*. The word *tenure* seems inclined to lengthen the first vowel for no other reason than to distinguish itself from *tenor*; and as there are no good reasons for shortening it, this reason seems sufficient to turn the balance in its favour, if it had not a preponderancy of usage on its side.

THAT, thât. pronoun demonstrative.

Not this, but the other; it sometimes serves to save the repetition of a word or words foregoing; opposed to This, as The Other to One; when This and That relate to foregoing words, This is referred to the latter, and That to the former; such as; that which, what; the thing; by way of eminence.

3 When this word is used as a pronoun demonstrative it has always an accent on it, and is heard distinctly rhyming with *bat*, *mat*, &c. Thus in Pope's Essay on Criticism, v. 5.

But of the two, less dang'rous is th' offence
To tire our patience, than mislead our sense.
Some few in *that*, but numbers err in this;
Ten censure wrong, for one who writes amiss.

Here the word *that* is as distinctly pronounced as any other accented word in the language.

THAT, thât. pronoun relative.

Which, relating to an antecedent thing; who, relating to an antecedent person.

3 When this word is a relative pronoun, and is arranged in a sentence with other words, it never can have an accent, and is therefore much less distinctly pronounced than the foregoing word. In this case the *a* goes into that obscure sound it generally has when unaccented, as may be heard in pronouncing it in the following passage from Pope's Essay on Criticism, v. 297.

True wit is nature to advantage dress'd,
What oft was thought, but ne'er so well express'd;

Something, whose truth, convinc'd at fight, we find,

That gives us back the image of our mind.

Here we find the *a* so obscured as to approach nearly to short *u*; and, without any perceptible difference in the sound, the word might be written *this*.

THAT, thât. conjunct.

Because; noting a consequence; noting indication; noting a final end, in *That*, *as* being.

3 What has been observed of the pronunciation of this word, when a relative pronoun, is perfectly applicable to it when a conjunction; in either case it never has the accent, and necessarily goes into an obscure sound like short *u*. Thus in the following passage from Pope's Essay on Criticism:

The vulgar thus through imitation err;
As oft the learn'd, by being singular;
So much they scorn the crowd, *that* if the throng
By chance go right, they purposely go wrong.

Here the conjunction *that* is pronounced with exactly the same degree of obscurity as when a relative pronoun.

The word *that*, by being sometimes a demonstrative pronoun, sometimes a relative, and sometimes a conjunction, may produce a quadruple repetition of the same word, which, though not elegant, is strictly grammatical: a repetition, which is, perhaps, peculiar to the English language. This is humorously exemplified by Mr. Steele in the Spectator, No. 85, in The Just Remembrance of affronted *THAT*, where he brings in this word, declaring how useful it had been to a great orator, who, in a speech to the Lords, had said, "My Lords, with humble submission, *that* that I say, is; *that* *that* that gentleman has advanced is not *that* that he should have proved to your Lordships." In the pronunciation of this passage it is plain, that the word *that*, which is not printed in italics, is pronounced nearly as if written *that*. I am sensible of the delicacy of the obscure sound of this *u*, and therefore do not offer *u* as a perfect equivalent, but as the nearest approach to it; and as the means of pointing out the power of the accent and its importance in ascertaining the sense; for if all these words were pronounced equally distinctly, it is plain the sense would be obscured; and so liable are the relative, the conjunction, and the demonstrative, to be confounded, that some writers have distinguished the latter by printing it in italics. Those who wish to see the most profound and ingenious investigation of the grammatical origin of these words must consult Horne Tooke's *Diversions of Juris*.

TO THAW, thâw. v. a.

To melt what was congealed.

THAW, thâw. f.

Liquification of any thing congealed; warmth, such as liquifies congelation.

THE, THÉ, OR THÈ. article. (466).

The article noting a particular thing; before a vowel E is commonly cut off in verse.

Mr. Sheridan has given us these two modes of pronouncing this word, but has not told us when we are to use one, and when the other. To supply this deficiency, therefore, it may be observed, that when *the* is prefixed to a word beginning with a consonant it has a short sound, little more than the sound of *th* without the *e*; and when it precedes a word beginning with a vowel, the *e* is sounded plainly and distinctly. This difference will be perceptible by comparing *the pen, the band, &c.* with *the oil, the air, &c.*

A very imperfect way of pronouncing this word very frequently arises in verse, where the poet, for the preservation of the metre, cuts off *e* by an apostrophe, and unites the article to the following word. This pronunciation depraves the sound of the verse without necessity, as the syllable formed by *e* is so short as to admit of being sounded with the preceding syllable, so as not to increase the number of syllables to the ear, or to hurt the melody.

'Tis hard to say if greater want of skill
Appear in writing, or in judging ill.
But of the two, less dang'rous is *th'* offence
To tire our patience, than mislead our sense.

POPE.

With vain attempt. Him, the Almighty Power,
Hurl'd headlong flaming from *th'* ethereal sky,
With hideous ruin and combustion, down
To bottomless perdition; there to dwell
In adamantine chains and penal fire,
Who durst defy *th'* Omnipotent to arms.

MILTON.

In these examples we see the particle *the* may either form a distinct syllable, or not. In the third line from Pope the first *the* forms a distinct syllable, but the second is sunk into the succeeding noun. The same may be observed of this particle in the first, second, and sixth, lines of the passage from Milton; but what appears strange is, that though the particle *the* before a vowel, and shortened by an apostrophe, does not augment the number of syllables, it is really pronounced longer than where it forms a syllable, and is not thus shortened by elision. This is apparent in the third line from Pope,

But of the two, less dang'rous is *th'* offence—

The reason why the first *the*, though pronounced shorter than the second, forms a syllable, and the second does not, seems to arise from the coalescence of the vowels, which, though lengthened in sound, may still be pronounced with one impulse of the breath. Thus when a consonant follows the particle *the*, we find two distinct impulses, though the *e* is dropped; but when a vowel follows *the*, the impulse on this particle slides over, as it were, to the consonant of the succeeding syllable, without forming

two distinct impulses, nearly as if a *y* were interposed, and the words were written *th'ynt fence, th'Yomnipotent, &c.*

I would not, however, be supposed to disapprove of the practice of eliding the *e* before a vowel to the eye when the verse requires it: this practice is founded on good sense; and the first line in the passage from Milton shows the necessity of making the distinction, when it is, and when it is not, to be elided: what I wish to reform is, the practice of shortening the *e* to the ear, and thus mincing and impoverishing the sound of the verse without necessity.

THY, thî, or thê. pronoun.

Of thee, belonging to thee.

¶ From what has been already observed of the pronoun *my*, we are naturally led to suppose, that the word *thy*, when not emphatical, ought to follow the same analogy, and be pronounced like *the*, as we frequently hear it on the stage : but if we reflect that reading or reciting is a perfect picture of speaking, we shall be induced to think that, in this particular, the stage is wrong. The second personal pronoun *thy* is not like *my*, the common language of every subject ; it is used only where the subject is either raised above common life, or sunk below it into the mean and familiar. When the subject is elevated above common life, it adopts a language suitable to such an elevation, and the pronunciation of this language ought to be as far removed from the familiar as the language itself. Thus, in prayer, pronouncing *thy* like *the*, even when unemphatical, would be intolerable : while suffering *thy*, when unemphatical, to slide into *the* in the pronunciation of slight and familiar composition, seems to lower the sound to the language, and form a proper distinction between different subjects. If, therefore, it should be asked why, in reciting epic or tragic composition, we ought always to pronounce *thy* rhyming with *high*, while *my*, when unemphatical, sinks into the sound of *me*, it may be answered, because *my* is the common language of every subject, while *thy* is confined to subjects either elevated above common life, or sunk below it into the negligent and familiar. When, therefore, the language is elevated, the uncommonness of the word *thy*, and its full sound rhyming with *high*, is suitable to the dignity of the subject ; but the slender sound like *the* gives it a familiarity only suitable to the language of endearment or negligence, and for this very reason is unfit for the dignity of epic or tragic composition. Thus in the following passages from Milton :

Say first, for heav'n hides nothing from thy view,

Nor the deep tract of hell—

PARAD. LOST. b. i.

O thou, that with surpassing glory crown'd,
Look'st from thy sole dominion, like the God

Of this new world ; at whose sight all the stars
Hide their diminish'd heads ; to thee I call,
But with no friendly voice, and add thy name,
O sun, to tell thee how I hate thy beams.

PARAD. LOST. b. 4.

Here pronouncing the pronoun *thy*, like the word *the*, would familiarize and debase the language to prose. The same may be observed of the following passage from the tragedy of Cato :

Now, Cæsar, let thy troops beset our gates,
And bar each avenue ; thy gathering fleets
O'erspread the sea, and stop up ev'ry port ;
Cato shall open to himself a passage,
And mock thy hopes—

Here the impropriety of pronouncing *thy* like *the* is palpable : nor would it be much more excusable in the following speech of Portius, in the first scene of the same tragedy ;

Thou see'st not that thy brother is thy rival ;
But I must hide it, for I know thy temper.
Now, Marcus, now thy virtue's on the proof ;
Put forth thy utmost strength, work ev'ry nerve,

And call up all thy father in thy soul ;—

As this pronoun is generally pronounced on the stage, it would be difficult for the ear to distinguish whether the words are,

Thou know'st not that *thy* brother is *thy* rival—

or,

Thou know'st not that *the* brother is *the* rival,

&c.

And this may be one reason why the slender pronunciation of *thy* should be avoided as much as possible.

Perhaps it will be urged, that though these passages require *thy* to be pronounced so as to rhyme with *high*, there are other instances in tragedy where the subject is low and familiar, which would be better pronounced by founding *thy* like *the* : to which it may be answered, that when tragedy lowers her voice, and descends into the mean and familiar, as is frequently the case in the tragedies of Shakespeare, the slender pronunciation of *thy* may be adopted, because, though the piece may have the name of a tragedy, the scene may be really comedy. The only rule, therefore, that can be given, is a very indefinite one ; namely, that *thy* ought always to be pronounced so as to rhyme with *high* when the subject is raised, and the personage dignified ; but when the subject is familiar, and the person we address, without dignity or importance, if *thy* be the personal pronoun made use of, it ought to be pronounced like *the* : thus, if in a familiar way, we say to a friend, Give me *thy* hand, we never hear the pronoun *thy* sounded so as rhyme with *high* ; and it is always pronounced like *the* when speaking to a child ; we say, Mind *thy* book, Hold up *thy* head, or Take off *thy* hat. The phraseology we call *thee* and *thou* is not in so common use with us as the *tutoyant* among the French ; but as the second personal pronoun *thou*, and its possessive *thy* is indispensable in composition, it seems of some importance to pronounce them properly.

THYSELF, thî-sêlf. pronoun reciprocal. It is commonly used in the oblique cases, or following the verb ; in poetical or solemn language it is sometimes used in the nominative.

TIRE, têr. f. — See *Tier*.

Rank, row.

As this word, when it signifies a rank or row, is universally pronounced like *tear*, a drop from the eye, it ought always to be written *tier*; which would prevent a gross irregularity. This is the more to be withheld, not only as its derivation from the old French *tiere* seems to require this spelling, but to distinguish it from the word *tire*, a head-dress; which, probably, being a corruption either of the word *tiara*, an ornament for the head, or of the English word *attire*, ought to be written and pronounced like the word *tire*, to fatigue. Dr. Kenrick is the only Orthoëpist who has attended to this distinction.

it notes the intention, as she raised a war To call me back; after an adjective it notes its object, as born To beg; noting futurity, as, we are still to seek; To and again, To and fro, backward and forward.

What has been observed of the word *the*, respecting the length of the *e* before a vowel, and its shortness before a consonant, is perfectly applicable to the preposition, and the adverb *to*. This will be palpable in the pronunciation of the verbs *to begin* and *to end*. It may be observed too, that this word, though deprived of its *o* to the eye, always preserves it to the ear. Whether we see it elided, as in Pope's Essay on Man:

Say what the use were finer optics giv'n,
T' inspect a mite, not comprehend the heav'n?
Or preserved with an apostrophe after it, as in Milton:

For still they knew, and ought to' have still re-
member'd,
The high injunction not to take that fruit,
Whoever tempted.

In both these instances the word *so* ought to be pronounced in exactly the same manner; that is, like the number *two*.

TRAGEDIAN, trâ-jê'dê-ân. f.

A writer of tragedy; an actor of tragedy.

In this word we have a striking instance of the aversion of the language to what may

be called a Tautophony, or a successive repetition of the same sound. We find no repugnance at aspirating the *d* in *Comedian*, and pronouncing it as if written *Co-me-je an*; but there is no ear that would not be hurt at pronouncing *Tragedian*; as if written *Trâ-je-an*. The reason is evident. The *g* that immediately precedes being exactly the same sound as *th*, when aspirated into *je*, the ear will not suffer the repetition, and therefore dispenses with the laws of aspiration, rather than offend against those of harmony. To the same reason we must attribute giving the sound of *zh* to the double *s* in *Abdission*, and to the *ti* in *Transition*. The same aversion to the repetition of similar sounds makes us drop the first aspiration in *Diphthong*, *Triphthong*, *Optibalm*, &c.—See *Optibalmick*.

I prefer the first mode of pronouncing
this word to the second, though, at first
sight, it appears not so regular. My reason
is, the aversion our language has to a re-
petition of exactly similar sounds. The *sia*
the prefix *trans* is always sharp and hissing,
and that inclines us to vary the succeeding
aspiration, by giving it the flat instead of
the sharp sound. This is the best reason I
can give for the very prevailing custom of
pronouncing this termination in this word
contrary to analogy. When I asked Mr.
Garrick to pronounce this word, he, without
premeditation, gave it in the first manner;
but when I desired him to repeat his pro-
nunciation, he gave it in the second; and I
think it may be classed among those varieties
where we shall not be much applauded for
being right, nor blamed for being wrong.—
See *Tragedian*, *Ophthalmick*, &c.

I have made the first syllable of this word short, as I am convinced it is agreeable to the genius of English pronunciation to shorten every antepenultimate vowel except *e*, when not followed by a diphthong. This is evident in *tripartite*, *triplicate*, and a thousand other words, notwithstanding the specific meaning of the first syllable, which, in words of two syllables, when the accent is on the first, and in polysyllables when the accent is on the second, ought, according to analogy, to have the *i* long. See Principles, No. 530, 535.

The first mode of pronouncing this word is that which is adopted by Mr. Sheridan, Dr. Kenrick, Bailey, Buchanan, and Perry; and the second, by Dr. Ash, Mr. Nares, Mr. Scott, Entick, and Fry. I do not hesitate to pronounce the former the most agreeable to English analogy; not only because the prefixes, *bi* and *tri*, when no other law forbids, ought to be made as distinct as possible, but because all words of two syllables with the accent on the first, and having one consonant between two vowels, ought to have the vowel in the first syllable long. This is the genuine English analogy; the mode in which we pronounce all Latin words of this form, let the quantity be what it will; and the mode in which we should have pronounced all English words of this form, if an affectation of Latinity had not often prevented us. For the same reason, therefore, that we pronounced *biped*, *trigon*, and *trident*, with the *i* long, we ought to adopt the first pronunciation of the word in question, and not the second.—See *Drama*.

The authority or solemnity of a tutor.

TUTORESS,

—nô, môme, nôr, nôt; —tûbe, tûb, bûll; —ôil; —pôund; —tbin, this.

TUTORESS, or TUTRESS, tû'tôr-ês, or tû'três. f.
Directress, instructress, governess.

¶ The most general way of writing this word is the former, but the most analogical is certainly the latter; the termination *or* has a masculine import, and therefore ought to be dropped in the feminine, as it is in *adress, traitress, mistress, &c.*

TUTTY, tû'ttê. f.

A sublimate of zinc or calamine collected in the furnace.

TUZ, tûz. f.

A lock or tuft of hair. Not in use.

To pinch, to squeeze betwixt the fingers.

To TWEEDLE, tweé'dl. v. a. (246).

To handle lightly.

¶ This word seems formed from the sound of certain soft lengthened notes upon the fiddle, and therefore very properly used by Addison in the sense of *weedle*, but with additional propriety and humour; where he says, "A fiddler had brought in with him a 'body of lusty young fellows, whom he 'had tweedled into the service." The farcical couplet,

'Tis strange there should such difference be

'Twixt *tweedle dum* and *tweedle dee*—
seems to confirm the opinion I have ventured to give of the original formation of this whimsical word.

v. n. To prophesy, to practise prediction.

VAULT, vâwlt, or vâwt. f.

A continued arch; a cellar; a cave, a cavern; a repository for the dead.

Mr. Sheridan leaves out the *l* in this word, in the word *vault*, to leap, and in their compounds; but my ear grossly deceives me if this *l* is ever suppressed, except in the sense of a cellar for wine, &c. In this I am supported by all our Orthoëpists, from whom the sounds of the letter can be gathered; and Mr. Scott and Mr. Perry preserve the *l* in every word of this form. This, I think, is not agreeable to general usage with respect to the exception I have given; though I think it might be dispensed with for the sake of uniformity; but for this we must wait the decision of the discerning public.

TO VAULT, vâwlt. v. a.

To arch, to shape as a vault; to cover with an arch.

TO VAULT, vâwlt. v. n.

VENENOUS, vên'ûm-ûs. a.
Poisonous.

TO VENENATE, vên'ê-nâte. v. a.
To poison, to infect with poison.

37 I have given this word the antepenultimate accent, contrary to the example of Dr. Johnson, Dr. Ash, and Mr. Sheridan, who accent it on the second syllable, because the penultimate is long in the Latin *veneno*. But as the Latin quantity has no influence in the accentuation of *concatenule*, *importunate*, and a thousand others, it ought to have none on

this word, which, by having the accent on the first syllable, conforms to the most general rule in English pronunciation.—See Principles, No. 535.

VERDIGRIS, vẻr'ẻdẻ-grẻẻs. f. (112).

The rust of brass.

I have in this word corrected Dr. Johnson by comparing him with himself. If *Ambergis* is spelt without the final *e*, this letter certainly ought not to be in *verdigris*,

as both words derive their last syllable from exactly the same origin.

VERDITURE, vẻr'ẻdẻ-tửr. f.

VERMICELLI, vẻrẻ-mẻ-tẻhẻl'ẻ. f.

A paste rolled and broken in the form of worms.

This word is perfectly Italian; and may be pardoned its irregularity, because, like several other foreign words, being confined to a small circle, they are like so many excrescences on the surface of the language, which disfigure without corrupting it. See Principles, No. 388.

VERMICULAR, vẻrẻ-mẻk'ẻ'ẻ-lẻrẻ. a.

VERTEBRE, vẻrẻ'ẻ-tẻ-bửrẻ. f.

A joint of the back.

This word is perfectly anglicised, and therefore ought to have its last syllable pronounced according to English analogy, like *Centre, Sceptre, Mũre*, &c. See Principles, No. 416. There is a common mistake in the use of the Latin word from which this is derived, which it may not be improper to rectify. *Vertebra* is not unfrequently used to signify the whole collection of joints which form the back bone, while in reality it means only one of those joints; the plural is *Vertebrae*, and this ought to be used for the whole spine, if we denominate it by a Latin word; but if we speak English, it ought to be *Vertebres*, and pronounced as if written *Verticurs*.

VICTUAL, vik'tl. } f.
VICTUALS, vît'tlz. }

Provision of food, stores for the support of life, meat.

This corruption, like most others, has terminated in the generation of a new word; for no solemnity will allow of pronouncing this word as it is written. *Vituals* appeared to Swift so contrary to the real sound, that in some of his manuscript remarks which I have seen, he spells the word *Vittles*. This compliance with sound, however, is full of mischief to language, and ought not to be indulged. See *Skeptick*, and *Principles*, No. 350.

¶ In this tribe of words we find a manifest difference between the simple *villain* and the compounds *villany*, *villanous*, &c. Dr. John-

son tells us, these words are derived from the French *vikain*, or the low Latin *villanus*. Sometimes we find the word in question written *villany*; and it is certain, that it either ought to be written so from the old French *villonnais*, with double *l* and double *n*, or from the modern French with these letters single: or if we must form it from our own word *villain*, (which we seldom choose to do if we can discover the most remote relation to other languages); in this case, I say, we ought, according to our own analogy, to spell the word *villainy*.

Wind, to decay ; to take or have the Wind,
to have the upper hand.

[?] These two modes of pronunciation have
been long contending for superiority, till at
last the former seems to have gained a com-
plete victory, except in the territories of
rhyme. Here the poets claim a privilege,
and readers seem willing to grant it them,
by pronouncing this word when it ends a
verse, so as to rhyme with the word it is
coupled with—

For as in bodies, thus in soul we find,

What wants in blood and spirits fill'd with *wind*.

But in prose this regular and analogical pro-
nunciation borders on the antiquated and
pedantic.

What could have been the cause of this devi-
ation from the general rule in this word and
gold it is not easy to guess ; they were both
bound to their true sound in the fetters of
rhyme ; but these fetters, which are sup-
posed to alter the pronunciation of some
words by linking dissimilar sounds, have not
been strong enough to restrain these from a
capricious irregularity. It is not improba-
ble that the first deviation began in the com-
pounds, such as *Goldsmith*, *Goldfinch*, *Wind-
mill*, *Windward*, &c. (as it is a prevailing
idiom of pronunciation to shorten simples in
their compounds, see Principles, No. 515,
and the word *Knowledge*) and these at last
corrupted the simples. But whatever may
have been the cause, the effect is now be-
come so general, that reducing them to their
true sound seems almost impracticable. Mr.
Sheridan tells us, that Swift used to jeer those
who pronounced *wind* with the *i* short, by
saying, " I have a great *wínd* to *fínd* why
" you pronounce it *wínd*." A very illibe-
ral critick retorted this upon Mr. Sheridan,
by saying, " If I may be so *bold*, I should
" be glad to be *told* why you pronounce it
" *gold*." The truth is, every child knows
how these words ought to be pronounced
according to analogy ; but it requires some
judgment

(546). — Fâte, fâr, fâll, fât; — mē, mēt; — piac, pîn; —

judgment, and an extensive acquaintance with polite and literary circles, to know which is the most current pronunciation. Where analogy is not so evident, and yet as real as in these words, it is some credit to a speaker to depart a little from custom in favour of analogy; but where every one knows as well as ourselves what ought to be the pronunciation, and yet where every one pronounces in opposition to it, we shall get nothing but contempt in departing from the general voice. With respect to the word in question, my observation fails me, if *wind*, as a single word, is not more fixed in the sound of short *i* than *gold* in the sound of *oo*; the true sound of this last word seems not quite irrecoverable, except in the compound *goldsmith*; but the compounds of *wind*, such as *windy*, *windmill*, *windward*, &c. must, in my opinion, be given up. Nor till some superior spirit, uniting the politeness of a Chesterfield with the genius of a Swift, descends to vindicate the rights of an injured word, do I think that *wind* will, in prose and familiar language, ever be a fashionable pronunciation. The language of Scripture seems to have native dignity and solemnity sufficient to authorise the long sound, but no other. — See *Gold*.

To WRAP, ràp. v. a.

To roll together, to complicate; to involve; to cover with something rolled or thrown round; to comprise, to contain; to Wrap up, to involve totally; to transport, to put in ecstasy.

⚡ This word is often pronounced *rop*, rhyming with *top*, even by speakers much above the vulgar. They have a confused idea, that a preceding *w* makes the *a* broad, and do not attend to the intervening *r*, which bars the power of the *w*, and necessarily preserves the *a* in its short Italian sound.

WRAPPER, ràp'pùr. f.

One that wraps; that in which any thing is wrapped.

WRATH, ròth, or ràth. f.

Anger, fury, rage.

⚡ The first pronunciation of this word is by far the more usual, but the last is more analogical. The *w* has no power over the *a*, for the same reason as in the preceding word. A want of attending to this, and, perhaps, confounding this word with the obsolete adjective *wroth*, are the reasons of the present currency of this erroneous pronunciation. All our Orthoëpists, from whom the sound of the vowels can be gathered, have adopted it, except Mr. Perry; and in a case where analogy is so clear, his authority ought, in my opinion, to outweigh them all.

WRATHFUL, ròth'fùl, or ràth'fùl. a.

Angry, furious, raging.

WRATHFULLY, ròth'fùl-è, or ràth'fùl-lè. ad.

WREAKFUL, rèke'fùl. a.

Revengeful, angry.

WREATH, rèth, or rèth. f. (467).

Any thing curled or twisted; a garland, a chaplet.

⚡ I have placed what I think the least usual mode of pronouncing this word first, because I think it so much more agreeable to analogy than the second. Nouns and verbs throughout the whole language seem to be distinguished by the sharp or flat sound of the final hissing consonant.—See Principles, No. 437, 467, 499.

To WREATH, rèthe. v. a. preterit

Wreathed, part. pass. Wreathed, Wreathen.

To curl, to twist, to convolve; to interweave, to entwine one in another; to encircle as a garland; to encircle as with a garland.

To WRY, rî. v. n.

To be contorted and writhed, to deviate from the right direction.

X.

X, Says Johnson, is a letter which, though found in Saxon words, begins no word in the English language. But it may be observed, that in words from the Greek, where it is initial, it is always pronounced like Z. For the true pronunciation of this letter, when medial or final in English words, see Principles, No. 476.

XEROCOLLYRIUM, zê-rô-kôl-lîr'xê-ûm. f.

A dry plaster for sore eyes.

YCLAD, ê-klâd'. part. for Clad.

Clothed.

YCLEPED, ê-klêpt'. Called, termed, named.

YE, yê. The nominative plural of Thôu.

YEA, yê. ad. (227). Yes.

¶ Mr. Sheridan, Mr. Scott, W. Johnson, and Mr. Fry, pronounce this word so as to rhyme with *may*, *pay*, &c. But Dr. Kenrick and Mr. Perry, pronounce it like the pronoun *ye*. Though numbers are against me, I do not hesitate to pronounce the latter mode the best ; first, as it is more agreeable to the general sound of the diphthong ; next, as it is more related to its familiar substitute *yes* ; and lastly, unless my memory greatly fails me, because it is always so pronounced when contrasted with *no* ; as in that precept of the Gospel, " Let your communication be *yes*, *yea*, and *no*, *noy*."

To YEAN, yêne. v. n. (227).

To bring young. Used of sheep.

YEANLING, yêne'îng. f.

The young of sheep.

YEAR, yêre. f. (227).

To feel great internal uneasiness.

To YEARN, yêrn. v. a.

To grieve, to vex.

YELK, yêlk. f.

The yellow part of the egg.

¶ It is commonly pronounced, says Johnson, and often written *Yolk*. To which we may add, that when the word is so written, the *l* is silent, and the word pronounced *yoke*. But Johnson seems justly to have preferred the former mode of writing

—nô, mōve, nôr, nô; —tûbe, tûb, bûll; —ôil; —pôund; —thin, THIS.

writing and pronouncing this word as more agreeable both to etymology and the best usage.

TO YELL, yêll. v. n.

To cry out with horror and agony.

YELL, yêll. f.

A cry of horror.

YELLOW, yêl'lo. a.

Being of a bright glaring colour, as gold.

Mr. Sheridan, Mr. Nares, Mr. Scott, and Mr. Fry, pronounce this word as if written *yellow*, rhyming with *tallow*. But Dr. Kenrick, W. Johnston, and Mr. Perry, preserve the *e* in its pure sound, and rhyme the word with *mellow*. The latter mode is, in my opinion, clearly the best, both as more agreeable to analogy, and the best usage; for I am much deceived if the former pronunciation does not border closely on the vulgar.

YELLOWBOY, yêl'lo-bôe. f.

A gold coin.

YELLOWHAMMER, yêl'lo-hâm-mâr. f.

A bird.

YELLOWISH, yêl'lo-îsh. a.

TO YELP, yêlp. v. n.

To bark as a beagle hound after his prey.

YEOMAN, yô'mân. f. (260).

A man of a small estate in land, a farmer, a gentleman farmer; it seems to have been anciently a kind of ceremonious title given to soldiers, whence we have Yeomen of the guard; it was probably a freeholder not advanced to the rank of a gentleman.

This word is pronounced by Mr. Sheridan, Mr. Scott, and Buchanan, with the diphthong like *e* short, as if written *yëmman*, and by Dr. Kenrick as if written *yëmman*. But W. Johnston, Mr. Perry, Entick, and Fry, pronounce the *o* like long open *o*, as if written *yôman*. This last appears to me to be the most received pronunciation. It is that which we constantly hear applied to the King's body guard, and it is that which has always been the pronunciation on the Stage; an authority which, in this case, may not, perhaps, improperly be called the best echo of the public voice.

YEOMANRY, yô'mân-rê. f. (260).

The collective body of yeomen.

TO YERK, yêrk. v. a.

To throw out or move with a spring.

YERK, yêrk. f.

A quick motion.

TO YERN, yêrn. v. a.

See YEARN.

YES, yis. ad. (101).

A term of affirmation; the affirmative particle opposed to No.

This word is worn into a somewhat slenderer sound than what is authorized by the orthography; but *e* and *i* are frequently interchangeable, and few changes can be better established than this.—See *Been* and *De-spatch*.

YEST, yêst. f.

The foam, spume, or flower of beer in fermentation, barm; the spume on a troubled sea.

YESTY, yês'tê. a.

Frothy, spumy.

YESTERDAY, yês'têr-dâ. f.

The day last past, the next day before today.

YESTERNIGHT, yês'têr-nite. f.

The night before this night.

YET, yêt. conjunct.

Nevertheless, notwithstanding, however.

The *e* in this word is frequently changed by incorrect speakers into *i*; but though this change is agreeable to the best and most established usage in the word *yes*; in *yet* it is the mark of incorrectness and vulgarity.

YET, yêt. ad.

Beside, over and above; still, the state still remaining the same; once again; at this time, so soon, hitherto, with a negative before it; at least; it notes increase or extension of the sense of the words to which it is joined; still, in a now degree; even, after all; hitherto.

YEW, yôe. f.

A tree of tough wood.

TO YIELD, yêêl. v. a. (275).

To produce, to give in return for cultivation or labour; to produce in general; to afford, to exhibit; to give as claimed of right; to allow, to permit; to emit, to expire; to resign, to give up; to surrender.

TO YIELD, yêêl. v. n.

To give up the conquest, to submit; to comply with any person; to comply with things; to concede, to admit, to allow, not to deny; to give place as inferior in excellence or any other quality.

YIELDER, yêêl'dêr. f.

One who yields.

YOKE, yôke. f.

The bandage placed on the neck of draught oxen; a mark of servitude, slavery; a chain, a link, a bond; a couple, two, a pair.

TO YOKE, yôke. v. a.

To bind by a yoke or carriage; to join or couple with another; to enslave, to subdue; to restrain, to confine.

YOKE-ELM, yôke'êlm. f.

A tree.

YOKEFELLOW, yôke'fêl-lo. } f.

YOKEMATE, yôke'mâte. }

Companion in labour; mate, fellow.

YOLK, yôke. f.

The yellow part of an egg. See YELK.

YON, yôn. }

YONDER, yôn'dêr. } a.

Being at a distance within view.

There is a vulgar pronunciation of this word in London, as if written *yander*. This cannot be too carefully avoided.

YORE, yôre. ad.

Long; of old time, long ago.

YOU, yôo. pron. (315).

The oblique case of *Ye*; it is used in the nominative; it is the ceremonial word for the second person singular, and is always used, except in solemn language.

YOUNG, yûng. a.

Being in the first part of life, not old; ignorant, weak; it is sometimes applied to vegetable life.

YOUNG, yûng. f. (314).

The offspring of animals collectively.

YOUNGISH, yûng'îsh. a.

Somewhat young.

YOUNGLING, yûng'îng. f.

YOUNGLY, yûng'lê. ad.

Early in life; ignorantly, weakly.

YOUNGSTER, yûng'rêr. } f.

YOUNKER, yûnk'ôr. }

Ludicrously, a young person.

YOUR, yôor. pronoun.

Belonging to you; Yours is used when the substantive goes before or is understood, as this is Your book, this book is Yours.

This word is nearly under the same predicament as the pronoun *My*. When the emphasis is upon this word, it is always pronounced full and open like the noun *Ewer*; as, "The moment I had read Your letter I sat down to write Mine;" but when it is not emphatical it generally sinks into *yer*, exactly like the last syllable of *Law-yer*; as, "I had just answered yer first letter as yer last arrived." Here if we were to say, "I had just answered your first letter as your last arrived," with *your* sounded full and open like *Ewer*, as in the former sentence, every delicate ear would be offended. This obscure sound of the possessive pronoun *your* always takes place when it is used to signify any species of persons or things in an indeterminate sense. Thus Addison, speaking of those metaphors which professional men most commonly fall into, says, "Your men of business usually have recourse to such influences as are too mean and familiar.—Spec. No. 431.

YOURSELF, yôr-sêlf. f.

You, even you; ye, not others.

The pronunciation of *your* in this word is a confirmation of the observations on the foregoing word.

YOUTH, yôth. f.

The part of life succeeding to childhood and adolescence; a young man; young men.

YOUTHFUL, yôth'fûl. a.

Young; suitable to the first part of life; vigorous as in youth.

YOUTHFULLY, yôth'fûl-ê. ad.

In a youthful manner.

YOUTHY, yôth'ê. a.

Young, youthful.
